Hydrotreatment catalyst activity enhancement. Quarterly report No. 7, February 1, 1985-April 30, 1985, 10:29636 (R;US)

Phase behavior of coal fluids: data for correlation development. Reporting period: November 1, 1984-April 30, 1985, 10:29635 (R;US)

Oklahoma Univ., Norman (USA)

[Emulsion spectrometer experiment for B and C particles], 10:32021 (R;US)

Salt deposits in the United States and regional geologic characteristics important for storage of radioactive waste, 10:29991 (R;US)

Oregon Appropriate Technology, Inc., Eugene (USA)

Gearhart fire station passive solar retrofit, City of Gearhart, 10:30370 (R;US)

Oregon Inst. of Tech., Klamath Falls (USA). Geo-Heat Center

Feasibility of geothermal applications for greenhousing and space heating on the Pine Ridge Indian Reservation, South Dakota, 10:30572 (R;US)

Haystack Resources Company: greenhouses, near Boulder, Colorado, 10:30606 (R;US)

Oregon State Univ., Corvallis (USA). Dept. of Mechanical Engineering

Development of an analytical model and code for the flapping response of a Hawte rotor blade, 10:30633 (R;US)

Oregon Univ., Eugene (USA)

Should we expect large polarization effects at high energies, 10:32592 (R;US)

Theory of electron-impact atomic ionization cross sections. Annual summary report, 1 July 1984-30 June 1985, 10:32475 (R;US)

Oregon Univ., Eugene (USA). Inst. of Theoretical Science

Hierarchies in grand unification, 10:32639 (R;US)

Orkand Corp., Silver Spring, MD (USA)

Feasibility analysis for data base design, 10:29631 (R;US)

Osaka Gas Co. Ltd. (Japan)

Method of wet oxidation treatment of waste water, 10:32191 (TG;GB)

Osnabrueck Univ. (Germany, F.R.). Fachbereich Biologie/Chemie

Energy storage by means of chemical reactions, 10:31051 (R;DE;In German)

Oxford Univ. (UK). Dept. of Engineering Science

Effect of cooling rate from the γ-phase on the strain-rate sensitivity of a uranium 2 sup(w)/o molybdenum alloy, 10:31475 (R;GB)

Effect of strain rate and temperature on the tensile behaviour of uranium - 2sup(w)/o molybdenum, 10:31474 (R;GB)

P

Pacifica Technology, Del Mar, CA (USA)

Material-response models and ground-motion calculations for high-explosive tests in G-Tunnel tuff. Technical report, 10:32080 (R;US)

Pacific Northwest Labs., Richland, WA (USA)

Analysis of drainage and consolidation at typical uranium mill tailings sites, 10:29954 (R;US)

Beta response of selected instruments, 10:32033 (R;US)

Burning and clipping effects on bluebunch wheatgrass productivity. Revision, 10:32293 (R;US)

Design features for enhancing international safeguards of AFR dry storage for spent LWR fuel, 10:30043 (R;US)

ELCAP instrumentation, 10:32062 (R;US)

Electrical and thermal transport property studies of high-temperature thermoelectric materials. Interim report, 15 August 1983-15 May 1984, 10:31523 (R;US)

ESF collection effectiveness, a study in fine particle dynamics, 10:31033 (R;US)

Feasibility of dismantling the biological shield by the blast-hole technique. Final report, 10:31038 (TG;US)

GT2F: a computer code for estimating light water reactor fuel rod failures, 10:31022 (R;US)

Guidelines for selecting codes for ground-water transport modeling of low-level waste burial sites. Executive summary, 10:30016 (R;US)

Guidelines for selecting codes for ground-water transport modeling of low-level waste burial sites. Volume 1. Guideline approach, 10:29961 (R;US)

Hanford ground-water data base management guide and user's manual, 10:29963 (R;US)

Harvester ant bioassay for assessing hazardous chemical waste sites, 10:32352 (R;US)

Irradiation of Northwest agricultural products, 10:30053 (R;US)

Long-terms goals for solar thermal technology, 10:30349 (R;US)

Managing data analysis through save-states, 10:33099 (R;US)

Nuclear Waste Treatment Program. Annual report for FY 1984, 10:29962 (R;US)

Operational and long-term performance assessment for Hanford Grout, 10:29964 (R;US)

Organic solvent alteration of hydraulic properties of sedimentary rocks of low permeability: a review, 10:32172 (R;US)

Photovoltaic industry progress through 1984, 10:30337 (R;US)
Project on Restaurant Energy Performance: end-use monitoring and analysis, 10:31191 (R;US)
Radiation exposures for DOE and DOE contractor employees - 1983. Sixteenth annual report, 10:32297 (R;US)
Reactor safety research programs. Quarterly report, October-December 1984. Volume 4, 10:31011 (R;US)
Selection and testing of rock for armoring uranium tailings impoundments, 10:29950 (R;US)
Separation of gas mixtures by supported complexes, 10:31671 (R;US)
Status of rod consolidation, 10:29899 (R;US)
Technical bases and user's manual for the prototype of a Suppression Pool Aerosol Removal Code (SPARC), 10:31008 (R;US)
Technology, safety and costs of decommissioning reference nuclear fuel cycle and non-fuel cycle facilities following postulated accidents. Main report. Volume 1, 10:31710 (R;US)
Technology, safety and costs of decommissioning reference nuclear fuel cycle and non-fuel cycle facilities following postulated accidents. Appendices. Volume 2, 10:31711 (R;US)
Uranium mill tailings neutralization: contaminant complexation and tailings leaching studies, 10:29951 (R;US)
User manual for Conservation Project Data Base, 10:31370 (R;US)
Vitrification of high-level radioactive waste in a pilot-scale liquid-fed ceramic melter, 10:29965 (R;US)

Paris-7 Univ., 75 (France)
Characterization of defects in InSe. Application to the photovoltaic conversion, 10:30303 (R;FR;In French)

Excitation of $\Delta L=0$ spin-flip transitions in the $N=28$ isotones by 201 MeV proton inelastic scattering, 10:32703 (R;FR)
Fusion and competing reactions in central collisions at large excitation energies, 10:32780 (R;FR)
Superconducting coils electromagnet of the Orsay IPN project, 10:31838 (R;FR;In French)
Thomas-Fermi equation of state of hot dense matter, 10:32423 (R;FR)

Paris-13 Univ., 93 - Villetaneuse (France)
Theoretical and numerical study of a heat storage model using fusion heat, 10:30563 (R;FR;In French)

Pau Univ., 64 (France)
Study of phase transitions of macroscopic and dispersed salt hydrates. Application to low temperature heat storage, 10:31049 (R;FR;In French)

Pechan (E.H.) and Associates, Inc., Springfield, VA (USA)
Forecasting future industrial SO_2 and NO/sub x/ emissions. Revised, 10:31118 (R;US)

Pennsylvania State Univ., University Park (USA)
Aliphatic components of coal. Final report, September 1, 1978-August 31, 1980, 10:29648 (R;US)
Gasification of disordered carbons (chars). Final report, 10:29618 (R;US)
X-ray activity in pre-main sequence stars, 10:32430 (R;US)

Pennsylvania State Univ., University Park (USA). Center for Air Environment Studies
Acoustic agglomeration of power plant fly ash. Fourth quarterly report, June 8-September 7, 1984, 10:29669 (R;US)

Pennsylvania State Univ., University Park (USA). Dept. of Agronomy
Anaerobic microbial transformations in subsurface environments, 10:32348 (R;US)

Pennsylvania State Univ., University Park (USA). Dept. of Chemical Engineering
Characterization of catalysts with metal-support effects and of the species adsorbed on their surfaces. Progress report, September 1, 1984-August 30, 1985, 10:31656 (R;US)

Pennsylvania State Univ., University Park (USA). Dept. of Chemistry
Mechanistic studies of carbon monoxide reduction. Final technical report, 10:30065 (R;US)

Pennsylvania State Univ., University Park (USA). Materials Research Lab.
Slag cement - low-level waste forms at the Savannah River Plant, 10:29922 (R;US)

Pennsylvania State Univ., University Park (USA). Noise Control Lab.
Acoustic agglomeration of power plant fly ash. Fifth quarterly report, September 8-December 7, 1984, 10:29670 (R;US)

Pennsylvania State Univ., University Park (USA). Office of Remote Sensing of Earth Resources
Remote sensing of hydrologic transport processes using spot simulation data. Final report, August 1, 1983-April 30, 1985, 10:32385 (R;US)

Pittsburgh Univ., PA (USA)
Atomic processes in electron beam channels. Final report, November 13, 1981-October 30, 1983, 10:32508 (R;US)

Pittsburgh Univ., PA (USA). Dept. of Chemical and Petroleum Engineering
Promotion effects on the synthesis of higher alcohols. 11th quarterly report, January-March 1985, 10:30068 (R;US)

Pittsburgh Univ., PA (USA). Dept. of Metallurgical and Materials Engineering
High temperature corrosion of ceramics. Progress report, June 15, 1984-June 14, 1985, 10:31528 (R;US)

Pontificia Univ. Catolica do Rio de Janeiro (Brazil). Dept. de Fisica
Breakdown of the 1/N expansion in the continuum limit of strong coupling lattice QCD, 10:32650 (R;BR)
Color centers in KCN: ferro-elastic alignment and free optical absorption of phonons, 10:31566 (R;BR;In Portuguese)
Critical phase for the antiferromagnetic Z(5) model on a square lattice, 10:32838 (R;BR)
Dilute Potts chain in a magnetic field, 10:32834 (R;BR)
Direct Coulomb ionization of the 1s σ molecular orbital by slow heavy projectiles following hyperbolic paths, 10:32505 (R;BR)
Domain walls at finite temperature, 10:32652 (R;BR)
Dynamical symmetry breakdown in SU(5) and SO(10), 10:32625 (R;BR;In Portuguese)
Electric dipole ordering in alkali-cyanides: NaCN and KCN, 10:31578 (R;BR)
Electrons in crossed laser and magnetic fields: an exactly soluble model in QED, 10:32503 (R;BR)
EPR studies of cooperative binding of Cu (II) to hemoglobin, 10:32214 (R;BR)
Experimental display of Fourier analysis through the optical physics and its didatical utilization, 10:32857 (R;BR;In Portuguese)
High-intensity ionization approximations: test of convergence in a one-dimensional model, 10:32504 (R;BR)
Introduction to Quantum Chromodynamics, 10:32649 (R;BR;In Portuguese)
Landau theory for uniaxial systems near a Lifshitz point under applied fields, 10:32837 (R;BR)
Location of the higher affinity copper site on human hemoglobin by the use of the spin label technique, 10:32215 (R;BR)
Monte Carlo method in field theories, 10:32651 (R;BR;In Portuguese)
Multiphoton absorption coefficients in solids: an universal curve, 10:32805 (R;BR)
Non-linear absorption in solids, 10:32806 (R;BR)
Nonperturbative treatment of decaying states, 10:32506 (R;BR)
Phase behavior in diffraction, 10:32868 (R;BR)
Phase diagram of the Z(4)-model, 10:32624 (R;BR)
Pion deuteron scattering and the ΔN interaction, 10:32605 (R;BR)
Pion photoproduction in nucleons at low energies, 10:32596 (R;BR;In Portuguese)
Quantum and thermodynamic aspects of Black Holes, 10:32447 (R;BR;In Portuguese)
Quark model for baryons-negative parity states, 10:32607 (R;BR)
Recent developments in high-frequency scattering, 10:32867 (R;BR)

Renormalization group methods for the spectra of disordered chains, 10:32836 (R;BR)

Renormalization group treatment for spin waves in the randomly disordered Heisenberg chain, 10:32835 (R;BR)

Specific heat measurements in KCN:KCL mixed crystals, 10:31567 (R;BR;In Portuguese)

Study on the influence of annealing effects in GaN VPE, 10:31537 (R;BR)

Vertex function for pion-deuteron-dibaryon coupling, 10:32606 (R;BR)

Princeton Univ., NJ (USA)

Limiter, 10:33064 (P;US)

Princeton Univ., NJ (USA). Dept. of Mechanical and Aerospace Engineering

Modeling of engine sprays, 10:31412 (R;US)

Princeton Univ., NJ (USA). Plasma Physics Lab.

Princeton Plasma Physics Laboratory annual report, October 1, 1982-September 30, 1983, 10:33028 (R;US)

Transformation of Hamiltonians to near action-angle form, 10:32916 (R;US)

Viscous current drive, 10:32917 (R;US)

Puerto Rico Univ., San Juan. Center for Energy and Environment Research

Production of a usable energy source by anaerobic digestion of rum waste, 10:30069 (R;PR)

Pulse Sciences, Inc., San Leandro, CA (USA)

Four stage HELIA experiment, 10:31868 (R;US)

High brightness cathode experiments on the experimental test accelerator (ETA). Final report, 10:31912 (R;US)

Purdue Univ., Lafayette, IN (USA)

Energy Management Manual for dairy processors, 10:31353 (R;US)

Purdue Univ., Lafayette, IN (USA). Dept. of Computer Science

BLAS (Basic Linear Algebra Subroutines), linear algebra modules, and supercomputers. Technical report for period ending 15 December 1984, 10:33079 (R;US)

Supercomputers and symbolic computation. Technical report for period ending 4 June 1984, 10:33078 (R;US)

Very large least-squares problems and supercomputers, 10:32878 (R;US)

Purdue Univ., Lafayette, IN (USA). School of Chemical Engineering

CO + H_2 reaction over nitrogen-modified iron catalysts. Quarterly technical progress report, October 1, 1984-December 31, 1984, 10:30067 (R;US)

Q

Queens Coll., Flushing, NY (USA). Center for the Biology of Natural Systems

Research on modeling cogeneration-based residential energy systems in rowhouse and high-rise buildings. Final report, 10:31274 (R;US)

R

Raastofforvaltningen for Groenland, Copenhagen (Denmark)

Report of the Joint Committee for mineral resources in Greenland in the period 1 July 1983-30 June 1984, 10:31122 (R;DK;In Danish)

Specifications of mineral concessions and licences in Greenland as of June 30, 1984, 10:31123 (R;DK)

Radian Corp., Austin, TX (USA)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 2. Appendices A through C. Final report, June 1980-June 1984, 10:29677 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 3. Appendices D and E. Final report, June 1980-June 1984, 10:29678 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 6. Appendix H. Final report, June 1980-June 1984, 10:29681 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 7. Appendix I. Final report, June 1980-June 1984, 10:29682 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 8. Appendix J. Final report, June 1980-June 1984, 10:29683 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 5. Appendix G. Final report, June 1980-June 1984, 10:29680 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 4. Appendix F. Final report, June 1980-June 1984, 10:29679 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 1. Final report. Report for June 1980-June 1984, 10:29676 (R;US)

Cost digest: cost summaries of selected environmental control technologies. Report for January 1981-June 1982, 10:32190 (R;US)

Radian Corp., Research Triangle Park, NC (USA)

National Dioxin Study Tier 4 - combustion sources: project plan. Final report, 10:32147 (R;US)

Radievyj Inst., Leningrad (USSR)

Study on radioactive contamination of the Baltic Sea in 1979-1980, 10:32200 (R;SU;In Russian)

Rochester Univ., NY (USA). Lab. for Laser Energetics

Photoionization-pumped, Ne II, x-ray laser studies project. Final report, 10:31767 (R;US)

Thermal transport measurements of uv laser irradiated spherical targets, 10:32990 (R;US)

Rockwell International Corp., Golden, CO (USA). Rocky Flats Plant

Interaction of trace elements and welding parameters on GTA weld shape, 10:31476 (R;US)

Measurement control for plutonium isotopic measurements using gamma-ray spectrometry, 10:30044 (R;US)

Refractory material which is resistant to oxidation and hot corrosion at temperatures of 1000-1600°C, 10:31508 (TG;US)

Waste generation reduction: nitrates. FY 1984 status report, 10:29966 (R;US)

Rockwell International Corp., Richland, WA (USA). Rockwell Hanford Operations

Geology and basalt stratigraphy of the Weiser embayment, west-central Idaho, 10:29968 (R;US)

Groundwater travel time uncertainty analysis. Sensitivity of results to model geometry, and correlations and cross correlations among input parameters, 10:30017 (R;US)

MAGNUM-2D computer code: user's guide, 10:29967 (R;US)

Review of zirconium-zircaloy pyrophoricity, 10:31477 (R;US)

Rockwell International Corp., Thousand Oaks, CA (USA). Science Center

Computer-controlled acquisition of corrosion-rate data from multiple sensors, 10:32144 (R;US)

Rocky Mountain Biological Lab., Crested Butte, CO (USA)

Small hydroelectric power plant demonstration project. Final technical report, 10:30107 (R;US)

Ronson Management Corp., Alexandria, VA (USA)

User's guide for the Office of Minority Economic Impact National Information Clearinghouse System, 10:33111 (R;US)

Royal Aircraft Establishment, Farnborough (UK)

Polymer electrolytes: an investigation of some poly (N-propylaziridine)/lithium salt compositions, 10:31104 (R;GB)

Rutgers--the State Univ., Piscataway, NJ (USA). Waksman Inst. of Microbiology

Mechanisms of mutagenesis: analysis through the use of alcohol dehydrogenase in Drosophila. Progress report, February 1984-January 1985, 10:32371 (R;US)

Rutherford Appleton Lab., Chilton (UK)

Annual report to the Laser Facility Committee 1984, 10:33029 (R;GB)

Deconvolution of liquid structure data: the pulsed neutron source case, 10:32808 (R;GB)

Profile refinement of powder diffraction patterns using the Voigt function, 10:32807 (R;GB)

Quality assurance tests of the NRPB dental monitoring cassette, 10:32272 (R;GB)

Relativistic saturation of 'beat waves', 10:32918 (R;GB)

S

Sacramento Municipal Utility District, CA (USA)

Design and construction of the SMUDPV1 1-MW photovoltaic power plant. Final report I, 10:30332 (R;US)

SMUDPV1 quarterly performance report II, January-March 1985, 10:30331 (R;US)

Safety in Mines Research Establishment, Sheffield (UK)

Test report for linings for couplings and brakes for use in mining machines for surface and underground workings in which there is assumed to be a fire or explosion hazard due to the possible occurrence of methane/or coal dust/air mixtures, 10:29712 (TG;GB)

Safety Sciences, San Diego, CA (USA)

Report on electrocutions, electric shock, and electric burn injuries involving consumer products. final report, 10:32380 (R;US)

Report on electrocutions, electric shock, and electric-burn injuries involving consumer products. Appendices, 10:32381 (R;US)

Sandia National Labs., Albuquerque, NM (USA)

1984 Environmental summary: Sandia National Laboratories Tonopah Test Range, Tonopah, Nevada, 10:32177 (R;US)

Accuracy of coupled Monte-Carlo/next-event-estimator for bremsstrahlung dose predictions, 10:32829 (R;US)

Advances in data acquisition system technology for PBFA II, 10:33033 (R;US)

Analysis of drag reducing agents for use at the Strategic Petroleum Reserve site at West Hackberry, Louisiana, 10:29803 (R;US)

Application of pulsed power in the simulation of severe natural lightning, 10:31809 (R;US)

Assessment of Class 1E pressure transmitter response when subjected to harsh environment screening tests, 10:30687 (R;US)

Automated magnet testing facility, 10:31988 (R;US)

Benchmarking NNWSI flow and transport codes: COVE 1 results, 10:30019 (R;US)

Calibrated Faraday current and magnetic field sensor, 10:32063 (R;US)

Calibrator for displacement gages used in the rock mechanics laboratory, 10:32064 (R;US)

Characterization of cathodic corrosion products in the Ca/$CaCrO_4$ thermal battery, 10:31108 (R;US)

Characterization of sheet calcium for Ca/$CaCrO_4$ thermal batteries, 10:31105 (R;US)

Compact, low jitter, triggered spark gap, 10:31867 (R;US)

Comparison of uncertainty and sensitivity analysis techniques for computer models, 10:31013 (R;US)

Comprehensive fracture diagnostics experiment. Part II. Comparison of seven fracture azimuth measurements, 10:29811 (R;US)

Control of step size and order in extrapolation codes, 10:33101 (R;US)

Coupled electron-photon transport calculations using the method of discrete ordinates, 10:32809 (R;US)

Dangling bonds and sub-gap optical absorption in silicon, 10:31579 (R;US)

Design and optimization of the PBFA II vacuum interface and transmission lines for light ion fusion, 10:33038 (R;US)

Effect of environmental stress on Sylgard 170 silicone elastomer, 10:31554 (R;US)

Electron and photon stimulated desorption from organic molecular solids: final state leading to desorption, 10:32507 (R;US)

Estimating wind speed as a function of height above ground: an analysis of data obtained at the Southwest Residential Experiment Station, Las Cruces, New Mexico, 10:30338 (R;US)

Experimental studies of chemical reactivity during shock initiation of hexanitrostilbene, 10:32095 (R;US)

Experiments and improvements of the ordinary differential equation solvers DEPAC on the CRAY computer, 10:33102 (R;US)

Explosive generators for low-cost pulsed power, 10:31812 (R;US)

Explosive initiation by very small conical shaped charge jets, 10:32093 (R;US)
Final battery evaluation report: Energy Research Corporation zinc/bromine battery, 10:31107 (R;US)
Four stage HELIA experiment, 10:31868 (R;US)
Graph-theoretical exorcitm, 10:33103 (R;US)
IFA-2 collective ion accelerator experiments, 10:31870 (R;US)
Impedance effects on anode formation of microparticles in an electron-beam diode, 10:31810 (R;US)
Implementing the automated features of the PBFA-I control/monitor system, 10:33036 (R;US)
Injector losses on Mite, 10:30667 (R;US)
Investigation of fuel and clad relocation during LMFBR initiation phase accidents: the STAR experiment program, 10:31034 (R;US)
Kinetic loss experiments on Mite, 10:31869 (R;US)
Light ion sources for ICF, 10:33039 (R;US)
Location recommendation for surface facilities for the prospective Yucca Mountain Nuclear Waste Repository, 10:29970 (R;US)
Measurement and interpretation of electron angle at MABE beam stop, 10:31908 (R;US)
Model that predicts pulse charged gas switching breakdown phenomena, 10:33035 (R;US)
Modeling granular explosive detonations with shear band concepts, 10:32094 (R;US)
Moment-method formulation of the cavity-probe aperture antenna, 10:31813 (R;US)
New directional couplers for multimode circular waveguides applied to intense pulsed microwave systems, 10:31989 (R;US)
Operations considerations in designing a high speed multi-channel data acquisition system, 10:33034 (R;US)
PETROS: a program for calculating transport of heat, water, water vapor and air through a porous material, 10:31779 (R;US)
Photovoltaic Concentrator Technology Project. Thirteenth project integration meeting, 10:30310 (R;US)
PMEXA: diagnostic filtering program for the PBFA-I performance monitoring and evaluation system, 10:33031 (R;US)
Preliminary considerations for the gasdynamic precompression of solid molecular hydrogen, 10:32540 (R;US)
Preliminary cost and risk analysis for transporting spent fuel and high-level wastes to candidate repository sites, 10:29900 (R;US)
Preliminary SPR thermal model description and results for WH-11 and BM-4, 10:29802 (R;US)
Pressure-shear loading of PBX-9404, 10:32092 (R;US)
Pretest reference calculation for the 6.1 meter (20 ft) wide drifts of the Geomechanical Evaluation (WIPP Room G in situ experiment), 10:29972 (R;US)
Pretest reference calculation for the 18-W/m^2 Mockup for Defense High-Level Waste (WIPP Room A in situ experiment), 10:29971 (R;US)
Providing automated control for PBFA-II, 10:33032 (R;US)
RADLAC technology review, 10:31871 (R;US)
Reduction of the well test data for test well USW H-1, adjacent to Nevada Test Site, Nye County, Nevada, 10:29969 (R;US)
Sealed neutron tubes foreword, 10:30054 (TJ;US)
Shock and release equation of state of calcite, 10:31580 (R;US)
Simulation of lattice damage due to dynamic loading, 10:33100 (R;US)
Statistical distribution of breakdown voltages in rep-rate spark gaps, 10:31811 (R;US)
Steam explosion experiments with single drops of iron oxide melted with a CO_2 laser. Part II. Parametric studies, 10:31007 (R;US)
Supermite vacuum interface design, 10:33037 (R;US)
Technical assessment of thermal-hydraulics for high heat flux fusion components, 10:33030 (R;US)
Testbed for sensory control of intelligent machines, 10:31748 (R;US)
Testing of sealed lead-acid batteries. Revision, 10:31106 (R;US)
TRAC-PF1 LOCA calculations using fine-node and coarse-node input models, 10:31016 (R;US)
Transient two-dimensional simulation of SEU in a CMOS SRAM cell, 10:31814 (R;US)
Understanding and improving acoustic to seismic coupling as it pertains to Sandia's helicopter detector, 10:32065 (R;US)
Vacuum interface flashover with bipolar electric fields, 10:31907 (R;US)

Sandia National Labs., Livermore, CA (USA)
Monograph series No. 2: 10 MWe Solar Thermal Central Receiver Pilot Plant and receiver performance evaluation, 10:30353 (R;US)

Saskatchewan Univ., Saskatoon (Canada)
Partial reflection D-region electron densities, 10:32460 (R;CA)

Science and Engineering Associates, Inc., Albuquerque, NM (USA)
Coupled electron-photon transport calculations using the method of discrete ordinates, 10:32809 (R;US)

Science Applications International Corp., Boulder, CO (USA). Plasma Research Inst.
RF stabilization of interchange-ballooning modes, 10:32919 (R;US)

Science Applications International Corp., La Jolla, CA (USA)
Inspection guide for vulnerability analysis of nuclear sites against outsider threats, 10:30045 (R;US)

Science Applications International Corp., McLean, VA (USA)
Analysis of radiation exposure for naval personnel at Operation Sandstone. Technical report, 10:32103 (R;US)

Scientific Design Co., Inc., New York (USA)
ASPEN sensitivity study for the Great Plains Gasification Plant. Technical progress report, May 1-31, 1985, 10:29620 (R;US)

S-Cubed, La Jolla, CA (USA)
Analysis of flow data from the T-F and S/DOE Gladys McCall No. 1 well. Final report, 10:30599 (R;US)
WIPP horizon in situ permeability measurements. Final report, 10:32404 (R;US)

Sheffield Univ. (UK). Dept. of Fuel Technology and Chemical Engineering
Coherent structures in turbulent flames. Final report, 10:31716 (R;GB)

Shirco, Inc., Dallas, TX (USA)
Electrically fired incineration of combustible radioactive waste, 10:29921 (R;US)

Sigma Research, Inc., Richland, WA (USA)
Clad interface crack detection and sizing. Final report, 10:30918 (R;US)

SKF Industries, Inc., King of Prussia, PA (USA)
Mechanical interactions of rough surfaces. Quarterly progress report, December 31, 1984-March 31, 1985, 10:31794 (R;US)

Solar AquaSystems, Inc., Encinitas, CA (USA)
Covered, anaerobic, wastewater lagoon primary treatment system, the "anaerobic cell". Technical completion report, 10:31374 (R;US)

Solar Energy Research Inst., Golden, CO (USA)
1985 amorphous silicon review meeting, 10:30311 (R;US)
Identification of chemical and physical phenomena affecting the durability of silvered polymer (PMMA) mirrors, 10:30551 (R;US)
Program redesign based on reality, 10:31295 (R;US)
Resource evaluation and site selection for microalgae production systems, 10:30315 (R;US)
Results of active solar control system testing and the performance effects of sensor degradation, 10:30402 (R;US)
Solid/melt interface studies of high-speed silicon sheet growth. Final technical progress report, July 15, 1983-July 15, 1984, 10:30312 (R;US)

South Dakota School of Mines and Technology, Rapid City (USA)
Thermally induced chemical migration: a natural analog approach. Progress report, September 1984-September 1985, 10:32409 (R;US)

Southern Illinois Univ., Carbondale (USA)
Laser induced coal fluorescence. Tenth quarterly technical progress report, January 1-March 31, 1985, 10:29655 (R;US)
Structure-sensitive catalytic dehydrogenation of hydrogen donors over iron sulfides: new methods for increasing coal depolymerization under mild conditions. Final report, July 1, 1983-December 31, 1984, 10:31657 (R;US)

Southwest Research Inst., San Antonio, TX (USA)
Assessment of dynamic fracture mechanics for the analysis of crack arrest in a pressurized thermal shock event. Final report, 10:30919 (R;US)
Effects of 60 Hz electric fields on operant and social stress behaviors of nonhuman primates. Project technical status report, February 16, 1985-April 12, 1985, 10:32372 (R;US)

Southwest Research Inst., San Antonio, TX (USA). Army Fuels and Lubricants Research Lab.
- Overview on assessment of crude oil and refined product quality during long-term storage, 10:29798 (R;US)

Springborn Labs., Inc., Enfield, CT (USA)
- Investigation of test methods, material properties, and processes for solar cell encapsulants. Eighth annual report, 10:30300 (R;US)

SRI International, Menlo Park, CA (USA)
- Improved coal conversion in CO/water systems. Quarterly report No. 2, December 4, 1984-March 3, 1985, 10:29638 (R;US)
- Laboratory investigation of containment of underground explosions. Technical report, 10:32102 (R;US)

Stanford Linear Accelerator Center, CA (USA)
- Electron wind in strong wave guide fields, 10:31991 (R;US)
- Error message recording and reporting in the SLC control system, 10:31993 (R;US)
- GIANT: a computer code for General Interactive ANalysis of Trajectories, 10:31992 (R;US)
- High resolution beam profile monitors in the SLC, 10:31910 (R;US)
- High-resolution phosphor screen beam profile monitor, 10:31994 (R;US)
- Increased intensity performance of the Brookhaven AGS, 10:31995 (R;US)
- Observations of accelerated high current low emittance beams in the SLC Linac, 10:31911 (R;US)
- Rf beam deflection measurements and corrections in the SLC linac, 10:31909 (R;US)
- Solid state high power amplifier for driving the SLC injector klystron, 10:31990 (R;US)
- Status of the zeta(8.3), 10:32565 (R;US)
- Superconductors for pulsed rf accelerators, 10:31872 (R;US)
- Time domain reflectometry for SLC BPM system. Revision, 10:31996 (R;US)

Stanford Univ., CA (USA)
- Directivity of Bremsstrahlung radiation from relativistic beams and the gamma-rays from solar flares, 10:32445 (R;US)

Stanford Univ., CA (USA). Dept. of Applied Physics
- Improved solid state laser sources. Final technical report, September 2, 1982-February 10, 1985. Volume 3, 10:31764 (R;US)

Stanford Univ., CA (USA). Stanford Geothermal Program
- Characterization of retention processes and their effect on the analysis of tracer tests in fractured reservoirs, 10:30607 (R;US)
- Depletion modeling of liquid dominated geothermal reservoirs, 10:30602 (R;US)
- Experimental determination of the effective Taylor dispersivity in a fracture, 10:30601 (R;US)
- Linear boundary detection using pressure buildup tests, 10:30604 (R;US)
- Tracer test analysis of the Klamath Falls geothermal resource: a comparison of models, 10:30603 (R;US)
- Velocity and gravity effects in relative permeability measurements, 10:29769 (R;US)

Stanford Univ., CA (USA). Systems Optimization Lab.
- Practical approach to Karmarkar's algorithm, 10:33104 (R;US)
- Properties of a representation of a basis for the null space, 10:32880 (R;US)

Statens Energiverk, Stockholm (Sweden)
- Analysis of the control problem for horizontal axis wind turbines. Final report, 10:30634 (R;SE)
- Building and running of a pilot catalytic cracker, 10:29773 (R;SE;In Swedish)
- Case study of a boundary layer wind regime in stably stratified air over the Baltic Sea, 10:30642 (R;SE)
- Classification of peat. An investigation of the physical properties of peat and the methods of determination, 10:29666 (R;SE;In Swedish)
- Development of a pulverized fuel from specially treated peat, 10:29643 (R;SE;In Swedish)
- Drying of wood chips for fuel. Full scale tests and dryer designs, 10:30086 (R;SE;In Swedish)
- Energy Forest. Experiment on a large scale Domaen. Progress report 2, 10:30317 (R;SE;In Swedish)
- Flow characteristics above a very low and gently sloping hill, 10:30636 (R;SE)
- Full depth method for peat mining. Stage 2, 10:29707 (R;SE;In Swedish)
- Gasification of biomass and peat. Progress report for the period 810701-830630, 10:29642 (R;SE;In Swedish)
- Great transition. An analysis of international energy markets, 10:31143 (R;SE)
- Gusts. Introductory statistical treatment, 10:30611 (R;SE;In Swedish)
- Investigation of the characteristics of the autosynchronous generator as a wind generator, 10:30639 (R;SE;In Swedish)
- Machine system Rejlers for peat production, 10:29706 (R;SE;In Swedish)
- Measurement of wind on high masts. Quarterly report 4/1983, 10:30614 (R;SE;In Swedish)
- Pellets as fuel II. A study of methods and ways of development in the combustion of pellets, 10:29726 (R;SE;In Swedish)
- Preliminary analysis of turbulence measurements at Naesudden during October 1980 and October 1982, 10:30640 (R;SE;In Swedish)
- Progress report fiscal year 1982/83, Forest Energy Project, 10:30319 (R;SE;In Swedish)
- Renewable energy sources wind and solar energy in electrical energy systems. Development of methods, 10:30610 (R;SE;In Swedish)
- Sequential switching of a three-phase asynchronous wind generator onto the grid, 10:30638 (R;SE;In Swedish)

Geometric proof of Liouville's theorem, 10:32870 (R;AT)

Grassmann expansion of the classical N=2 supergravity field equations, 10:32869 (R;AT)

Progress report 1983/1984 of the Institute for Theoretical Physics of the Technical University, Vienna, 10:32833 (R;AT;In German)

Proton decay in the potential model approach, 10:32610 (R;AT)

Technology and Economics, Inc., Cambridge, MA (USA)

Neighborhood energy works, 10:31378 (R;US)

Tekniska Hoegskolan, Lund (Sweden). Institutionen foer Vaerme- och Kraftteknik

Electric load in single family houses. Load analysis and simulation studies for local mains, 10:31170 (R;SE;In Swedish)

Teledyne Geotech, Alexandria, VA (USA)

Frequency dependence of q in the mantle underlying the shield areas of Eurasia. Final technical report, 15 November 1982-30 December 1984, 10:32109 (R;US)

Testing the hypothesis of TTBT (Threshold Test Ban Treaty) compliance, and magnitude-yield regression for explosions in granite. Final technical report, 15 November 1982-30 December 1984, 10:32108 (R;US)

Teledyne Geotech, Dallas, TX (USA)

Comprehensive fracture diagnostics experiment. Part II. Comparison of seven fracture azimuth measurements, 10:29811 (R;US)

Teledyne-Wah Chang, Albany, OR (USA)

Processing and problems in manufacturing MJR billets of four separate compositions for Lawrence Livermore National Laboratory, 10:31750 (R;US)

Tennessee Univ., Knoxville (USA)

Shape memory effect in uranium-niobium alloys below room temperature. Final report, 10:31492 (R;US)

Tennessee Univ., Knoxville (USA). Dept. of Chemistry

Coal structure and reactivity: the macromolecular structure of coal. Final report, 10:29653 (R;US)

Tennessee Univ., Knoxville (USA). Dept. of Physics

Formation, ion modification, and annealing of VN, 10:31526 (R;US)

Tennessee Univ., Oak Ridge (USA). Graduate School of Biomedical Sciences

Three-dimensional reconstruction and data display of chromosome structure studied by electron microscope tomography, 10:32228 (R;US)

Texas A and I Univ., Kingsville (USA). Dept. of Chemical and Natural Gas

Evaluation of in-place gas, reserves and production potential of coalbed gas using a vertical boreholes pattern. Final report, September 1, 1983-December 31, 1984, 10:29695 (R;US)

Texas A and M Univ., College Station (USA)

Application of detailed fission-product decay gamma spectra in the calculation of photoneutron spectra from D(y,n) reactions in PWR fuel, 10:30715 (R;US)

Application of evaluated fission-product delayed-neutron precursor data in reactor kinetics calculations, 10:30778 (R;US)

Texas A and M Univ., College Station (USA). Dept. of Aerospace Engineering

Addendum to a catalog of low Reynolds number airfoil data for wind turbine applications, 10:30632 (R;US)

Texas A and M Univ., College Station (USA). Dept. of Chemistry

Investigations on multiphoton ionization and laser-ion beam photodissociation spectroscopy. Progress report, September 1, 1982-August 31, 1985, 10:31688 (R;US)

Texas Accelerator Center, The Woodlands

Beam-cavity interaction measurements in a DAW structure, 10:31862 (R;US)

Texas Tech Univ., Lubbock (USA)

Laser induced coal fluorescence. Tenth quarterly technical progress report, January 1-March 31, 1985, 10:29655 (R;US)

Texas Univ., Arlington (USA)

Detonations of solid explosives. Final report, 1 November 1982-31 October 1984, 10:32081 (R;US)

Texas Univ., Austin (USA)

Research program in iterative solution and finite element analysis in computational mechanics. Annual progress report, 1983, 10:33087 (R;US)

Texas Univ., Austin (USA). Center for Numerical Analysis

Accelerating nonsymmetrizable iterative methods, 10:33082 (R;US)

ITPACK project: past, present, and future, 10:33083 (R;US)

Texas Univ., Austin (USA). Dept. of Physics

Medium energy measurements of n-n parameters. Progress in research, January 1-December 31, 1984, 10:32667 (R;US)

Texas Univ., Austin (USA). Inst. for Fusion Studies

Current interruption by density depression, 10:32890 (R;US)

High energy plasma accelerators, 10:32891 (R;US)

Local conservation laws for the Maxwell-Vlasov and collisionless kinetic guiding center theories, 10:32888 (R;US)

Scale separation closure and Alfven wave turbulence, 10:32889 (R;US)

Thermecon, Atlanta, GA (USA)

Centralized ladle preheating system. Final report, March 1982-February 1984, 10:31365 (R;US)

Thermo Energy Corp., Mountain View, CA (USA)

Small-scale regenerator. Final report, 10:31357 (R;US)

Tokyo Astronomical Observatory (Japan)

Bipolar flows and X-ray emission from young stellar object, 10:32431 (R;US)

Toulouse-3 Univ., 31 (France)

Alcohol fermentation: study in continuous culture of the effect of temperature and antibiotics in a multi-stage reactor, 10:30079 (R;FR;In French)

Contribution to the development of solar and meteorological stations in Senegal: microcomputer controlled measuring station and solar tracking system, 10:30276 (R;FR;In French)
Conversion coatings on stainless steels for solar energy absorbant materials. Influence of metallurgical and structural state of the metal on the properties of the films, 10:30547 (R;FR;In French)
Immobilized yeasts: growth and metabolism, alcohol fermentation, 10:30077 (R;FR;In French)
Microordinator controlled measuring station for studying the materials of solar system components, 10:30375 (R;FR;In French)
Real site study of a solar passive house with long time heat storage in the ground, 10:30378 (R;FR;In French)
Study of the performance of a wind mill in presence of a wind gradient, 10:30627 (R;FR;In French)

TRC Environmental Consultants, Inc., East Hartford, CT (USA)
Evaluation of rural air-quality simulation models. Appendix g. Statistical tables for PPSP (Power Plant Siting Program), 10:30659 (R;US)

Treve (Yvain M.), Santa Barbara, CA (USA)
Application of nonlinear methods to some current problems in fusion plasma physics. Final report, 10:32887 (R;US)

TRW Defense and Space Systems Group, Redondo Beach, CA (USA)
Microwave modeling of laser plasma interactions. Final report, 10:33042 (R;US)

TRW Energy Development Group, Redondo Beach, CA (USA)
Helium-cooled molten-salt fusion breeder, 10:33040 (R;US)

TRW, Inc., Redondo Beach, CA (USA)
Physics modeling of tandem mirror devices with high-field test cell inserts, 10:32921 (R;US)

TRW, Inc., Redondo Beach, CA (USA). Applied Technology Div.
Investigation of non-intrusive radiometers for entrained gasifier temperature measurement. Fourth quarterly report, August 1-October 31, 1984. Revision 3, 10:32034 (R;US)

TRW Space and Technology Group, Redondo Beach, CA (USA)
Coal water mixture development. Quarterly technical progress report, first quarter 1985, 10:29713 (R;US)

TRW Space and Technology Group, Redondo Beach, CA (USA). Energy Div.
Symmetric Tandem Mirror program. Annual progress report, 10:32885 (R;US)

TRW Space Technology Labs., Redondo Beach, CA (USA)
Automated assembly of Gallium Arsenide and 50-micron thick silicon solar cell modules, 10:30309 (R;US)
Research study of space plasma boundary processes. Final report, 1 October 1983-30 September 1984, 10:32464 (R;US)

Tucson, City of, AZ (USA)
City of Tucson, Arizona, electric vehicle report, April 1, 1981-May 31, 1985. Final report, 10:31424 (R;US)

Tuebingen Univ. (Germany, F.R.). Fakultaet fuer Physik
Study of collective coordinates and dynamical groups in nuclear theory, 10:32771 (R;DE)

Tufts Univ., Medford, MA (USA). Dept. of Physics
Should we expect large polarization effects at high energies, 10:32592 (R;US)
Very Large Array observations of coronal loops and related observations of solar-type stars. Annual scientific report, 1 January-31 December 1984, 10:32414 (R;US)

U

UKAEA Atomic Energy Establishment, Winfrith
New surveillance and control techniques and their application to nuclear power plant with particular reference to 1300 MW, 10:30827 (TJ;GB)
Particle size distribution of fragmented melt debris from Molten Fuel Coolant Interactions, 10:30817 (R;GB)
Preliminary results from film boiling destabilisation experiments, 10:30818 (R;GB)

UKAEA Atomic Energy Research Establishment, Harwell. Chemical Technology Div.
AERE contracts with DOE on the treatment and disposal of intermediate level wastes. Annual report for 1983/84, 10:29903 (R;GB)
Decontamination of α bearing waste streams using coprecipitation with ferric hydroxide in conjunction with ultrafiltration, 10:29906 (R;GB)
One third linear scale Joule Ceramic Melter - Progress report April 1983-March 1984, 10:29904 (R;GB)
Strontium removal from Magnox pond waters by ultrafiltration, 10:29907 (R;GB)

UKAEA Atomic Energy Research Establishment, Harwell. Chemistry Div.
Investigation of the liability of surface contamination arising from plutonium containing solutions, 10:30022 (R;GB)

UKAEA Atomic Energy Research Establishment, Harwell. Engineering Projects Div.
Selection of radiation tolerant electrical/electronic components for gamma radiation environments in the nuclear power industry, 10:32048 (R;GB)

UKAEA Atomic Energy Research Establishment, Harwell. Environmental and Medical Sciences Div.
Construction and calibration of a simple scintillation counter for monitoring radioactive gases in ducts, 10:32013 (R;GB)
Livermore phantom as a calibration standard in the assessment of plutonium in lungs, 10:32818 (R;GB)
Measurement of neutron spectra with hydrogen proportional counters. Part 1. Spectrometry system and calibration, 10:32015 (R;GB)
Report on a visit to Canada to discuss tritium instrumentation and radiological protection, 10:32981 (R;GB)

UKAEA Atomic Energy Research Establishment, Harwell. Instrumentation and Applied Physics Div.
Filter paper counting system incorporating a segmented alpha particle detector, 10:32014 (R;GB)

UKAEA Atomic Energy Research Establishment, Harwell. Materials Development Div.
Cold pressed and sintered barium sulphate ceramic waste forms for direct immobilisation of medium level Magnox waste, 10:29908 (R;GB)
Immobilisation of ^{137}Cs and ^{90}Sr in hot-pressed clinoptilolite, 10:29909 (R;GB)
Role of void nucleation in the swelling resistance of ferritic steel, 10:31431 (R;GB)

UKAEA Atomic Energy Research Establishment, Harwell. Nuclear Physics Div.
Uranium series disequilibrium measurements at Mol and Whiteshell. Progress report for January-June 1984, 10:29905 (R;GB)

UKAEA Atomic Energy Research Establishment, Harwell. Theoretical Physics Div.
Analysis of steady-state hydraulic tests in fractured rock, 10:29910 (R;GB)
Analysis of the AECL/CEC field experiment on the transport of ^{82}Br through a single fracture, 10:29911 (R;GB)
Mathematical modelling of fracture hydrology. Progress report January-June 1984, 10:32382 (R;GB)
Migration processes in a model deep repository for the disposal of intermediate level nuclear waste, 10:30008 (R;GB)
Review of methodologies used in safety analyses of nuclear waste disposal, 10:29912 (R;GB)

UKAEA Risley Nuclear Power Development Establishment
Risks in the transport and storage of liquefied natural gas. Sub-project 5-2: investigation into building damage, 10:29809 (R;GB)

Undercurrent Design Research, New Haven, CT (USA)
Assessment of the energy savings potential of building foundations research, 10:31276 (R;US)

Union Internationale d'Electrothermie (Sweden)
High temperature heat pumps for industry. Session 4 N.4.6, 10:31351 (R;SE)

United Technologies Corp., South Windsor, CT (USA). Power Systems Div.
Advanced converter technology. Final report, May 23, 1979-December 31, 1984, 10:30653 (R;US)

United Technologies Research Center, East Hartford, CT (USA)
Laser diagnostic analyses of sooting flames. Final report, 1 October 1980-30 September 1984, 10:31717 (R;US)

Universitaets- und Landesbibliothek Sachsen-Anmhalt, Halle (German Democratic Republic)
Effects of sulphur dioxide on plants with special reference to biochemical and physiological responses, 10:32351 (R;DD;In German)

Universite de Technologie de Compiegne, 60 (France)
Simulations of the kinetics of large wood particle pyrolysis and of material balance of pure oxygen gasification, 10:30072 (R;FR;In French)

University City Science Center, Philadelphia, PA (USA)
Energy conservation opportunities implemented by small and medium-size manufacturers. EADC Program, 1981-1983, 10:31352 (R;US)

University of Manchester Inst. of Science and Technology (UK). Control Systems Centre
Elimination of the outside influence in the prediction of optimum start control, 10:31278 (R;GB)
Preheat prediction models (revised), 10:31277 (R;GB)

UOP, Inc., Des Plaines, IL (USA)
Development and demonstration of a spiral-wound thin-film composite membrane system for the economical production of oxygen-enriched air, Phase IV. Final report, January 1, 1983-December 31, 1984, 10:31552 (R;US)

UOP, Inc., San Diego, CA (USA). Fluid Systems Div.
Development and demonstration of a spiral-wound thin-film composite membrane system for the economical production of oxygen-enriched air, Phase IV. Final report, January 1, 1983-December 31, 1984, 10:31552 (R;US)

Urban Systems Research and Engineering, Inc., Cambridge, MA (USA)
Integration of building and energy technology with on-site waste management in the year 2000. Final report, October 1979-September 1980, 10:31286 (R;US)

Urban Systems Research and Engineering, Inc., Washington, DC (USA)
Western Maryland power-plant siting study: socio-economic impact assessment of three candidate sites. Final report, 10:30662 (R;US)

USDOE Assistant Secretary for Conservation and Renewable Energy, Washington, DC
National Awards Program for Energy Innovation 1984. Project descriptions, 10:31127 (R;US)

USDOE Assistant Secretary for Defense Programs, Washington, DC
Evaluation of commercial repository capacity for the disposal of defense high-level waste, 10:29914 (R;US)

Adsorption of metals on metal surfaces and the possibilities of its application in nuclear chemistry. Calculation of adsorption enthalpies with the program AMO, 10:31494 (R;DD;In German)
MCANG - a group data library of cumulative angular distributions of elastically scattered neutrons for Monte Carlo calculations, 10:32810 (R;DD;In German)

PERSONAL AUTHOR INDEX

Authors' surnames are indexed in the form appearing in the abstracted publication; given names are reduced to initials. Each author entry gives the publication title and the citation number. The document type, e.g., R for Report; country of publication, e.g., US; and language of the document, e.g., In German; are given in parentheses at the end of the entry. If no language statement appears, the language is English. Tables of document types and country of publication codes appear after the indexes. For publications with multiple authors, an entry is provided for each author. Entries for the second and succeeding authors give references to the first author.

Because of problems involved in the mechanical preparation of this index, all accent marks are omitted. Changes in spelling introduced as a result of accent omission follow standard conventions.

SUBJECT INDEX

The subject index is based on the use of subject descriptors selected from a controlled thesaurus of terms (DOE/TIC-7000). Subject descriptors and qualifiers (subheadings) are selected and presented in the following format:

SUBJECT DESCRIPTOR
  Qualifier
    Title, (supplementary information), citation number, (R;US)

The notations in the final parentheses indicate the type of document, e.g., R for Report; the country of publication, e.g., US; and the language if other than English, e.g., In German. Tables of document types and country of publication codes appear after the indexes.

The title may be supplemented with additional words, or a phrase, if it appears additional information would be helpful. In cases for which the title contains little or no information related to the subject entry, it may be replaced entirely by the supplementary information. A qualifier is not always required, and in such cases the title will follow the unqualified subject descriptor.

The descriptors selected for use as subject terms are generally the names of specific materials, things, or processes. To the extent possible, a qualifier is selected to describe the properties of, or processes applied to, the subject term.

Index entries are selected to indicate the important ideas and concepts presented in a document, rather than words that may appear in the text. Within the available thesaurus terms, the most probable or logical place to look for typical information is selected. "See references" are included to guide users from synonymous terms or phrases to the descriptor selected as a subject heading for the concept (e.g., Pipeline Quality Gas, see HIGH BTU GAS). "See also references" are used to indicate where to find references to subject concepts that are narrower, broader, or related to a particular subject heading. To complete an exhaustive search of a given subject, all such headings should be reviewed. Copies of DOE/TIC-7000, the Subject Thesaurus, are available from the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, VA 22161.

Ingestion
Gut-related studies of radionuclide toxicity, 10:32332 (RA;US)
Inhalation
Gut-related studies of radionuclide toxicity, 10:32332 (RA;US)
Recovery
Method for recovery of actinides from actinide-bearing scrap and waste nuclear material using O_2F_2, 10:29993 (P;US)

ACTIVATED SLUDGE PROCESS
Biodegradation
Theory, design, and operation of nutrient-removal activated-sludge processes, 10:31375 (R;ZA)

ACTIVATION ANALYSIS
List of important sources of nuclear data for neutron activation analysis and gamma spectrometry, 10:31612 (RA;CS;In Czech)
Accuracy
Relative accuracy, precision and frequency of use of neutron activation analysis and other techniques as revealed by the results of some recent IAEA intercomparisons, 10:31598 (RA;XA)
Calibration Standards
Preparation and use of chemical irradiation standards, 10:31601 (RA;XA)
Computer Codes
Optimization of reactor neutron activation analysis conditions, 10:31604 (RA;XA)
Errors
Collection and manipulation of samples for trace element analysis. Quality assurance considerations, 10:31600 (RA;XA)
Error sources involved in pre-irradiation separations, 10:31602 (RA;XA)
Error sources involved in radiochemical processing, 10:31605 (RA;XA)
Gamma-ray spectroscopy in neutron activation analysis: sources of error, 10:31606 (RA;XA)
Sources of errors in reactor neutron activation analysis of biological samples, 10:31603 (RA;XA)
Interference
Interference in instrumental neutron activation analysis, 10:31611 (RA;CS;In Czech)
Interlaboratory Comparisons
Need for improved quality assurance in biomedical neutron activation analysis as revealed by the results of some recent IAEA intercomparisons, 10:31599 (RA;XA)
Relative accuracy, precision and frequency of use of neutron activation analysis and other techniques as revealed by the results of some recent IAEA intercomparisons, 10:31598 (RA;XA)
Meetings
Abstracts of papers from seminar on instrumental activation analysis, 10:31613 (R;CS;In Czech)
Quality assurance in biomedical neutron activation analysis. Report of an advisory group meeting organized by the IAEA and held in Vienna, 13-17 September 1982, 10:31597 (R;XA)
Optimization
Optimization of reactor neutron activation analysis conditions, 10:31604 (RA;XA)
Quality Assurance
Internal quality assurance in biomedical neutron activation analysis, 10:31607 (RA;XA)
Need for improved quality assurance in biomedical neutron activation analysis as revealed by the results of some recent IAEA intercomparisons, 10:31599 (RA;XA)
Preservation and preparation of biological materials for trace element analysis: quality assurance considerations, 10:32308 (RA;XA)
Quality assurance in biomedical neutron activation analysis. Report of an advisory group meeting organized by the IAEA and held in Vienna, 13-17 September 1982, 10:31597 (R;XA)
Quality Control
External quality control, 10:31608 (RA;XA)
Sample Preparation
Collection and manipulation of samples for trace element analysis. Quality assurance considerations, 10:31600 (RA;XA)
Error sources involved in pre-irradiation separations, 10:31602 (RA;XA)

ACTIVATION DETECTORS
Accuracy
Twenty-first nuclear accident dosimetry intercomparison study, August 6-10, 1984, 10:32828 (R;US)

ACTIVATION ENERGY
Computer Calculations
Detonations of solid explosives. Final report, 1 November 1982-31 October 1984, 10:32081 (R;US)

ALPHA PARTICLES
Emitted by nuclei.
Energy Losses
Calculation of heavy-ion tracks in liquid water, 10:32799 (R;US)
Energy Spectra
Nuclear techniques for determining the spatial and energy distribution of fast-confined alpha particles in ignited D—T plasma, 10:32973 (J;US)
Radiation Hazards
Risk estimates for the health effects of alpha radiation, 10:32309 (R;CA)
ALPHA REACTIONS
Breakup Reactions
Comparative analysis of proton and alpha-particle interactions with C, O and Ag, Br nuclei at 4.5 GeV/c per nucleon, 10:32688 (R;SU;In Russian)
Capture
E2 strength of the lowest resonance in ^{6}Li(α,γ): Collective effects in the 1p shell, 10:32693 (J;US)
Compound-Nucleus Reactions
Study of the reaction α+Pb at 600 MeV, 10:32748 (R;FR;In French)
Inelastic Scattering
Neutron decay of the giant monopole resonance (GMR) in ^{208}Pb, 10:32744 (RA;NL)
Three-Nucleon Transfer Reactions
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Angular correlation measurements with (α,pγ) reactions, 10:32707 (RA;ZA)
Transfer Reactions
Gamma-ray production cross sections for alpha-particle induced reactions on ^{19}F and ^{23}Na, 10:32691 (R;US)
ALPHA SOURCES
Alpha Detection
Filter paper counting system incorporating a segmented alpha particle detector, 10:32014 (R;GB)
ALPHA-BEARING WASTES
Combustion
Electrically fired incineration of combustible radioactive waste, 10:29921 (R;US)
Decontamination
Decontamination of α bearing waste streams using coprecipitation with ferric hydroxide in conjunction with ultrafiltration, 10:29906 (R;GB)
ALTERNATE FUELS
See SYNTHETIC FUELS
ALUMINIA
See ALUMINIUM OXIDES
ALUMINIUM
Oxidation
Optimization of the NiCrAl-Y/ZrO-Y2O3 thermal barrier system, 10:31535 (R;US)

Phase Diagrams
Processing and microstructural characterization of B_4C-Al cermets, 10:31548 (R;US)
Physical Radiation Effects
Electrical resistivity change in Cu and Al stabilizers of superconducting magnets after low-temperature neutron irradiation, 10:33010 (R;JP;In Japanese)
Radiation damage in $Al^{57}Co$ caused by 25 MeV oxygen ions: Establishment of a dose curve on the basis of Moessbauer effect and resistance measurements, 10:31460 (R;DE;In German)
Pionic Atoms
Anomalous strong interaction in pionic atoms of Mg and Al, 10:32491 (RA;NL)
PIXE Analysis
Report of the Van de Graaff Group: nuclear analysis. The toxic effects of aluminium in vines, 10:31626 (RA;ZA)
Toxicity
Report of the Van de Graaff Group: nuclear analysis. The toxic effects of aluminium in vines, 10:31626 (RA;ZA)
ALUMINIUM 27 TARGET
Argon 40 Reactions
Fragmentation processes in nuclear reactions, 10:32695 (R;FR)
Electron Reactions
Deep inelastic scattering of charged leptons and quark distributions in nuclei, 10:32563 (RA;DE)
Neutron Reactions
Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)
Nitrogen 14 Reactions
Study of the light particle emission in the transition region of mechanisms on SARA, 10:32700 (R;FR;In French)
Subthreshold pion production: An intranuclear N-N collision interpretation, 10:32694 (J;US)
Proton Reactions
Validation of the intra-nuclear-cascade-evaporation model for particle production, 10:32791 (R;DE)
ALUMINIUM ALLOYS
See also HEUSLER ALLOYS
INCONEL 617
Crack Propagation
Near-threshold fatigue: an overview of the role of microstructure and environment, 10:31468 (R;US)
Fatigue
Near-threshold fatigue: an overview of the role of microstructure and environment, 10:31468 (R;US)
Order Parameters
Local atomic order of a Ni-12.7 at.% Al alloy quenched from 1323 K, 10:31519 (J;DK)
Precipitation Hardening
Atomic mechanisms of γ' precipitate plate growth in the Al-Ag system, 10:31469 (R;US)
Quantitative Chemical Analysis
Spectrochemical determination of impurities in aluminium alloys by DC arc technique, 10:31634 (R;IL;In Hebrew)
ALUMINIUM HYDRIDES
Chemical Reactions
Transition metal catalysis of hydrogen shuttling in coal liquefaction. Quarterly technical progress report, December 1, 1984-February 28, 1985, 10:29637 (R;US)
ALUMINIUM OXIDES
Chemical Composition
Creation of tailored surfaces using selective oxidation of ion-implanted materials, 10:31506 (J;US)
Corrosion
High temperature corrosion of ceramics. Progress report, June 15, 1984-June 14, 1985, 10:31528 (R;US)
Mechanical Properties
Transformation toughening in the Al_2O_3-Cr_2O_3/ZrO_2-HfO_2 system, 10:31391 (RA;US)
Transformation toughening of ceramics for engines, 10:31392 (RA;US)
Physical Properties
β''-alumina research, 10:31075 (RA;US)
β alumina research, 10:31074 (RA;US)
Glass electrolytes for sodium/sulfur cells, 10:31077 (RA;US)
Improved β''-Al_2O_3 electrolyte through transformation toughening, 10:31076 (RA;US)
Production
Synthesis of ultrafine ceramic and metallic powders in a thermal argon rf plasma, 10:31533 (R;US)
Research Programs
β''-alumina research, 10:31075 (RA;US)
β alumina research, 10:31074 (RA;US)
Glass electrolytes for sodium/sulfur cells, 10:31077 (RA;US)
Improved β''-Al_2O_3 electrolyte through transformation toughening, 10:31076 (RA;US)
Sulfidation
Novel sorbents for high temperature regenerative H_2S removal. Quarterly report No. 4, November 1984-January 1985, 10:29619 (R;US)
ALUMINIUM-AIR BATTERIES
Anodes
Progress in aluminum-air battery development, 10:31099 (RA;US)
Cathodes
Progress in aluminum-air battery development, 10:31099 (RA;US)
ALUMINUM

ANALYSIS (GAS)
See GAS ANALYSIS
ANALYSIS (THERMAL)
See THERMAL ANALYSIS
ANEUPLOIDY
Screening
Experimental approaches for the detection of chromosomal malsegregation occurring in the germline of mammals, 10:32229 (R;US)
ANGIOGRAPHY
See BIOMEDICAL RADIOGRAPHY
ANIMAL FEEDS
Radiosterilization
Irradiation effect on animal feeds and feedstuffs, 10:32312 (R;JP;In Japanese)
ANL
Fire Prevention
Fire protection review revisit No. 2, Argonne National Laboratory, Argonne, Illinois, 10:32378 (R;US)
ANNULAR FUEL ELEMENTS
Performance Testing
Graphite disc - oxide fuel elements for high powers and extended burnups, 10:30729 (RA;XA)
Specifications
Graphite disc - oxide fuel elements for high powers and extended burnups, 10:30729 (RA;XA)
ANODES
Performance Testing
Progress in aluminum-air battery development, 10:31099 (RA;US)
ANOXIA
Biological Effects
Effect of acute prenatal hypoxia on the incorporation of ^{15}N in the brain and liver protein of rats aged 6 and 11 days, 10:32355 (RA;DD)
ANTENNAS
Computerized Simulation
Numerical modeling of objects near a penetrable interface, 10:31816 (R;US)
Electric Fields
Moment-method formulation of the cavity-probe aperture antenna, 10:31813 (R;US)
Interfaces
Numerical modeling of objects near a penetrable interface, 10:31816 (R;US)
Moments Method
Moment-method formulation of the cavity-probe aperture antenna, 10:31813 (R;US)
ANTHRACENE
Solvent Properties
Solvent tailoring in coal liquefaction based on critical properties of physical solvating agents and hydrogen donors. Progress report, August 1980-January 1981, 10:29621 (R;US)
ANTHRACITE
Chemical Composition
Characterization of coal surfaces. Technical progress report, 5 February 1985-20 May 1985, 10:29659 (R;US)

Oxidation
Characterization of coal surfaces. Technical progress report, 5 February 1985-20 May 1985, 10:29659 (R;US)
Surface Properties
Characterization of coal surfaces. Technical progress report, 5 February 1985-20 May 1985, 10:29659 (R;US)

ANTIFERROMAGNETIC MATERIALS
Modulation
Landau theory for uniaxial systems near a Lifshitz point under applied fields, 10:32837 (R;BR)
Phase Diagrams
Landau theory for uniaxial systems near a Lifshitz point under applied fields, 10:32837 (R;BR)

ANTIFERROMAGNETISM
Phase Diagrams
Critical phase for the antiferromagnetic Z(5) model on a square lattice, 10:32838 (R;BR)
Phase Transformations
Critical phase for the antiferromagnetic Z(5) model on a square lattice, 10:32838 (R;BR)

ANTILAMBDA PARTICLES
Particle Production
Neutral strange particle production in K^+ p interactions at 32 GeV/c, 10:32561 (R;SU;In Russian)

ANTI-MISSILE SYSTEMS
See SPACE WEAPONS

ANTIMONY
Emission Spectroscopy
Spectrochemical determination of impurities in aluminium alloys by DC arc technique, 10:31634 (R;IL;In Hebrew)

ANTIMONY ALLOYS
De Haas-Van Alphen Effect
Fermi surface study of CeSb in the ferromagnetic and antiferromagnetic phases , 10:31438 (R;US)

ANTIMONY IODIDES
Chemical Preparation
Synthesis of $Sb^{131}I_3$ crystals, 10:31698 (RA;IL)

ANTIMONY SELENIDES
Segregation
Radioactive tracer study of segregation in grown n-type thermoelectric alloys, 10:31565 (RA;IL)

ANTIMONY SULFIDES
Diagnostic Uses
Tc-99m antimony trisulfide colloid for lymphoscintigraphy, 10:32262 (RA;IL)

ANTIMONY TELLURIDES
Segregation
Radioactive tracer study of segregation in grown n-type thermoelectric alloys, 10:31565 (RA;IL)

ANTINEOPLASTIC DRUGS
Carcinogen Screening
Mutagenicity and cytotoxicity of five antitumor ellipticines in mammalian cells and their structure-activity relationships in Salmonella, 10:32362 (J;US)
Mutagen Screening
Mutagenicity and cytotoxicity of five antitumor ellipticines in mammalian cells and their structure-activity relationships in Salmonella, 10:32362 (J;US)

ANTIPROTON BEAMS
Beam Production
Beam cooling and anti-proton production, 10:31878 (RA;US)
Electron Cooling
Phase-space cooling of ion beams, 10:31892 (R;CH)
Stochastic Cooling
Phase-space cooling of ion beams, 10:31892 (R;CH)

ANTIREFLECTION COATINGS
Damage
Pulse duration dependence of 1064-nm laser damage thresholds of porous silica antireflection coatings on fused silica substrates, 10:31581 (R;US)
Pulsed D_2-F_2 chain-laser damage to coated window and mirror components, 10:31763 (R;US)
Physical Radiation Effects
Pulse duration dependence of 1064-nm laser damage thresholds of porous silica antireflection coatings on fused silica substrates, 10:31581 (R;US)

ANTI-SATELLITE SYSTEMS
See SPACE WEAPONS

ANTRIM SHALES

ATMOSPHERIC PRECIPITATIONS
Chemical Composition
Throughfall rate and chemistry studies: Whiteface Mountain, 10:32132 (R;US)
Sampling
Elemental tracers of source regions of contaminants in precipitation. Second quarterly report, 10:32136 (R;US)
ATOMIC BEAM SOURCES
Beam Cooling
Cooling high intensity atomic hydrogen beams to liquid helium temperatures, 10:32478 (R;US)
ATOMIC BOMBS
See NUCLEAR WEAPONS
ATOMIC CLOUDS
See RADIOACTIVE CLOUDS
ATOMIC ENERGY
See NUCLEAR ENERGY
ATOMIC ENERGY OF CANADA LTD
See also CHALK RIVER NUCLEAR LABS
Research Programs
1982-1983 annual report [Atomic Energy of Canada Ltd.] (Atomic Energy of Canada Ltd.), 10:31124 (R;CA)
ATOMIC EXPLOSIONS
See NUCLEAR EXPLOSIONS
ATOMIC FLUORESCENCE SPECTROSCOPY
See FLUORESCENCE SPECTROSCOPY
ATOMIC MODELS
One-Dimensional Calculations
High-intensity ionization approximations: test of convergence in a one-dimensional model, 10:32504 (R;BR)
ATOMIC PHYSICS
Use only for indexing articles of very broad coverage, such as annual reviews, text books, etc.
Research Programs
Activities of Working Group on Atomic, Molecular and Nuclear Data for Medical Science, 10:32803 (R;JP;JA)
ATOMIC WEAPONS
See NUCLEAR WEAPONS
ATOMIZATION
Structural Models
Modeling of engine sprays, 10:31412 (R;US)
ATOMKRAFTWERK MUEHLEBERG
See MUEHLEBERG REACTOR
ATOMS
See also MUONIC ATOMS
Electromagnetic Fields
Nonperturbative treatment of decaying states, 10:32506 (R;BR)
Excitation
Nonperturbative treatment of decaying states, 10:32506 (R;BR)
Excited States
Studies of collisional and nonlinear radiative process for development of coherent uv and xuv sources. Final report, November 1983-November 1984, 10:32477 (R;US)
Ionization
High-intensity ionization approximations: test of convergence in a one-dimensional model, 10:32504 (R;BR)
ATP
Biochemical Reaction Kinetics
Stimulation of Escherichia coli DNA photoreactivating enzyme activity by adenosine 5'-triphosphate, 10:32340 (J;US)
ATTACHED GREENHOUSES
Computer-Aided Design
The custom passive solar sunspace: some design alternatives, 10:30507 (BA;US)
Construction
Solar Architecture in Schools: An innovative community approach, 10:30450 (BA;US)
Design
Sunspace performance and design flexibility in three climates, 10:30525 (BA;US)
Glazing Materials
Comparison of vertical high performance glazing to sloped double glazing with movable insulation, 10:30484 (BA;US)
Marketing
Marketing attached greenhouses in an affordable subdivision: Fairway Village, Santa Fe, NM, 10:30290 (BA;US)
Monitoring
Two years experience: thermal performance and operating data of the first German 2-story greenhouse retrofit in the city of Kiel, West Germany, 10:30501 (BA;US)
Performance
Sunspace performance and design flexibility in three climates, 10:30525 (BA;US)
The custom passive solar sunspace: some design alternatives, 10:30507 (BA;US)

Two years experience: thermal performance and operating data of the first German 2-story greenhouse retrofit in the city of Kiel, West Germany, 10:30501 (BA;US)
Research Programs
Solar Architecture in Schools: An innovative community approach, 10:30450 (BA;US)
Thermal Efficiency
Energy savings potential for attached sunspaces in different climates, 10:30530 (BA;US)
Sunspace performance and design flexibility in three climates, 10:30525 (BA;US)
ATTICS
U Values
Modeling of residential attics, 10:31227 (RA;US)
ATUCHA REACTOR
Lima, Buenos Aires, Argentina
Moderators
Test models and solutions for the moderator circuit failure in PHWR Atucha I, 10:30945 (RA;XA)
Testing
Test models and solutions for the moderator circuit failure in PHWR Atucha I, 10:30945 (RA;XA)
Thermal Fatigue
Test models and solutions for the moderator circuit failure in PHWR Atucha I, 10:30945 (RA;XA)
ATUCHA-1 REACTOR
See ATUCHA REACTOR
AURORAE
Electric Fields
Simulation study of type 2 counterstreaming electrons along auroral field lines, 10:32467 (J;US)
Electrons
Simulation study of type 2 counterstreaming electrons along auroral field lines, 10:32467 (J;US)
AURORAL ELECTROJETS
See ELECTROJETS
AURORAL ZONES
Plasma Waves
Effects of magnetic shear on lower hybrid waves in the supraauroral region. Final report, 1 April 1983-31 March 1984, 10:32458 (R;US)
AUSTENITIC STEELS
Prior to February, 1978 STEELS and AUSTENITE were used to index this concept.
See also STEEL-DIN-1-4301
Mechanical Properties
Tritium-helium effects in metals, 10:32994 (R;US)
Tensile Properties
Tritium-helium effects in metals, 10:32994 (R;US)
AUSTRIA
Energy Policy
Austria - energy situation 1983, 10:31149 (R;DE;In German)
Energy Supplies
Austria - energy situation 1983, 10:31149 (R;DE;In German)
AUTOIONIZATION
Resonance
Exit channels of autoionization resonances in atoms, 10:32480 (R;US)
AUTOMOBILE EFFICIENCY STANDARDS
See AUTOMOBILES
AUTOMOBILE INDUSTRY
See AUTOMOTIVE INDUSTRY
AUTOMOBILES
Diesel Engines
Advanced automotive diesel assessment program, 10:31385 (RA;US)
Engines
Direct and indirect costs arising from implementation of new engines, 10:31125 (R;US)
Gas Turbine Engines
AGT 100 Advanced Gas Turbine Technology Project, 10:31405 (RA;US)
AGT101 advanced gas turbine development program, 10:31406 (RA;US)
Ceramic life prediction methodology, 10:31411 (RA;US)
Characterization of sintered reaction bonded silicon nitride, 10:31409 (RA;US)
Development of alpha silicon carbide components for gas turbine applications, 10:31408 (RA;US)
Fabrication of silicon nitride turbine engine components, 10:31407 (RA;US)
Injection molded silicon nitride for engine applications: fabrication and properties, 10:31410 (RA;US)
Welcome and program overview, 10:31379 (RA;US)
Internal Combustion Engines
Keynote address (Automotive Technology Development Program), 10:31380 (RA;US)
Spark Ignition Engines
Advanced on-board storage concepts for compressed natural gas fueled automotive vehicles, 10:31396 (RA;US)
Stirling Engines
Automotive Stirling Engine Development Program: overview and status report, 10:31413 (RA;US)
Automotive Stirling engine component development advances, 10:31414 (RA;US)
Ceramic automotive Stirling engine conceptual design, 10:31420 (RA;US)
Experimental evaluation of working gas containment in the automotive Stirling engine, 10:31417 (RA;US)
Free-piston Stirling engine endurance test program, 10:31421 (RA;US)
Initial testing of a variable-stroke Stirling engine, 10:31418 (RA;US)
Low cost Stirling engines, 10:31422 (RA;US)
Statistical life-testing of Stirling engine main seals (84ASE359TR29), 10:31416 (RA;US)
Stirling engine heater head stress analysis (84ASE360TR30), 10:31419 (RA;US)
Welcome and program overview, 10:31379 (RA;US)
AUTOMOTIVE FUELS
Comparative Evaluations
Influence of ethanol and methanol gasoline blends on the mutagenicity of particulate exhaust extracts, 10:32369 (J;DE)
Fuel Substitution
The costs of transportation fuel from methanol versus oil sands, 10:29645 (R;CA)
AUTOMOTIVE INDUSTRY
Energy Conservation
Keynote address (Automotive Technology Development Program), 10:31380 (RA;US)
Meetings
Industry Perspectives Session, 10:31393 (RA;US)
AVIATION FUELS
Sales
Petroleum Marketing Monthly, March 1985, 10:29780 (R;US)

B

B MESONS
Particle Decay
Recent results in upsilon spectroscopy from CESR, 10:32575 (J;US)
BACILLUS SUBTILIS
DNA Repair
DNA repair in B. subtilis: an inducible dimer specific W-reactivation system, 10:32342 (J;DE)
Genetics and specificity of the constitutive excision repair system of Bacillus subtilis, 10:32367 (J;DE)
Gene Recombination
Genetics and specificity of the constitutive excision repair system of Bacillus subtilis, 10:32367 (J;DE)
Radioinduction
DNA repair in B. subtilis: an inducible dimer specific W-reactivation system, 10:32342 (J;DE)
BACTERIA
See also AEROBACTER
CLOSTRIDIUM
ESCHERICHIA COLI
HAEMOPHILUS
SALMONELLA
STREPTOCOCCUS

Competition
Competition among rhizobium species for nodulation of Leucaena leucocephala in two tropical soils, 10:32281 (J;US)
Infectivity
Structure and synthesis of histopine, a histidine derivative produced by crown gall tumors, 10:32220 (J;US)
Pollution Sources
Indoor air pollution, 10:32127 (R;US)

BAG MODEL
Dirac Equation
Relativistic quark model, 10:32594 (R;BR)
Single-Particle Model
Relativistic quark model, 10:32594 (R;BR)

BALLOONING INSTABILITY
Stabilization
RF stabilization of interchange-ballooning modes, 10:32919 (R;US)

BALTIC SEA
Coastal Regions
Case study of a boundary layer wind regime in stably stratified air over the Baltic Sea, 10:30642 (R;SE)
Radiation Monitoring
Study on radioactive contamination of the Baltic Sea in 1979-1980, 10:32200 (R;SU;In Russian)
Wind
Case study of a boundary layer wind regime in stably stratified air over the Baltic Sea, 10:30642 (R;SE)
Wind-climatic study of profile measurements at Naesskaer, 10:30613 (R;SE;In Swedish)

BANKS
See COMMERCIAL BUILDINGS

BARIUM
Chemical Analysis
Barium and radium in water-treatment-plant wastes. Report for September 1983-May 1984, 10:31363 (R;US)

BARIUM 126
Moment of Inertia
Dynamic moment of inertia in the Ba-region, 10:32729 (R;FR)

BARIUM 128
Moment of Inertia
Difference of the dynamic moment of inertia Isub(band)sup(2)) for Xe and Ba nuclei, 10:32728 (R;FR)

BARIUM CARBONATES
Catalytic Effects
Catalyzed gasification of coal: isotope and XPS studies. Reporting period: February 16, 1985-May 15, 1985, 10:29632 (R;US)

BARRIERS
See DIFFUSION BARRIERS

BARSEBAECK-1 REACTOR
Barsbaeck, Malmo, Sweden
Reactor Decommissioning
Technology and cost for decommissioning Swedish nuclear power plants, 10:31035 (R;SE;In Swedish)

BARSTOW SOLAR PILOT PLANT
10-MW solar central receiver pilot plant at Barstow, California.
Cost Estimation
Solar One project, 10:30354 (BA;US)
Performance
Monograph series No. 2: 10 MWe Sclar Thermal Central Receiver Pilot Plant and receiver performance evaluation, 10:30353 (R;US)

BARYON NUMBER 2 RESONANCES
See DIBARYON RESONANCES

BARYONS
See also HYPERONS
Mass Difference
Electromagnetic mass differences between baryons in potential models, 10:32585 (R;FR)
Mass Spectra
Quark model for baryons-negative parity states, 10:32607 (R;BR)
Quark Model
Quark model for baryons-negative parity states, 10:32607 (R;BR)

BASALT
Fluid Flow
Groundwater travel time uncertainty analysis. Sensitivity of results to model geometry, and correlations and cross correlations among input parameters, 10:30017 (R;US)
Fracture Properties
Critical parameters for a high-level waste repository. Volume 1. Basalt, 10:29953 (R;US)
Geology
Critical parameters for a high-level waste repository. Volume 1. Basalt, 10:29953 (R;US)
Geology and basalt stratigraphy of the Weiser embayment, west-central Idaho, 10:29968 (R;US)
Hydrology
Critical parameters for a high-level waste repository. Volume 1. Basalt, 10:29953 (R;US)
Lithology
Geology and basalt stratigraphy of the Weiser embayment, west-central Idaho, 10:29968 (R;US)
Radioactive Waste Disposal
Geology and basalt stratigraphy of the Weiser embayment, west-central Idaho, 10:29968 (R;US)
Stratigraphy
Geology and basalt stratigraphy of the Weiser embayment, west-central Idaho, 10:29968 (R;US)

BATTERIES (ELECTRIC)
See ELECTRIC BATTERIES

BATTERY SEPARATORS
Research Programs
Cationic exchange membrane for the zinc-ferricyanide battery. Final report, 10:31109 (R;US)

BEAD WALLS
Monitoring
Monitored performance of Patoka nature center: A direct gain building with BEADWALL night insulation in southern Indiana, 10:30428 (BA;US)
Performance
Monitored performance of Patoka nature center: A direct gain building with BEADWALL night insulation in southern Indiana, 10:30428 (BA;US)

BEAM BENDING MAGNETS
Beam Optics
Measurement and resulting first and second order approximations for a 9 degree bending magnet in LAMPF's 750-keV transport, 10:31899 (R;US)

BEAM BUNCHERS
Design
Proposed bunching scheme for a polarized H^- injector, 10:31983 (R;US)
Proton Beams
RF measurment of split-coaxial RFQ structure, 10:31974 (RA;JP;In Japanese)

BEAM BUNCHING
Kilo Amp Beam Currents
Wake field generated by a high-current single bunch, 10:31960 (RA;JP;In Japanese)

BEAM CHOPPERS
See BEAM PULSERS

BEAM DYNAMICS
See also BEAM BUNCHING
BEAM-BEAM INTERACTIONS
Apertures
Determination of the dynamic aperture of circular accelerators by the perturbation theory method, 10:31930 (RA;US)
Computer Codes
Deprit's algorithm, Green's functions, and multipole perturbation theory, 10:31894 (R;US)
JINR U-400 Cyclotron
Calculation of some characteristics of the beam dynamics in the central region of the U-400 cyclotron, 10:31896 (R;SU;In Russian)

BEAM EXTRACTION
Optimization
CANAL code, 10:31946 (R;FR;In French)
Windows
Beam line windows at LAMPF, 10:31986 (R;US)

BEAM INJECTION
See also NEUTRAL ATOM BEAM INJECTION
Control
Operation of PF injector throuch a minicomputer network, 10:31966 (RA;JP;In Japanese)
BEAM MONITORS
Monitoring and calibration system for neutrino flux measurement in a high energy dichromatic beam, 10:32001 (J;NL)
Secondary electron profile monitor, 10:31951 (RA;JP;In Japanese)
Apertures
Aperture requirements for the beam position monitor and closed orbit distortions, 10:31931 (RA;US)
Beam Profiles
Beam profile monitor using Cerenkov light, 10:31953 (RA;JP;In Japanese)
Electrodes
Coupling impedance of position monitor electrodes, 10:31883 (RA;US)
Linear Accelerators
Beam loss monitoring system for 2.5GeV electron Linac, 10:31955 (RA;JP;In Japanese)
Maintenance
Time domain reflectometry for SLC BPM system. Revision, 10:31996 (R;US)
Phosphors
High-resolution phosphor screen beam profile monitor, 10:31994 (R;US)
Remote Viewing Equipment
High resolution beam profile monitors in the SLC, 10:31910 (R;US)
High-resolution phosphor screen beam profile monitor, 10:31994 (R;US)
BEAM POSITION
Beam Monitors
Real time beam position monitor, 10:31969 (RA;JP;In Japanese)
BEAM PROFILES
Beam Monitors
High-resolution phosphor screen beam profile monitor, 10:31994 (R;US)
BEAM PULSERS
Performance
Nanosecond electron gun with a compact cathode pulser, 10:31965 (RA;JP;In Japanese)
BEAM TRANSPORT
Beam Focusing Magnets
Note on reversible dispersion matching with arbitrary phase advance, 10:31922 (RA;US)
Beam Monitors
Beam monitors in the transport line of the photon factory storage ring, 10:31970 (RA;JP;In Japanese)
Instability
High current beam hollowing instability study. Final technical report, 10:32474 (R;US)
Planning
Design of PF beam-transport-line, 10:31971 (RA;JP;In Japanese)
BEAM WIDTHS
See BEAM PROFILES
BEAM-BEAM INTERACTIONS
Computerized Simulation
Comparison between theoretical predictions and tracking, 10:31891 (R;US)
BEAM-PLASMA SYSTEMS
Plasma Diagnostics
Ion transport in beam-plasma interactions. Annual report, 30 September 1983-30 September 1984, 10:32534 (R;US)
Plasma Instability
Electromagnetic ion beam instabilities: Hot beams at interplanetary shocks, 10:32455 (J;US)
BEAUTY PARTICLES
Lifetime
[Emulsion spectrometer experiment for B and C particles], 10:32021 (R;US)
Particle Decay
[Emulsion spectrometer experiment for B and C particles], 10:32021 (R;US)
Reviews
Heavy quark fragmentation, 10:32555 (R;DE)
BEAVER VALLEY-1 REACTOR
Shippingport, Pennsylvania, USA
Radiation Monitoring
Beaver Valley Power Station and Shippingport Atomic Power Station. 1984 Annual environmental report, radiological. Volume 2, 10:30828 (R;US)
BEAVER VALLEY-2 REACTOR
Shippingport, Pennsylvania, USA
Radiation Monitoring
Beaver Valley Power Station and Shippingport Atomic Power Station. 1984 Annual environmental report, radiological. Volume 2, 10:30828 (R;US)
BEES
Behavior
Effects of high-voltage transmission lines on honeybees, 10:32373 (R;US)
BELGIAN REACTOR 3
See BR-3 REACTOR
BELGIUM
PWR Type Reactors
Belgian contributions to improved fuel utilization, 10:30702 (RA;XA)
Experimental programmes on Gadolinium fuel utilization in LWR's in Belgium, 10:30711 (RA;XA)
Seismic Events
Assessment of seismic hazard for NNP sites in France analysis of several aftershocks of November 8, 1983, Liege earthquake, 10:32394 (R;FR)
BELLOWS
Mechanical Properties
Type tests of the welded bellows for the ports of the JT-60 vacuum vessel, 10:33014 (R;JP;In Japanese)
BENTONITE
Radionuclide Migration
Radionuclide diffusion and mobilities in compacted bentonite, 10:32178 (R;SE)
BENZENE
Chemical Reaction Yield
Formation of benzene by the pyrolysis of 4-vinylcyclohexene regiospecific formation of anthracenes in the pyrolysis of dibenzobuerones and related systems, 10:31674 (R;US)
Performance of rare earth modified faujasites in the process of toluene disproportionation, 10:31672 (R;DZ;In French)
Mass Spectra
Formation of benzene by the pyrolysis of 4-vinylcyclohexene regiospecific formation of anthracenes in the pyrolysis of dibenzobuerones and related systems, 10:31674 (R;US)
Radiolysis
Ionization of the hydroxycyclohexadienyl radical in concentrated KOH: a measure of the activity of OH^- in highly basic media, 10:31694 (J;US)
Solubility
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)
Solvent Properties
Phase behavior of coal fluids: data for correlation development. Reporting period: November 1, 1984-April 30, 1985, 10:29635 (R;US)
Solvent tailoring in coal liquefaction based on critical properties of physical solvating agents and hydrogen donors. Progress report, August 1980-January 1981, 10:29621 (R;US)
Synthesis
Flash hydropyrolysis and methanolysis of biomass with hydrogen and methane, 10:30063 (R;US)
BENZIDINE
Liquid Column Chromatography
Capillary supercritical fluid chromatography/mass spectrometry with electron impact ionization, 10:31640 (J;US)

Mass Spectroscopy
Capillary supercritical fluid chromatography/mass spectrometry with electron impact ionization, 10:31640 (J;US)
BERKELIUM 249
Chemical Preparation
Chemistry of transuranium elements and compounds, 10:31712 (RA;US)
Crystal-Phase Transformations
Chemistry of transuranium elements and compounds, 10:31712 (RA;US)
BERYLLIUM
Aerosol Monitoring
Studies of beryllium aerosols in fusion-related systems, 10:33023 (RA;US)
Ellipsometry
Ellipsometric investigation of Be(0001) oxidation, 10:31504 (J;US)
Lung Clearance
Lung clearance, translocation, and acute toxicity of arsenic, beryllium, cadmium, cobalt, lead, selenium, vanadium, and ytterbium oxides following deposition in rat lung, 10:32356 (J;US)
Oxidation
Ellipsometric investigation of Be(0001) oxidation, 10:31504 (J;US)
Production
[Beryllium production. Monthly technical progress report, 1 April-5 May 1985], 10:31441 (R;US)
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
Toxicity
Lung clearance, translocation, and acute toxicity of arsenic, beryllium, cadmium, cobalt, lead, selenium, vanadium, and ytterbium oxides following deposition in rat lung, 10:32356 (J;US)
BERYLLIUM 7
Radioecological Concentration
Annual report of the Surface Air Sampling Program, 10:32157 (R;US)
BERYLLIUM 9
Proton Reactions
Report of the Research Group. Analyzing-power measurements on quasi-free (p,pα) knockout from ^{9}Be at 150MeV, 10:32677 (RA;ZA)
BERYLLIUM 9 TARGET
Deuteron Reactions
Resonant absorption of deuteron-capture gamma-rays, 10:32684 (RA;NL)
Electron Reactions
Deep inelastic scattering of charged leptons and quark distributions in nuclei, 10:32563 (RA;DE)
Neutron Reactions
Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)
Pion Minus Reactions
Production of omega and phi mesons by 193 GeV/C pions and 250 GeV/C protons on a beryllium target, 10:32558 (R;US)
Proton Reactions
(p,d) and (p,t) reactions on ^{9}Be at Esub(p)=50 and 72 MEV, 10:32689 (RA;SU;In Russian)
Production of omega and phi mesons by 193 GeV/C pions and 250 GeV/C protons on a beryllium target, 10:32558 (R;US)
Resonance Absorption
Resonant absorption of deuteron-capture gamma-rays, 10:32684 (RA;NL)
BERYLLIUM ALLOYS
Debye Temperature
Investigation into temperature dependence of specific heat of $Zr_{70}Be_{30}$ superconductive system in amorphous and crystalline, states in the temperature range of 100 to 500 K, 10:31458 (R;SU;In Russian)
Specific Heat
Investigation into temperature dependence of specific heat of $Zr_{70}Be_{30}$ superconductive system in amorphous and crystalline, states in the temperature range of 100 to 500 K, 10:31458 (R;SU;In Russian)
BERYLLIUM MODERATORS
See BERYLLIUM
BETA BEAMS (ELECTRONS)
See ELECTRON BEAMS
BETA DETECTION
Beta response of selected instruments, 10:32033 (R;US)
BETA-MINUS DECAY RADIOISOTOPES

Solar Energy Education. Renewable energy: a background text, 10:30544 (R;US)
Educational Tools
Solar Energy Education. Renewable energy activities for biology, 10:30298 (R;US)
Gasification
Gasification of biomass and peat. Progress report for the period 810701-830630, 10:29642 (R;SE;In Swedish)
Harvesting
Energy Forest. Experiment on a large scale Domaen. Progress report 2 (Sweden), 10:30317 (R;SE;In Swedish)
Liquefaction
Biomass thermochemical liquefaction, 10:30074 (R;FR;In French)
Technology Assessment
Alternative liquid fuels, 10:30082 (R;CA)
Technology Utilization
Pellets as fuel II. A study of methods and ways of development in the combustion of pellets, 10:29726 (R;SE;In Swedish)
BIOMASS PLANTATIONS
Emergent aquatic plants: biological and economic perspectives, 10:30330 (J;GB)
Site Selection
Resource evaluation and site selection for microalgae production systems, 10:30315 (R;US)
BIOMEDICAL RADIOGRAPHY
See also INDUSTRIAL RADIOGRAPHY.
Proceedings of the 12. congress of Hungarian radiologists held at Debrecen, Hungary, 27-29 August 1984. Abstracts of papers, 10:32268 (R;HU;In several languages)
Beam Monitoring
Development and operation of a method for the remote determination of X-ray beam parameters used in dental radiography, 10:32271 (R;GB)
Shielding
New method of checking the shielding of medical radiography rooms, 10:32822 (RA;AT;In German)
BIPHENYL
Liquid Column Chromatography
Capillary supercritical fluid chromatography/mass spectrometry with electron impact ionization, 10:31640 (J;US)
Mass Spectroscopy
Capillary supercritical fluid chromatography/mass spectrometry with electron impact ionization, 10:31640 (J;US)
Rapid and efficient capillary column supercritical fluid chromatography with mass spectrometric detection, 10:31645 (J;US)
Supercritical Fluid Chromatography
Rapid and efficient capillary column supercritical fluid chromatography with mass spectrometric detection, 10:31645 (J;US)
BIPHENYLDIAMINE
See BENZIDINE
BIRDS
Behavior
Report of the Van de Graaff Group: NUCOR Isotope Unit. Autoradiographic gauges for penguin movements, 10:32212 (RA;ZA)
BISMUTH
Adsorption
Influence of adsorbed Bi on the chemisorption properties of Pt(111):H_2, CO, and O_2, 10:31501 (J;US)
Neutron Reactions
Neutron-induced reactions and secondary-ion mass spectrometry: complementary tools for depth profiling. Final report, 10:32804 (R;US)
Surface Properties
Ordered steps on Bi(~ 0001) vicinal surfaces by laser pulse anneal, 10:31520 (J;NL)
BISMUTH 209 TARGET
Neon 20 Reactions
Fission induced by heavy ions, 10:32745 (RA;NL)
Neutron Reactions
Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)
BISMUTH 214
Gamma Spectroscopy
Emanation coefficients for Rn in sized coal fly ash, 10:29687 (J;GB)
BISMUTH TELLURIDES
Segregation
Radioactive tracer study of segregation in grown n-type thermoelectric alloys, 10:31565 (RA;IL)
BISULFATES
See ACID SULFATES
BITUMENS
See also ASPHALTS

Combustion Properties
Alternate fuels for maritime use, 10:31324 (RA;US)
Physical Properties
Upgrading Utah tar sand bitumen to syncrude, 10:29832 (RA;US)
Qualitative Chemical Analysis
Distributions of nitrogen functional groups in Utah tar sand bitumen and produced oils, 10:29831 (RA;US)
Quantitative Chemical Analysis
Application of carbon-13 and proton NMR to the average structure analysis of Athabasca, Santa Rosa, and Asphalt Ridge tar sand bitumens, 10:29830 (RA;US)
Distributions of nitrogen functional groups in Utah tar sand bitumen and produced oils, 10:29831 (RA;US)
Recovery
Application of TG concepts to in-situ combustion processes in tar sands, 10:29826 (RA;US)
Cost analysis of water pollution control during in-situ production of bitumen from tar sand, 10:29850 (RA;US)
Dravo solvent extraction process for tar sand: update, 10:29835 (RA;US)
Heavy oil from Kentucky tar sands via a wet combustion process, 10:29825 (RA;US)
Laboratory simulation of bitumen recovery by steam stimulation of horizontal wells, 10:29822 (RA;US)
Laboratory investigation of the steam displacement process in a Utah tar sand, 10:29823 (RA;US)
Mined oil sands bitumen extraction, 10:29828 (RA;US)
Physical simulator for horizontal well, 10:29821 (RA;US)
Process development in in-situ recovery of bitumen from oil sands, 10:29820 (RA;US)
Relative supply prices for non-conventional Canadian domestic oil, 10:29819 (RA;US)
Tar sand analysis, 10:29827 (RA;US)
Thermal recovery of bitumen from tar sands, 10:29834 (RA;US)
Use of CO$_2$ with steam in bitumen recovery from oil sands: effect of injection strategies, 10:29824 (RA;US)
Refining
Pyrolysis of the bitumen-impregnated sandstone from the P.R. Spring (Utah) deposit in a fluidized bed, 10:29833 (RA;US)
Upgrading Utah tar sand bitumen to syncrude, 10:29832 (RA;US)
Reserves
Geology and resources of the Tar Sand Triangle, southeastern Utah, 10:29815 (RA;US)
Results of the DOE-OGS tar sand coring program, south-central Oklahoma, 10:29816 (RA;US)
Viscosity
Viscosity of heavy oil and bitumen which contain subsaturation concentrations of carbon dioxide, 10:29829 (RA;US)

BITUMINOUS COAL
Chemical Bonds
Coal structure and reactivity: the macromolecular structure of coal. Final report, 10:29653 (R;US)
Chemical Composition
Characterization of coal surfaces. Technical progress report, 5 February 1985-20 May 1985, 10:29659 (R;US)
Devolatilization
Flash hydropyrolysis and methanolysis of coal with hydrogen and methane, 10:29617 (R;US)
Molecular Structure
Coal structure and reactivity: the macromolecular structure of coal. Final report, 10:29653 (R;US)
Oxidation
Characterization of coal surfaces. Technical progress report, 5 February 1985-20 May 1985, 10:29659 (R;US)
Solvent Extraction
Coal structure and reactivity: the macromolecular structure of coal. Final report, 10:29653 (R;US)
Swelling
Coal structure and reactivity: the macromolecular structure of coal. Final report, 10:29653 (R;US)
Wettability
Characterization of coal surfaces. Technical progress report, 5 February 1985-20 May 1985, 10:29659 (R;US)

BLACK HOLES
Entropy
Statistical mechanical origin of the entropy of a rotating, charged black hole, 10:32874 (J;US)
Quantum Mechanics
Quantum and thermodynamic aspects of Black Holes, 10:32447 (R;BR;In Portuguese)
Thermodynamics
Quantum and thermodynamic aspects of Black Holes, 10:32447 (R;BR;In Portuguese)

BLACK LUNG DISEASE
See PNEUMOCONIOSES

BLACK SHALES
Stratigraphy
Geological investigation of uranium resources, 10:29878 (R;KR;KO)

BLACKOUTS
Evaluation of Station Blackout accidents at nuclear power plants. Technical findings related to Unresolved Safety Issue A-44. Draft report for comment, 10:30967 (R;US)

BLADES (TURBINES)
See TURBINE BLADES

BLANKETS (BREEDING)
See BREEDING BLANKETS

BLAST FURNACES
Retrofitting
Assessment of blast furnace retrofit for the co-manufacture of steel, electricity, and synfuels. Final report, 10:29646 (R;US)

BLOOD
Radiochemical Analysis
^{15}N isotopic analysis in biological materials using the ^{15}N analyzer NOI-6, 10:32274 (RA;DD;In German)
Sampling
Collection and manipulation of samples for trace element analysis. Quality assurance considerations, 10:31600 (RA;XA)

BLOOD CIRCULATION
Radioisotope Scanning
Comparison of 201-Tl myocardial perfusion scan and 99m-TC cine-VG on IHD patients under ergometric stress and with dipyridamole infusion, 10:32265 (RA;HU)
Synopsis of global and regional left ventricular ejection fraction (LV-EF). Determination methodology by nuclear cardiological methods, 10:32264 (RA;HU)

BLOOD FLOW
Inhibition
Effects of CdCl$_2$ on the maternal-to-fetal clearance of ^{67}Cu and placental blood flow, 10:32360 (J;US)

BLOOD SERUM
PIXE Analysis
Report of the Van de Graaff Group: nuclear analysis. Trace element composition of maternal and infant serum determined by PIXE, 10:31627 (RA;ZA)
Sampling
Collection and manipulation of samples for trace element analysis. Quality assurance considerations, 10:31600 (RA;XA)

BOILERS
See also FLUIDIZED BED BOILERS
Air Pollution Abatement
Overview of EPA's (Environmental Protection Agency's) LIMB technology development program, 10:32146 (R;US)
Computerized Simulation
Process simulation software KATTILA. General routines, 10:29729 (R;FI;In Finnish)
Process simulation software KATTILA. Computation of equipment modules, 10:29730 (R;FI;In Finnish)
Process simulation software KATTILA. Computation of material and flow properties, 10:29731 (R;FI;In Finnish)
Process simulation software KATTILA. User handbook, 10:29732 (R;FI;In Finnish)
Design
Conversion of oil-designed utility boilers to pulverized coal or coal-water mixture firing. Final report, 10:29722 (R;US)
Heat Transfer
Simple heat transfer model for shell type boilers, 10:29733 (R;FI;In Finnish)

Tests of turbulators for fire-tube boilers. Final report, 29 September 1981-31 December 1982, 10:31824 (R;US)
Performance
Coal-fired boilers for the 1980's, 10:31339 (RA;US)
Retrofitting
Conversion of oil-designed utility boilers to pulverized coal or coal-water mixture firing. Final report, 10:29722 (R;US)
Soot
Sound propagation in boilers and heat exchangers equipped with sonic sootblowing, 10:31828 (R;SE;In Swedish)
Sound Waves
Sound propagation in boilers and heat exchangers equipped with sonic sootblowing, 10:31828 (R;SE;In Swedish)
BOILING WATER COOLED AND MODERATED REACTO
See BWR TYPE REACTORS
BONE MARROW CELLS
Biological Functions
Analysis of the hematopoietic effects of new dominant spotting (W) mutations of the mouse. I. Influence upon hematopoietic stem cells, 10:32233 (J;DK)
BONES
See SKELETON
BORANES
Chemical Bonds
Photoelectron spectroscopic study of bonding in inorganic and organometallic compounds (Boron trihalides; silyl amines; thiazyl fluorides; borane adducts; transition metal complexes with isocyanides and olefins), 10:31658 (R;US)
Chemical Reactions
Synthesis of aryl halides via organoborane chemistry, 10:31680 (J;ZZ)
BORATES
Specific compounds, except those of significance to energy reserach and development, should be indexed by coordination of a descriptor of the form (CATION) COMPOUNDS and the above anion descriptor.
Precipitation
Use of Co-60 gamma irradiation to simulate decomposition of tetraphenylborate precipitates from high-level radioactive waste, 10:29923 (R;US)
Radiolysis
Use of Co-60 gamma irradiation to simulate decomposition of tetraphenylborate precipitates from high-level radioactive waste, 10:29923 (R;US)
BOREHOLES
Lithology
Lithologic logs of selected exploratory and emplacement drill holes in areas 9 and 10, Nevada Test Site, 10:32392 (R;US)
Seasonal Thermal Energy Storage
Bore hole heat store in rock. Investigation of an alternative heat store for the Soedertuna solar heating project, 10:30561 (R;SE;In Swedish)
BORON
Emission Spectroscopy
Spectrochemical determination of impurities in aluminium alloys by DC arc technique, 10:31634 (R;IL;In Hebrew)
Nuclear Reaction Analysis
Report of the Van de Graaff Group: nuclear analysis. The search for molecular effects in range corrections in elemental determination by proton bombardment, 10:31618 (RA;ZA)
Phase Diagrams
Processing and microstructural characterization of B_4C-Al cermets, 10:31548 (R;US)
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
BORON 10
E2-Transitions
E2 strength of the lowest resonance in ^{6}Li(α,γ): Collective effects in the 1p shell, 10:32693 (J;US)
BORON ALLOYS
Physical Radiation Effects
Effect of damage rates and different kinds of irradiation on the ductility of amorphous $Fe_{40}Ni_{40}B_{20}$, 10:31447 (R;DE)
BORON COMPOUNDS
See also BORANES
BORATES
BORON OXIDES
Chemical Bonds
Photoelectron spectroscopic study of bonding in inorganic and organometallic compounds (Boron trihalides; silyl amines; thiazyl fluorides; borane adducts; transition metal complexes with isocyanides and olefins), 10:31658 (R;US)
BORON OXIDES
Corrosion
Electrical conduction and corrosion processes in fast ion conducting glasses, 10:31080 (RA;US)
Electric Conductivity
Electrical conduction and corrosion processes in fast ion conducting glasses, 10:31080 (RA;US)
Removal
Method for removing oxide contamination from silicon carbide powders, 10:31666 (P;US)
BOROSILICATE GLASS
Dissolution
Long-term performance of materials used for high-level waste packaging. Third quarterly report, Year Three, October-December 1984. Vol. 3, 10:31471 (R;US)
Leaching
Chemical durability of alkali aluminosilicate glasses, 10:31556 (R;CA)
Melting
Recirculation within a glass mixture subjected to external and resistive heating, 10:31560 (R;US)
BOROSILICATES
See BOROSILICATE GLASS
BOSON-EXCHANGE MODELS
RPA screening of a meson-exchange force, 10:32772 (RA;NL)
BOTTOM MESONS
See B MESONS
BOTTOM PARTICLES
See BEAUTY PARTICLES
BOTTOM-HOLE PRESSURE
See WELL PRESSURE
BOUNDARY LAYERS
Fluid Mechanics
Study of deposition control using transpiration. Technical progress report, 10:31773 (R;US)
Mathematical Models
Atmospheric boundary layer testing: hot-wire anemometry measurements of turbulent boundary layer flow past a two-dimensional obstacle. 1982-1983 equipment loan report. Supplement 2, 10:32117 (R;US)
Atmospheric boundary layer testing. Final project report, 10:32116 (R;US)
Transpiration
Study of deposition control using transpiration. Technical progress report, 10:31773 (R;US)
Turbulent Flow
Study of deposition control using transpiration. Technical progress report, 10:31773 (R;US)
BOUNDARY VALUE PROBLEMS
See BOUNDARY-VALUE PROBLEMS
BOUNDARY-VALUE PROBLEMS
Finite Element Method
Research program in iterative solution and finite element analysis in computational mechanics. Annual progress report, 1983, 10:33087 (R;US)
BR-3 REACTOR
Plutonium Recycle
Use of BR3 for the Belgian plutonium recycle irradiation programme, 10:30714 (RA;XA)
BRAIN
Metabolism
Effect of acute prenatal hypoxia on the incorporation of ^{15}N in the brain and liver protein of rats aged 6 and 11 days, 10:32355 (RA;DD)
BRAKING RADIATION
See BREMSSTRAHLUNG
BRAWLEY GEOTHERMAL FIELD
Geothermal Power Plants
Development operations: hypersaline geothermal brine utilization, Imperial County, California, 10:30592 (RA;US)

BRAYTON CYCLE
  Cost Benefit Analysis
    Exergy analyses, aspects of their practical use, 10:31833 (R;DK)
  Efficiency
    Exergy analyses, aspects of their practical use, 10:31833 (R;DK)
BRAZIL
  FBR Type Reactors
    Option for the Brazilian nuclear project: necessity of fast breeder reactors and core design for an experimental fast reactor, 10:30741 (R;BR;In Portuguese)
  Hydroelectric Power
    Indian areas threatened by hydroelectric projects in Brazil, 10:30246 (R;DK)
  Hydroelectric Power Plants
    Ecological impacts of hydroelectric projects in Amazonia, 10:30245 (R;BR)
  Indian Reservations
    Indian areas threatened by hydroelectric projects in Brazil, 10:30246 (R;DK)
  LMFBR Type Reactors
    Some basic considerations about the Brazilian nuclear program, 10:30738 (R;BR;In Portuguese)
BREAKDOWN
  Limited to electric discharge phenomena. See also CLEAVAGE or DECOMPOSITION.
  Statistical Models
    Statistical distribution of breakdown voltages in rep-rate spark gaps, 10:31811 (R;US)
BREAKWATERS
  See DAMS
BREEDER REACTORS
  See also FBR TYPE REACTORS
    LWBR TYPE REACTORS
  Breeding Ratio
    Burnup characteristics of binary breeder reactors, 10:30740 (R;BR;In Portuguese)
  Fuel Assemblies
    Burnup characteristics of binary breeder reactors, 10:30740 (R;BR;In Portuguese)
  Reactor Safety
    Project of a binary breeder reactor and its inherent safety, 10:30739 (R;BR;In Portuguese)
  Specifications
    Project of a binary breeder reactor and its inherent safety, 10:30739 (R;BR;In Portuguese)
BREEDING BLANKETS
  Design
    Helium-cooled molten-salt fusion breeder, 10:33040 (R;US)
  Fracture Mechanics
    Stress and lifetime calculations for first wall and blanket structural components. Pt. 1, 10:33018 (R;DE)
  Power Generation
    High energy-multiplication blankets for cat-D fusion reactors, 10:32997 (RA;IL)
  Tritium Recovery
    In-pile test of tritium release from lithium oxide. An evaluation study on neutronics and thermohydraurics of sweep gas capsule packed with Li_2O pellets, 10:33013 (R;JP;In Japanese)
BREEDING RATIO
  Neutron Spectra
    Effect of neutron spectra on the plutonium discharge composition, 10:30775 (RA;IL)
BREMSSTRAHLUNG
  See also SYNCHROTRON RADIATION
  Dosimetry
    Accuracy of coupled Monte-Carlo/next-event-estimator for bremsstrahlung dose predictions, 10:32829 (R;US)
BREMSSTRAHLUNG (MAGNETIC)
  See SYNCHROTRON RADIATION
BRINES
  Additives
    Analysis of drag reducing agents for use at the Strategic Petroleum Reserve site at West Hackberry, Louisiana, 10:29803 (R;US)
  Fluid Flow
    Analysis of drag reducing agents for use at the Strategic Petroleum Reserve site at West Hackberry, Louisiana, 10:29803 (R;US)
  Geochemistry
    Chemical modeling of nuclear waste repositories in the salt repository project, 10:29949 (RA;US)
  Waste Disposal
    Analysis of drag reducing agents for use at the Strategic Petroleum Reserve site at West Hackberry, Louisiana, 10:29803 (R;US)
BRITISH COLUMBIA
  Hydroelectric Power Plants
    Homathko development, 10:30145 (RA;US)
  Volcanoes
    Indications of mineral zoning in a fossil hydrothermal system at the Meager Creek geothermal prospect, British Columbia, Canada, from induced polarization studies, 10:30579 (R;US)
BROMINE
  Alpha Reactions
    Comparative analysis of proton and alpha-particle interactions with C, O and Ag, Br nuclei at 4.5 GeV/c per nucleon, 10:32688 (R;SU;In Russian)
  Ion-Molecule Collisions
    Ion-molecule reactions and beam studies in relation to hot atom chemistry. Chapter 2-C, 10:31715 (BA;NL)
  Proton Reactions
    Comparative analysis of proton and alpha-particle interactions with C, O and Ag, Br nuclei at 4.5 GeV/c per nucleon, 10:32688 (R;SU;In Russian)
BROMINE BROMIDES
  See BROMINE
BRONCHITIS
  Epidemiology
    Studies of the Scottish oil shale industry. Volume 3. Causes of death of Scottish oil shale workers. Final report, 10:29842 (R;US)
BRONCHOGENIC CARCINOMA
  See CARCINOMAS
    RESPIRATORY SYSTEM DISEASES
BROOKHAVEN AGS
  Beam Injection
    Increased intensity performance of the Brookhaven AGS, 10:31995 (R;US)
BROOKHAVEN INTERSECTING STORAGE ACCELERAT

BUSES
Air Conditioners
Alternative technology for transit-bus air conditioning: the rotary-screw compressor. Final report 1981-82, 10:31348 (R;US)
Diesel Engines
Neat methanol as a fuel for compression ignition engines in transit bus operation, 10:31403 (RA;US)
BUTADIENE
Mass Spectra
Formation of benzene by the pyrolysis of 4-vinylcyclohexene regiospecific formation of anthracenes in the pyrolysis of dibenzobuerones and related systems, 10:31674 (R;US)
NMR Spectra
Formation of benzene by the pyrolysis of 4-vinylcyclohexene regiospecific formation of anthracenes in the pyrolysis of dibenzobuerones and related systems, 10:31674 (R;US)
BUTANE
Combustion Properties
Chemical kinetic modeling of hydrocarbon combustion, 10:30076 (J;GB)
Data Compilation
Petroleum Supply Monthly, March 1985, 10:29777 (R;US)
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
BUTANOIC ACID
See BUTYRIC ACID
BUTANOLS
Solvent Properties
Rotational reorientation dynamics at high pressures: rhodamine 6G in ethanol from 1 bar to 6 kbar, 10:31678 (J;US)
Thermodynamic Properties
Effects of surfactant structure on micelle formation and solubilization, 10:29760 (RA;US)
BUTYL ALCOHOLS
See BUTANOLS
BUTYRIC ACID
Biological Effects
Extent of histone modifications and H1° content during cell cycle progression in the presence of butyrate, 10:32364 (J;US)
BUTYRIC ALCOHOLS
See BUTANOLS
BWR TYPE REACTORS

MUEHLEBERG REACTOR
NINE MILE POINT-2 REACTOR
OKG-2 REACTOR
Burnup
Japanese fuel study related to extended burn-up and plutonium recycling, 10:30703 (RA;XA)
Containment
Containment performance working group report. Draft report for comment, 10:30968 (R;US)
Containment Buildings
Hydrogen combustion in nuclear plant accidents and associated containment loads, 10:31040 (J;NL)
SMACS - a system of computer programs for probabilistic seismic analysis of structures and subsystems. Volume II. Example problem, 10:30833 (R;US)
Containment Systems
COBRA-NC application to containment analysis, 10:30990 (RA;US)
Containment event tree analysis for source term frequency estimation, 10:30885 (RA;US)
ESF collection effectiveness, a study in fine particle dynamics, 10:31033 (R;US)
Evaluation of containment failure modes and fission product releases during core meltdown accidents in a BWR with a Mark III containment, 10:30886 (RA;US)
Insights gained from in-depth reviews of several industry generated PRAs, 10:30881 (RA;US)
Reactor containment purge and vent valve performance experiments, 10:30861 (R;US)
Review of probabilistic containment analyses and some suggested improvements, 10:30882 (RA;US)
Statistical evaluation of the heat transfer data obtained in the HDR containment tests, 10:30991 (RA;US)
Core Spray Systems
BWR core cooling in refill/reflood phase, 10:31002 (RA;US)
ECCS
18° sector system test (ESTA-II), 10:31004 (RA;US)
BWR core cooling in refill/reflood phase, 10:31002 (RA;US)
BWR safety research in Japanese industry, 10:30998 (RA;US)
BWR upper plenum mixing test, 10:31003 (RA;US)
LOCA/ECCS integral tests with Two Bundle Loop, 10:30999 (RA;US)
Fires
Evaluation of available data for probabilistic risk assessments (PRA) of fire events at nuclear power plants, 10:31028 (R;US)
Fission Product Release
Evaluation of containment failure modes and fission product releases during core meltdown accidents in a BWR with a Mark III containment, 10:30886 (RA;US)
Fuel Assemblies
Optimized BWR fuel lattice for improved fuel utilization, 10:30683 (RA;XA)
Performance of the plutonium-island fuel assemblies loaded into the Dodewaard boiling water reactor, 10:30684 (RA;XA)
Fuel Cycle
Alternative routes to improved fuel utilization: Analysis of near-term economic incentives, 10:30765 (RA;XA)
Remarks on the cycle length extension of BWR plants, 10:30682 (RA;XA)
Status of rod consolidation, 10:29899 (R;US)
Fuel Element Clusters
Remarks on the cycle length extension of BWR plants, 10:30682 (RA;XA)
Fuel Element Failure
Light-water-reactor safety fuel systems research programs. Quarterly progress report, July-September 1984. Volume 3, 10:31015 (R;US)
Fuel Management
BWR Fuel Bundle Extended Burnup Program. Final report, 10:30672 (R;US)
Fuel Rods
Corrosion-product buildup on LWR fuel rods. Final report, 10:30691 (R;US)
FRAPCON-2 assessment: power reactor fuel performance data and code evaluation status, 10:30992 (RA;US)
High burnup program in the French power plants, 10:30706 (RA;XA)
Light water reactor fuel performance: proceedings. Volume 2, 10:30674 (R;US)
Light water reactor fuel performance: proceedings. Volume 1, 10:30673 (R;US)
LWR fuel rods for extended burnup - Design and experimental bases, 10:30705 (RA;XA)
Post-irradiation examination of plutonium-bearing fuel elements irradiated in LWR power plants. A European Community campaign, 10:30712 (RA;XA)
Reactor safety research programs. Quarterly report, October-December 1984. Volume 4, 10:31011 (R;US)
Review of extended burnup research, development and implementation in the United States, 10:30707 (RA;XA)
US Department of Energy extended burnup program, 10:30995 (RA;US)
Fuel-Cladding Interactions
Reactor safety research programs. Quarterly report, October-December 1984. Volume 4, 10:31011 (R;US)

Legal Aspects
  Operating reactors licensing actions summary. Volume 5, No. 3, 10:30761 (R;US)
Loss of Coolant
  18° sector system test (ESTA-II), 10:31004 (RA;US)
  Aspects of small-break LOCA analysis using few volumes (RELAP5 computer code), 10:30938 (RA;XA)
  BWR core cooling in refill/reflood phase, 10:31002 (RA;US)
  BWR safety research in Japanese industry, 10:30998 (RA;US)
  BWR upper plenum mixing test, 10:31003 (RA;US)
  Comparisons of analysis on Rosa-III Run 912 test. A BWR small break LOCA simulation, 10:30932 (RA;XA)
  Computer code application, verification and development for small-break LOCA analysis, 10:30933 (RA;XA)
  LOCA/ECCS integral tests with Two Bundle Loop, 10:30999 (RA;US)
  Measurement of two-phase flow at the core upper plenum interface under simulated reflood conditions, 10:30845 (R;US)
  Overview of TRAC-BD1 (Version 12) assessment studies, 10:31025 (R;US)
  Reactor safety research programs. Quarterly report, October-December 1984. Volume 4, 10:31011 (R;US)
  RELAP5 user experiences, 10:30936 (RA;XA)
  TBL analysis by best estimate codes, 10:31000 (RA;US)
  TBL analysis by best estimate codes, 10:31001 (RA;US)
Meltdown
  Evaluation of containment failure modes and fission product releases during core meltdown accidents in a BWR with a Mark III containment, 10:30886 (RA;US)
  Mechanisms in dryout of debris beds, 10:30987 (RA;US)
  Review of probabilistic containment analyses and some suggested improvements, 10:30882 (RA;US)
  Steam explosion experiments with single drops of iron oxide melted with a CO_2 laser. Part II. Parametric studies, 10:31007 (R;US)
Pipes
  Evaluation of stress corrosion crack growth in BWR piping systems, 10:30690 (R;US)
Plutonium Recycle
  Japanese fuel study related to extended burn-up and plutonium recycling, 10:30703 (RA;XA)
  Post-irradiation examination of plutonium-bearing fuel elements irradiated in LWR power plants. A European Community campaign, 10:30712 (RA;XA)
Post-Irradiation Examination
  Post-irradiation examination of plutonium-bearing fuel elements irradiated in LWR power plants. A European Community campaign, 10:30712 (RA;XA)
Pressure Vessels
  Light water reactor pressure vessel simulation (LWR-PVS) program, 10:30675 (R;US)
  Pressurized-thermal-shock test of 6-in.-thick pressure vessels. PTSE-1: investigation of warm prestressing and upper-shelf arrest, 10:31020 (R;US)
Primary Coolant Circuits
  Decontamination impacts on solidification, 10:30670 (R;US)
  Hydrodynamics of single- and two-phase flow in inclined rod arrays, 10:30671 (R;US)
Radioactive Wastes
  Decontamination impacts on solidification, 10:30670 (R;US)
Reactor Accidents
  Assessment of thermal gradient tube results from the HI series of fission product release tests, 10:31019 (R;US)
  Behavior of aerosols in a steam-air environment, 10:30846 (R;US)
  Chemical factors affecting fission product transport in BWR severe accidents, 10:30984 (RA;US)
  Containment performance working group report. Draft report for comment, 10:30968 (R;US)
  Effects of control system failures on transients and accidents at a General Electric boiling water reactor. Volume 2. Appendices, 10:31031 (R;US)
  Effects of control system failures on transients and accidents at a General Electric boiling water reactor. Volume 1. Main report, 10:31030 (R;US)
  ESF collection effectiveness, a study in fine particle dynamics, 10:31033 (R;US)
  Introductory user's manual for the US Nuclear Regulatory Commission Reactor Safety Research Data Bank. Revision 3, 10:31006 (R;US)
  Perspectives on technical issues evolving from the source term reassessment, 10:30997 (RA;US)
  Review of the status of validation of the computer codes used in the severe accident source term reassessment study (BMI-2104), 10:31032 (R;US)
  Safety/safeguards interactions during safety-related emergencies at Nuclear Power Reactor Facilities, 10:31018 (R;US)
  Technical bases and user's manual for the prototype of a Suppression Pool Aerosol Removal Code (SPARC), 10:31008 (R;US)
Reactor Components
  ATV-system and its use, 10:30897 (RA;US)
  Compilation of contract research for the Materials Engineering Branch, Division of Engineering Technology. Annual report for FY 1984. Volume 3, 10:30685 (R;US)
  Distributions of component failure rates, estimated from LER data, 10:30900 (RA;US)
  Licensee contractor and vendor inspection status report. Quarterly report, January-March 1985. Volume 9, No. 1, 10:30760 (R;US)
  Long-term embrittlement of cast duplex stainless steels in LWR systems. Annual report, October 1983-September 1984, 10:30689 (R;US)
Reactor Control Systems
  Effects of control system failures on transients and accidents at a General Electric boiling water reactor. Volume 1. Main report, 10:31030 (R;US)
  New surveillance and control techniques and their application to nuclear power plant with particular reference to 1300 MW, 10:30827 (TJ;GB)
Reactor Cooling Systems
  Impact of colloidal chemistry on radioactivity transport in nuclear power plants, 10:30678 (R;US)
Reactor Core Disruption
  BNL severe accident sequence experiments and analysis program, 10:30989 (RA;US)
  COBRA-NC application to containment analysis, 10:30990 (RA;US)
  Insights gained from in-depth reviews of several industry generated PRAs, 10:30881 (RA;US)
  Radionuclide release to the environment under specific LWR accident conditins, 10:30996 (RA;US)
Reactor Cores
  EPRI core materials program, 10:30994 (RA;US)
  Hydrodynamics of single- and two-phase flow in inclined rod arrays, 10:30671 (R;US)
  Optimized BWR fuel lattice for improved fuel utilization, 10:30683 (RA;XA)
  Thorium fuel cycles in light water reactors (NASAP fuel cycle analysis). Monthly project status report, December 1978, 10:30755 (R;US)
Reactor Fueling
  Improvements to critical path time for BWR refueling outages. Final report, 10:30677 (R;US)
Reactor Instrumentation
  Assessment of Class 1E pressure transmitter response when subjected to harsh environment screening tests, 10:30687 (R;US)
  New surveillance and control techniques and their application to nuclear power plant with particular reference to 1300 MW, 10:30827 (TJ;GB)
Reactor Kinetics
  ORIGEN-S data libraries, 10:30686 (RA;US)
Reactor Maintenance
  Improvements to critical path time for BWR refueling outages. Final report, 10:30677 (R;US)
Reactor Materials
  Compilation of contract research for the Materials Engineering Branch, Division of Engineering Technology. Annual report for FY 1984. Volume 3, 10:30685 (R;US)

Light water reactor pressure vessel simulation (LWR-PVS) program, 10:30675 (R;US)
Pressurized-thermal-shock test of 6-in.-thick pressure vessels. PTSE-1: investigation of warm prestressing and upper-shelf arrest, 10:31020 (R;US)
Tensile properties of irradiated nuclear grade pressure vessel welds for the third HSST irradiation series, 10:30688 (R;US)

Reactor Operation
Operating reactors licensing actions summary. Volume 5, No. 3, 10:30761 (R;US)
Report to Congress on abnormal occurrences, October-December 1984. Volume 7, No. 4, 10:30961 (R;US)

Reactor Safety
BNL severe accident sequence experiments and analysis program, 10:30989 (RA;US)
BWR safety research in Japanese industry, 10:30998 (RA;US)
EPRI core materials program, 10:30994 (RA;US)
FRAPCON-2 assessment: power reactor fuel performance data and code evaluation status, 10:30992 (RA;US)
Introductory user's manual for the US Nuclear Regulatory Commission Reactor Safety Research Data Bank. Revision 3, 10:31006 (R;US)
Perspectives on technical issues evolving from the source term reassessment, 10:30997 (RA;US)
Reactor safety research programs. Quarterly report, October-December 1984. Volume 4, 10:31011 (R;US)
US Department of Energy extended burnup program, 10:30995 (RA;US)

Reactor Sites
SMACS - a system of computer programs for probabilistic seismic analysis of structures and subsystems. Volume II. Example problem, 10:30833 (R;US)

Regulations
Relationship between regulatory issues and probabilistic risk assessments, 10:30844 (R;US)

Reliability
European Reliability Data System: main developments and use, 10:30895 (RA;US)

Risk Assessment
ATV-system and its use, 10:30897 (RA;US)
Containment event tree analysis for source term frequency estimation, 10:30885 (RA;US)
Development of transient initiating event frequencies for use in probabilistic risk assessments, 10:31012 (R;US)
Evaluation of containment failure modes and fission product releases during core meltdown accidents in a BWR with a Mark III containment, 10:30886 (RA;US)
Insights gained from in-depth reviews of several industry generated PRAs, 10:30881 (RA;US)
Relationship between regulatory issues and probabilistic risk assessments, 10:30844 (R;US)
Review of probabilistic containment analyses and some suggested improvements, 10:30882 (RA;US)

Thorium Cycle
Thorium fuel cycles in light water reactors (NASAP fuel cycle analysis). Monthly project status report, December 1978, 10:30755 (R;US)

Transient Overpower Accidents
GT2F: a computer code for estimating light water reactor fuel rod failures, 10:31022 (R;US)

Transients
Effects of control system failures on transients and accidents at a General Electric boiling water reactor. Volume 2. Appendices, 10:31031 (R;US)
Light-water-reactor safety fuel systems research programs. Quarterly progress report, July-September 1984. Volume 3, 10:31015 (R;US)
Pressurized-thermal-shock test of 6-in.-thick pressure vessels. PTSE-1: investigation of warm prestressing and upper-shelf arrest, 10:31020 (R;US)

Vulnerability
Vital areas at nuclear power plants, 10:30957 (R;US)

C

C CODES
Beam Optics
CANAL code, 10:31946 (R;FR;In French)
Manuals
Hanford ground-water data base management guide and user's manual (CIRMIS), 10:29963 (R;US)

CABLES (ELECTRIC)
See ELECTRIC CABLES

CADMIUM
Anaerobic Digestion
Anaerobic microbial transformations in subsurface environments: project description, 10:32186 (R;US)
Control
Cadmium regulation - effects and costs, 10:32169 (R;SE;In Swedish)
Emission Spectroscopy
Spectrochemical determination of impurities in aluminium alloys by DC arc technique, 10:31634 (R;IL;In Hebrew)
Energy Levels
Theory of deep level trap effects on generation-recombination noise in HgCdTe photoconductors, 10:31584 (J;US)
Lung Clearance
Lung clearance, translocation, and acute toxicity of arsenic, beryllium, cadmium, cobalt, lead, selenium, vanadium, and ytterbium oxides following deposition in rat lung, 10:32356 (J;US)
Noise
Theory of deep level trap effects on generation-recombination noise in HgCdTe photoconductors, 10:31584 (J;US)
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
Recombination
Theory of deep level trap effects on generation-recombination noise in HgCdTe photoconductors, 10:31584 (J;US)
Regulations
Cadmium regulation - effects and costs, 10:32169 (R;SE;In Swedish)
Toxicity
Effects of CdCl$_2$ on the maternal-to-fetal clearance of ^{67}Cu and placental blood flow, 10:32360 (J;US)
Lung clearance, translocation, and acute toxicity of arsenic, beryllium, cadmium, cobalt, lead, selenium, vanadium, and ytterbium oxides following deposition in rat lung, 10:32356 (J;US)
Traps
Theory of deep level trap effects on generation-recombination noise in HgCdTe photoconductors, 10:31584 (J;US)

CADMIUM SULFIDE SOLAR CELLS
Manufacturing
Contribution to the development of a pilot manufacturing line of Cu$_2$S-CdS film solar cells using the chemical reactive spray method, 10:30304 (R;FR;In French)

CADMIUM TELLURIDE DETECTORS
See CDTE SEMICONDUCTOR DETECTORS

CAES PLANT
See COMPRESSED AIR STORAGE POWER PLANTS

CAFETERIAS
See RESTAURANTS

CALANDRIAS
Pressure Tubes
Consequences of pressure tube rupture on in-core components. Phase 1 - technology review, 10:30951 (R;CA)

CALCITE
Equations of State
Shock and release equation of state of calcite, 10:31580 (R;US)
Isotope Dating
Uranium, thorium isotopic analyses and uranium-series ages of calcite and opal, and stable isotopic compositions of calcite from drill cores UE25a No. 1, USW G-2 and USW G-3/GU-3, Yucca Mountain, Nevada, 10:29990 (R;US)

Uranium Deposits
Uranium, thorium isotopic analyses and uranium-series ages of calcite and opal, and stable isotopic compositions of calcite from drill cores UE25a No. 1, USW G-2 and USW G-3/GU-3, Yucca Mountain, Nevada, 10:29990 (R;US)
CALCIUM
Chemical Properties
Characterization of sheet calcium for Ca/CaCrO$_4$ thermal batteries, 10:31105 (R;US)
Physical Properties
Characterization of sheet calcium for Ca/CaCrO$_4$ thermal batteries, 10:31105 (R;US)
X-Ray Fluorescence Analysis
X-ray fluorescence analysis of uranium concentrates, 10:31637 (TG;US)
CALCIUM 40
Alpha Reactions
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Angular correlation measurements with (α,pγ) reactions, 10:32707 (RA;ZA)
CALCIUM 40 REACTIONS
Deep Inelastic Heavy Ion Reactions
Collective flow of nuclear matter, 10:32697 (RA;DE)
Participant region radii from 4 π detection of proton-proton correlations in relativistic heavy ion reactions, 10:32702 (RA;DE)
CALCIUM 40 TARGET
Calcium 40 Reactions
Collective flow of nuclear matter, 10:32697 (RA;DE)
Participant region radii from 4 π detection of proton-proton correlations in relativistic heavy ion reactions, 10:32702 (RA;DE)
Deuteron Reactions
Elastic scattering of polarized deuteron at intermediate energies, 10:32704 (R;FR)
Electron Reactions
Deep inelastic scattering of charged leptons and quark distributions in nuclei, 10:32563 (RA;DE)
Lithium 7 Reactions
Description of (^{7}Li, ^{7}Be) charge-exchange reactions within the framework of microscopic DWBA, 10:32671 (R;SU;In Russian)
CALCIUM 48
Double Beta Decay
Project of an experiment on search for the neutrinoless double beta decay of ^{48}Ca, 10:32701 (R;SU;In Russian)
CALCIUM COMPOUNDS
See also CALCIUM OXIDES
CALCIUM SULFIDES
Structural Chemical Analysis
Electron optical and microanalytical studies of precipitation in ceramic systems. Progress report, July 1, 1983-June 30, 1984, 10:31527 (R;US)
CALCIUM OXIDES
See also ZIRCONOLITE
Recovery
Recovery of sulfur and lime from waste gypsum, 10:31360 (RA;US)
CALCIUM SULFIDES
Oxidation
Recovery of sulfur and lime from waste gypsum, 10:31360 (RA;US)
CALCULATIONS (COMPUTER)
See COMPUTER CALCULATIONS
CALIBRATION STANDARDS
Materials Handling
Premium Coal Sample Program - a model, 10:29665 (RA;US)
CALIFORNIA

Pulsed x-ray induced damage to metal and multilayer mirrors, 10:31507 (J;US)
Proton Reactions
Comparative analysis of proton and alpha-particle interactions with C, O and Ag, Br nuclei at 4.5 GeV/c per nucleon, 10:32688 (R;SU;In Russian)
Validation of the intra-nuclear-cascade-evaporation model for particle production, 10:32791 (R;DE)

CARBON 12 REACTIONS
Compound-Nucleus Reactions
Subthreshold pion production: An intranuclear N-N collision interpretation, 10:32694 (J;US)
Particle Production
Coincidence measurement of charged pions and forwards emitted light fragments in the reaction of 1 GeV $^{12}C+^{12}C$, 10:32682 (RA;DE)
Total Cross Sections
Determination of the total reaction cross section for heavy ions at 15 MeV/amu, 25 MeV/amu, and 35 MeV/amu, 10:32679 (R;US)

CARBON 12 TARGET
Carbon 12 Reactions
Coincidence measurement of charged pions and forwards emitted light fragments in the reaction of 1 GeV $^{12}C+^{12}C$, 10:32682 (RA;DE)
Determination of the total reaction cross section for heavy ions at 15 MeV/amu, 25 MeV/amu, and 35 MeV/amu, 10:32679 (R;US)
Subthreshold pion production: An intranuclear N-N collision interpretation, 10:32694 (J;US)
Electron Reactions
Deep inelastic scattering of charged leptons and quark distributions in nuclei, 10:32563 (RA;DE)
Study of 1ssub(1/2) and 2ssub(1/2) contributions to the $^{12}C(e,e'p)^{11}B$ (Esub(ex) = 6.79 MeV, Jsup(π) = $1/2^+$) transition, 10:32683 (RA;NL)
Krypton 84 Reactions
Heavy fragments emission in the ^{84}Kr on ^{12}C reaction at 35 MeV/nucleon, 10:32710 (R;FR)
Neutron Reactions
Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)
Pion Reactions
Elastic scattering of low energy pions, 10:32685 (RA;NL)

CARBON 13
Radiochemistry
Synthesis of carbon-13 labeled compounds, 10:31703 (RA;IL)

CARBON BLACK
Gasification
Gasification of disordered carbons (chars). Final report, 10:29618 (R;US)

CARBON CYCLE
Mathematical Models
Two dimensional CO_2-ocean model including the biological processes, 10:32134 (R;US)
Research Programs
Global carbon geosystem, 10:32129 (RA;US)
CARBON DIOXIDE
Adducts
Rydberg states of the $ArCO_2$ and $KrCO_2$ van der Waals molecules, 10:32515 (J;US)
Air Pollution Control
Systems study for the removal, recovery, and disposal of carbon dioxide from fossil fuel power plants in the US, 10:32125 (R;US)
Air Pollution Monitoring
CSIRO (Australia) atmospheric carbon dioxide monitoring program: surface data, 10:32141 (R;AU)
Biological Effects
Photosynthetic response of Bragg soybean leaves adapted to different CO_2 environments, 10:32150 (J;US)
Chemical Reaction Kinetics
Separation of gas mixtures by supported complexes, 10:31671 (R;US)
Chemical Reaction Yield
Gasification of disordered carbons (chars). Final report, 10:29618 (R;US)
Real time analysis of PETN detonation products, 10:32085 (R;US)
Chemisorption
Influence of adsorbed Bi on the chemisorption properties of $Pt(111):H_2$, CO, and O_2, 10:31501 (J;US)
Corrosive Effects
Effects of acid deposition on the properties of portland cement concrete: state of knowledge, 10:31577 (R;US)
Diffusion
Atmospheric boundary layer testing: experimental measurements of heavier-than-air gas dispersion in an atmospheric boundary layer. 1982-1983 Equipment loan report. Supplement 1, 10:32148 (R;US)
Ecological Concentration
Model projections of time-dependent response to increasing carbon dioxide. Final report, 10:32133 (R;US)
Electron-Molecule Collisions
Electron storage ring beam lifetime dependence on pressure and pumping speed, 10:32008 (J;US)
Environmental Effects
Climate and climate impact scenarios for Europe in a warmer world, 10:32156 (J;US)
Energy supply and demand implications of CO_2, 10:32168 (RA;US)
Global carbon geosystem, 10:32129 (RA;US)
International problems: ramifications of the carbon dioxide fossil fuel issue, 10:32128 (RA;US)
Environmental Impacts
Climate modeling: a retrospective-prospective view with consideration for the atmospheric carbon dioxide-climate issue, 10:32130 (R;US)
Lake ice occurrence as a possible detector of atmospheric CO_2 effects on climate. Second annual progress report, 1 December 1983-31 May 1985, 10:32131 (R;US)
Environmental Policy
Energy supply and demand implications of CO_2, 10:32168 (RA;US)
Greenhouse Effect
Systems study for the removal, recovery, and disposal of carbon dioxide from fossil fuel power plants in the US, 10:32125 (R;US)
Infrared Spectra
Determination of pyrolyzable oxygen in ambient particulate matter, 10:31653 (J;US)
Mass Spectra
Real time analysis of PETN detonation products, 10:32085 (R;US)
Pollution Sources
Indoor air pollution, 10:32127 (R;U
Solubility
Phase behavior of coal fluids: data for correlation development. Reporting period: November 1, 1984-April 30, 1985, 10:29635 (R;US)
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)
CARBON DIOXIDE INJECTION
Bench-Scale Experiments
Gas-miscible displacement: enhanced oil recovery. Technical status report, October 1, 1983-September 30, 1984, 10:29752 (R;US)
Field Tests
Gas-miscible displacement: enhanced oil recovery. Technical status report, October 1, 1983-September 30, 1984, 10:29752 (R;US)
Research Programs
Gas-miscible displacement: enhanced oil recovery. Technical status report, October 1, 1983-September 30, 1984, 10:29752 (R;US)
CARBON DIOXIDE LASERS
Electric Discharges
Near field/far field (nf/ff) energy loss in electric-discharge lasers (EDL's): a mode-medium interaction. Technical report, 10:31755 (R;US)
Energy Losses
Near field/far field (nf/ff) energy loss in electric-discharge lasers (EDL's): a mode-medium interaction. Technical report, 10:31755 (R;US)
CARBON FLUORIDES
Chemical Reactions
Reaction of uranium and the fluorocarbon FC-75, 10:31595 (R;US)
CARBON IONS
Excitation
Population inversion in laser-initiated vacuum arcs. Annual report, 1 February 1984-31 January 1985, 10:32476 (R;US)
CARBON MONOXIDE
Adsorption Heat
Characterization of catalysts with metal-support effects and of the species adsorbed on their surfaces. Progress report, September 1, 1984-August 30, 1985, 10:31656 (R;US)
Chemical Reaction Kinetics
Separation of gas mixtures by supported complexes, 10:31671 (R;US)
Chemical Reaction Yield
Real time analysis of PETN detonation products, 10:32085 (R;US)
Electron-Molecule Collisions
Electron storage ring beam lifetime dependence on pressure and pumping speed, 10:32008 (J;US)
Hydrogenation
Promotion effects on the synthesis of higher alcohols. 11th quarterly report, January-March 1985, 10:30068 (R;US)
Mass Spectra
Real time analysis of PETN detonation products, 10:32085 (R;US)
Methanation
Mechanistic studies of carbon monoxide reduction. Final technical report, 10:30065 (R;US)
Pollution Sources
Indoor air pollution, 10:32127 (R;US)
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)
CARBON STEELS
See also STEEL-ASTM-A533-B
Cracking
Long-term performance of materials used for high-level waste packaging. Third quarterly report, Year Three, October-December 1984. Vol. 3, 10:31471 (R;US)

Crevice Corrosion
Long-term performance of materials used for high-level waste packaging. Third quarterly report, Year Three, October-December 1984. Vol. 3, 10:31471 (R;US)
Hydrogen Embrittlement
Long-term performance of materials used for high-level waste packaging. Third quarterly report, Year Three, October-December 1984. Vol. 3, 10:31471 (R;US)
Mechanical Properties
Effect of microstructure on the fatigue behavior of Fe-C-X alloys. Final report, July 1, 1983-November 16, 1984 (Fe-0.2C-1Mn; Fe-0.2C-2Mo; Fe-0.2C-4Mo), 10:31443 (R;US)
Pitting Corrosion
Long-term performance of materials used for high-level waste packaging. Third quarterly report, Year Three, October-December 1984. Vol. 3, 10:31471 (R;US)
Stress Corrosion
Long-term performance of materials used for high-level waste packaging. Third quarterly report, Year Three, October-December 1984. Vol. 3, 10:31471 (R;US)
Stresses
Long-term performance of materials used for high-level waste packaging. Third quarterly report, Year Three, October-December 1984. Vol. 3, 10:31471 (R;US)

CARBON TETRACHLORIDE
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)

CARBONATES
See also AMERICIUM CARBONATES
BARIUM CARBONATES
NEPTUNIUM CARBONATES
PLUTONIUM CARBONATES
POTASSIUM CARBONATES
SODIUM CARBONATES
THORIUM CARBONATES
URANIUM CARBONATES
Environmental Transport
Radionuclide diffusion and mobilities in compacted bentonite, 10:32178 (R;SE)
Phase Stability
Thermodynamics of the corrosion of chromium in molten carbonates, 10:31186 (R;US)

CARBONYLS
Only for compounds of metals with carbonyl radicals.
Chemical Preparation
Transition-metal mediated formation and cleavage of carbon-hydrogen bonds: hydrogenolysis of trinuclear alkylidyne clusters and oxidative addition of carbon-hydrogen bonds to rhenium, 10:31675 (R;US)
Photolysis
Photofragmentation of $Fe(CO)_5$. 1. Infrared and Moessbauer evidence for the formation of $Fe(CO)_4$ in polymer matrices, 10:31685 (R;BR)

CARBOXYLIC ACIDS
See also AMINO ACIDS
DICARBOXYLIC ACIDS
Chemical Reaction Yield
Chemical changes in coal liquefaction, 10:29651 (RA;US)
Low temperature chemical fragmentation of coal, 10:29650 (RA;US)
Gas Chromatography
Chemical changes in coal liquefaction, 10:29651 (RA;US)
Potentiometry
Characterization of coal surfaces. Technical progress report, 5 February 1985-20 May 1985, 10:29659 (R;US)

CARCINOGENESIS
Biological Models
Report of the Van de Graaff Group: radiobiology. Radiation-induced damage and carcinogenesis in cultured human cells, 10:32317 (RA;ZA)
Radioinduction
Report of the Van de Graaff Group: radiobiology. Radiation-induced damage and carcinogenesis in cultured human cells, 10:32317 (RA;ZA)

CARCINOMAS
Epidemiology
Studies of the Scottish oil shale industry. Volume 3. Causes of death of Scottish oil shale workers. Final report, 10:29842 (R;US)
Radioinduction
Inhalation hazards to uranium miners, 10:32328 (RA;US)

CARDIAC OUTPUT
See BLOOD CIRCULATION

CARLSON METHOD
See DISCRETE ORDINATE METHOD

CARNOT CYCLE
Cost Benefit Analysis
Exergy analyses, aspects of their practical use, 10:31833 (R;DK)
Efficiency
Exergy analyses, aspects of their practical use, 10:31833 (R;DK)

CAROLINA POWER LIGHT ROBINSON-2 REACTOR
See ROBINSON-2 REACTOR

CARPOOLING
See also VANPOOLING
DOE National Rideshare Program Plan, 10:31347 (R;US)

CARS SPECTROSCOPY
See RAMAN SPECTROSCOPY

CASCADE (EXTRACTION)
See EXTRACTION COLUMNS

CASCADE SOLAR CELLS
Mathematical Models
Annual performance analysis of series and independently connected A1GaAs/silicon stacked cells, 10:30325 (BA;US)
Performance
Annual performance analysis of series and independently connected A1GaAs/silicon stacked cells, 10:30325 (BA;US)

CASINGS
See COVERINGS

CASTE (INSECTS)
See POPULATIONS

CAT SCANNING
Dosimetry
Radiation dosimetry of computed tomography x-ray scanners. Principles and techniques of measurement, 10:32826 (R;NZ)

CATALYSTS
See also ELECTROCATALYSTS
Chemical Preparation
New catalysts for the indirect liquefaction of coal. First quarterly technical report, August 1-October 31, 1981, 10:30066 (R;US)
Comparative Evaluations
New catalysts for the indirect liquefaction of coal. First quarterly technical report, August 1-October 31, 1981, 10:30066 (R;US)
Labelling
Catalyzed gasification of coal: isotope and XPS studies. Reporting period: February 16, 1985-May 15, 1985, 10:29632 (R;US)
Performance
Performance of rare earth modified faujasites in the process of toluene disproportionation, 10:31672 (R;DZ;In French)
Surface Area
Hydrotreatment catalyst activity enhancement. Quarterly report No. 7, February 1, 1985-April 30, 1985, 10:29636 (R;US)
Surface Properties
Surface science and catalysis, 10:30075 (J;US)
Testing
Development of significantly improved catalysts for coal liquefaction and upgrading of coal extracts. Final report, September 28, 1981-February 28, 1985, 10:29624 (R;US)

CATALYTIC CRACKING
Pilot Plants
Building and running of a pilot catalytic cracker, 10:29773 (R;SE;In Swedish)

CATAPHORESIS
See ELECTROPHORESIS

CATECHOLAMINES
Labelling
Tritium labeling of catecholamine by a catalyzed reductive debromination, 10:31700 (RA;IL)
CATHODES
See also PHOTOCATHODES
Performance Testing
Progress in aluminum-air battery development, 10:31099 (RA;US)
Polarization
Effects of cathode slag polarization on magnetohydrodynamic generator performance, 10:31182 (TA;US)
CAVITY RECEIVERS
Forced Convection
Experimental study of free and mixed convective flow of air in a heated cavity, 10:30352 (R;US)
Natural Convection
Experimental study of free and mixed convective flow of air in a heated cavity, 10:30352 (R;US)
CAVITY RESONATORS
See also SUPERCONDUCTING CAVITY RESONATORS
Coupling
New directional couplers for multimode circular waveguides applied to intense pulsed microwave systems, 10:31989 (R;US)
Flashover
Vacuum interface flashover with bipolar electric fields, 10:31907 (R;US)
Quadrupoles
RF measurment of split-coaxial RFQ structure, 10:31974 (RA;JP;In Japanese)
Spark Gaps
Compact, low jitter, triggered spark gap, 10:31867 (R;US)
Synchrotron Radiation
Microwave undulator, 10:31967 (RA;JP)
CBA (BROOKHAVEN COLLIDING BEAM ACCELERATO
See ISABELLE STORAGE RINGS
CDTE SEMICONDUCTOR DETECTORS
Optimization
Estimation of the figures of merit of Mercuric-Cadmium-Telluride detectors, 10:32171 (R;IL;In Hebrew)
CELL CONSTITUENTS
See also PLASMIDS
Ultrastructural Changes
TPA induces simultaneous alterations in the synthesis and organization of vimentin, 10:32365 (J;US)
CELL CYCLE
Radiosensitivity
Radiation effects on cultured mouse embryos in relation to cell division cycle, 10:32321 (RA;JP)
CELLS (BACTERIAL)

CENTRAL RECEIVERS
Performance
Monograph series No. 2: 10 MWe Solar Thermal Central Receiver Pilot Plant and receiver performance evaluation, 10:30353 (R;US)
CENTRAL REGION
See FEDERAL REGION III
CENTRIFUGE ENRICHMENT PLANTS
Nuclear Materials Management
Measurement of uranium enrichment for gaseous uranium at low pressure, 10:29887 (R;US)
CERAMICS
Impact Strength
General statistical description of the fracture particulates formed by mechanical impacts of brittle materials, 10:31541 (J;US)
Interfaces
High resolution electron microscopic characterization of interfaces in ceramics, 10:31534 (R;US)
Mechanical Properties
Transformation-toughened ceramics. A potential material for light diesel engine applications. Final report, 1 October 1982-30 September 1983, 10:31524 (R;US)
PIXE Analysis
Report of the Van de Graaff Group: nuclear analysis. Examination of Chinese ceramics and pottery excavated in the Cape, 10:31623 (RA;ZA)
Thermal Conductivity
Transformation-toughened ceramics. A potential material for light diesel engine applications. Final report, 1 October 1982-30 September 1983, 10:31524 (R;US)
CEREBRAL CORTEX
Positron Computed Tomography
Human primary visual cortex topography imaged via positron tomography, 10:32279 (J;NL)

CERIUM
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
CERIUM 130
Moment of Inertia
Dynamic moment of inertia in the Ba-region, 10:32729 (R;FR)
CERIUM 139
Isotope Production
Report of the Research Group. Participation in the International Reference System (SIR) of the Bureau International des Poids et Mesures (BIPM) (Laboratory standards of ^{139}Ce), 10:30051 (RA;ZA)
CERIUM 140 TARGET
Neutron Reactions
Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)
CERIUM 144
Radioecological Concentration
Annual report of the Surface Air Sampling Program, 10:32157 (R;US)
CERIUM ALLOYS
De Haas-Van Alphen Effect
Fermi surface study of CeSb in the ferromagnetic and antiferromagnetic phases , 10:31438 (R;US)
CERIUM SULFIDES
Catalytic Effects
Mechanistic study of the hydrodesulfurization of methanethiol over tungsten disulfide; a survey of rare earth sulfides for hydrodesulfurization activity, 10:31673 (R;US)
CERMETS
Density
Processing and microstructural characterization of B_4C-Al cermets, 10:31548 (R;US)
Fabrication
Processing and microstructural characterization of B_4C-Al cermets, 10:31548 (R;US)
Microhardness
Processing and microstructural characterization of B_4C-Al cermets, 10:31548 (R;US)
Microstructure
Processing and microstructural characterization of B_4C-Al cermets, 10:31548 (R;US)
Sintering
Processing and microstructural characterization of B_4C-Al cermets, 10:31548 (R;US)
Thermodynamics
Processing and microstructural characterization of B_4C-Al cermets, 10:31548 (R;US)
CERN II SYNCHROTRON
See CERN SPS SYNCHROTRON
CERN SPS SYNCHROTRON
Antiproton Beams
SPS collider, 10:31879 (RA;US)
Beam Cooling
Feasibility study of stochastic cooling of bunches in the SPS, 10:31885 (RA;US)
Beam Dynamics
Intra-beam scattering with vertical dispersion, 10:31920 (RA;US)
Beam-Beam Interactions
How much random sextupole field can we have in the presence of beam-beam interactions, 10:31928 (RA;US)
CERRO PRIETO GEOTHERMAL FIELD
Geothermal Wells
Status of the Cerro Prieto project, 10:30576 (RA;US)
CESIUM
Activation Analysis
Cesium as an activatable tracer for studying biological intrusion of plant roots into waste burial areas, 10:31641 (J;CH)
Environmental Transport
Radionuclide diffusion and mobilities in compacted bentonite, 10:32178 (R;SE)
Ion-Atom Collisions
New target cell design for alkali and alkaline earth vapor scattering experiments, 10:32524 (J;US)
Leaching
Leach tests of cemented radioactive ion-exchange resins, 10:29958 (R;AT;In German)
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
Stimulated Emission
Infrared generation and wave-mixing studies in cesium, 10:31804 (R;US)
CESIUM 137
Precipitation
I-129 analysis in radioactive waste, 10:29920 (R;US)
Radioactive Waste Processing
Immobilisation of ^{137}Cs and ^{90}Sr in hot-pressed clinoptilolite, 10:29909 (R;GB)
Radioecological Concentration
Annual report of the Surface Air Sampling Program, 10:32157 (R;US)
Strontium-90 and cesium-137 in freshwater from December, 1981, to July, 1982. Environmental and dietary materials, 10:32198 (RA;JP)
Strontium-90 and cesium-137 in airborne dust from October, 1981 to March, 1982. Environmental and dietary materials, 10:32162 (RA;JP)
Strontium-90 and cesium-137 in rain and dry fallout for WHO program from January to July, 1982. Environmental and dietary materials, 10:32163 (RA;JP)
Strontium-90 and cesium-137 in rain and dry fallout for domestic program from January to July, 1982. Environmental and dietary materials, 10:32164 (RA;JP)
Study on radioactive contamination of the Baltic Sea in 1979-1980, 10:32200 (R;SU;In Russian)
Vitrification
Immobilisation of ^{137}Cs and ^{90}Sr in hot-pressed clinoptilolite, 10:29909 (R;GB)
CESIUM IODIDES
Deposition
Downstream behavior of volatile fission product species, 10:30847 (R;US)
CESIUM SULFATES
Crystal-Phase Transformations
Investigation of phase transitions in a superionic conductor using the neutron scattering method, 10:31569 (R;SU;In Russian)
CHALK RIVER NUCLEAR LABS
Personnel
Updated follow-up of long-term Chalk River employees, 10:32295 (R;CA)
CHARGE EXCHANGE
Differential Cross Sections
Theory of electron-impact atomic ionization cross sections. Annual summary report, 1 July 1984-30 June 1985, 10:32475 (R;US)
CHARGE TRANSPORT
Probes
[Chemical probes of charge transfer at semiconductor/liquid junctions]. Technical report for May 15, 1984-January 15, 1985, 10:31682 (R;US)
CHARGED PARTICLES
In addition to the specific charged particles listed below, see also the list under ELEMENTARY PARTICLES.

CHARMED BARYON RESONANCES
Weak Hadronic Decay
Nonleptonic decays of charged baryons in chiral theory (account for baryon poles), 10:32604 (R;SU;In Russian)
CHARS
Gasification
Gasification kinetics and surface areas of catalyzed carbonaceous chars, 10:29644 (BA;US)
Gasification of disordered carbons (chars). Final report, 10:29618 (R;US)
Heterogeneous kinetics of coal gasification. Quarterly technical progress report, 1 January 1983-31 March 1983, 10:29627 (R;US)
Heterogeneous kinetics of coal gasification. Quarterly technical progress report, 1 October 1982-31 December 1982, 10:29626 (R;US)
Thermal Gravimetric Analysis
Gasification kinetics and surface areas of catalyzed carbonaceous chars, 10:29644 (BA;US)
CHEMICAL ANALYSIS
See also ACTIVATION ANALYSIS
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
Infrared Spectra
Optimization of detector-noise-limited infrared multiwavelength determinations, 10:31638 (J;US)
Spectroscopy
Optimization of detector-noise-limited infrared multiwavelength determinations, 10:31638 (J;US)
Technology Assessment
New directions in chemical analysis, 10:31636 (R;US)
CHEMICAL EFFLUENTS
Air Pollution Abatement
Development document for effluent limitations guidelines, new source performance standards, and pretreatment standards for the inorganic chemicals manufacturing point-source category. Phase 2. Final report, 10:32201 (R;US)
CHEMICAL EXPLOSIONS
Blast Effects
Gas cloud explosions and their effect on nuclear power plant. Phase 1: basic development of explosion codes, 10:30924 (R;XE)
Shock Waves
Gas cloud explosions and their effect on nuclear power plant. Phase 1: basic development of explosion codes, 10:30924 (R;XE)
CHEMICAL EXPLOSIVES
See also NITROMETHANE
PETN
SHAPED CHARGES
TATB
Activation Energy
Detonations of solid explosives. Final report, 1 November 1982-31 October 1984, 10:32081 (R;US)
Experimental studies of chemical reactivity during shock initiation of hexanitrostilbene, 10:32095 (R;US)
Three-dimensional hydrodynamic hot-spot model (HMX, nitroguanidine; interactions of shock waves and voids), 10:32083 (R;US)
Combustion
Behavior of the porous bed in a combustion-deflagration-detonation transition, 10:31831 (R;FR;FR)
Density
Comparison of experimental data on detonation velocity and Chapman-Jouget pressure vs initial HE density with predictions from Ree's model equation of state (RDX and HMX which are homologous nitramines of the family ($CH_2N_2O_2$)/sub n/ where n is 3 for RDX and 4 for HMX), 10:32096 (R;US)
Sensitivity and performance characterization of DINGU (1,4-dinitroglycoluril (DINGU)), 10:32090 (R;US)
Detonations
Behavior of the porous bed in a combustion-deflagration-detonation transition, 10:31831 (R;FR;FR)
Detonation in tungsten-loaded HMX, 10:32088 (R;US)
Intermolecular explosives (TNT, EDD, EAK, EARL, Amatol, EA, and Comp B 64 RDK), 10:32089 (R;US)
Modeling granular explosive detonations with shear band concepts, 10:32094 (R;US)
Modeling heterogeneous high explosive burn with an explicit hot-spot process, 10:32084 (R;US)
Three-dimensional hydrodynamic hot-spot model (HMX, nitroguanidine; interactions of shock waves and voids), 10:32083 (R;US)
Detonators
Explosive initiation by very small conical shaped charge jets, 10:32093 (R;US)
Electron Density
Electron density distribution analysis for nitroguanidine, 10:32087 (R;US)
Hot Spots
Modeling heterogeneous high explosive burn with an explicit hot-spot process, 10:32084 (R;US)
Hydrodynamics
Three-dimensional hydrodynamic hot-spot model (HMX, nitroguanidine; interactions of shock waves and voids), 10:32083 (R;US)
Ignition
Design of a Mobile Combustion Diagnostic Fixture (MCDF). Final report, 10:31827 (R;US)
Performance
Explosive initiation by very small conical shaped charge jets, 10:32093 (R;US)
Performance Testing
Sensitivity and performance characterization of DINGU (1,4-dinitroglycoluril (DINGU)), 10:32090 (R;US)
Raman Spectra
Single-pulse Raman scattering studies of heterogeneous explosive materials, 10:32072 (J;US)
Sensitivity
Friction, impact, and electrostatic discharge sensitivities of energetic materials, 10:32091 (R;US)
Intermolecular explosives (TNT, EDD, EAK, EARL, Amatol, EA, and Comp B 64 RDK), 10:32089 (R;US)
Sensitivity and performance characterization of DINGU (1,4-dinitroglycoluril (DINGU)), 10:32090 (R;US)
Shear Properties
Pressure-shear loading of PBX-9404, 10:32092 (R;US)
Synthesis
Sensitivity and performance characterization of DINGU (1,4-dinitroglycoluril (DINGU)), 10:32090 (R;US)
Underground Explosions
Material-response models and ground-motion calculations for high-explosive tests in G-Tunnel tuff. Technical report, 10:32080 (R;US)
CHEMICAL HEAT PUMPS
Hydridation
Thermocompressor or heat pump using metal hydrides, 10:31050 (R;FR;In French)
CHEMICAL INDUSTRY
Air Pollution Abatement
Development document for effluent limitations guidelines, new source performance standards, and pretreatment standards for the inorganic chemicals manufacturing point-source category. Phase 2. Final report, 10:32201 (R;US)
Energy Demand
Industry's energy demand for space heating, 10:31350 (R;SE;In Swedish)
Heat Recovery
Industry's energy demand for space heating, 10:31350 (R;SE;In Swedish)
Waste Heat Utilization
Industry's energy demand for space heating, 10:31350 (R;SE;In Swedish)

Water Pollution Abatement
Development document for effluent limitations guidelines, new source performance standards, and pretreatment standards for the inorganic chemicals manufacturing point-source category. Phase 2. Final report, 10:32201 (R;US)

CHEMICAL LASERS
Reaction Kinetics
Mechanism of four-level laser action in solution excimer and excited-state proton-transfer cases, 10:31770 (J;US)

CHEMICAL REACTION KINETICS
Correlations
Gasification kinetics and surface areas of catalyzed carbonaceous chars, 10:29644 (BA;US)

CHEMICAL REACTORS
Coalescence/dispersion modeling of turbulent combustion in a jet stirred reactor, 10:31718 (R;US)
Computerized Simulation
Process simulation software KATTILA. General routines, 10:29729 (R;FI;In Finnish)
Process simulation software KATTILA. Computation of equipment modules, 10:29730 (R;FI;In Finnish)
Process simulation software KATTILA. Computation of material and flow properties, 10:29731 (R;FI;In Finnish)
Process simulation software KATTILA. User handbook, 10:29732 (R;FI;In Finnish)
Design
Biomass thermochemical liquefaction, 10:30074 (R;FR;In French)
Liners
Heat conduction through layered refractory linings, 10:31784 (J;US)
Operation
Biomass thermochemical liquefaction, 10:30074 (R;FR;In French)

CHEMICAL VAPOR DEPOSITION
Laser-Radiation Heating
Real time measurement of deposition initiation and rate in laser chemical vapor deposition, 10:31495 (J;US)

CHEMICALS
See PIGMENTS
SURFACTANTS

CHERENKOV COUNTERS
Design
Detector development for γ-ray diagnostics of D-T fusion reactions, 10:32966 (J;US)

CHERENKOV DETECTORS
See CHERENKOV COUNTERS

CHERRIES
Radiodisinfestation
Irradiation of Northwest agricultural products, 10:30053 (R;US)
Radiopreservation
Irradiation of Northwest agricultural products, 10:30053 (R;US)

CHICKENS
Radiopreservation
Low-dose irradiation of fresh non-frozen chicken to extend shelf-life and eliminate pathogenic bacteria, 10:32306 (RA;IL)

CHILDREN
Growth
Kinetic studies on nitrogen and protein metabolism in dwarfish children using ^{15}N as tracer, 10:32255 (RA;DD;In German)
Hypothyroidism
Studies on the influence of the thyroid activity on the nitrogen balance using ^{15}N-glycine, 10:32254 (RA;DD;In German)

CHINA
Hydroelectric Power
Case study of US-China cooperation in unified resource development, 10:30098 (RA;US)
Development of small hydroelectric power in China, 10:30093 (RA;US)
Natural Gas Deposits
Geology and petroleum resources of basins in western China, 10:29744 (R;US)
Petroleum Deposits
Geology and petroleum resources of basins in western China, 10:29744 (R;US)

CHINESE HAMSTER OVARY CELLS
See CHO CELLS

CHLOR-ALKALI INDUSTRY
See CHEMICAL INDUSTRY
SODIUM CARBONATES

CHLORAMINE-B
See CHLORAMINES

CHLORAMINES
Chemical Reactions
Synthesis of aryl halides via organoborane chemistry, 10:31680 (J;ZZ)

CHLORAMINE-T

CHLORINE 35 TARGET
Neutron Reactions
Parity non-conservation in the radiative capture of polarized neutrons by ^{35}Cl, 10:32699 (R;FR)

CHLORINE LOGS
See NEUTRON-GAMMA LOGGING

CHLOROFORM
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)

CHLOROPHYLL
Electron Transfer
Mechanisms of photochemical energy conversion by chlorophyll. Technical progress report, March 1, 1983-March 1, 1985, 10:30299 (R;US)
Fluorescence
Fluorescence sensitization and quenching in a particulate chlorophyll model system, 10:30326 (BA;US)
Photosynthesis
Fluorescence sensitization and quenching in a particulate chlorophyll model system, 10:30326 (BA;US)
Quenching
Fluorescence sensitization and quenching in a particulate chlorophyll model system, 10:30326 (BA;US)

CHO CELLS
Radiation Injuries
Role of protein synthesis in the repair of sublethal x-ray damage in a mutant Chinese hamster ovary cell line, 10:32315 (R;US)
Radiosensitivity
Correction of a nucleotide-excision-repair mutation by human chromosome 19 in hamster-human hybrid cells, 10:32338 (J;US)

CHOPPERS (BEAM)
See BEAM PULSERS

CHROMATES
Specific compounds should be indexed by coordination of a descriptor of the form (CATION) COMPOUNDS and the above anion descriptor.
Phase Stability
Thermodynamics of the corrosion of chromium in molten carbonates, 10:31186 (R;US)

CHROMATOGRAPHIC COLUMNS
See EXTRACTION COLUMNS

CHROMIUM
Anaerobic Digestion
Anaerobic microbial transformations in subsurface environments: project description, 10:32186 (R;US)
Corrosion
Thermodynamics of the corrosion of chromium in molten carbonates, 10:31186 (R;US)
Emission Spectroscopy
Spectrochemical determination of impurities in aluminium alloys by DC arc technique, 10:31634 (R;IL;In Hebrew)
Oxidation
Optimization of the NiCrAl-Y/ZrO-Y2O3 thermal barrier system, 10:31535 (R;US)

CHROMIUM 52 TARGET
Neutron Reactions
Calculated neutron-induced cross sections for /sup 63,65/Cu /sup 58,60/Ni, and ^{52}Cr from 1 to 20 MeV and comparisons with experiments, 10:32709 (R;US)
Proton Reactions
Excitation of $\Delta L=0$ spin-flip transitions in the $N=28$ isotones by 201 MeV proton inelastic scattering, 10:32703 (R;FR)
CHROMIUM ALLOYS
See also *HASTELLOY C*
HASTELLOY X
HASTELLOY XR
STAINLESS STEELS
Physical Radiation Effects
Electron beam and pulsed laser irradiation of glass-forming Cr-Ta and Cr-Zr-Ge alloys, 10:31513 (J;US)
CHROMIUM OXIDES
Mechanical Properties
Transformation toughening in the Al_2O_3-Cr_2O_3/ZrO_2-HfO_2 system, 10:31391 (RA;US)
CHROMIUM-MOLYBDENUM STEELS
Casting
Characterization of modified 9 Cr-1 Mo steel sand castings, 10:31473 (R;US)
Embrittlement
Experiments for liquid metal embrittlement of fusion reactor materials by liquid lithium, 10:31466 (R;DE;In German)
Long-term embrittlement of cast duplex stainless steels in LWR systems. Annual report, October 1983-September 1984, 10:30689 (R;US)
Extrusion
Characterization of modified 9 Cr-1 Mo steel extruded pipe, 10:30744 (R;US)
Fatigue
Mechanisms of fatigue in coal liquefaction environments. Progress report, 10:29622 (R;US)
Mechanical Properties
Characterization of modified 9 Cr-1 Mo steel sand castings, 10:31473 (R;US)
CHROMODYNAMICS
See QUANTUM CHROMODYNAMICS
CHROMOSOMES
Fluorescence
Slit-scan flow cytometer for recording simultaneous waveforms, 10:32076 (J;US)

COAL
Activation Analysis
Organic oxygen characterization of coal and coal liquids. Quarterly progress report, February-April 1985, 10:29657 (R;US)
Ash Content
Conversion of oil-designed utility boilers to pulverized coal or coal-water mixture firing. Final report, 10:29722 (R;US)
Calibration Standards
Premium Coal Sample Program - a model, 10:29665 (RA;US)
Chemical Analysis
[Mining and mineral-related research.] Final report, July 1, 1983-June 30, 1984, 10:29615 (R;US)
Rapid dissolution of coal and minerals for analysis, 10:29662 (RA;US)
Chemical Composition
Organic oxygen characterization of coal and coal liquids. Quarterly progress report, February-April 1985, 10:29657 (R;US)
Chemical Properties
Coal characteristics, 10:29667 (R;FI;In Finnish)
Combustion
Coal-fired boilers for the 1980's, 10:31339 (RA;US)
Conversion of oil-designed utility boilers to pulverized coal or coal-water mixture firing. Final report, 10:29722 (R;US)

Design of coal-fired steam power plant for a containership, 10:31340 (RA;US)
Slurry fuels: the retrofittable alternative, 10:31344 (RA;US)
Combustion Products
Field investigations at Kollunds coal ash fill, 10:29674 (RA;SE;In Swedish)
Investigation of profiles from coal ash disposal sites, 10:29673 (RA;SE;In Swedish)
Combustion Properties
Alternate fuels for maritime use, 10:31324 (RA;US)
Comminution
Effect of maceral properties on the comminution of coal. Technical progress report, January 1-March 31, 1985, 10:29715 (R;US)
Consumption Rates
Annual outlook for US coal 1985: with projections to 1995, 10:29734 (R;US)
Fuel use of coal. Part 1. Preliminary study (Global aspects), 10:29738 (R;FI;In Finnish)
Data Compilation
Energy Facts, 1984, 10:29781 (R;US)
Decomposition
Aliphatic components of coal. Final report, September 1, 1978-August 31, 1980, 10:29648 (R;US)
Low temperature chemical fragmentation of coal, 10:29650 (RA;US)
Demineralization
Organic oxygen characterization of coal and coal liquids. Quarterly progress report, February-April 1985, 10:29657 (R;US)
Derivatization
Organic oxygen characterization of coal and coal liquids. Quarterly progress report, February-April 1985, 10:29657 (R;US)
Dissolution
[Mining and mineral-related research.] Final report, July 1, 1983-June 30, 1984, 10:29615 (R;US)
Drying
Organic oxygen characterization of coal and coal liquids. Quarterly progress report, February-April 1985, 10:29657 (R;US)
Energy Consumption
Monthly Energy Review, February 1985, 10:31172 (R;US)
Energy Policy
Applying multidisciplinary policy analysis to factors affecting coal use, 10:31151 (R;US)
Fluidized-Bed Combustion
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 1. Final report. Report for June 1980-June 1984, 10:29676 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 2. Appendices A through C. Final report, June 1980-June 1984, 10:29677 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 3. Appendices D and E. Final report, June 1980-June 1984, 10:29678 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 4. Appendix F. Final report, June 1980-June 1984, 10:29679 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 5. Appendix G. Final report, June 1980-June 1984, 10:29680 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 6. Appendix H. Final report, June 1980-June 1984, 10:29681 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 7. Appendix I. Final report, June 1980-June 1984, 10:29682 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 8. Appendix J. Final report, June 1980-June 1984, 10:29683 (R;US)
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Utilization of carbonate rocks and other calcium bearing materials as desulfurization sorbents in fluidized bed combustion, 10:29725 (RA;US)
Imports
Government bill 1983/84:158 concerning certain coal topics (Sweden), 10:29737 (R;SE;In Swedish)
Lyophilization
Effect of maceral properties on the comminution of coal. Technical progress report, January 1-March 31, 1985, 10:29715 (R;US)
Market
Effects of railroad regulatory reform on coal and electricity. Draft, 10:29736 (R;US)
Enhanced coal technology. Hearing before the Subcommittee on Energy and Mineral Resources of the Committee on Energy and Natural Resources, United States Senate, Ninety-Eighth Congress, First Session, August 9, 1983, 10:29739 (B;US)
Mineralogy
[Mining and mineral-related research]. Final report, October 1, 1982-September 30, 1983, 10:29614 (R;US)
Oxidation
Chemical changes in coal liquefaction, 10:29651 (RA;US)
Linear alkane chains in coals, 10:29649 (RA;US)
Low temperature chemical fragmentation of coal, 10:29650 (RA;US)
Survey of the chemical structures of twenty-seven coals as determined by oxidative degradation, 10:29652 (RA;US)
Petrology
Coal characteristics, 10:29667 (R;FI;In Finnish)
Porosity
Effect of maceral properties on the comminution of coal. Technical progress report, January 1-March 31, 1985, 10:29715 (R;US)
Production
Annual outlook for US coal 1985: with projections to 1995, 10:29734 (R;US)
Fuel use of coal. Part 1. Preliminary study (Global aspects), 10:29738 (R;FI;In Finnish)
Monthly Energy Review, February 1985, 10:31172 (R;US)
Review of the US energy situation, 10:31138 (RA;US)
Pyrolysis
Studies of initial reaction steps in the gasification of coal and selected model compounds. Final technical report, September 1981-August 1983, 10:29628 (R;US)
Research Programs
US fossil program - an overview, 10:29613 (RA;US)
Resource Development
Energy situation in Morocco and its perspectives, 10:31137 (RA;US)
Sample Preparation
Rapid dissolution of coal and minerals for analysis, 10:29662 (RA;US)
Structural Chemical Analysis
Aliphatic components of coal. Final report, September 1, 1978-August 31, 1980, 10:29648 (R;US)
Chemical changes in coal liquefaction, 10:29651 (RA;US)
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Linear alkane chains in coals, 10:29649 (RA;US)
Low temperature chemical fragmentation of coal, 10:29650 (RA;US)
Survey of the chemical structures of twenty-seven coals as determined by oxidative degradation, 10:29652 (RA;US)
Surface Area
Effect of maceral properties on the comminution of coal. Technical progress report, January 1-March 31, 1985, 10:29715 (R;US)
Swelling
Effect of maceral properties on the comminution of coal. Technical progress report, January 1-March 31, 1985, 10:29715 (R;US)
Trade
Fuel use of coal. Part 1. Preliminary study (Global aspects), 10:29738 (R;FI;In Finnish)
Uses
Initial assessment of coal-fired ship operations. Final report, 10:29718 (R;US)

Waste Disposal
Investigation of profiles from coal ash disposal sites, 10:29673 (RA;SE;In Swedish)

COAL DEPOSITS

Feasibility analysis for data base design, 10:29631 (R;US)
Information Systems
Feasibility analysis for data base design, 10:29631 (R;US)
Organic Solvents
Fate of basic nitrogen solvents in coal liquefaction. Final report, 10:29640 (R;US)
Solvent tailoring in coal liquefaction based on critical properties of physical solvating agents and hydrogen donors. Progress report, August 1980-January 1981, 10:29621 (R;US)
Thermal component of residuum conversion in two-stage coal liquefaction, 10:29639 (R;US)
Research Programs
Improved coal conversion in CO/water systems. Quarterly report No. 2, December 4, 1984-March 3, 1985, 10:29638 (R;US)
Residues
Thermal component of residuum conversion in two-stage coal liquefaction, 10:29639 (R;US)
Yields
Solvent tailoring in coal liquefaction based on critical properties of physical solvating agents and hydrogen donors. Progress report, August 1980-January 1981, 10:29621 (R;US)

COAL LIQUEFACTION PLANTS
Materials Testing
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Mechanisms of fatigue in coal liquefaction environments. Progress report, 10:29622 (R;US)
Waste Water
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)

COAL LIQUIDS
Chemical Composition
Thermal component of residuum conversion in two-stage coal liquefaction, 10:29639 (R;US)
Combustion Properties
Alternate fuels for maritime use, 10:31324 (RA;US)
Utilization of shale and coal derived fuels in diesel engines, 10:31401 (RA;US)

Denitrification
Transition metal catalysis of hydrogen shuttling in coal liquefaction. Quarterly technical progress report, December 1, 1984-February 28, 1985, 10:29637 (R;US)

Desulfurization
Transition metal catalysis of hydrogen shuttling in coal liquefaction. Quarterly technical progress report, December 1, 1984-February 28, 1985, 10:29637 (R;US)

Electron Spin Resonance
Hydrotreatment catalyst activity enhancement. Quarterly report No. 7, February 1, 1985-April 30, 1985, 10:29636 (R;US)

Fractionation
Supercritical fluid chromatography/supersonic jet spectroscopy. Progress report, February 1, 1985-April 30, 1985, 10:29790 (R;US)

Gas Chromatography
Supercritical fluid chromatography/supersonic jet spectroscopy. Progress report, February 1, 1985-April 30, 1985, 10:29790 (R;US)

Hydrogenation
Hydrotreatment catalyst activity enhancement. Quarterly report No. 7, February 1, 1985-April 30, 1985, 10:29636 (R;US)
Thermal component of residuum conversion in two-stage coal liquefaction, 10:29639 (R;US)

Physical Properties
Thermophysical properties of real and synthetic fluid mixtures derived from fossil substances, 10:29664 (RA;US)

Refining
Refining and upgrading of synfuels from coal and oil shales by advanced catalytic processes. Tenth Interim Report. Revised stock balances and updated cost estimates, 10:29735 (R;US)

Supercritical Fluid Chromatography
Supercritical fluid chromatography/supersonic jet spectroscopy. Progress report, February 1, 1985-April 30, 1985, 10:29790 (R;US)

Toxicity
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)

COAL MINERS

Productivity
Annual outlook for US coal 1985: with projections to 1995, 10:29734 (R;US)

COAL MINES

Planning
Geological origins in the prognosis of gas-bearing qualities in coal-bearing strata for the purpose of solving the problems of gas hazard in mine workings, 10:29710 (TG;GB)

Safety Engineering
Geological origins in the prognosis of gas-bearing qualities in coal-bearing strata for the purpose of solving the problems of gas hazard in mine workings, 10:29710 (TG;GB)

COAL PREPARATION PLANTS

Waste Water
Ground water quality of municipal aquifers downstream from a coal preparation plant, 10:29717 (RA;US)

COAL RESERVES
Fuel use of coal. Part 1. Preliminary study (Global aspects), 10:29738 (R;FI;In Finnish)

COAL SEAMS

Degassing
Evaluation of in-place gas, reserves and production potential of coalbed gas using a vertical boreholes pattern. Final report, September 1, 1983-December 31, 1984 (Mary Lee Coal Warrior Field, Alabama), 10:29695 (R;US)

COAL TAR

Yields
Flash hydropyrolysis and methanolysis of coal with hydrogen and methane, 10:29617 (R;US)

COAL TAR OILS

Quantitative Chemical Analysis
Rapid and efficient capillary column supercritical fluid chromatography with mass spectrometric detection, 10:31645 (J;US)

COAL-DERIVED LIQUIDS
See COAL LIQUIDS

COAL-FIRED MHD GENERATORS

Combustors
Magnetohydrodynamic generator performance comparisons between coal and oil plus ash firing, 10:31183 (TA;US)

Electrodes
The effect of current control circuits on magnetohydrodynamic generator performance, 10:31184 (TA;US)

Equipment Protection Devices
The effect of current control circuits on magnetohydrodynamic generator performance, 10:31184 (TA;US)

Performance Testing
Magnetohydrodynamic generator performance comparisons between coal and oil plus ash firing, 10:31183 (TA;US)

COAL-OIL MIXTURES
See COAL
FUEL OILS
FUEL SLURRIES

COASTAL REGIONS

Wind
Case study of a boundary layer wind regime in stably stratified air over the Baltic Sea, 10:30642 (R;SE)
Preliminary analysis of turbulence measurements at Naesudden during October 1980 and October 1982, 10:30640 (R;SE;In Swedish)
Some observations of turbulence structure near a wooded coast line, 10:30637 (R;SE)
Turbulent characteristics of a shallow convective internal boundary layer, 10:30641 (R;SE)

COATINGS
See also ANTIREFLECTION COATINGS
PROTECTIVE COATINGS
SPRAYED COATINGS

Decomposition
Polymer degradation on reflecting metal films: fourier transform infrared (FTIR) reflection-absorbance studies, 10:30553 (J;NL)

COBALT

Lung Clearance
Lung clearance, translocation, and acute toxicity of arsenic, beryllium, cadmium, cobalt, lead, selenium, vanadium, and ytterbium oxides following deposition in rat lung, 10:32356 (J;US)

Mass Spectroscopy
Continuum flow sampling mass spectrometer for elemental analysis with an inductively coupled plasma ion source, 10:32052 (R;US)
Systematics of multielement determination with resonance ionization mass spectrometry and thermal atomization, 10:31642 (J;US)

Toxicity
Lung clearance, translocation, and acute toxicity of arsenic, beryllium, cadmium, cobalt, lead, selenium, vanadium, and ytterbium oxides following deposition in rat lung, 10:32356 (J;US)

COBALT 59 TARGET

Neutron Reactions
Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)

COBALT ALLOYS
See also HASTELLOY X
INCONEL 617

Coercive Force
Coercivity and squareness ratio in Co-W thin films, 10:31455 (RA;IL)

Magnetization
Irreversible magnetization in Co-W thin films, 10:31456 (RA;IL)

COBALT COMPLEXES

Electron Spin Resonance
Transition-metal mediated formation and cleavage of carbon-hydrogen bonds: hydrogenolysis of trinuclear alkylidyne clusters and oxidative addition of carbon-hydrogen bonds to rhenium, 10:31675 (R;US)

Lattice Parameters
Structure of potassium tetrakis(isothiocyanato)cobaltate(II) monohydrate nitromethane solvate, $K_2[Co(NCS)_4].H_2O.2CH_3NO_2$, at 120 K by neutron diffraction, 10:31665 (J;DK)
Monoclinic Lattices
Structure of potassium tetrakis(isothiocyanato)cobaltate(II) monohydrate nitromethane solvate, $K_2[Co(NCS)_4].H_2O.2CH_3NO_2$, at 120 K by neutron diffraction, 10:31665 (J;DK)
COBALT SILICIDES
Synthesis
Report of the Van de Graaff Group: solid state and materials research. The influence of Au on the formation of cobalt and nickel silicides, 10:31574 (RA;ZA)
COCKCROFT-WALTON ACCELERATORS
Planning
Status of polarized proton preinjector project, 10:31845 (RA;JP;In Japanese)
Specifications
2 MeV, 60 kW dual-beam type electron accelerator irradiation facility, 10:31839 (R;JP;In Japanese)
COENZYME I
See NAD
COENZYME II
See NADP
COGENERATION
Prior to November 1980, this concept was indexed to CO-GENERATION.
See COGENERATION
Economic Analysis
Research on modeling cogeneration-based residential energy systems in rowhouse and high-rise buildings. Final report, 10:31274 (R;US)
Mathematical Models
Research on modeling cogeneration-based residential energy systems in rowhouse and high-rise buildings. Final report, 10:31274 (R;US)
COHERENT ANTI-STOKES RAMAN SPECTROSCOPY
See RAMAN SPECTROSCOPY
COHERENT RADIATION
Far Ultraviolet Radiation
Studies of collisional and nonlinear radiative process for development of coherent uv and xuv sources. Final report, November 1983-November 1984, 10:32477 (R;US)
Ultraviolet Radiation
Studies of collisional and nonlinear radiative process for development of coherent uv and xuv sources. Final report, November 1983-November 1984, 10:32477 (R;US)
COILS (MAGNETIC)
See MAGNET COILS
COINCIDENCE METHODS
Corrections
Simple self-multiplication correction for in-plant use, 10:30039 (R;US)
COKE
Chemical Properties
Studies of the mechanical and chemical properties of coke at high temperature (Report on ECSC contract 7220-EB/818), 10:29660 (R;XE)
Mechanical Properties
Studies of the mechanical and chemical properties of coke at high temperature (Report on ECSC contract 7220-EB/818), 10:29660 (R;XE)
COLLECTIVE ACCELERATORS
See also ELECTRON-RING ACCELERATORS
Cathodes
Considerations on collective ion acceleration as an intense ion injector, 10:31903 (R;US)
Performance
IFA-2 collective ion accelerator experiments, 10:31870 (R;US)
COLLECTIVE MODEL
Lie Groups
Study of collective coordinates and dynamical groups in nuclear theory, 10:32771 (R;DE)
COLLIDING BEAMS
Beam Focusing Magnets
LHC insertions with offset quadrupoles, 10:31923 (RA;US)
Beam Optics
LHC insertions with offset quadrupoles, 10:31923 (RA;US)
COLLIERIES
See COAL MINES
COLLISIONLESS PLASMA
Boltzmann-Vlasov Equation
Local conservation laws for the Maxwell-Vlasov and collisionless kinetic guiding center theories, 10:32888 (R;US)
Electric Currents
Current interruption by density depression, 10:32890 (R;US)
Guiding-Center Approximation
Local conservation laws for the Maxwell-Vlasov and collisionless kinetic guiding center theories, 10:32888 (R;US)
Maxwell Equations
Local conservation laws for the Maxwell-Vlasov and collisionless kinetic guiding center theories, 10:32888 (R;US)
Plasma Heating
Ion and electron heating at collisionless shocks near the critical Mach number, 10:32548 (J;US)
Shock Waves
Ion and electron heating at collisionless shocks near the critical Mach number, 10:32548 (J;US)
Second-order theory of electromagnetic hot ion beam instabilities, 10:32546 (J;US)
COLOGNE SPIRITS
See ETHANOL
COLONIES
See POPULATIONS
COLOR MODEL
Dynamics
Twelve colourful stones, 10:32579 (R;BR)
Nuclear Matter
Color-conductivity in nuclei and the EMC-effect, 10:32769 (RA;DE)
COLORADO
Resource Assessment
Geothermal potential for commercial and industrial direct heat applications in Salida, Colorado. Final report, 10:30586 (R;US)
Sandstones
Effects of water and stress upon permeability to gas of paludal and coastal sands: USDOE multiwell experiment, 10:29805 (R;US)
COLUMBIUM
See NIOBIUM
COLUMNS (EXTRACTION)
See EXTRACTION COLUMNS
COMANCHE PEAK-1 REACTOR
Somervell, Texas, USA
Reactor Safety
Safety Evaluation Report related to the operation of Comanche Peak Steam Electric Station, Units 1 and 2 (Docket Nos. 50-445 and 50-446). Supplement No. 10, 10:30963 (R;US)
Safety Evaluation Report related to the operation of Comanche Peak Steam Electric Station, Units 1 and 2 (Docket Nos. 50-445 and 50-446). Supplement No. 11, 10:30964 (R;US)
COMANCHE PEAK-2 REACTOR
Somervell, Texas, USA
Reactor Safety
Safety Evaluation Report related to the operation of Comanche Peak Steam Electric Station, Units 1 and 2 (Docket Nos. 50-445 and 50-446). Supplement No. 10, 10:30963 (R;US)
Safety Evaluation Report related to the operation of Comanche Peak Steam Electric Station, Units 1 and 2 (Docket Nos. 50-445 and 50-446). Supplement No. 11, 10:30964 (R;US)
COMBINED GAS AND STEAM CYCLE POWER PLANTS
See COMBINED-CYCLE POWER PLANTS
COMBINED STEAM-POWER GENERATION
See COGENERATION

COMBINED-CYCLE POWER PLANTS
Prior to March, 1976, the descriptors COMBINED CYCLES and FOSSIL-FUEL POWER PLANTS or THERMAL POWER PLANTS were used for indexing this concept.
Economic Analysis
The role of MHD in the energy future, 10:30656 (J;US)
COMBUSTION
See also FLUIDIZED-BED COMBUSTION
Behavior of the porous bed in a combustion-deflagration-detonation transition, 10:31831 (R;FR;FR)
Theoretical studies of molecular interactions, 10:31720 (R;US)
Asymptotic Solutions
Asymptotic methods especially in combustion. Final report, 15 June 1981-30 September 1984, 10:31826 (R;US)
Flame Propagation
Coherent structures in turbulent flames. Final report, 10:31716 (R;GB)
Flame-acceleration mechanisms under conditions of partial confinement. Final report, February 1983-August 1984, 10:29807 (R;US)
Initiation, stability, and limits of detonation for advanced stable air-breathing and hybrid-propulsion engine design. Final report, 15 March 1982-14 March 1983, 10:31825 (R;DE)
Flames
Laser diagnostic analyses of sooting flames. Final report, 1 October 1980-30 September 1984, 10:31717 (R;US)
Flow Models
Two-fluid model of turbulence applied to combustion phenomena, 10:31722 (R;GB)
Heat Transfer
Two-d heat transfer through porous media with heat generation. Master's thesis, 10:31771 (R;US)
Mathematical Models
Coal-water mixtures combustion modeling. Final report, 6 May 1983-6 August 1984, 10:29719 (R;US)
Particle Size
Size and velocity distributions of particles and droplets in spray-combustion systems. Final report, 1 March 1980-15 August 1984, 10:31823 (R;US)
COMBUSTION CHAMBERS
Design
Design of a Mobile Combustion Diagnostic Fixture (MCDF). Final report, 10:31827 (R;US)
Flames
Application of DRASC method on snecma centers (Raman Anti-Stokes Coherent Diffusion), 10:31830 (R;FR;FR)
Safety
Design of a Mobile Combustion Diagnostic Fixture (MCDF). Final report, 10:31827 (R;US)
COMBUSTION PRODUCTS
Air Pollution Abatement
Bench-scale process evaluation of reburning and sorbent injection for in-furnace NOx/SOx reduction. Final report, October 1983-October 1984, 10:31368 (R;US)
Air Pollution Monitoring
National Dioxin Study Tier 4 - combustion sources: project plan. Final report, 10:32147 (R;US)
Gas Chromatography
Microanalysis of reaction products in sealed tube wet air oxidations by capillary gas chromatography, 10:31643 (J;US)
COMBUSTORS
See also FLUIDIZED-BED COMBUSTORS
Performance
Evaluation of alternate combustor concepts for gas turbine application program. Monthly report No. 1, October 1984, 10:29720 (R;US)
Temperature Measurement
Investigation of non-intrusive radiometers for entrained gasifier temperature measurement. Fourth quarterly report, August 1-October 31, 1984. Revision 3, 10:32034 (R;US)
COMMERCIAL BUILDINGS
See also RESTAURANTS
SHOPPING CENTERS
Daylighting
Daylighting performance documentation of two innovative low rise commercial buildings, 10:31302 (BA;US)
The impact of fenstration on energy use and peak loads in daylighted commercial buildings, 10:31305 (BA;US)
Design
168 proof?, 10:31289 (RA;US)
Baseline for energy design, 10:31288 (RA;US)
Bed, board, and Btu's, 10:31294 (RA;US)
Dwelling with energy, 10:31293 (RA;US)
Energy for sales, 10:31292 (RA;US)
Introduction, 10:31287 (RA;US)
Energy Analysis
168 proof?, 10:31289 (RA;US)
Baseline for energy design, 10:31288 (RA;US)
Bed, board, and Btu's, 10:31294 (RA;US)
Dwelling with energy, 10:31293 (RA;US)
Energy for sales, 10:31292 (RA;US)
Introduction, 10:31287 (RA;US)
Energy Conservation
Baseline for energy design, 10:31288 (RA;US)
Energy conservation code assessment. Volume 1. Final report, 10:31272 (R;US)
Energy conservation in existing small commercial buildings, 10:31260 (RA;US)
Energy Consumption
168 proof?, 10:31289 (RA;US)
Baseline for energy design, 10:31288 (RA;US)
Bed, board, and Btu's, 10:31294 (RA;US)
Dwelling with energy, 10:31293 (RA;US)
Introduction, 10:31287 (RA;US)
Energy Efficiency
168 proof?, 10:31289 (RA;US)
Baseline for energy design, 10:31288 (RA;US)
Bed, board, and Btu's, 10:31294 (RA;US)
Conservation and solar guidelines, 10:30439 (BA;US)
Dwelling with energy, 10:31293 (RA;US)
Energy for sales, 10:31292 (RA;US)
Introduction, 10:31287 (RA;US)
The impact of fenstration on energy use and peak loads in daylighted commercial buildings, 10:31305 (BA;US)
Energy Efficiency Standards
Energy conservation opportunities in the building envelope through the enforcement of a mandatory energy code, 10:31211 (RA;US)
Implementation of building energy standards in New York State, 10:31212 (RA;US)
HVAC Systems
HVAC control in passive/hybrid buildings with remote thermal storage, 10:30460 (BA;US)
Passive Solar Cooling Systems
The courtyard: Passive cooling performance and shading variables, 10:30464 (BA;US)
The DOE passive solar commercial buildings program: Preliminary results of performance evaluation, 10:30427 (BA;US)
The impact of occupants on the performance of passive solar commercial buildings, 10:30424 (BA;US)
Passive Solar Heating Systems
Conservation and solar guidelines, 10:30439 (BA;US)
HVAC control in passive/hybrid buildings with remote thermal storage, 10:30460 (BA;US)
The DOE passive solar commercial buildings program: Preliminary results of performance evaluation, 10:30427 (BA;US)
The impact of occupants on the performance of passive solar commercial buildings, 10:30424 (BA;US)
Roofs
Direct approach to retrofitting - protected membrane roofing, 10:31252 (RA;US)
Thermal spacers improve roof insulation performance of metal buildings, 10:31250 (RA;US)
Solar Air Heaters
Farm shop thermo-syphon collector. Final report, 10:30371 (R;US)
Solar Heating Systems
Construction and preliminary performance data on two commercial buildings with active charge/passive discharge solar systems, 10:30494 (BA;US)

Thermal Insulation
Moisture condensation above insulated suspended ceilings - experimental results, 10:31251 (RA;US)
Windows
Thermal performance of vinyl covered fiberglass solar screens, 10:31244 (RA;US)
COMMERCIALIZATION
Planning
Commercialization of the Staged Cascade Fluid Bed Combustor: a Cooperative Energy Technology Development Program. Final report, 10:29721 (R;US)
COMMUNICATIONS
Computer Codes
Error message recording and reporting in the SLC control system, 10:31993 (R;US)
Equipment Protection Devices
Nuclear electromagnetic pulse (EMP) protection manual for emergency broadcast radio stations and Emergency Operations Centers, 10:31808 (R;US)
COMMUNITIES
See also PLANNED COMMUNITIES
Energy Conservation
Neighborhood energy works, 10:31378 (R;US)
Program Management
Neighborhood energy works, 10:31378 (R;US)
COMPLEX TERRAIN
Atmospheric Chemistry
Evaluation of the 2DFLOW and hybrid complex-terrain dispersion models with the 1980 ASCOT data base from The Geysers. Final report, 10:32118 (R;US)
COMPLEXES
See also ACTINIDE COMPLEXES
SILICON COMPLEXES
TRANSITION ELEMENT COMPLEXES
Chemical Bonds
Photoelectron spectroscopic study of bonding in inorganic and organometallic compounds (Boron trihalides; silyl amines; thiazyl fluorides; borane adducts; transition metal complexes with isocyanides and olefins), 10:31658 (R;US)
COMPOSITE MATERIALS

SUPERCONDUCTING COMPOSITES
Elasticity
Self-consistent approach to the elastic stiffness of short-fiber composites, 10:31543 (R;US)
Fatigue
Flexural fatigue of short fiber reinforced high temperature thermoplastics, 10:31549 (J;US)
Mechanical Properties
Viscoelastic behavior of short-fiber composite materials, 10:31544 (R;US)
Physical Radiation Effects
Effects of high energy radiation on the mechanical properties of epoxy-graphite fiber reinforced composites, 10:31545 (R;US)
Tensile Properties
Flexural fatigue of short fiber reinforced high temperature thermoplastics, 10:31549 (J;US)
Young Modulus
Viscoelastic behavior of short-fiber composite materials, 10:31544 (R;US)
COMPOST
Production
Compost production from municipal wastes of Canadian mining towns, 10:31821 (RA;CA)
COMPOUND NUCLEI
Energy-Level Transitions
Decay of highly excited compound nuclei: a statistical approach, 10:32731 (R;SU;In Russian)
Excitation
Decay of highly excited compound nuclei: a statistical approach, 10:32731 (R;SU;In Russian)
COMPOUND-NUCLEUS REACTIONS
Energy-Level Transitions
Decay of highly excited compound nuclei: a statistical approach, 10:32731 (R;SU;In Russian)
Particle-Hole Model
Pairing correction of particle-hole state densities for two kinds of Fermions, 10:32756 (R;US)
COMPOUNDS (ORGANIC)
See ORGANIC COMPOUNDS
COMPRESSED AIR STORAGE POWER PLANTS
Feasibility Studies
Compressed air energy storage at New York State hydropower sites, 10:31042 (RA;US)
COMPRESSED GASES
Hazards
Safety implications associated with in-plant pressurized gas storage and distribution systems in nuclear power plants, 10:31009 (R;US)
Safety
Safety implications associated with in-plant pressurized gas storage and distribution systems in nuclear power plants, 10:31009 (R;US)
COMPRESSIBLE FLOW
Computerized Simulation
Compressible two-phase flow instabilities simulated with a hybrid Lagrange-Euler pseudospectral method, 10:31780 (R;US)
Flow Models
Compressible two-phase flow instabilities simulated with a hybrid Lagrange-Euler pseudospectral method, 10:31780 (R;US)
COMPTON SPECTROMETERS
Design
Detector development for γ-ray diagnostics of D-T fusion reactions, 10:32966 (J;US)
COMPUTER AXIAL TOMOGRAPHY SCANNING
See CAT SCANNING
COMPUTER CALCULATIONS
Methods, not results.
Supercomputers and symbolic computation. Technical report for period ending 4 June 1984, 10:33078 (R;US)
Documentation
Repository environmental parameters relevant to assessing the performance of high-level waste packages, 10:29952 (R;US)
Numerical Solution
Toolpack. Final report, August 1, 1980-July 31, 1984, 10:33086 (R;US)
Specifications
Repository environmental parameters relevant to assessing the performance of high-level waste packages, 10:29952 (R;US)
Validation
Repository environmental parameters relevant to assessing the performance of high-level waste packages, 10:29952 (R;US)
COMPUTER CODES
Computer codes are indexed by their initial letter and CODES, e.g., A CODES. If the code name begins with a number the code is indexed to NUMBER CODES.

CANDU LOCA experiments comparisons with the FIREBIRD-III and RELAP5 codes, 10:30946 (RA;XA)
FEATURE: Finite-Element Analysis Tool for Utility Rotordynamic Evaluation. Volume 1. User's manual, 10:30646 (R;US)
User's manual for the FLORA equilibrium and stability code, 10:32920 (R;US)
Users' manual for the FTA-J (Fault Tree Analysis-JAERI) code system, 10:30953 (R;JP;In Japanese)
G Codes
GIANT: a computer code for General Interactive ANalysis of Trajectories, 10:31992 (R;US)
GORGON - a computer code for the calculation of energy deposition and the slowing down of ions in cold materials and hot dense plasmas, 10:33017 (R;DE)
GT2F: a computer code for estimating light water reactor fuel rod failures, 10:31022 (R;US)
H Codes
HEATING5-JR: a finite difference computer program for nonlinear heat conduction problems, 10:31774 (R;JP;In Japanese)
I Codes
ITPACK project: past, present, and future, 10:33083 (R;US)
Using an LSI-11/23 and RT-11 to digitize analog tapes, 10:33098 (R;US)
L Codes
LEEM - a lake energy and evaporation model user's manual, 10:32181 (R;CA)
M Codes
Deprit's algorithm, Green's functions, and multipole perturbation theory, 10:31894 (R;US)
Interactive computers in the energy-conscious design process, 10:30473 (BA;US)
Micropas, an annual hourly heating and cooling building simulation for microcomputers, 10:30481 (BA;US)
MODEASY - a program-system for modification and management of stored functions of one independent variable, 10:33094 (R;DE;In German)
MUSTAFA and MUSTAMO, computer programs for analysis of fault trees with multistate-components, 10:33095 (R;DE;In German)
New programs for computer aided design, 10:30489 (BA;US)
User's guide to the MATHEW/ADPIC models, 10:32115 (R;US)
N Codes
Development of two-dimensional transient fuel behavior analysis code for non-concentric pellet-cladding alignments, NSR-EXENT. Analysis model and sample calculation, 10:30826 (R;JP;In Japanese)
P Codes
A generalized model for passive solar direct gain, 10:30476 (BA;US)
Analysis of flow-induced vibration of heat exchanger and steam generator tube bundles using the AECL computer code PIPEAU-2, 10:30810 (R;CA)
Error message recording and reporting in the SLC control system, 10:31993 (R;US)
Optimization of activity loading of low and medium level waste packages, 10:29939 (R;DE;In German)
PETROS: a program for calculating transport of heat, water, water vapor and air through a porous material, 10:31779 (R;US)
PMEXA: diagnostic filtering program for the PBFA-I performance monitoring and evaluation system, 10:33031 (R;US)
Reduction of the well test data for test well USW H-1, adjacent to Nevada Test Site, Nye County, Nevada, 10:29969 (R;US)
Tracer test analysis of the Klamath Falls geothermal resource: a comparison of models, 10:30603 (R;US)
Q Codes
QUIKPAS: A microcomputer based tool for passive solar design, 10:30487 (BA;US)
R Codes
Aspects of small-break LOCA analysis using few volumes (RELAP5 computer code), 10:30938 (RA;XA)
CANDU LOCA experiments comparisons with the FIREBIRD-III and RELAP5 codes, 10:30946 (RA;XA)
Pre-test analysis of PMK experiments (RELAP4/MOD3 and MOD6 computer codes), 10:30939 (RA;XA)
RELAP5 user experiences, 10:30936 (RA;XA)
RL5SORT/RL5PLOT. A graphite package for the JRC-Ispra IBM version of RELAP5/MOD1, 10:30920 (R;XE)
Transition from single-phase forced convection to fully developed boiling (TRAC, DRUFAN and RELAP5 computer codes), 10:30812 (RA;XA)
S Codes
Monte Carlo calculation of the average solid angle subtended by a parallelepiped detector from a distributed source (SOLANG), 10:32037 (J;NL)
Numerical simulation(I) of field tracer experiment by a system for prediction of environmental emergency dose information (SPEEDI). Field experiment with a line source, 10:32158 (R;JP;In Japanese)
Technical bases and user's manual for the prototype of a Suppression Pool Aerosol Removal Code (SPARC), 10:31008 (R;US)
T Codes
Toolpack. Final report, August 1, 1980-July 31, 1984, 10:33086 (R;US)
Transition from single-phase forced convection to fully developed boiling (TRAC, DRUFAN and RELAP5 computer codes), 10:30812 (RA;XA)
TRAP-MELT2 user's manual, 10:31026 (R;US)
Z Codes
Development of a mathematical model for studying rewetting of reactor fuel elements after a loss-of-coolant accident, 10:30949 (R;DE;In German)
COMPUTER GRAPHICS
Optimization
Optimal parallel algorithms for graph connectivity. Technical report, 10:33081 (R;US)

Programming Languages
Scientific workstation research. Second annual report, August 1984-July 1985, 10:33088 (R;US)
COMPUTER NETWORKS
Data Transmission
Software for the system of data transmission from the U-240 measuring center to the M-4030 computer, 10:31976 (RA;SU;In Russian)
COMPUTER PROGRAMMING
See PROGRAMMING
COMPUTER PROGRAMS
See COMPUTER CODES
COMPUTER-AIDED MANUFACTURING
Productivity
Electronic information management and productivity, 10:31807 (R;US)
COMPUTERIZED CONTROL SYSTEMS
Communications
Error message recording and reporting in the SLC control system, 10:31993 (R;US)
Design
Economical control of hydroelectric plants, 10:30186 (RA;US)
Systems Analysis
Ultra-reliable computer systems: an integrated approach for application in reactor safety systems, 10:30858 (R;US)
COMPUTERIZED SIMULATION
Computer Codes
Faster-than-real-time simulation of nuclear reactor accidents: the TRAC-NPA code, 10:30958 (R;US)
CONCENTRATING COLLECTORS
Efficiency
Applications of collectors for solar cooling, 10:30389 (RA;US)
Performance
Applications of collectors for solar cooling, 10:30389 (RA;US)
CONCENTRATOR SOLAR CELLS
Prior to July, 1979 SOLAR CELLS or specific solar cells descriptors and SOLAR CONCENTRATORS were used to index this concept.
Fresnel Lens
Second generation point focused concentration on the next step, 10:30556 (BA;US)
Meetings
Photovoltaic Concentrator Technology Project. Thirteenth project integration meeting, 10:30310 (R;US)
Technology Assessment
Multijunction cells for concentrators: technology prospects, 10:30307 (R;US)
CONCRETE BLOCKS
U Values
Heat transmission coefficients of concrete block walls with core insulation, 10:31208 (RA;US)
CONCRETES
See also REINFORCED CONCRETE
Compression Strength
Properties of concrete at elevated temperatures, 10:30742 (R;US)
Corrosion
Effects of acid deposition on the properties of portland cement concrete: state of knowledge, 10:31577 (R;US)
Crack Propagation
Thermo-mechanical analysis of concrete in LMFBR programs, 10:30749 (J;NL)
Creep
[Mining and mineral-related research.] Final report, July 1, 1983-June 30, 1984, 10:29615 (R;US)
Properties of concrete at elevated temperatures, 10:30742 (R;US)
Heat Transfer
Heat conduction through layered refractory linings, 10:31784 (J;US)
Impact Tests
Hopkinson bar simulation using DYNA2D. Revision 1, 10:31798 (R;US)
Thermal Conductivity
Properties of concrete at elevated temperatures, 10:30742 (R;US)
Thermal Expansion
Properties of concrete at elevated temperatures, 10:30742 (R;US)
CONDENSED AROMATICS
See also ANTHRACENE
NAPHTHALENE
PHENANTHRENE
PYRENE
Chemical Reaction Yield
Formation of benzene by the pyrolysis of 4-vinylcyclohexene regiospecific formation of anthracenes in the pyrolysis of dibenzobuerones and related systems (2,6-dimethylanthracene), 10:31674 (R;US)
NMR Spectra
Formation of benzene by the pyrolysis of 4-vinylcyclohexene regiospecific formation of anthracenes in the pyrolysis of dibenzobuerones and related systems (2,6-dimethylanthracene), 10:31674 (R;US)
CONDENSERS (STEAM)
See STEAM CONDENSERS
CONGLOMERATES
Limited to geological formations.
Geochemistry
Uraniferous carbon nodules in Witwatersrand conglomerates and Pre-Witwatersrand granite, 10:29870 (RA;ZA)
CONSERVATION (ENERGY)
See ENERGY CONSERVATION
CONSOLIDATED EDISON THORIUM REACTOR
See INDIAN POINT-1 REACTOR
CONSTRUCTION
Environmental Impacts
Draft supplement to the environmental statement fiscal year 1976 proposed program. Facility location evaluation for Hangman Creek Area service study area 76-8, 10:32206 (R;US)
Draft supplement to the environmental statement fiscal year 1975 proposed program. Facility location evaluation for Ashe-Hanford 500-kV transmission line study area 74-3, 10:32203 (R;US)
Draft supplement to the environmental statement fiscal year 1977 proposed program. Facility location evaluation for Hot Springs-Bell 500-kV line study area 76-6, 10:32207 (R;US)
Draft supplement to the environmental statement fiscal year 1975 proposed program. Facility location evaluation for San Juan Island service study area 74-7, 10:32204 (R;US)
Draft supplement to the environmental statement fiscal year 1975 proposed program. Facility location supplement for Maple Valley 500-kV reinforcement study area 75-14, 10:32205 (R;US)
Errors
Method for evaluation of risk due to seismic related design and construction errors based on past reactor experience, 10:30905 (RA;US)
CONSTRUCTION INDUSTRY
Machinery
Night-work lighting systems for construction equipment. Interim report No. 1, 10:31730 (R;US)
CONSUMER PROTECTION
Report on electrocutions, electric shock, and electric burn injuries involving consumer products. final report, 10:32380 (R;US)
Report on electrocutions, electric shock, and electric-burn injuries involving consumer products. Appendices, 10:32381 (R;US)
CONTACT RADIOTHERAPY
See RADIOTHERAPY
CONTACTORS
See SWITCHES
CONTAINERS
See also CALANDRIAS
PRESSURE VESSELS
Closures
Latch assembly, 10:29892 (P;US)
Corrosion
Repository environmental parameters relevant to assessing the performance of high-level waste packages, 10:29952 (R;US)

Remote Handling
In-cell welding fixture. Remote welder assembly, Model II (Engineering Materials), 10:31731 (E;US)
Stresses
Repository environmental parameters relevant to assessing the performance of high-level waste packages, 10:29952 (R;US)
Welding
In-cell welding fixture. Remote welder assembly, Model II (Engineering Materials), 10:31731 (E;US)
CONTAINMENT
See also CONTAINMENT BUILDINGS
CONTAINMENT SYSTEMS
Laboratory investigation of containment of underground explosions. Technical report, 10:32102 (R;US)
Leaks
Characterization of nuclear reactor containment penetrations. Preliminary report, 10:30813 (R;US)
Containment performance working group report. Draft report for comment, 10:30968 (R;US)
Safety Standards
Project CSNI - CASP. Summarizing final report 1983-03-15 (COPTA computer codes), 10:31037 (R;SE;In Swedish)
CONTAINMENT BUILDINGS
Chemical Explosions
Gas cloud explosions and their effect on nuclear power plant. Phase 1: basic development of explosion codes, 10:30924 (R;XE)
Dynamic Loads
Hydrogen combustion in nuclear plant accidents and associated containment loads, 10:31040 (J;NL)
Seismic Effects
SMACS - a system of computer programs for probabilistic seismic analysis of structures and subsystems. Volume II. Example problem, 10:30833 (R;US)
CONTAINMENT SYSTEMS
Controlled Atmospheres
Hydrogen Problems in Reactor Safety Research, 10:30842 (R;DE;In German)
Failure Mode Analysis
Consistent probabilistic methodology for the Seabrook Station containment event tree analysis, 10:30884 (RA;US)
Containment event tree analysis for source term frequency estimation, 10:30885 (RA;US)
Evaluation of containment failure modes and fission product releases during core meltdown accidents in a BWR with a Mark III containment, 10:30886 (RA;US)
Failures
Containment failure pressure analysis for the Seabrook Station Probabilistic Safety Assessment, 10:30883 (RA;US)
Review of probabilistic containment analyses and some suggested improvements, 10:30882 (RA;US)
Heat Transfer
Statistical evaluation of the heat transfer data obtained in the HDR containment tests, 10:30991 (RA;US)
Hydrogen
Evaluation of containment failure modes and fission product releases during core meltdown accidents in a BWR with a Mark III containment, 10:30886 (RA;US)
Performance
ESF collection effectiveness, a study in fine particle dynamics (PWR; BWR), 10:31033 (R;US)
Valves
Reactor containment purge and vent valve performance experiments, 10:30861 (R;US)
CONTENT ANALYSIS
See CHEMICAL ANALYSIS
CONTINENTAL SHELF
Natural Gas Deposits
Estimated oil and gas reserves, Southern California Outer Continental Shelf, December 31, 1982, 10:29743 (R;US)
Final environmental impact statement: proposed 1985 Outer Continental Shelf oil and gas Lease Sale No. 111, offshore the Mid-Atlantic states, 10:29787 (R;US)
Petroleum Deposits
Estimated oil and gas reserves, Southern California Outer Continental Shelf, December 31, 1982, 10:29743 (R;US)
Final environmental impact statement: proposed 1985 Outer Continental Shelf oil and gas Lease Sale No. 111, offshore the Mid-Atlantic states, 10:29787 (R;US)
Sediments
Geological study on the shallow water, 10:32410 (R;KR;In Korean)
CONTINENTAL SLOPE
Water Currents
"Pycnobathic" currents over the upper continental slope, 10:32411 (J;US)
CONTRACTORS
Inspection
Licensee contractor and vendor inspection status report. Quarterly report, January-March 1985. Volume 9, No. 1, 10:30760 (R;US)
Quality Assurance
Licensee contractor and vendor inspection status report. Quarterly report, January-March 1985. Volume 9, No. 1, 10:30760 (R;US)
CONTROL ROD EFFECTIVENESS
See CONTROL ROD WORTHS
CONTROL ROD WORTHS
Simulation
Studies of LMFBR: method of analysis and some results, 10:30737 (R;BR;In Portuguese)
CONTROL SYSTEMS

S Codes
CSAS1: a one-dimensional criticality safety analysis module, 10:30781 (RA;US)
CSAS2: a multidimensional criticality safety analysis module, 10:30782 (RA;US)
CSAS4: an enhanced criticality safety analysis module with an optimum pitch search option, 10:30783 (RA;US)
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 1. Control modules, 10:30780 (R;US)
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 2. Functional modules, 10:30785 (R;US)
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 3. Miscellaneous, 10:30796 (R;US)
SCALE free-form reading routines, 10:30799 (RA;US)
SCALE subroutine library, 10:30798 (RA;US)
SCALE system driver, 10:30797 (RA;US)
Safety
What is validation, 10:31737 (R;US)
CRITICALITY ACCIDENTS
See CRITICALITY
RADIATION ACCIDENTS
CROSSED BEAMS
See COLLIDING BEAMS
CROSSFLOW COOLING TOWERS
See COOLING TOWERS
CROSSROADS PROJECT
Historical Aspects
Operation Crossroads. Atomic bomb tests Able and Baker conducted at Bikini Atoll, Marshall Islands on 1 July 1946 and 25 July 1946. Volume 1. History of Director of Ship Material report, 10:32100 (R;US)

Operation Crossroads. Atomic bomb tests Able and Baker conducted at Bikini Atoll, Marshall Islands on 1 July 1946 and 25 July 1946. Volume 3. Appendix v: pictorial review. History of Director of Ship Material report, 10:32101 (R;US)

CRUDE CARRIERS
See TANKER SHIPS

CRUDE OIL
See PETROLEUM

CRYOPUMPS
Design
Underground remotely controlled cryopump vacuum system utilizing 460-m long helium gas lines, 10:31800 (J;US)
Operation
Underground remotely controlled cryopump vacuum system utilizing 460-m long helium gas lines, 10:31800 (J;US)

CRYSTAL GROWTH
Annealing
Study on the influence of annealing effects in GaN VPE, 10:31537 (R;BR)

CRYSTAL LATTICES
See also BETA-W LATTICES
CUBIC LATTICES
Computerized Simulation
Simulation of lattice damage due to dynamic loading, 10:33100 (R;US)
Damage
Simulation of lattice damage due to dynamic loading, 10:33100 (R;US)

CRYSTAL MODELS
For theories only.
See also HEISENBERG MODEL
ISING MODEL
Coupling Constants
External stress influence on the spin-Peierls phase diagram of the XY model, 10:32830 (R;BR)
Energy Spectra
Renormalization group methods for the spectra of disordered chains, 10:32836 (R;BR)
Green Function
Renormalization group methods for the spectra of disordered chains, 10:32836 (R;BR)
Magnetic Fields
Dilute Potts chain in a magnetic field, 10:32834 (R;BR)
Phase Diagrams
External stress influence on the spin-Peierls phase diagram of the XY model, 10:32830 (R;BR)
Renormalization
Renormalization group methods for the spectra of disordered chains, 10:32836 (R;BR)

CRYSTALLINE ROCKS
See IGNEOUS ROCKS
METAMORPHIC ROCKS

CRYSTALS
See also LIQUID CRYSTALS
Lorentz Force
Lorentz factors for large-mosaic crystals, 10:32047 (J;DK)
Multi-Photon Processes
Non-linear absorption in solids, 10:32806 (R;BR)

CT SCANNING
See CAT SCANNING

CUBA
Energy Policy
Cuba - energy situation 1983, 10:31147 (R;DE;In German)

CUBIC LATTICES
Spin Waves
Spin waves at surfaces and interfaces in cubic Heisenberg systems, 10:32842 (J;US)

CULTURAL OBJECTS
Objects of historical and/or artistic value.
Chemical Analysis
Report of the Van de Graaff Group: nuclear analysis. Studies on the origin of archaeological gold objects, 10:31620 (RA;ZA)
PIXE Analysis
Report of the Van de Graaff Group: nuclear analysis. Studies of South-West African interest (Analysis of clays and pottery from the Kavongo and Caprivi ares of northern South West Africa and trace element analysis of the Namib Desert), 10:31619 (RA;ZA)
Report of the Van de Graaff Group: nuclear analysis. Determining the origin of 18th century Cape pottery, 10:31621 (RA;ZA)
Report of the Van de Graaff Group: nuclear analysis. Examination of Chinese ceramics and pottery excavated in the Cape, 10:31623 (RA;ZA)
Report of the Van de Graaff Group: nuclear analysis. Qualitative analysis of isolated archaeological trade beads, 10:31624 (RA;ZA)

CURIUM 248
Chemical Preparation
Chemistry of transuranium elements and compounds, 10:31712 (RA;US)
Crystal-Phase Transformations
Chemistry of transuranium elements and compounds, 10:31712 (RA;US)
Volume
Chemistry of transuranium elements and compounds, 10:31712 (RA;US)

CURIUM 248 TARGET
Uranium 238 Reactions
Anomalous positron peaks from supercritical collision systems, 10:32753 (J;US)

CURRENTS (ELECTRIC)
See ELECTRIC CURRENTS

CYANATES
Specific compounds should be indexed by coordination of a descriptor of the form (CATION) COMPOUNDS and the above anion descriptor.
Chemical Preparation
Pb/sub 0.77/K/sub 0.23/[Pt(CN)$_4$].1.5H$_2$O: a new type of partially oxidized tetracyanoplatinate salt, 10:31522 (J;GB)
Electric Conductivity
Pb/sub 0.77/K/sub 0.23/[Pt(CN)$_4$].1.5H$_2$O: a new type of partially oxidized tetracyanoplatinate salt, 10:31522 (J;GB)

CYANIDES
Specific compounds, except those of significance to energy research and development, should be indexed by coordination of a descriptor of the form (CATION) COMPOUNDS and the above anion descriptor.
See also HYDROCYANIC ACID
Color Centers
Color centers in KCN: ferro-elastic alignment and free optical absorption of phonons, 10:31566 (R;BR;In Portuguese)
Electric Dipoles
Electric dipole ordering in alkali-cyanides: NaCN and KCN, 10:31578 (R;BR)
Specific Heat
Specific heat measurements in KCN:KCL mixed crystals, 10:31567 (R;BR;In Portuguese)

CYANOGEN
Electronic Structure
Ab initio study of cyanogen: The X $^1u^+$/sub g/, a $^3\Sigma^+$/sub u/, B $^1\Delta$/sub u/, and C ^{1}Pi/sub u/ states, 10:32517 (J;US)
Rotational States
Theoretical studies of molecular interactions, 10:31720 (R;US)

CYCLES (THERMODYNAMIC)
See THERMODYNAMIC CYCLES

CYCLIC ACCELERATORS
See also BETATRONS
CYCLOTRONS
Beam Dynamics
Modified betatron accelerator studies. Final report, 10:31890 (R;US)
Beam Optics
Beam trapping in high-current cyclic accelerators with strong-focusing fields. Memorandum report, January-December 1984, 10:31889 (R;US)
Betatron Oscillations
Betatron oscillation frequency shift in large cyclic accelerators, 10:31906 (R;SU;In Russian)
Pulse Generators
High-power, solid-state rf source for accelerator cavities, 10:31978 (R;US)

Stability
Modified betatron accelerator studies. Final report, 10:31890 (R;US)

CYCLOALKANES
See also CYCLOHEXANE
DECALIN
Dissociation
Infrared multiphoton dissociation of octafluorocyclobutane with a two-frequency Q-switched CO_2 laser, 10:31679 (J;US)

CYCLOALKENES
Combustion Products
Soot and radiation in free boundary layer flames (Cyclohexene), 10:31719 (R;US)
Mass Spectra
Formation of benzene by the pyrolysis of 4-vinylcyclohexene regiospecific formation of anthracenes in the pyrolysis of dibenzobuerones and related systems, 10:31674 (R;US)
NMR Spectra
Formation of benzene by the pyrolysis of 4-vinylcyclohexene regiospecific formation of anthracenes in the pyrolysis of dibenzobuerones and related systems, 10:31674 (R;US)
Photochemical Reactions
Solar energy conversion in homogeneous solution. Final report, August 1, 1979-November 30, 1984. Revision, 10:31687 (R;US)
Pyrolysis
Formation of benzene by the pyrolysis of 4-vinylcyclohexene regiospecific formation of anthracenes in the pyrolysis of dibenzobuerones and related systems, 10:31674 (R;US)

CYCLOHEXANE
Combustion Products
Soot and radiation in free boundary layer flames, 10:31719 (R;US)
Solubility
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)
Solvent Properties
Advanced coal liquefaction catalyst development. Quarterly progress report No. 9, October 1-December 31, 1983, 10:29623 (R;US)
Phase behavior of coal fluids: data for correlation development. Reporting period: November 1, 1984-April 30, 1985, 10:29635 (R;US)
Vapor Pressure
Thermodynamics of multi-polar molecules: the perturbed-anisotropic-chain theory, 10:31670 (R;US)

CYCLOTRONS
See also ISOCHRONOUS CYCLOTRONS
MICROTRONS
Magnetic Fields
Superconducting coils electromagnet of the Orsay IPN project, 10:31838 (R;FR;In French)

CYSTEINE
Oxidation
Oxidation of biologically active reducing substances by ozone, 10:32227 (J;US)

CYTOCHROME OXIDASE
Biosynthesis
Isolation and characterization of an Escherichia coli mutant lacking the cytochrome o terminal oxidase, 10:32219 (J;US)
Enzyme Immunoassay
Immunological investigation of the distribution of cytochromes related to the two terminal oxidases of Escherichia coli in other gram-negative bacteria, 10:32218 (J;US)

D

D MESONS
Prior to Jan. 1985 this information was indexed with the descriptor D-1865 RESONANCES.
Form Factors
Calculation of the $D^{+}\rightarrow$ anti ksup(0)esup(+)ωsub(e) transition formfactor and the Usub(cs) element of the Kobajashi-Maskawa matrix, 10:32602 (R;SU)
Semileptonic Decay
Calculation of the $D^{+}\rightarrow$ anti ksup(0)esup(+)ωsub(e) transition formfactor and the Usub(cs) element of the Kobajashi-Maskawa matrix, 10:32602 (R;SU)

D REGION
Electron Density
Incoherent scatter radar studies of the mesosphere, 10:32461 (R;US)
Partial reflection D-region electron densities, 10:32460 (R;CA)
Ion Density
Incoherent scatter radar studies of the mesosphere, 10:32461 (R;US)
Wind
D1 LF wind measurements in the 90 to 100 km height range, 10:32462 (R;DE)

D-1285 RESONANCES
Particle Production
Investigation of D(1285) and E(1420) meson production in exclusive interactions of negatively charged pions and kaons at the momentum 32,5 GeV/c, 10:32560 (R;SU;In Russian)

D-1865 RESONANCES
See D MESONS

DAIRY INDUSTRY
Energy Management
Energy Management Manual for dairy processors, 10:31353 (R;US)

DAMS
Retrofitting
Rapidan hydroelectric project - retrofit of a 70 year old dam, 10:30269 (RA;US)
Safety
Auxiliary spillway improves dam safety at minimal cost, 10:30267 (RA;US)
Hazard ratings and warning systems for dams, 10:30265 (RA;US)
Probability based safety assessment of existing dams, 10:30266 (RA;US)
Rapidan hydroelectric project - retrofit of a 70 year old dam, 10:30269 (RA;US)
Spillway addition at TVA's Blue Ridge Project, 10:30268 (RA;US)
US dam safety issues, 10:30264 (RA;US)
Spillway
Auxiliary spillway improves dam safety at minimal cost, 10:30267 (RA;US)
Spillway addition at TVA's Blue Ridge Project, 10:30268 (RA;US)

DATA ACQUISITION SYSTEMS
Advances in data acquisition system technology for PBFA II, 10:33033 (R;US)
Data acquisition system for a calorimetric installation, 10:30825 (R;SU;In Russian)
Introductory user's manual for the US Nuclear Regulatory Commission Reactor Safety Research Data Bank. Revision 3, 10:31006 (R;US)
Operations considerations in designing a high speed multi-channel data acquisition system, 10:33034 (R;US)

DATA ANALYSIS
Data Processing
Managing data analysis through save-states, 10:33099 (R;US)

DATA BASE MANAGEMENT
Safety analysis code input automation using the Nuclear Plant Data Bank, 10:30981 (RA;US)
Programming
Logical and physical modeling and design of scientific and statistical databases for energy research. Final technical report, July 1, 1981-May 31, 1984, 10:33110 (R;US)

DATA DISPLAY DEVICES
See DISPLAY DEVICES

DATA DISPLAY SYSTEMS

DIESEL ENGINES
Bottoming Cycles
Exhaust-driven Brayton Bottoming Systems for adiabatic diesel engines, 10:31386 (RA;US)
Status report for an RC-1 organic Rankine bottoming cycle for an adiabatic diesel engine, 10:31388 (RA;US)
Steam bottoming cycle study for heavy duty transport, 10:31387 (RA;US)
Ceramics
Transformation-toughened ceramics. A potential material for light diesel engine applications. Final report, 1 October 1982-30 September 1983, 10:31524 (R;US)
Design
Cummins/TACOM advanced adiabatic engine, 10:31384 (RA;US)
Diesel Fuels
Diesel fuel quality criteria, 10:29796 (RA;US)
Exhaust Gases
Diesel exhaust characterization, 10:29784 (RA;US)
Effects of fuel molecular structure on diesel exhaust particulates, 10:31399 (RA;US)
Feasibility Studies
Advanced automotive diesel assessment program, 10:31385 (RA;US)
Fuel Consumption
Re-engining of a VLCC with low-speed geared diesel engines, 10:31325 (RA;US)
Fuel Economy
Exhaust-driven Brayton Bottoming Systems for adiabatic diesel engines, 10:31386 (RA;US)

- **Fuel Substitution**
  - Alternate fuels for maritime use, 10:31324 (RA;US)
  - Future diesel fuel quality and its effects on existing engine performance; alternatives to diesel - the Canadian situation, 10:31402 (RA;US)
  - Neat methanol as a fuel for compression ignition engines in transit bus operation, 10:31403 (RA;US)
  - Utilization of shale and coal derived fuels in diesel engines, 10:31401 (RA;US)
- **Installation**
  - Re-engining of a VLCC with low-speed geared diesel engines, 10:31325 (RA;US)
- **Liquid Fuels**
  - Flame propagation in heterogeneous mixtures of fuel drops and air, 10:31400 (RA;US)
- **Lubricants**
  - Solid lubrication design methodology, 10:31398 (RA;US)
- **Materials**
  - Cummins/TACOM advanced adiabatic engine, 10:31384 (RA;US)
  - Long-term stability and properties of commercial zirconia ceramics, 10:31390 (RA;US)
  - Room and elevated temperature sliding contact-stress behavior of transformation-toughened zirconium oxide ceramics, 10:31397 (RA;US)
  - Time-temperature dependence of the strength of commercial zirconia ceramics, 10:31389 (RA;US)
  - Transformation toughening in the Al_2O_3-Cr_2O_3/ZrO_2-HfO_2 system, 10:31391 (RA;US)
  - Transformation toughening of ceramics for engines, 10:31392 (RA;US)
- **Performance**
  - Advanced automotive diesel assessment program, 10:31385 (RA;US)
  - Development of future performance maintenance and cost requirements for heavy duty diesel engines, 10:31382 (RA;US)
  - Future diesel fuel quality and its effects on existing engine performance; alternatives to diesel - the Canadian situation, 10:31402 (RA;US)
- **Reviews**
  - Heavy duty transport technology project overview, 10:31381 (RA;US)
- **Specifications**
  - Diesel fuel quality criteria, 10:29796 (RA;US)
- **Sprayed Coatings**
  - Investigation of enhanced thermal barrier coating systems for diesel engine components, 10:31383 (RA;US)
- **Technology Assessment**
  - Advanced automotive diesel assessment program, 10:31385 (RA;US)
  - Development of future performance maintenance and cost requirements for heavy duty diesel engines, 10:31382 (RA;US)
  - Heavy duty transport technology project overview, 10:31381 (RA;US)
  - Industry Perspectives Session, 10:31393 (RA;US)

DIESEL FUELS

- **Combustion**
  - Flame propagation in heterogeneous mixtures of fuel drops and air, 10:31400 (RA;US)
- **Combustion Properties**
  - Diesel fuel quality criteria, 10:29796 (RA;US)
  - Future diesel fuel quality and its effects on existing engine performance; alternatives to diesel - the Canadian situation, 10:31402 (RA;US)
- **Flame Propagation**
  - Flame propagation in heterogeneous mixtures of fuel drops and air, 10:31400 (RA;US)
- **Molecular Structure**
  - Effects of fuel molecular structure on diesel exhaust particulates, 10:31399 (RA;US)
- **Physical Properties**
  - Fuel trends and analyses, 10:29795 (RA;US)
- **Production**
  - Refining and upgrading of synfuels from coal and oil shales by advanced catalytic processes. Tenth Interim Report. Revised stock balances and updated cost estimates, 10:29735 (R;US)
- **Sales**
  - Petroleum Marketing Monthly, March 1985, 10:29780 (R;US)

DIESEL OIL (FRACTION)

Alkylation
Release of 3-methyladenine from nucleosomal DNA by a 3-methyladenine DNA glycosylase, 10:32223 (J;US)
Biological Radiation Effects
Formation of radiation-induced DNA breaks: the ratio of double-strand breaks to single-strand breaks, 10:32336 (J;US)

Progress report: Health Sciences Division, 1982 January 1 to March 31, 10:32010 (R;CA)
Progress report: Health Sciences Division, 1982 April 1-June 30, 10:32011 (R;CA)
Progress report: Health Sciences Division, 1983 January 1-June 30, 10:32012 (R;CA)
Progress report: Health Sciences Division, 1983 July 1-December 31, 10:32817 (R;CA)
Biological Repair
Role of DNA repair in the realization of oxygen effect in bacteria Escherichia coli irradiated with various types of radiation. The balance of repair systems and the sensitivity to radiation, 10:32313 (R;SU;In Russian)
Low Dose Irradiation
DNA metabolism and poly(ADP-ribose)-synthesis in lymphocytes of persons exposed to low doses of ionizing radiation, 10:32326 (R;AT;In German)
Oxygen Enhancement Ratio
Role of DNA repair in the realization of oxygen effect in bacteria Escherichia coli irradiated with various types of radiation. The balance of repair systems and the sensitivity to radiation, 10:32313 (R;SU;In Russian)
Photosensitivity
P-aminobenzoic acid can sensitize the formation of pyrimidine dimers in DNA: direct chemical evidence, 10:31689 (J;GB)
DNA REPAIR
DNA metabolism and poly(ADP-ribose)-synthesis in lymphocytes of persons exposed to low doses of ionizing radiation, 10:32326 (R;AT;In German)
ADP
Poly(ADP-ribose) plays a role in the repair of 5-bromodeoxyuridine photolysis damage in DNA of Chinese hamster cells, 10:32302 (RA;IL)
Alkylation
Role of poly(ADP-ribose) in repair of alkylation damage in DNA. Studies with alkylation sensitive mutant of Chinese hamster cells, 10:32303 (RA;IL)
Biochemical Reaction Kinetics
Cellular levels of NAD as a limiting factor in ability to repair DNA radiation damage, 10:32301 (RA;IL)
Poly(ADP-ribose) plays a role in the repair of 5-bromodeoxyuridine photolysis damage in DNA of Chinese hamster cells, 10:32302 (RA;IL)
Release of 3-methyladenine from nucleosomal DNA by a 3-methyladenine DNA glycosylase, 10:32223 (J;US)
Role of poly(ADP-ribose) in repair of alkylation damage in DNA. Studies with alkylation sensitive mutant of Chinese hamster cells, 10:32303 (RA;IL)
Inhibition
Role of protein synthesis in the repair of sublethal x-ray damage in a mutant Chinese hamster ovary cell line, 10:32315 (R;US)
Strand Breaks
Mechanism of action of radioprotectors Part I. Effect of WR-2721 and cysteamine on DNA strand breaks, 10:32299 (RA;IL)
DNA REPLICATION
Inhibition
Mutagen-induced changes in cellular deoxycytidine triphosphate and thymidine triphosphate in Chinese hamster ovary cells, 10:32341 (J;US)
DODECANE
Solvent Properties
Phase behavior of coal fluids: data for correlation development. Reporting period: November 1, 1984-April 30, 1985, 10:29635 (R;US)
Solvent tailoring in coal liquefaction based on critical properties of physical solvating agents and hydrogen donors. Progress report, August 1980-January 1981, 10:29621 (R;US)
Vapor Pressure
Prediction of thermodynamic properties of coal derivatives. Progress report, September 1, 1984-August 31, 1985, 10:31669 (R;US)
DOEL-2 REACTOR
Doel Beveren, Flandre, Belgium
Ruptures
Numerical simulation and analysis of the Doel-2 steam generator tube rupture, 10:30942 (RA;XA)
Steam Generators

Monopole-fermion and dyon-fermion bound states. Pt. 4, 10:32588 (R;DE)
Charge Density
Localization of the dyon charge, 10:32656 (J;US)
DYSPROSIUM
Mass Spectroscopy
Systematics of multielement determination with resonance ionization mass spectrometry and thermal atomization, 10:31642 (J;US)
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
DYSPROSIUM 152
High Spin States
Feeding times of high spin states in sup(152,154)Dy: Probes of nuclear structure above the yrast line, 10:32735 (R;DE)
DYSPROSIUM 154
High Spin States
Feeding times of high spin states in sup(152,154)Dy: Probes of nuclear structure above the yrast line, 10:32735 (R;DE)
DYSPROSIUM SULFIDES
Catalytic Effects
Mechanistic study of the hydrodesulfurization of methanethiol over tungsten disulfide; a survey of rare earth sulfides for hydrodesulfurization activity, 10:31673 (R;US)

E

E-1422 RESONANCES
Particle Production
Investigation of D(1285) and E(1420) meson production in exclusive interactions of negatively charged pions and kaons at the momentum 32,5 GeV/c, 10:32560 (R;SU;In Russian)
EARTH ATMOSPHERE
See also EARTH MAGNETOSPHERE
IONOSPHERE
Boundary Layers
Atmospheric boundary layer testing: hot-wire anemometry measurements of turbulent boundary layer flow past a two-dimensional obstacle. 1982-1983 equipment loan report. Supplement 2, 10:32117 (R;US)
Atmospheric boundary layer testing. Final project report, 10:32116 (R;US)
Environmental Transport
Comparison of the 1981 INEL dispersion data with results from a number of different models, 10:32114 (R;US)
Mathematical Models
Distributed emergency response system to model dispersion and deposition of atmospheric releases, 10:32119 (R;US)
Radiation Monitoring
Annual report of the Surface Air Sampling Program, 10:32157 (R;US)
Radionuclide Migration
Progress report: Health Sciences Division, 1982 January 1 to March 31, 10:32010 (R;CA)
Stability
Measured atmospheric stability near Oak Ridge, Tennessee, 10:32120 (J;US)
EARTH MAGNETOSPHERE
See also MAGNETOTAIL
Research Programs
Plasma and magnetospheric research, 10:32459 (R;US)
Solar Wind
Research study of space plasma boundary processes. Final report, 1 October 1983-30 September 1984, 10:32464 (R;US)
EARTH PLANET
Radiation Belts
Earth's radiation belts, 10:32465 (R;US)
EARTH-COVERED BUILDINGS
Ground temperature profiles for selected New Mexico locations, 10:31318 (BA;US)
Attitudes
An exploratory study of the relationship between owner attitudes and characteristics of earth-sheltered housing, 10:30420 (BA;US)
Daylighting
Daylighting analysis for an earth covered office building in Sacramento, California, 10:31301 (BA;US)
Heat Losses
Analysis and measurement of the thermal behavior of the walls and surrounding soil for a large underground building, 10:31249 (RA;US)
Impact of insulation placement on the seasonal heat loss through basement and earth-sheltered walls, 10:31218 (RA;US)
Occupants
An exploratory study of the relationship between owner attitudes and characteristics of earth-sheltered housing, 10:30420 (BA;US)
Passive Solar Heating Systems
An experimental passive solar performance assessment on an earth-sheltered house, 10:30471 (BA;US)
Solar Space Heating
An experimental passive solar performance assessment on an earth-sheltered house, 10:30471 (BA;US)
Thermal Insulation
Impact of insulation placement on the seasonal heat loss through basement and earth-sheltered walls, 10:31218 (RA;US)
EARTHQUAKES
Risk Assessment
Assessment of seismic hazard for NNP sites in France analysis of several aftershocks of November 8, 1983, Liege earthquake, 10:32394 (R;FR)
EAST MESA GEOTHERMAL FIELD
Infrared Thermography
Evaluation of thermal remote sensing as a low-cost regional geothermal exploration technique in New Mexico. Final report, 10:30584 (R;US)
EBIS
See ELECTRON BEAM ION SOURCES
EBR-2 REACTOR
Computerized Simulation
SASSYS-1 computer code verification with EBR-II test data, 10:30836 (R;US)
Loss of Flow
SASSYS-1 computer code verification with EBR-II test data, 10:30836 (R;US)
Natural Convection
SASSYS-1 computer code verification with EBR-II test data, 10:30836 (R;US)
Reactor Control Systems
Application of microprocessor based controller in the Breeder Reactor Program, 10:30823 (R;US)
ECCS
Flow Rate
Experimental and analytical studies pertaining to small-break LOCA in Pressurised Heavy Water Reactors, 10:30944 (RA;XA)
Hydraulics
Features of transients following loss-of-coolant accidents and emergency core cooling systems in pressure-tube boiling water reactors, 10:30943 (RA;XA)

ECONOMIC IMPACT
Information Systems
User's guide for the Office of Minority Economic Impact National Information Clearinghouse System, 10:33111 (R;US)
EDS LIQUEFACTION
See EXXON LIQUEFACTION PROCESS
EFFLUENTS (CHEMICAL)

EINSTEIN FIELD EQUATIONS
Torsion
Exact solution of the Einstein-Cartan field equations, 10:32848 (R;BR;In Portuguese)
EINSTEIN-DE SITTER MODEL
See COSMOLOGICAL MODELS
EINSTEINIUM 253
Chemical Preparation
Chemistry of transuranium elements and compounds, 10:31712 (RA;US)
Crystal-Phase Transformations
Chemistry of transuranium elements and compounds, 10:31712 (RA;US)
EINSTEIN-MAXWELL EQUATIONS
Analytical Solution
Eternal universe, 10:32416 (R;BR)
ELASTOMERS
See also RUBBERS
Aging
Effect of environmental stress on Sylgard 170 silicone elastomer, 10:31554 (R;US)
Compression
Effect of environmental stress on Sylgard 170 silicone elastomer, 10:31554 (R;US)
Physical Radiation Effects
Effect of environmental stress on Sylgard 170 silicone elastomer, 10:31554 (R;US)
Stress Relaxation
Effect of environmental stress on Sylgard 170 silicone elastomer, 10:31554 (R;US)
ELECTRIC ARCS
Population Inversion
Population inversion in laser-initiated vacuum arcs. Annual report, 1 February 1984-31 January 1985, 10:32476 (R;US)
ELECTRIC BATTERIES
Devices for production and/or storage of electrical energy from chemical reactions; excludes FUEL CELLS and RADIOISOTOPE BATTERIES.
See also LEAD-ACID BATTERIES
METAL-GAS BATTERIES
METAL-METAL BATTERIES
METAL-NONMETAL BATTERIES
THERMAL BATTERIES
Battery Separators
Cationic exchange membrane for the zinc-ferricyanide battery. Final report, 10:31109 (R;US)
Cathodes
Calcium/thionyl chloride battery technology. Interim report, June 1983-May 1984, 10:31052 (R;US)
Commercialization
Development of an ECS technology transfer plan, 10:31057 (RA;US)
Deposits
Dendritic zinc deposition in flow batteries, 10:31069 (RA;US)
Electrochemistry
Electrochemistry of the iodide/tri-iodide/iodine redox system in propylene carbonate, 10:31072 (RA;US)
Electrodes
Electrochemical and morphological study of the effect of temperature on the restructuring and loss of capacity of alkaline battery electrodes, 10:31098 (RA;US)
Electrochemical phenomena on micro-mosaic electrodes, 10:31102 (RA;US)
Experimental evaluation of the thermodynamic properties of alkaline battery electrodes in concentrated alkali hydroxide solutions, 10:31097 (RA;US)
New battery materials, 10:31085 (RA;US)
Potential distributions and transients in particulate electrodes of possible use in energy storage, 10:31082 (RA;US)
Reaction profiles in zinc porous electrodes, 10:31090 (RA;US)
Semiconductor electrochemistry approach to the study of oxide films on nickel, iron, zinc, and cadmium electrodes, 10:31091 (RA;US)
Surface layers for rechargeable lithium cells, 10:31073 (RA;US)
Electrolytes
Calcium/thionyl chloride battery technology. Interim report, June 1983-May 1984, 10:31052 (R;US)
New battery materials, 10:31085 (RA;US)
Polymer electrolytes: an investigation of some poly (N-propylaziridine)/lithium salt compositions, 10:31104 (R;GB)
Polymeric electrolytes for ambient temperature lithium batteries, 10:31088 (RA;US)
Sulfolanes as electrolytic solvents for rechargeable lithium batteries, 10:31087 (RA;US)
Heat Transfer
Bibliography of convective transport correlations, 10:31058 (RA;US)
Ion Exchange Materials
Novel membranes for lithium batteries, 10:31089 (RA;US)
Mass Transfer
Bibliography of convective transport correlations, 10:31058 (RA;US)
Membranes
Novel membranes for lithium batteries, 10:31089 (RA;US)
Research on separators for alkaline zinc batteries, 10:31094 (RA;US)
Molten Salts
Batteries, 10:31110 (BA;US)
Performance
Batteries, 10:31110 (BA;US)
Performance Testing
Exploratory development and testing program, 10:31064 (RA;US)
Performance and evaluation results, 10:31066 (RA;US)
Testing activities at the National Battery Test Laboratory, 10:31065 (RA;US)
Research Programs
DOE multiyear planning, 10:31056 (RA;US)
Exploratory development and testing program, 10:31064 (RA;US)
Technology Assessment
DOE multiyear planning, 10:31056 (RA;US)
Electrochemistry: today and tomorrow, 10:31054 (RA;US)
Technology base research project, 10:31055 (RA;US)
Technology Transfer
Development of an ECS technology transfer plan, 10:31057 (RA;US)
ELECTRIC CABLES
See also OIL-FILLED CABLES
SUPERCONDUCTING CABLES
Joints
Development of molded joints and terminals for 230-kV extruded cross-linked polyethylene (XLPE) insulated cable. Final report, 10:30664 (R;US)
ELECTRIC CONTACTORS
See SWITCHES
ELECTRIC CURRENTS
See also ELECTRIC ARCS
ELECTROJETS
Control Systems
The effect of current control circuits on magnetohydrodynamic generator performance, 10:31184 (TA;US)
ELECTRIC DISCHARGES

GLOW DISCHARGES
LIGHTNING

Activation Energy
Electric-discharge excitation and energy source integration. Final report, 30 January 1980-31 December 1983, 10:32536 (R;US)
Breakdown
Model that predicts pulse charged gas switching breakdown phenomena, 10:33035 (R;US)
Chemistry
Ion chemistry in silane dc discharges, 10:31684 (J;US)
Energy Transfer
Electric-discharge excitation and energy source integration. Final report, 30 January 1980-31 December 1983, 10:32536 (R;US)
ELECTRIC FIELDS
Biological Effects
Effects of high-voltage transmission lines on honeybees, 10:32373 (R;US)
Effects of 60 Hz electric fields on operant and social stress behaviors of nonhuman primates. Project technical status report, February 16, 1985-April 12, 1985, 10:32372 (R;US)
ELECTRIC GENERATORS
Rotating generators only; excludes DIRECT ENERGY CONVERTERS.
See also TURBOGENERATORS
Control Systems
Control of cascaded induction-generator systems. Final technical report, 1 September 1983-30 August 1984, 10:31801 (R;US)
Performance
Power plant performance in Massachusetts: analysis and recommendations, 10:31162 (R;US)
Power Factor
Cage rotor induction machine with controllable power factor, 10:30609 (R;SE)
Specifications
Cage rotor induction machine with controllable power factor, 10:30609 (R;SE)
Investigation of the characteristics of the autosynchronous generator as a wind generator, 10:30639 (R;SE;In Swedish)
Stability
Control of cascaded induction-generator systems. Final technical report, 1 September 1983-30 August 1984, 10:31801 (R;US)
Switching Circuits
Sequential switching of a three-phase asynchronous wind generator onto the grid, 10:30638 (R;SE;In Swedish)
ELECTRIC POWER
See also HYDROELECTRIC POWER
Budgets
Energy and water development appropriations for 1986. Part 7. Hearings before a Subcommittee of the Committee on Appropriations, House of Representatives, Ninety-Ninth Congress, First Session, 10:31136 (B;US)
Contracts
Power purchase contracts: impact on project risks and taxes, 10:30219 (RA;US)
Data Compilation
Energy Facts, 1984, 10:29781 (R;US)
Energy Consumption
Comparative effects of high energy cost on black and white families at four economic income levels, 10:31175 (R;US)
Government Policies
Energy and water development appropriations for 1986. Part 7. Hearings before a Subcommittee of the Committee on Appropriations, House of Representatives, Ninety-Ninth Congress, First Session, 10:31136 (B;US)
Market
Effects of railroad regulatory reform on coal and electricity. Draft, 10:29736 (R;US)
Prices
Preliminary economic analysis of the value of contributions by small dams to system generation reliability, 10:30216 (RA;US)
Production
Monthly Energy Review, February 1985, 10:31172 (R;US)
Sales
Monopsony and the supply of power from small generating stations, 10:30215 (RA;US)
Power purchase contracts - some suggested approaches, 10:30231 (RA;US)
Power sales contracts from the developer's perspective, 10:30218 (RA;US)
Tailoring PURPA rates to meet the needs of small hydro developers, 10:30222 (RA;US)
Utility interface, 10:30232 (RA;US)
Simulation
Electric load in single family houses. Load analysis and simulation studies for local mains (Sweden), 10:31170 (R;SE;In Swedish)
Supply and Demand
Electric power supply and demand for the contiguous United States, 1985-1994. Staff report, 10:31159 (R;US)
ELECTRIC POWER INDUSTRY
Capacitors
Workshop proceedings: metering-type coupling capacitor voltage transformers (CCVTs), 10:30649 (R;US)
Meetings
Workshop proceedings: metering-type coupling capacitor voltage transformers (CCVTs), 10:30649 (R;US)
Transformers
Workshop proceedings: metering-type coupling capacitor voltage transformers (CCVTs), 10:30649 (R;US)
ELECTRIC POWER SUBSTATIONS
See POWER SUBSTATIONS
ELECTRIC POWER SYSTEMS
See POWER SYSTEMS
ELECTRIC PROBES
Langmuir probe on ISX-B, 10:32912 (R;US)
Calibration
Plasma-edge studies using carbon resistance probes, 10:32931 (J;US)
Low Temperature
Automatic point testing machine at 78 K, 10:31735 (R;FR)
ELECTRIC SWITCHES

ELECTRIC UTILITIES
Cost
Chelan County Pud formal educational services, Topic B.3 - project valuation techniques; Topic B.4 - optimum electric pricing, 10:31164 (R;US)
Documentation manual for automated cost of service: Public Utility District No. 1 of Chelan County, 10:31165 (R;US)
Data Compilation
Electric Power Monthly, February 1985, 10:31157 (R;US)
Electric Power Monthly, March 1985, 10:31158 (R;US)
Energy Conservation
Evaluation of Minnesota utility home energy audit and retrofit loan programs, 10:31296 (J;US)
Energy Consumption
End-use results for Public Utility District No. 1 of Chelan County, 10:31163 (R;US)
Environmental Impacts
Forecasting future industrial SO_2 and NO/sub x/ emissions. Revised, 10:31118 (R;US)
Financial Data
Operating and financial profile report of the electric utility industry in the United States, 10:31160 (R;US)
Fuel Consumption
Annual outlook for US coal 1985: with projections to 1995, 10:29734 (R;US)
Hydroelectric Power
Documentation manual for automated cost of service: Public Utility District No. 1 of Chelan County, 10:31165 (R;US)
Interfaces
Utility interface, 10:30232 (RA;US)
Load Analysis
Sample design for load research: current practice and methods, 10:31169 (R;US)

Load Management
Chelan County Pud formal educational services, Topic B.3 - project valuation techniques; Topic B.4 - optimum electric pricing, 10:31164 (R;US)
Customer response to load management: a survey and analysis of utility studies. Final report, 10:31168 (R;US)
Ownership
Regulation, pricing, and comparative performance in the US electric utility industry by ownership type, 10:31171 (R;US)
Performance
Regulation, pricing, and comparative performance in the US electric utility industry by ownership type, 10:31171 (R;US)
Planning
Research on uncertainty for industry functional modelling. Final report, 10:31161 (R;US)
Power Demand
Documentation of forecasting models for Chelan County PUD No. 1, 10:31166 (R;US)
Prices
Chelan County Pud formal educational services, Topic B.3 - project valuation techniques; Topic B.4 - optimum electric pricing, 10:31164 (R;US)
Regulations
Regulation, pricing, and comparative performance in the US electric utility industry by ownership type, 10:31171 (R;US)
Technology Assessment
Technological development and its impact on the future energy system. Appendix 1. Evaluation commissioned by the Danish Ministry of Energy, 10:30654 (R;DK;In Danish)
Values
Chelan County Pud formal educational services, Topic B.3 - project valuation techniques; Topic B.4 - optimum electric pricing, 10:31164 (R;US)

EVAPORATION
Computer Codes
LEEM - a lake energy and evaporation model user's manual, 10:32181 (R;CA)
EVAPORATION MODEL
Proton Reactions
Validation of the intra-nuclear-cascade-evaporation model for particle production, 10:32791 (R;DE)
EVAPORATIVE COOLING
Comparative Evaluations
Evaporative cooling workshop. Final technical report, 10:31264 (R;US)
Equipment
Evaporative cooling workshop. Final technical report, 10:31264 (R;US)
Recommendations
Evaporative cooling workshop. Final technical report, 10:31264 (R;US)
EVAPORITES
Geochemistry
Geochemistry of sulfate evaporites in Iowa, 10:32388 (RA;US)
EVOLUTION
See BIOLOGICAL EVOLUTION
EXCHANGE (CHARGE)
See CHARGE EXCHANGE
EXCHANGE (HEAT)
See HEAT TRANSFER
EXCITATION SYSTEMS
Modifications
Renovation of the Lloyd Shoals hydro excitation system, 10:30167 (RA;US)
Performance
Renovation of the Lloyd Shoals hydro excitation system, 10:30167 (RA;US)
EXCITERS
See EXCITATION SYSTEMS
EXERGY
That portion of energy which is converted into the desired, economically utilizable form.
Thermal Analysis
Exergy analyses, aspects of their practical use, 10:31833 (R;DK)
EXHAUST GASES
Air Pollution Monitoring
NOx emissions near a heat pump with gas motor, 10:32140 (R;GB)
Mutagen Screening
Diesel exhaust characterization, 10:29784 (RA;US)
Influence of ethanol and methanol gasoline blends on the mutagenicity of particulate exhaust extracts, 10:32369 (J;DE)
Particulates
Effects of fuel molecular structure on diesel exhaust particulates, 10:31399 (RA;US)
EXPECTATION VALUE
Equilibrium
Statistical behavior in deterministic quantum systems with few degrees of freedom, 10:32875 (J;US)
EXPERIMENTAL BREEDER REACTOR-2
See EBR-2 REACTOR
EXPERIMENTAL FACILITIES (ACCELERATOR)
See ACCELERATOR FACILITIES
EXPERIMENTAL FACILITIES (REACTOR)
See REACTOR EXPERIMENTAL FACILITIES
EXPOSURE (RADIATION DOSES)
See RADIATION DOSES
EXTRACTION (BEAM)
See BEAM EXTRACTION
EXTRACTION COLUMNS
Inventories
Effect of pulsed-column-inventory uncertainty on dynamic materials accounting, 10:30041 (R;US)
EXTRACTION (SOLVENT)
See SOLVENT EXTRACTION
EXTREMELY HIGH FREQUENCY RADIATION
See MICROWAVE RADIATION
EXTREME-VALUE PROBLEMS
Search for stationary points on surfaces, 10:32532 (J;US)
EXXON DONOR SOLVENT LIQUEFACTION
See EXXON LIQUEFACTION PROCESS
EXXON LIQUEFACTION PROCESS
Investment
Refining and upgrading of synfuels from coal and oil shales by advanced catalytic processes. Tenth Interim Report. Revised stock balances and updated cost estimates, 10:29735 (R;US)
EYES
Biological Radiation Effects
Precision, high dose radiotherapy: helium ion treatment of uveal melanoma, 10:32337 (J;US)

F

F CODES
Benchmarks
Benchmarking NNWSI flow and transport codes: COVE 1 results, 10:30019 (R;US)
F MESONS
Prior to Jan. 1985 this information was indexed with the descriptor F-2030 RESONANCES.
Particle Production
Production and decay of the F-meson in e$^+$e$^-$ annihilation at 10 GeV centre-of-mass energy, 10:32554 (R;DE)
Rest Mass
Production and decay of the F-meson in e$^+$e$^-$ annihilation at 10 GeV centre-of-mass energy, 10:32554 (R;DE)
Weak Hadronic Decay
Production and decay of the F-meson in e$^+$e$^-$ annihilation at 10 GeV centre-of-mass energy, 10:32554 (R;DE)
F-2030 RESONANCES
See F MESONS
FACILITIES (ACCELERATOR)

FACILITIES (TEST)
See TEST FACILITIES
FAILURES
Classification
Common cause data analysis and implications in system modeling, 10:30866 (RA;US)
Multiple components malfunction scenarios--a classification technique with emphasis on shared-cause events, 10:30865 (RA;US)
Data Analysis
Analysis and use of operating experience in probabilistic risk assessment, 10:30899 (RA;US)
Analysis of dependent failures in the ORNL precursor study, 10:30869 (RA;US)
Common cause data analysis and implications in system modeling, 10:30866 (RA;US)
Common cause failure methods dealing with dependent failures; a comparative application to US diesel generator data based on licensee event reports, 10:30867 (RA;US)
Development of a generic data base for failure rate, 10:30901 (RA;US)
Distributions of component failure rates, estimated from LER data, 10:30900 (RA;US)
Probability
Containment failure pressure analysis for the Seabrook Station Probabilistic Safety Assessment, 10:30883 (RA;US)
FALLOUT
For radioactive fallout only.
See also FALLOUT DEPOSITS
Radiation Monitoring
Strontium-90 and cesium-137 in rain and dry fallout for WHO program from January to July, 1982. Environmental and dietary materials, 10:32163 (RA;JP)
Strontium-90 and cesium-137 in rain and dry fallout for domestic program from January to July, 1982. Environmental and dietary materials, 10:32164 (RA;JP)
FALLOUT DEPOSITS
Risk Assessment
Radiological risks to the population of Israel following penetration of radioactive fallout into food chains, 10:32305 (RA;IL)
FALLOUT PARTICULATES
See FALLOUT
FAR ULTRAVIOLET RADIATION
Wavelength range 2000-400 A.
Radiation Sources
Studies of collisional and nonlinear radiative process for development of coherent uv and xuv sources. Final report, November 1983-November 1984, 10:32477 (R;US)
FARADAY GENERATORS
See MHD GENERATORS
FARMS
Biomass Conversion Plants
Biogas energy for Hawaiian small farms and homesteads, HI-11. Final report, 10:30071 (R;US)
FAST BREEDER TYPE REACTORS
See FBR TYPE REACTORS
FASTENERS
Corrosion
Evaluation of responses to IE Bulletin 82-02: degradation of threaded fasteners in reactor coolant pressure boundary of pressurized-water-reactor plants, 10:30970 (R;US)
Fatigue
Automatic capability to store and retrieve component data and to calculate structural integrity of these components, 10:30815 (R;US)
Stresses
Automatic capability to store and retrieve component data and to calculate structural integrity of these components, 10:30815 (R;US)
FAST-MIXED SPECTRUM REACTOR
See FBR TYPE REACTORS
FATIGUE
Near-threshold fatigue: an overview of the role of microstructure and environment, 10:31468 (R;US)
FATTY ACIDS
See CARBOXYLIC ACIDS
FAULT TREE ANALYSIS
Computer Codes
Users' manual for the FTA-J (Fault Tree Analysis-JAERI) code system, 10:30953 (R;JP;In Japanese)
Computerized Simulation
New probabilistic modeling and simulation methods for complex time-dependent systems, 10:33097 (R;US)
M Codes
MUSTAFA and MUSTAMO, computer programs for analysis of fault trees with multistate-components, 10:33095 (R;DE;In German)
Manuals
Users' manual for the FTA-J (Fault Tree Analysis-JAERI) code system, 10:30953 (R;JP;In Japanese)
FAULT TREE SYSTEMS
See FAULT TREE ANALYSIS
FAURE CYCLOTRON
See NAC CYCLOTRON
FBR TYPE REACTORS
See also LMFBR TYPE REACTORS
Reactor Cores
Option for the Brazilian nuclear project: necessity of fast breeder reactors and core design for an experimental fast reactor, 10:30741 (R;BR;In Portuguese)
Reactor Physics
Activity report of Reactor Physics Section, 1983, 10:30809 (R;IN)
Reactor Simulators
Recent developments in the DSNP simulation language, 10:30771 (RA;IL)
FEDERAL BUILDINGS
Energy Conservation
Thermal performance of the Norris Cotton Federal Building in Manchester, New Hampshire, 10:31245 (RA;US)
FEDERAL EMERGENCY MANAGEMENT AGENCY
See US FEMA
FEDERAL ENERGY REGULATORY COMMISSION
See US FERC
FEDERAL REGION I
Prior to June 1982 this concept was indexed to NORTH ATLANTIC REGION.
Earthquakes
Seismic hazard characterization of the eastern United States. Volume 2. Questionnaires, 10:32399 (R;US)

Seismicity
Seismic hazard characterization of the eastern United States. Volume 1. Methodology and results for ten sites, 10:32398 (R;US)
Seismic hazard characterization of the eastern United States. Volume 2. Questionnaires, 10:32399 (R;US)

FEDERAL REGION II
Prior to June 1982, this concept was indexed to MID-ATLANTIC REGION.
See also NEW JERSEY
PUERTO RICO
Earthquakes
Seismic hazard characterization of the eastern United States. Volume 2. Questionnaires, 10:32399 (R;US)
Seismicity
Seismic hazard characterization of the eastern United States. Volume 1. Methodology and results for ten sites, 10:32398 (R;US)
Seismic hazard characterization of the eastern United States. Volume 2. Questionnaires, 10:32399 (R;US)

FEDERAL REGION III
Prior to June 1982 this concept was indexed to CENTRAL REGION.
See also MARYLAND
PENNSYLVANIA
VIRGINIA
Earthquakes
Seismic hazard characterization of the eastern United States. Volume 2. Questionnaires, 10:32399 (R;US)
Seismicity
Seismic hazard characterization of the eastern United States. Volume 1. Methodology and results for ten sites, 10:32398 (R;US)
Seismic hazard characterization of the eastern United States. Volume 2. Questionnaires, 10:32399 (R;US)

FEDERAL REGION IV
Prior to June 1982 this concept was indexed to SOUTHEAST REGION.
See also ALABAMA
FLORIDA
KENTUCKY
NORTH CAROLINA
SOUTH CAROLINA
Earthquakes
Seismic hazard characterization of the eastern United States. Volume 2. Questionnaires, 10:32399 (R;US)
Seismicity
Seismic hazard characterization of the eastern United States. Volume 1. Methodology and results for ten sites, 10:32398 (R;US)
Seismic hazard characterization of the eastern United States. Volume 2. Questionnaires, 10:32399 (R;US)

FEDERAL REGION IX
Prior to June 1982 this concept was indexed to WESTERN REGION.
See also ARIZONA
CALIFORNIA
HAWAII
Hydroelectric Power
General recommendation areas, 10:30090 (RA;US)

FEDERAL REGION V
Prior to June 1982 this concept was indexed to GREAT LAKES REGION.
See also INDIANA
MINNESOTA
Earthquakes
Seismic hazard characterization of the eastern United States. Volume 2. Questionnaires, 10:32399 (R;US)
Seismicity
Seismic hazard characterization of the eastern United States. Volume 1. Methodology and results for ten sites, 10:32398 (R;US)
Seismic hazard characterization of the eastern United States. Volume 2. Questionnaires, 10:32399 (R;US)

FEDERAL REGION X
Prior to June 1982 this concept was indexed to PACIFIC NORTHWEST REGION.
See also ALASKA
IDAHO
Hydroelectric Power
Planning power resources in the Pacific Northwest, 10:30238 (RA;US)

FEDERAL REPUBLIC OF GERMANY
Personnel Dosimetry
1983 statistical results of the Official Personal Dosimetry Service, 10:32298 (R;DE;In German)

FEDERATION OF MALAYA
See MALAYSIA

FEED MATERIALS PLANTS
Decommissioning
Technology, safety and costs of decommissioning reference nuclear fuel cycle and non-fuel cycle facilities following postulated accidents. Main report. Volume 1, 10:31710 (R;US)
Technology, safety and costs of decommissioning reference nuclear fuel cycle and non-fuel cycle facilities following postulated accidents. Appendices. Volume 2, 10:31711 (R;US)
Mill Tailings
Analysis of drainage and consolidation at typical uranium mill tailings sites, 10:29954 (R;US)

FERMENTATION ALCOHOL
See ETHANOL

FERMILAB ACCELERATOR
Facility at Fermi National Accelerator Laboratory, Batavia, Illinois, includes main synchroton, booster synchrotron, and linac.
Environmental Effects
Site environmental report for calendar year 1984, 10:32173 (R;US)
Radiation Monitoring
Site environmental report for calendar year 1984, 10:32173 (R;US)

FERMILAB TEVATRON
Beam Dynamics
Tests of orbital dynamics using the Tevatron, 10:31835 (R;US)

FERMIONS
See also BARYONS
LEPTONS
Gravitational Interactions
Gravitational coupling of scalar and fermion fields to matter vorticity: microscopic asymmetries, 10:32849 (R;BR)

FERRIC COMPOUNDS
See IRON COMPOUNDS

FERRITIC STEELS
See also STEEL-DIN-1-6310
STEEL-DIN-1-6751
Physical Radiation Effects
Role of void nucleation in the swelling resistance of ferritic steel, 10:31431 (R;GB)

FERROCENE
Electronic Structure
About counterintuitive orbital mixing and bond populations, 10:31557 (R;BR)

FERROMAGNETIC MATERIALS
Critical Temperature
Critical point of the fully-anisotropic quenched bond-random Potts ferromagnet in triangular and honeycomb lattices, 10:31436 (R;BR)
Modulation
Landau theory for uniaxial systems near a Lifshitz point under applied fields, 10:32837 (R;BR)
Phase Diagrams
Landau theory for uniaxial systems near a Lifshitz point under applied fields, 10:32837 (R;BR)

FERROUS COMPOUNDS
See IRON COMPOUNDS

FERTILIZERS
Environmental Impacts
Influence of the biosphere on the release of N_2O from mineral nitrogenous fertilizers, 10:32138 (R;DE;In German)

FETUSES
Radiation Doses
Fetal and juvenile radiotoxicity, 10:32331 (RA;US)

FEYNMAN DIAGRAM
Chiral Symmetry
Simplified chiral superfield propagators for chiral constant mass superfields, 10:32634 (R;BR)
Potentials
Simplified chiral superfield propagators for chiral constant mass superfields, 10:32634 (R;BR)
FIBERGLASS
Physical Properties
Thermophysical properties data base activities at Owens-Corning Fiberglas, 10:31214 (RA;US)
Thermodynamic Properties
Thermophysical properties data base activities at Owens-Corning Fiberglas, 10:31214 (RA;US)
FIBROBLASTS
Radiation Injuries
Report of the Van de Graaff Group: radiobiology. Radiation-induced damage and carcinogenesis in cultured human cells, 10:32317 (RA;ZA)
FIELD THEORIES
See also QUANTUM FIELD THEORY
Lorentz Invariance
Finite temperature corrections to field theory: electron mass and magnetic moment, and vacuum energy, 10:32852 (R;US)
Temperature Dependence
Finite temperature corrections to field theory: electron mass and magnetic moment, and vacuum energy, 10:32852 (R;US)
FIELDS (ELECTRIC)
See ELECTRIC FIELDS
FIELDS (MAGNETIC)
See MAGNETIC FIELDS
FILM BADGES
See PHOTOGRAPHIC FILM DOSEMETERS
FILM BOILING
Instability
Preliminary results from film boiling destabilisation experiments, 10:30818 (R;GB)
FILM DOSEMETERS
See PHOTOGRAPHIC FILM DOSEMETERS
FILMS
Not for PHOTOGRAPHIC FILMS or NUCLEAR EMULSIONS.
See also SUPERCONDUCTING FILMS
Stability
Stability of amorphous metal films on semiconductor substrates. Progress report, July-December 1984 (Ni-Nb, W-Si, Mo-Si), 10:31444 (R;US)
FILTERS
See also AIR FILTERS
Porous metal filter collects radioactive strontium in hot cell operation, 10:29992 (J;US)
Design
Multipurpose pan development, 10:29893 (R;US)
FINANCIAL MANAGMENT
See PROGRAM MANAGEMENT
FINITE ELEMENT METHOD
Iterative Methods
Research program in iterative solution and finite element analysis in computational mechanics. Annual progress report, 1983, 10:33087 (R;US)
FINLAND
Central Heating Plants
Small district heating plants using indigenous fuels, 10:29728 (R;FI;In Finnish)
Fuel Supplies
Present exploitation technology and research needs of domestic fuels, 10:31155 (R;FI;In Finnish)
Imports
Fuel use of coal. Part 1. Preliminary study, 10:29738 (R;FI;In Finnish)
Research Programs
Present exploitation technology and research needs of domestic fuels, 10:31155 (R;FI;In Finnish)
FIRE FIGHTING
Probability-based evaluation of selected fire protection features in nuclear power plants, 10:31027 (R;US)
FIRE STATIONS
See PUBLIC BUILDINGS
FIREDAMP
See METHANE
FIRES
Biological Effects
Burning and clipping effects on bluebunch wheatgrass productivity. Revision, 10:32293 (R;US)
Risk Assessment
Evaluation of available data for probabilistic risk assessments (PRA) of fire events at nuclear power plants, 10:31028 (R;US)
FIREWOOD
See WOOD FUELS
FIRST WALL
Evaporation
Experimental measurements of melting and vaporization due to simulated plasma disruptions, 10:33059 (J;US)
Surface melting and evaporation during disruptions in magnetic fusion reactors, 10:33067 (J;NL)
Fluorescence
Measurement of the wall radiation in soft x-ray region in PDX (abstract), 10:33051 (J;US)
Fracture Mechanics
Stress and lifetime calculations for first wall and blanket structural components. Pt. 1, 10:33018 (R;DE)
Impurities
Fabrication and testing of a quartz oscillator microbalance, 10:33012 (R;JP;In Japanese)
Lifetime
Experimental measurements of melting and vaporization due to simulated plasma disruptions, 10:33059 (J;US)
Melting
Experimental measurements of melting and vaporization due to simulated plasma disruptions, 10:33059 (J;US)
Surface melting and evaporation during disruptions in magnetic fusion reactors, 10:33067 (J;NL)
Microbalances
Fabrication and testing of a quartz oscillator microbalance, 10:33012 (R;JP;In Japanese)
Reflectivity
Measurement of the wall radiation in soft x-ray region in PDX (abstract), 10:33051 (J;US)
Thermal Cycling
Design of JT-60 first wall, 10:33015 (R;JP;In Japanese)
X-Ray Spectra
Measurement of the wall radiation in soft x-ray region in PDX (abstract), 10:33051 (J;US)
FISCHER-TROPSCH SYNTHESIS
Catalysts
CO + H_2 reaction over nitrogen-modified iron catalysts. Quarterly technical progress report, October 1, 1984-December 31, 1984, 10:30067 (R;US)
New catalysts for the indirect liquefaction of coal. First quarterly technical report, August 1-October 31, 1981, 10:30066 (R;US)
FISH CULTURE
See FISHERIES
FISH HATCHERIES
See FISHERIES
FISH LADDERS
See FISH PASSAGE FACILITIES
FISH LIFTS
See FISH PASSAGE FACILITIES
FISH LOCKS
See FISH PASSAGE FACILITIES
FISH PASSAGE FACILITIES
Technology Assessment
Preventing fish mortality at hydropower facilities, 10:30253 (RA;US)
FISHERIES
Prior to August 1981, this concept was indexed to AQUACULTURE.
Research Programs
Fish disease research: BPA funding guidelines, 10:32289 (RA;US)
FISHES
See also ANADROMOUS FISHES

TROUT
Biological Effects
Effects of hydropower development on Columbia River salmonids, 10:30251 (RA;US)
Environmental impact of hydropower development, 10:30247 (RA;US)
Habitat
Instream flow: increased accuracy using habitat mapping, 10:30259 (RA;US)
Mortality
Effects of hydropower development on Columbia River salmonids, 10:30251 (RA;US)
Preventing fish mortality at hydropower facilities, 10:30253 (RA;US)
Radionuclide Kinetics
Radioecological studies in marine environment. A study of the concentration of mixed fission products in Greek sea waters and of ^{137}Cs in fish and sea plants, 10:32192 (R;GR)
Viral Diseases
Control of mortality caused by infectious hematopoietic necrosis virus, 10:32284 (RA;US)
Current fish disease control policies affecting the Columbia River Basin, 10:32287 (RA;US)
Fish disease research: BPA funding guidelines, 10:32289 (RA;US)
Methods for diagnosing IHNV infection in fish, 10:32283 (RA;US)
FISHWAYS
See FISH PASSAGE FACILITIES
FISSION
Hartree-Fock-Bogolyubov Theory
Microscopic analysis of collective dynamics in low energy fission, 10:32749 (R;FR)
FISSION FRAGMENTS
Range
Semi analytical derivation of the LSS parameters, 10:32751 (RA;IL)
FISSION PRODUCT RELEASE
Coordinate with descriptors for the area of release such as BIOSPHERE or COOLANTS, and for the specific fission products, if known.
Distribution of fission products in an LMFBR: summary, 10:30857 (R;US)
Deposition
Downstream behavior of volatile fission product species, 10:30847 (R;US)
Radioactivity Transport
Chemical factors affecting fission product transport in BWR severe accidents, 10:30984 (RA;US)
ESF collection effectiveness, a study in fine particle dynamics (PWR; BWR), 10:31033 (R;US)
Fission product transport analysis in a loss of decay heat removal accident at Browns Ferry, 10:30985 (RA;US)
Perspectives on technical issues evolving from the source term reassessment, 10:30997 (RA;US)
System to forecast health effects in order to determine necessary counter-measures in case an accidental atmospheric release, 10:30912 (RA;US)
Testing
Assessment of thermal gradient tube results from the HI series of fission product release tests, 10:31019 (R;US)
FISSION PRODUCTS
Biological Accumulation
Marine Sample Exploitation Project: estimates regarding the sensitivity and technology for the detection of nuclear explosion debris in the marine environment, 10:32110 (R;US)
Chemical Reactions
Chemical factors affecting fission product transport in BWR severe accidents, 10:30984 (RA;US)
Distribution
Distribution of fission products in an LMFBR: summary, 10:30857 (R;US)
Radiation Monitoring
Piggyback satellite packages, 10:32099 (R;US)
Radioecological Concentration
Radioecological studies in marine environment. A study of the concentration of mixed fission products in Greek sea waters and of ^{137}Cs in fish and sea plants, 10:32192 (R;GR)
Radionuclide Migration
Transport and release of fission products during nuclear reactor accident, 10:31041 (BA;KR)
FISSURED FORMATIONS
See FRACTURED RESERVOIRS
FLAME PROPAGATION
Flame-acceleration mechanisms under conditions of partial confinement. Final report, February 1983-August 1984, 10:29807 (R;US)
Turbulent Flow
Numerical calculation of the cold-flow characteristics of a bluff-body flame stabilizer, 10:31721 (R;GB)
FLAME SPECTROMETRY
See EMISSION SPECTROSCOPY
FLAMES
Mathematical Models
Soot and radiation in free boundary layer flames, 10:31719 (R;US)
Qualitative Chemical Analysis
Simultaneous two-dimensional mapping of species concentration and temperature in turbulent flames, 10:31724 (J;US)
Soot
Laser diagnostic analyses of sooting flames. Final report, 1 October 1980-30 September 1984, 10:31717 (R;US)
Temperature Distribution
Laser diagnostic analyses of sooting flames. Final report, 1 October 1980-30 September 1984, 10:31717 (R;US)
Temperature Measurement
Application of DRASC method on snecma centers (Raman Anti-Stokes Coherent Diffusion), 10:31830 (R;FR;FR)
Effect of in-situ heat treatment on coal char reactivity. Part 2. Temperature measurement in flames. Progress report, January 1-March 31, 1985, 10:29724 (R;US)
Simultaneous two-dimensional mapping of species concentration and temperature in turbulent flames, 10:31724 (J;US)
Soot and radiation in free boundary layer flames, 10:31719 (R;US)
Turbulent Flow
Coherent structures in turbulent flames. Final report, 10:31716 (R;GB)
FLASH HYDROPYROLYSIS PROCESS
Yields
Flash hydropyrolysis and methanolysis of coal with hydrogen and methane, 10:29617 (R;US)
FLASH TUBES
Chemical Reactions
Investigation of the feasibility of pumping high energy neodymium glass lasers by chemical flashlamps. Final report, 10:31765 (R;US)
FLAT PLATE COLLECTORS
Coatings
Solar Energy Education. Renewable energy activities for chemistry and physics., 10:30543 (R;US)
Research Programs
Alternative energies and combinations of them, 10:30381 (RA;US)
FLOODING FLUIDS
See DISPLACEMENT FLUIDS
FLOODS
Probability
Comparison of deterministic and stochastic techniques for estimation of design basis floods for nuclear power plants, 10:30950 (R;CA)
FLOORS
Thermal Mass
Wood frame supported thermal mass floors, 10:30458 (BA;US)
FLORIDA
Hydroelectric Power
Renewable energy: hydropower, 10:30089 (R;US)
FLOW (BLOOD)
See BLOOD FLOW
FLOW (FLUID)
See FLUID FLOW

FLOW MODELS
Finite Element Method
GWHRT - A finite element solution to the coupled ground water flow and heat transport problem in three dimensions, 10:32391 (R;SE)
FLUE GAS
Chemical Analysis
Comparative usefulness of flue gas oxygen and carbon dioxide analysis, 10:31617 (R;GB)
Chemical Properties
Flue-gas conditioning. Final report, March 1979-March 1982, 10:30663 (R;US)
Denitrification
Briefing package: Low-pollution coal-fired power plants, 10:29675 (R;DE;In German)
Evaluation of advanced separation techniques for application to flue gas cleanup processes for the simultaneous removal of sulfur dioxide and nitrogen oxides, 10:29671 (R;US)
Desulfurization
Briefing package: Low-pollution coal-fired power plants, 10:29675 (R;DE;In German)
Evaluation of advanced separation techniques for application to flue gas cleanup processes for the simultaneous removal of sulfur dioxide and nitrogen oxides, 10:29671 (R;US)
Exhaust Recirculation Systems
Effect calculation of a gas turbine with recirculating flue gas, 10:31358 (R;DK;In Danish)
Heat Recovery
Absorption heat pumps for recovery of heat from flue gases. A technical/economic assessment, 10:31254 (R;SE;In Swedish)
Effect calculation of a gas turbine with recirculating flue gas, 10:31358 (R;DK;In Danish)
FLUID FLOW
See also *COMPRESSIBLE FLOW*
CRITICAL FLOW
INCOMPRESSIBLE FLOW
MULTIPHASE FLOW
TWO-PHASE FLOW
VISCOUS FLOW
VORTEX FLOW
Computerized Simulation
Benchmarking NNWSI flow and transport codes: COVE 1 results, 10:30019 (R;US)
MAGNUM-2D computer code: user's guide, 10:29967 (R;US)
Mathematical Models
Transient three-phase three-component systems. Part 1. Formulation of the system of differential equations, 10:31039 (TG;US)
Mesh Generation
Gradient scaling for nonuniform meshes, 10:32539 (R;US)
FLUID MECHANICS
See also *HYDRAULICS*
Asymptotic Solutions
Asymptotic methods especially in combustion. Final report, 15 June 1981-30 September 1984, 10:31826 (R;US)
FLUIDIZED BED BOILERS
Design
Prototype steam plant with fluid bed designed for uncertain energy conditions, 10:31345 (RA;US)
Materials Testing
Corrosion/erosion of materials for AFBC applications; cost 501 Project NL-9, 10:29727 (R;NL)
Sulfidation
Corrosion/erosion of materials for AFBC applications; cost 501 Project NL-9, 10:29727 (R;NL)
Test Facilities
Corrosion/erosion of materials for AFBC applications; cost 501 Project NL-9, 10:29727 (R;NL)
FLUIDIZED BED REACTORS
Combustion Products
Nitration of polycyclic aromatic hydrocarbons adsorbed to different carriers in a fluidized bed reactor, 10:29685 (J;GB)
FLUIDIZED-BED COMBUSTION
Adsorbents
Utilization of carbonate rocks and other calcium bearing materials as desulfurization sorbents in fluidized bed combustion, 10:29725 (RA;US)
Coordinated Research Programs
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Solid Wastes
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 1. Final report. Report for June 1980-June 1984, 10:29676 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 2. Appendices A through C. Final report, June 1980-June 1984, 10:29677 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 3. Appendices D and E. Final report, June 1980-June 1984, 10:29678 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 4. Appendix F. Final report, June 1980-June 1984, 10:29679 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 5. Appendix G. Final report, June 1980-June 1984, 10:29680 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 6. Appendix H. Final report, June 1980-June 1984, 10:29681 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 7. Appendix I. Final report, June 1980-June 1984, 10:29682 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 8. Appendix J. Final report, June 1980-June 1984, 10:29683 (R;US)
FLUIDIZED-BED COMBUSTORS
Commercialization
Commercialization of the Staged Cascade Fluid Bed Combustor: a Cooperative Energy Technology Development Program. Final report, 10:29721 (R;US)
Design
Commercialization of the Staged Cascade Fluid Bed Combustor: a Cooperative Energy Technology Development Program. Final report, 10:29721 (R;US)
FLUIDS
Not for BODY FLUIDS.

FLY ASH
Agglomeration
Acoustic agglomeration of power plant fly ash. Fourth quarterly report, June 8-September 7, 1984, 10:29669 (R;US)
Catalytic Effects
Catalytic activity of western coal fly ashes on the reduction of flue gas NO/sub x/, 10:29668 (R;US)
Chemical Analysis
Emanation coefficients for Rn in sized coal fly ash, 10:29687 (J;GB)
Chemical Properties
Flue-gas conditioning. Final report, March 1979-March 1982, 10:30663 (R;US)
Materials Recovery
[Mining and mineral-related research]. Final report, October 1, 1982-September 30, 1983, 10:29614 (R;US)
Solvent Extraction
Isolating fly ash adsorbed benz(a)anthracene-14 C and benzo(a)pyrene-14 C using liquid extraction, 10:29684 (R;NL;In Dutch)
Sorptive Properties
Isolating fly ash adsorbed benz(a)anthracene-14 C and benzo(a)pyrene-14 C using liquid extraction, 10:29684 (R;NL;In Dutch)
Uses
[Mining and mineral-related research.] Final report, July 1, 1983-June 30, 1984, 10:29615 (R;US)
Waste Product Utilization
Utilization of coal-derived fly ash in combination with mining wastes, 10:31361 (RA;US)
FLYING SPOT DIGITIZERS
Mechanical flying spot digitizers; see also CATHODE RAY TUBE DIGITIZERS.
Modifications
Modification of a two-level track follower to a sixteen-gray-level digitizer, 10:32019 (R;GR;In Greek)
FLYWHEEL ENERGY STORAGE
Research Programs
Strategic defense initiative, 10:30751 (R;US)
FMIT FACILITY

SHALE OIL
Combustion Products
Bench-scale process evaluation of reburning and sorbent injection for in-furnace NOx/SOx reduction. Final report, October 1983-October 1984, 10:31368 (R;US)
Reviews
US fossil program - an overview, 10:29613 (RA;US)
FOSSIL-FUEL POWER PLANTS
Air Pollution
Evaluation of rural air-quality simulation models. Appendix g. Statistical tables for PPSP (Power Plant Siting Program), 10:30659 (R;US)
Air Pollution Control
Acoustic agglomeration of power plant fly ash. Fifth quarterly report, September 8-December 7, 1984, 10:29670 (R;US)
Briefing package: Low-pollution coal-fired power plants, 10:29675 (R;DE;In German)
Boilers
Conversion of oil-designed utility boilers to pulverized coal or coal-water mixture firing. Final report, 10:29722 (R;US)
Combustion Products
Studies of foreign disposals for coal burning wastes, 10:29672 (R;SE;In Swedish)
Dimensions
Effect of scale and quantity on the cost and performance of energy technologies. A literature review, 10:30766 (RA;DK)
Economic Impact
Western Maryland power-plant siting study: socio-economic impact assessment of three candidate sites. Final report, 10:30662 (R;US)
Efficiency
1983 fossil plant heat rate improvement workshop: proceedings, 10:30648 (R;US)
Electrostatic Precipitators
Flue-gas conditioning. Final report, March 1979-March 1982, 10:30663 (R;US)
Energy Storage
Power supply system. Some factors affecting the future production pattern (Denmark), 10:30666 (RA;DK;In Danish)
Environmental Impacts
Western Maryland power plant siting study: air-quality assessment of three candidate sites. Final report, 10:30660 (R;US)
Western Maryland power plant siting study: biological characterization of candidate sites. Final assessment. Final report, 10:30661 (R;US)
Flue Gas
Flue-gas conditioning. Final report, March 1979-March 1982, 10:30663 (R;US)
Fly Ash
Utilization of coal-derived fly ash in combination with mining wastes, 10:31361 (RA;US)
Fuel Substitution
Conversion of oil-designed utility boilers to pulverized coal or coal-water mixture firing. Final report, 10:29722 (R;US)
Performance Testing
1983 fossil plant heat rate improvement workshop: proceedings, 10:30648 (R;US)
Power Generation
Effect of scale and quantity on the cost and performance of energy technologies. A literature review, 10:30766 (RA;DK)
Power Supplies
Power supply system. Some factors affecting the future production pattern (Denmark), 10:30666 (RA;DK;In Danish)
Power Transmission
Power supply system. Some factors affecting the future production pattern (Denmark), 10:30666 (RA;DK;In Danish)
Site Selection
Western Maryland power plant siting study: air-quality assessment of three candidate sites. Final report, 10:30660 (R;US)
Western Maryland power plant siting study: biological characterization of candidate sites. Final assessment. Final report, 10:30661 (R;US)
Western Maryland power-plant siting study: socio-economic impact assessment of three candidate sites. Final report, 10:30662 (R;US)
Social Impact
Western Maryland power-plant siting study: socio-economic impact assessment of three candidate sites. Final report, 10:30662 (R;US)
Waste Disposal
Field investigations at Kollunds coal ash fill, 10:29674 (RA;SE;In Swedish)
Studies of foreign disposals for coal burning wastes, 10:29672 (R;SE;In Swedish)
Waste Storage
Studies of foreign disposals for coal burning wastes, 10:29672 (R;SE;In Swedish)
FOUNDATIONS
Heat Losses
Mathematical modeling and computer simulation of insulation systems in below grade applications, 10:31228 (RA;US)
Heat Transfer
Assessment of the energy savings potential of building foundations research, 10:31276 (R;US)
Thermal Insulation
Assessment of the energy savings potential of building foundations research, 10:31276 (R;US)
FOUNDRIES
Melting
Centralized ladle preheating system. Final report, March 1982-February 1984, 10:31365 (R;US)
FOUR-BODY PROBLEM
Bosons
Four-body Yakubovsky differential equations for identical particles, 10:32781 (R;FR)
Fermions
Four-body Yakubovsky differential equations for identical particles, 10:32781 (R;FR)
FRACTURE MECHANICS
Fully plastic crack problems: solutions by a penalty method that pass the consistency check. Part I, 10:31428 (R;US)
Computerized Simulation
Applying molecular dynamics to fracture, 10:31726 (R;US)
FRACTURED FORMATIONS
See FRACTURED RESERVOIRS
FRACTURED RESERVOIRS
Computerized Simulation
Physical model studies of dispersion in fracture systems, 10:30600 (R;US)

Fluid Flow
Characterization of retention processes and their effect on the analysis of tracer tests in fractured reservoirs, 10:30607 (R;US)
Tracer test analysis of the Klamath Falls geothermal resource: a comparison of models, 10:30603 (R;US)
Functional Models
Physical model studies of dispersion in fracture systems, 10:30600 (R;US)

FRAGMENTS (FALLOUT)

FUEL-COOLANT INTERACTIONS
Explosions
Steam explosion studies at Winfrith, 10:30988 (RA;US)
Fragmentation
Particle size distribution of fragmented melt debris from Molten Fuel Coolant Interactions, 10:30817 (R;GB)
Statistical Models
Particle size distribution of fragmented melt debris from Molten Fuel Coolant Interactions, 10:30817 (R;GB)
FUELS (NUCLEAR)
See NUCLEAR FUELS
FUELWOOD
See WOOD FUELS
FUGEN ATR
See JATR REACTOR
FUMES
See AEROSOLS
FUNCTIONS
See also GREEN FUNCTION
STRENGTH FUNCTIONS
Computer Codes
MODEASY - a program-system for modification and management of stored functions of one independent variable, 10:33094 (R;DE;In German)
FUNGI
See also YEASTS
Pollution Sources
Indoor air pollution, 10:32127 (R;US)
FURNACE OIL
See HEATING OILS
FURNACES
See also BLAST FURNACES
Gas Burners
Advanced furnace concepts - commercial unit heater. Annual report, October 1983-September 1984, 10:31832 (R;US)
Heat Recovery
Small-scale regenerator. Final report, 10:31357 (R;US)
Waste Heat Utilization
Small-scale regenerator. Final report, 10:31357 (R;US)
FUSED SALTS
See MOLTEN SALTS
FUSION (MELTING)
See MELTING
FUSION REACTIONS
Fast Fission
Some aspects of heavy ion macrophysics, 10:32755 (R;FR)
Fission Fragments
Some aspects of heavy ion macrophysics, 10:32755 (R;FR)
Reviews
Fusion and competing reactions in central collisions at large excitation energies, 10:32780 (R;FR)
FUSION REACTORS
See THERMONUCLEAR REACTORS

G

G CODES
Benchmarks
Benchmarking NNWSI flow and transport codes: COVE 1 results, 10:30019 (R;US)
GADOLINIUM
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
GADOLINIUM SULFIDES
Catalytic Effects
Mechanistic study of the hydrodesulfurization of methanethiol over tungsten disulfide; a survey of rare earth sulfides for hydrodesulfurization activity, 10:31673 (R;US)
GAGES (PRESSURE)
See PRESSURE GAGES
GALAXIES
Gamma Spectra
HEAO-1 diffuse component spectrum from 15 to above 500 keV, 10:32432 (R;DE)
Radiowave Radiation
Groups and clusters of galaxies. Radio and X-ray studies, 10:32421 (R;NL)
Star Evolution
International Ultraviolet Explorer observations of amorphous hot galaxies, 10:32442 (R;US)
Ultraviolet Spectra
International Ultraviolet Explorer observations of amorphous hot galaxies, 10:32442 (R;US)

X Radiation
Groups and clusters of galaxies. Radio and X-ray studies, 10:32421 (R;NL)
X-Ray Spectra
HEAO-1 diffuse component spectrum from 15 to above 500 keV, 10:32432 (R;DE)
GALLIUM
Autoionization
Exit channels of autoionization resonances in atoms, 10:32480 (R;US)
GALLIUM 71 TARGET
Proton Reactions
Specificity of ^{71}Ga(p,n)^{71}Ge at 35 MeV for Gamow-Teller strength, 10:32708 (R;US)
GALLIUM ARSENIDE SOLAR CELLS
Fabrication
Automated assembly of Gallium Arsenide and 50-micron thick silicon solar cell modules, 10:30309 (R;US)
GALLIUM ARSENIDES
Crystal Growth
Material growth and characterization for solid state devices, 10:31572 (R;US)
Physical Radiation Effects
Study of irradiation defects in GaAs, 10:31561 (R;FR;In French)
Rutherford Scattering
Report of the Van de Graaff Group: solid state and materials research. Backscattering analysis of metallic contacts to GaAs, 10:31630 (RA;ZA)
GALLIUM BASE ALLOYS
Lattice Parameters
Structure of Rsub(1-x)Gasub(2(1+x)) (0<=x<=0.33) and its relation to RGa$_6$ and Ga, 10:31449 (RA;IL)
GALLIUM NITRIDES
Annealing
Study on the influence of annealing effects in GaN VPE, 10:31537 (R;BR)
Crystal Growth
Study on the influence of annealing effects in GaN VPE, 10:31537 (R;BR)
GAMMA ASTRONOMY
For photon energies above 100 KeV.
Gamma Spectrometers
Instrumental background in balloon-borne gamma-ray spectrometers and techniques for its reduction, 10:32435 (R;US)
GAMMA DETECTION
Angular Distribution
Monte Carlo calculation of the average solid angle subtended by a parallelepiped detector from a distributed source (SOLANG), 10:32037 (J;NL)
Computer Calculations
Monte Carlo calculation of the average solid angle subtended by a parallelepiped detector from a distributed source (SOLANG), 10:32037 (J;NL)
Efficiency
Fusion gamma diagnostics, 10:32958 (J;US)
Energy Resolution
Fusion gamma diagnostics, 10:32958 (J;US)
Scintillation Counters
Shuttle flight test of an advanced gamma-ray detection system. Semi-annual technical report, 1 July-31 December 1983, 10:32009 (R;US)
GAMMA DOSIMETRY
One-Dimensional Calculations
SAS2: a coupled one-dimensional depletion and shielding analysis code, 10:31744 (RA;US)
S Codes
SAS2: a coupled one-dimensional depletion and shielding analysis code, 10:31744 (RA;US)
GAMMA RADIATION
Radiation Monitoring
Measuring stations for gamma radiation. Results 1983, 10:32165 (R;SE;In Swedish)
GAMMA RADIOGRAPHY
Occupational Safety
Radiological safety aspects of industrial radiography, 10:31792 (RA;ZA)
Safeguard Regulations
Radiological safety aspects of industrial radiography, 10:31792 (RA;ZA)
GAMMA REACTIONS
See PHOTONUCLEAR REACTIONS
GAMMA SPECTROSCOPY
Ge Semiconductor Detectors
Spectroscopy of the highest-spin states, 10:32738 (BA;HU)
Li-Drifted Ge Detectors
Method of radioactive tracer samples with ion exchange resins for spectrometric analysis with Ge(Li) detector, 10:32183 (R;RO;In Romanian)
Radioecological Concentration
Annual report of the Surface Air Sampling Program, 10:32157 (R;US)
Standardization
Measurement control for plutonium isotopic measurements using gamma-ray spectrometry, 10:30044 (R;US)
GANIL
Reviews
First results from GANIL, 10:32680 (R;FR)
Secondary Beams
Secondary beams at GANIL, 10:32681 (R;FR)
Spectrometers
LISE: a new spectrometer at GANIL for physics on exotic nuclei, 10:31943 (R;FR)
GARNETS
For silicate garnets only.
Equilibrium
Prehnite - epidote equilibria and their petrologic applications, 10:30608 (J;GB)
Phase Stability
Prehnite - epidote equilibria and their petrologic applications, 10:30608 (J;GB)
GAS ANALYSIS
Calibration
Measurement and calibration techniques used in computer partial pressure analysis, 10:32073 (J;US)
Computerized Control Systems
Measurement and calibration techniques used in computer partial pressure analysis, 10:32073 (J;US)
Probes
Sorption detector system for chemical agents detection and recognition, 10:32066 (R;US)
GAS BURNERS
Air Pollution Abatement
Advanced furnace concepts - commercial unit heater. Annual report, October 1983-September 1984, 10:31832 (R;US)
Noise
Critical review of noise production models for turbulent, gas-fueled burners, 10:31829 (R;US)
GAS CENTRIFUGES
Mechanical Vibrations
Method for controlling the viscosity of siloxane oils, 10:29889 (P;US)
GAS CHROMATOGRAPHY
Quantitative gas chromatography without analytic identification by ultrasonic detection, 10:31652 (J;US)
Efficiency
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)
Radiation Protection
Guide for the preparation of applications for licenses for the use of sealed sources in gas chromatography devices and x-ray fluorescence analyzers. Draft, 10:32333 (R;US)
GAS COOLANTS
See GASES
GAS ENGINES
See INTERNAL COMBUSTION ENGINES
GAS FIELDS
See NATURAL GAS FIELDS
GAS HEAT PUMPS
Stirling Cycle
Duplex Stirling gas-fired heat pump. Phase 2. Breadboard demonstration. Final report, May 1981-November 1982, 10:31285 (R;US)

GAS LASERS
See also CARBON DIOXIDE LASERS
METAL VAPOR LASERS
Electric Discharges
Electric-discharge excitation and energy source integration. Final report, 30 January 1980-31 December 1983, 10:32536 (R;US)
Gain
Calculations of collision-induced optical gain in high-density mixtures of D2 or HD with a buffer gas, 10:31757 (R;AU)
Hollow Cathodes
Laser with hollow copper cathode, 10:31762 (R;FR;GE)
Performance
Pulsed hydrogen-fluoride laser, 10:31754 (R;AU)
Performance Testing
Construction, testing of 1-MW nitrogen laser, 10:31761 (R;US)
GAS SCINTILLATION DETECTORS
Design
^{3}He gas scintillation spectrometer for fusion neutron measurements, 10:32971 (J;US)
Energy Resolution
^{3}He gas scintillation spectrometer for fusion neutron measurements, 10:32971 (J;US)
Fabrication
^{3}He gas scintillation spectrometer for fusion neutron measurements, 10:32971 (J;US)
Optimization
^{3}He gas scintillation spectrometer for fusion neutron measurements, 10:32971 (J;US)
GAS TUNGSTEN-ARC WELDING
Interaction of trace elements and welding parameters on GTA weld shape (Variation with penetration and tip angle), 10:31476 (R;US)
GAS TURBINE ENGINES
Liquid Fuels
Flame propagation in heterogeneous mixtures of fuel drops and air, 10:31400 (RA;US)
Materials
AGT 100 Advanced Gas Turbine Technology Project, 10:31405 (RA;US)
AGT101 advanced gas turbine development program, 10:31406 (RA;US)
Ceramic Applications in Turbine Engines (CATE) program summary, 10:31404 (RA;US)
Ceramic life prediction methodology, 10:31411 (RA;US)
Characterization of sintered reaction bonded silicon nitride, 10:31409 (RA;US)
Development of alpha silicon carbide components for gas turbine applications, 10:31408 (RA;US)
Fabrication of silicon nitride turbine engine components, 10:31407 (RA;US)
Injection molded silicon nitride for engine applications: fabrication and properties, 10:31410 (RA;US)
Performance Testing
AGT 100 Advanced Gas Turbine Technology Project, 10:31405 (RA;US)
AGT101 advanced gas turbine development program, 10:31406 (RA;US)
Ceramic life prediction methodology, 10:31411 (RA;US)
Research Programs
Welcome and program overview, 10:31379 (RA;US)
Technology Assessment
Industry Perspectives Session, 10:31393 (RA;US)
Welcome and program overview, 10:31379 (RA;US)
GAS TURBINE POWER PLANTS
Hydrogen Fuels
Hydrogen production at low-head hydropower plants, 10:30198 (RA;US)
GAS TURBINES
Design
Design and construction of a small gas turbine for solar energy conversion. Modeling the system operation in transient conditions, 10:30348 (R;FR;In French)
Flue Gas
Effect calculation of a gas turbine with recirculating flue gas, 10:31358 (R;DK;In Danish)
Fuel Substitution
Alternate fuels for maritime use, 10:31324 (RA;US)
Fuels
Evaluation of alternate combustor concepts for gas turbine application program. Monthly report No. 1, October 1984, 10:29720 (R;US)
Operation
Design and construction of a small gas turbine for solar energy conversion. Modeling the system operation in transient conditions, 10:30348 (R;FR;In French)
GASEOUS DIFFUSION
Fokker-Planck Equation
Asymptotic equivalence of Fokker-Planck and diffusion solutions for large time, 10:32877 (J;US)
GASES
See also COMPRESSED GASES
COSMIC GASES
ELECTRON GAS
EXHAUST GASES
FUEL GAS
RARE GASES
SYNTHESIS GAS
VAPORS
Heat Transfer
Radiative and convective transfer in a cylindrical enclosure for a real gas, 10:31783 (J;US)
Purification
Thermophoretic separation of aerosol particles from a sampled gas stream, 10:32167 (P;US)
GASIFICATION
See also COAL GASIFICATION
Catalysts
Gasification kinetics and surface areas of catalyzed carbonaceous chars, 10:29644 (BA;US)
GAS-INSULATED TRANSFORMERS
Electrical Insulators
Evaluation of polymer films for electrical insulation, 10:31555 (R;US)
GASOLINE
Antiknock Ratings
Direct utilization of aromatic feedstocks, 10:29797 (RA;US)
Combustion Properties
Results of the Coordinating Research Council methanol-gasoline blends program, 10:31394 (RA;US)
Data Compilation
Petroleum Supply Monthly, March 1985, 10:29777 (R;US)
Physical Properties
Fuel trends and analyses, 10:29795 (RA;US)
Prices
Functional form analysis of the short-run demand for travel and gasoline by one-vehicle households, 10:29741 (R;US)
Production
Refining and upgrading of synfuels from coal and oil shales by advanced catalytic processes. Tenth Interim Report. Revised stock balances and updated cost estimates, 10:29735 (R;US)
Sales
Petroleum Marketing Monthly, March 1985, 10:29780 (R;US)
GASOLINE ENGINES
See INTERNAL COMBUSTION ENGINES
GASTEROPODS
See MOLLUSCS
GEL PERMEATION CHROMATOGRAPHY
Calibration Standards
Synthesis of oligomeric models of coal derived materials for use with GPC calibration. Quarterly report, October-December 1984, 10:29654 (R;US)
GENE LOCI

Wind
Average diurnal behavior of surface winds during summer at sites in complex terrain, 10:32121 (J;US)
GIANT CELLS
See TUMOR CELLS
GIANT RESONANCE
Elasticity
Nuclear elasticity approach to giant resonances, 10:32783 (R;FR)
Fine Structure
Probing the microstructure of the GDR in Pb-208, 10:32832 (RA;IL)
Gamow-Teller Rules
Lorentz-Lorenz quenching for the Gamow-Teller sum rule, 10:32793 (R;FR)
GLASS
See also BOROSILICATE GLASS
Crushing
Single-point diamond crushing of Zerodur with in-situ polishing and metrology on a diamond turning machine, 10:31582 (R;US)
Flashover
Vacuum surface flashover: A high-pressure phenomenon, 10:31583 (J;US)
Impact Strength
General statistical description of the fracture particulates formed by mechanical impacts of brittle materials, 10:31541 (J;US)
Leaching
Chemical durability of alkali aluminosilicate glasses, 10:31556 (R;CA)
PIXE Analysis
Report of the Van de Graaff Group: nuclear analysis. Analysis of trace compositions for the identification of Woodstock glass, 10:31622 (RA;ZA)
GLASSY METALS
See METALLIC GLASSES
GLAUBER'S SALT
See SODIUM SULFATES
GLAZING MATERIALS
Transparent or translucent materials such as glass or glass substitutes.
Product update on options for north-facing glazing, 10:30532 (BA;US)
Comparative Evaluations
Comparison of vertical high performance glazing to sloped double glazing with movable insulation, 10:30484 (BA;US)
GLOBULINS-GAMMA
Iodination
Special protein iodination Part 2. The radioiodination of γ-globulin fragments (factor VIII Fab' fragments), 10:31707 (RA;IL)
Labelling
Special protein iodination Part 2. The radioiodination of γ-globulin fragments (factor VIII Fab' fragments), 10:31707 (RA;IL)
GLOW DISCHARGES
Design
Glow discharge cleaning of stainless steel accelerator beam tubes, 10:32007 (J;US)
Fabrication
Glow discharge cleaning of stainless steel accelerator beam tubes, 10:32007 (J;US)
Surface Cleaning
Glow discharge cleaning of stainless steel accelerator beam tubes, 10:32007 (J;US)

GLUCOPROTEINS
Biosynthesis
Glycoprotein processing in mutants of HSV-1 that induce cell fusion, 10:32224 (J;US)
GLUCOSE
Fermentation
Alcohol fermentation: study in continuous culture of the effect of temperature and antibiotics in a multi-stage reactor, 10:30079 (R;FR;In French)
Redox Reactions
Continuous organic electrochemical synthesis, 10:31059 (RA;US)
GLUEBALLS
Particle Decay
G(1590)-meson and possible characteristic features of a glueball, 10:32595 (R;SU)
GLUON MODEL
Particle Production
Quark-gluon model for particle production processes, 10:32601 (R;SU)
GLUONIUM
See GLUEBALLS
GLUTATHIONE
Oxidation
Oxidation of biologically active reducing substances by ozone, 10:32227 (J;US)
GLYCERIN

GREECE
Geochemical Surveys
Detailed investigation of ten small field areas with high radioactivity at the Serres Basin (E. Macedonia, Greece), 10:29856 (R;GR;In Greek)
Report on the geological-geochemical research carried out within the area of geochemical anomaly P_7, Vathyrema, Drama Department (E. Macedonia, Greece), 10:29871 (R;GR;In Greek)
Report on the research so far carried out in the sedimentary basin situated east of Potamoi village, Drama Department (E. Macedonia, Greece), 10:29872 (R;GR;In Greek)
Report on geological surveys of Vrondou area (E. Macedonia, Greece), 10:29874 (R;GR;In Greek)
Uranium exploration in Central and Eastern Macedonia and Thrace (Greece). Geology, scintillometry and geochemistry of the map area 2423-2422 Thrace, 10:29873 (R;GR;In Greek)
Radiometric Surveys
Detailed investigation of ten small field areas with high radioactivity at the Serres Basin (E. Macedonia, Greece), 10:29856 (R;GR;In Greek)
Exploration of the possibilities of existence of a considerable uranium mineralization in the Symvolon granodiorite, Kavala Dept. (E. Macedonia, Greece), 10:29875 (R;GR;In Greek)
Ground radiometric anomalies of the Serres Basin (E. Macedonia, Greece), 10:31121 (R;GR;In Greek)
Report on the geological-geochemical research carried out within the area of geochemical anomaly P_7, Vathyrema, Drama Department (E. Macedonia, Greece), 10:29871 (R;GR;In Greek)
Report on the research so far carried out in the sedimentary basin situated east of Potamoi village, Drama Department (E. Macedonia, Greece), 10:29872 (R;GR;In Greek)
Report on geological surveys of Vrondou area (E. Macedonia, Greece), 10:29874 (R;GR;In Greek)
Uranium exploration in Central and Eastern Macedonia and Thrace (Greece). Geology, scintillometry and geochemistry of the map area 2423-2422 Thrace, 10:29873 (R;GR;In Greek)

GREEN FUNCTION
Analytical Solution
Gauge field propagator for QED and linearized QCD in inhomogeneous media, 10:32653 (J;US)

GREENHOUSE EFFECT
Global Aspects
International problems: ramifications of the carbon dioxide fossil fuel issue, 10:32128 (RA;US)

GREENHOUSES
See also ATTACHED GREENHOUSES
Double Glazing
Vapor control in site-build glazing systems, 10:30459 (BA;US)

Geothermal Heating Systems
Haystack Resources Company: greenhouses, near Boulder, Colorado, 10:30606 (R;US)
Research Programs
Alternative energies and combinations of them, 10:30381 (RA;US)
GREENLAND
Energy Source Development
Report of the Joint Committee for mineral resources in Greenland in the period 1 July 1983-30 June 1984, 10:31122 (R;DK;In Danish)
Mineral Resources
Report of the Joint Committee for mineral resources in Greenland in the period 1 July 1983-30 June 1984, 10:31122 (R;DK;In Danish)
Specifications of mineral concessions and licences in Greenland as of June 30, 1984, 10:31123 (R;DK)
Runoff
Runoff conditions at Kuussuup Tasia, Christianshaab, estimated by modelling, 10:30105 (R;DK)
GROSSWELZHEIM HDR REACTOR
See HDR REACTOR
GROUND SOURCE HEAT PUMPS
Energy-efficient residence (EER-2). Final report, 10:31280 (R;US)
Electric Power
Combined solar and surface earth heating for a small group of houses in Perstorp. Results of three years performance monitoring, 10:30357 (R;SE;In Swedish)
Meetings
Workshop on solar assisted heat pumps with ground coupled storage: proceedings, 10:30360 (R;IT)
Performance Testing
Combined solar and surface earth heating for a small group of houses in Perstorp. Results of three years performance monitoring, 10:30357 (R;SE;In Swedish)
GROUND WATER
Chemical Analysis
Analysis of groundwater from deep boreholes in Kamlunge, 10:29984 (R;SE)
Chemical Composition
Permeability and fluid chemistry studies of the Topopah Spring Member of the Paintbrush Tuff, Nevada Test Site: Part II, 10:29988 (R;US)
Flow Models
Groundwater travel time uncertainty analysis. Sensitivity of results to model geometry, and correlations and cross correlations among input parameters, 10:30017 (R;US)
GWHRT - A finite element solution to the coupled ground water flow and heat transport problem in three dimensions, 10:32391 (R;SE)
Mathematical modelling of fracture hydrology. Progress report January-June 1984, 10:32382 (R;GB)
Fluid Flow
Repository environmental parameters relevant to assessing the performance of high-level waste packages, 10:29952 (R;US)
Geochemistry
Uranium series disequilibrium measurements at Mol and Whiteshell. Progress report for January-June 1984, 10:29905 (R;GB)
Heat Storage
Heat storage. Seasonal storage in groundwater reservoirs (Denmark), 10:30580 (RA;DK;In Danish)
Hydraulics
GWHRT - A finite element solution to the coupled ground water flow and heat transport problem in three dimensions, 10:32391 (R;SE)
Information Systems
Hanford ground-water data base management guide and user's manual, 10:29963 (R;US)
Isotope Ratio
Isotope hydrology study of Kato Nevrokopi, Drama Dept. (E. Macedonia, Greece), 10:32193 (R;GR;In Greek)
Uranium series disequilibrium measurements at Mol and Whiteshell. Progress report for January-June 1984, 10:29905 (R;GB)
PH Value
Repository environmental parameters relevant to assessing the performance of high-level waste packages, 10:29952 (R;US)
Radiolysis
Effect of β-radiolysis on the products from α-radiolysis of ground water, 10:29986 (R;SE)
Radionuclide Migration
Analysis of the risk assessment of a waste repository for radioactive waste from the decommissioning of nuclear power plants, 10:30028 (R;DE;In German)
Applications of geochemical modeling to site characterization and radionuclide transport in the NNWSI project, 10:29948 (RA;US)
Behaviour of radium in waterways and aquifers. Final report of the Coordinated Research Programme on source, distribution, movement and deposition of radium in inland waterways and aquifers sponsored by the IAEA from 1976 to 1980, 10:32194 (R;XA)
Chemical transport beneath a uranium mill tailings pile, Riverton, Wyoming, 10:30003 (BA;US)
Guidelines for selecting codes for ground-water transport modeling of low-level waste burial sites. Executive summary, 10:30016 (R;US)
Mathematical modelling of fracture hydrology. Progress report January-June 1984, 10:32382 (R;GB)
Matrix diffusion coefficients for the NNWSI waste package environment, 10:29947 (RA;US)
Migration of radionuclides in unconsolidated materials. Equilibrium transport models, 10:30007 (R;CA)
Migration processes in a model deep repository for the disposal of intermediate level nuclear waste, 10:30008 (R;GB)
Redox Potential
Iron and manganese in oxide minerals and in glasses: preliminary consideration of Eh buffering potential at Yucca Mountain, Nevada, 10:32403 (R;US)
Rock-Fluid Interactions
Iron and manganese in oxide minerals and in glasses: preliminary consideration of Eh buffering potential at Yucca Mountain, Nevada, 10:32403 (R;US)
Solvent Properties
Actinide solution equlibria and solubilities in geologic systems, 10:29979 (R;SE)
Water Chemistry
Repository environmental parameters relevant to assessing the performance of high-level waste packages, 10:29952 (R;US)
Water Quality
Ground water quality of municipal aquifers downstream from a coal preparation plant, 10:29717 (RA;US)
Hanford ground-water data base management guide and user's manual, 10:29963 (R;US)
Interior drains for open pit disposal of uranium mill tailings, 10:30006 (BA;US)
GROUND-WATER RESERVES

RESONANCE PARTICLES
Pair Production
Experimental results on hadron pair production by two photons, 10:32551 (R;DE)
Particle Production
Hadronic final states in deep inelastic muon interactions, 10:32552 (R;CH)
Measurement of energy-energy correlations in $e^+e^- \rightarrow$hadrons at $\sqrt{s} = 29$ GeV, 10:32571 (J;US)
Quark-gluon model for particle production processes, 10:32601 (R;SU)
Structure Functions
Comparison of structure function data to the Lopez-Yndurain parametrizations, 10:32586 (R;GR)
HAEMOPHILUS
Gene Recombination
Differential behavior of plasmids containing chromosomal DNA insertions of various sizes during transformation and conjugation in Haemophilus influenzae, 10:32232 (J;US)
HAFNIUM
Mass Spectroscopy
Systematics of multielement determination with resonance ionization mass spectrometry and thermal atomization, 10:31642 (J;US)
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
HAFNIUM 167
High Spin States
Investigation of the rotational nuclei ^{167}, ^{168}Hf and ^{170}, ^{171}W and the shell-model nucleus ^{26}Mg, 10:32737 (R;NL)
HAFNIUM 168
High Spin States
Investigation of the rotational nuclei ^{167}, ^{168}Hf and ^{170}, ^{171}W and the shell-model nucleus ^{26}Mg, 10:32737 (R;NL)
HAFNIUM OXIDES
Mechanical Properties
Transformation toughening in the Al_2O_3-Cr_2O_3/ZrO_2-HfO_2 system, 10:31391 (RA;US)
Transformation toughening of ceramics for engines, 10:31392 (RA;US)
HAIR
Activation Analysis
Need for improved quality assurance in biomedical neutron activation analysis as revealed by the results of some recent IAEA intercomparisons, 10:31599 (RA;XA)
HALIDES
See also FLUORIDES
IODIDES
Chemical Bonds
Photoelectron spectroscopic study of bonding in inorganic and organometallic compounds (Boron trihalides; silyl amines; thiazyl fluorides; borane adducts; transition metal complexes with isocyanides and olefins), 10:31658 (R;US)
HALL GENERATORS

Thermal Expansion
Multipurpose pan development, 10:29893 (R;US)
HASTELLOY X
Fatigue
Design fatigue curve for Hastelloy-X, 10:31461 (R;JP;In Japanese)
Low-cycle fatigue of Hastelloy X and Hastelloy XR in simulated VHTR helium coolant environment at elevated temperature, 10:31462 (R;JP;In Japanese)
HASTELLOY XR
Fatigue
Design fatigue curve for Hastelloy-X, 10:31461 (R;JP;In Japanese)
Low-cycle fatigue of Hastelloy X and Hastelloy XR in simulated VHTR helium coolant environment at elevated temperature, 10:31462 (R;JP;In Japanese)
HAULAGE EQUIPMENT
Brakes
Test report for linings for couplings and brakes for use in mining machines for surface and underground workings in which there is assumed to be a fire or explosion hazard due to the possible occurrence of methane/or coal dust/air mixtures, 10:29712 (TG;GB)
Mechanical Transmissions
Test report for linings for couplings and brakes for use in mining machines for surface and underground workings in which there is assumed to be a fire or explosion hazard due to the possible occurrence of methane/or coal dust/air mixtures, 10:29712 (TG;GB)
HAWAII
Biomass Conversion Plants
Biogas energy for Hawaiian small farms and homesteads, HI-11. Final report, 10:30071 (R;US)
Energy Source Development
Hawaii Natural Energy Institute annual report, 1984, 10:31129 (R;US)

Research Programs
Hawaii Natural Energy Institute annual report, 1984, 10:31129 (R;US)

HAZARDOUS MATERIALS
Not for radioactive materials.
Combustion
Preliminary assessment of costs and credits for hazardous waste co-firing in industrial boilers. Final report, 1 July 83-15 oct 83, 10:31364 (R;US)
Legal Aspects
Using mined space for long-term retention of nonradioactive hazardous waste. Volume 1. Conventional mines. Final report, August 1983-January 1985, 10:31366 (R;US)
Waste Disposal
Preliminary assessment of costs and credits for hazardous waste co-firing in industrial boilers. Final report, 1 July 83-15 oct 83, 10:31364 (R;US)
Using mined space for long-term retention of nonradioactive hazardous waste. Volume 2. Solution-mined salt caverns. Final report, August 1983-January 1985, 10:31367 (R;US)
Using mined space for long-term retention of nonradioactive hazardous waste. Volume 1. Conventional mines. Final report, August 1983-January 1985, 10:31366 (R;US)

KRYPTON 86 REACTIONS
LITHIUM 7 REACTIONS
NEON 20 REACTIONS
NIOBIUM 93 REACTIONS
NITROGEN 14 REACTIONS
OXYGEN 16 REACTIONS
URANIUM 238 REACTIONS
Breakup Reactions
Distorted-wave Born-approximation theory of heavy-ion induced projectile break-up reactions, 10:32759 (R;DE)
Bremsstrahlung
Coherent photon radiation from nuclei as a probe of impact parameters and nucleon velocity distributions in ultrarelativistic nuclear collisions, 10:32766 (RA;DE)
Probing heavy ion collisions with bremsstrahlung, 10:32795 (J;US)
Compound-Nucleus Reactions
Decay of highly excited compound nuclei: a statistical approach, 10:32731 (R;SU;In Russian)
Energy Losses
Some aspects of heavy ion macrophysics, 10:32755 (R;FR)
Fusion Reactions
Complete fusion and quasifission in reactions between heavy ions, 10:32796 (J;US)
Hydrodynamic Model
Signals longitudinal hydrodynamic expansion in ultra-relativistic nucleus-nucleus collisions, 10:32797 (J;NL)
Impact Parameter
Coherent photon radiation from nuclei as a probe of impact parameters and nucleon velocity distributions in ultrarelativistic nuclear collisions, 10:32766 (RA;DE)
Lectures
Some aspects of heavy ion macrophysics, 10:32755 (R;FR)
Particle Production
Mean field approach to pion production in intermediate energy heavy ion collisions, 10:32696 (RA;DE)
Message from light ions: an experimental review of the search for abnormal phenomena in high-energy nucleus-nucleus collisions, 10:32553 (R;CH)
Quasi-Fission
Complete fusion and quasifission in reactions between heavy ions, 10:32796 (J;US)
Reviews
Message from light ions: an experimental review of the search for abnormal phenomena in high-energy nucleus-nucleus collisions, 10:32553 (R;CH)
HEAVY IONS
Whenever possible use one of the more specific terms listed under ION BEAMS.
Compression
Numerical studies of high current beam compression in heavy ion fusion, 10:33045 (R;US)
HEAVY NUCLEI
For nuclei from mass 181 upwards.

PHWR TYPE REACTORS
Calandrias
Consequences of pressure tube rupture on in-core components. Phase 1 - technology review, 10:30951 (R;CA)
HEAVY WATER MODERATOR
See HEAVY WATER
HEAVY WATER PLANTS
Future trends in heavy water production, 10:30046 (R;CA)
HEBER GEOTHERMAL FIELD
Geothermal Power Plants
Heber binary project, 10:30588 (RA;US)
HEISENBERG MODEL
Anisotropy
Criticality of the D=2 anisotropic quantum Heisenberg model, 10:32831 (R;BR)
Critical Temperature
Criticality of the D=2 anisotropic quantum Heisenberg model, 10:32831 (R;BR)
Spin Waves
Renormalization group treatment for spin waves in the randomly disordered Heisenberg chain, 10:32835 (R;BR)
HEISSDAMPFREAKTORANLAGE
See HDR REACTOR
HELICOPTERS
Detection
Understanding and improving acoustic to seismic coupling as it pertains to Sandia's helicopter detector, 10:32065 (R;US)
HELIUM
Adsorption
Field adsorption of inert gas atoms on the tungsten surface: A pulsed-laser atom-probe study, 10:31503 (J;US)
Atom-Atom Collisions
Calculation of collisional angular-momentum mixing of Rydberg states, 10:32501 (R;IL)
Binding Energy
Field adsorption of inert gas atoms on the tungsten surface: A pulsed-laser atom-probe study, 10:31503 (J;US)
Ion-Atom Collisions
Evidence for uncorrelated electron capture and K-shell excitation in S^{13+}/He collisions, 10:32523 (J;US)
Photon-Atom Collisions
Experimental x-ray scattering cross sections for H_2 and rare atomic gases, 10:32481 (R;US)
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)
HELIUM 3 REACTIONS
Breakup Reactions
Inclusive and exclusive cross sections for the ^{3}He breakup on ^{197}Au. A test case for the DWBA approach in the post-formulation, 10:32742 (R;DE;In German)
Charge-Exchange Reactions
Δ in nuclei and spin-isospin excitation, 10:32686 (R;FR)
Inclusive Interactions
Inclusive and exclusive cross sections for the ^{3}He breakup on ^{197}Au. A test case for the DWBA approach in the post-formulation, 10:32742 (R;DE;In German)
HELIUM 3 TARGET
Knock-Out Reactions
Direct deuteron knockout in ^{3}He(e,e′d)p, 10:32669 (RA;NL)
Pion Minus Reactions
Mechanism of ^{3}He(π^-,pn) reaction, 10:32678 (J;US)

HELIUM 4 REACTIONS
See ALPHA REACTIONS
HELIUM 4 TARGET
Deuteron Reactions
Study of the energy and angular dependence of the final state interaction (αn) in the reaction ^{4}He(d,pα)n with polarized deuterons, 10:32668 (R;DE;In German)
Electron Reactions
Deep inelastic scattering of charged leptons and quark distributions in nuclei, 10:32563 (RA;DE)
Triton Reactions
R-matrix analysis of the ^{7}Li system with peripheral channel overlap exchange effects, 10:32690 (R;US)
HELIUM DILUTION REFRIGERATORS
Energy Balance
Thermodynamic analysis and optimization of cryogenic helium systems with satellite refrigerators, 10:31739 (R;SU;In Russian)
HEMOGLOBIN
Binding Energy
EPR studies of cooperative binding of Cu (II) to hemoglobin, 10:32214 (R;BR)
Electron Spin Resonance
Location of the higher affinity copper site on human hemoglobin by the use of the spin label technique, 10:32215 (R;BR)
HEMOPHILUS
See HAEMOPHILUS
HENS
See CHICKENS
HEPTANE
Combustion Products
Soot and radiation in free boundary layer flames, 10:31719 (R;US)
Enthalpy
Enthalpy and phase behavior of coal derived liquid mixtures. Technical progress report, January-March 1985, 10:29658 (R;US)
HERBICIDES
Foliar Uptake
Effects of high humidity on translocation of foliar-applied labeled compounds in plants. II. Translocation from starved leaves, 10:32256 (J;US)
HEREDITY
See GENETICS
HETEROCYCLIC COMPOUNDS
See also DIOXIN
Labelling
Synthesis of (-)-^{125}I-iodopindolol, 10:31704 (RA;IL)
HETERODYNE RECEIVERS
Calibration
Fast scanning heterodyne receiver for the measurement of the time evolution of the electron temperature profile on the Tokamak Fusion Test Reactor, 10:32949 (J;US)
HEUSLER ALLOYS
Magnetic Susceptibility
Magnetic and Moessbauer studies on rare-earth-containing Heusler alloys Pd$_2$RSn (R = Tb—Yb), 10:31498 (J;US)
HEVEA
Energy Source Development
Fuel oils from higher plants, 10:30305 (R;US)
HEXADECANE
Solvent Properties
Solvent tailoring in coal liquefaction based on critical properties of physical solvating agents and hydrogen donors. Progress report, August 1980-January 1981, 10:29621 (R;US)
Vapor Pressure
Prediction of thermodynamic properties of coal derivatives. Progress report, September 1, 1984-August 31, 1985, 10:31669 (R;US)
HEXANE
Solubility
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)
Solvent Properties
Phase behavior of coal fluids: data for correlation development. Reporting period: November 1, 1984-April 30, 1985, 10:29635 (R;US)
Solvent tailoring in coal liquefaction based on critical properties of physical solvating agents and hydrogen donors. Progress report, August 1980-January 1981, 10:29621 (R;US)
Vapor Pressure
Prediction of thermodynamic properties of coal derivatives. Progress report, September 1, 1984-August 31, 1985, 10:31669 (R;US)
Weight Measurement
Quantitative gas chromatography without analytic identification by ultrasonic detection, 10:31652 (J;US)
HEXENES
Solubility
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)
HGI2 SEMICONDUCTOR DETECTORS
New thermal neutron solid-state electronic detector based on HgI$_2$ crystals, 10:32032 (R;IL;In Hebrew)
Materials
New and revised methods of purifying mercuric iodide, 10:32023 (R;US)
HHIRF
Ion Sources
Negative ion sources equipped with continuous annular and spherical geometry surface ionizers, 10:31940 (R;US)
HIGGS BOSONS
Jet Model
Nonstandard Higgs bosons as a source of monojets, 10:32615 (J;US)
Particle Identification
Possibility of searching for Higgs boson in t-quarkonium decays, 10:32611 (J;US)
Particle Production
Possibility of searching for Higgs boson in t-quarkonium decays, 10:32611 (J;US)
HIGGS MODEL
Correlations and static energies in the standard Higgs-model, 10:32589 (R;DE)
HIGH BTU GAS
Over 900 Btu/ft^3.
Synthesis
Flash hydropyrolysis and methanolysis of biomass with hydrogen and methane, 10:30063 (R;US)
HIGH ENERGY PHYSICS
Use only for articles of a very broad nature such as an annual research program, etc.
Information Systems
Review-of-Particle-Properties system, 10:32550 (J;NL)
Research Programs
NIKHEF annual report 1983, 10:32663 (R;NL;In Dutch)
HIGH ENERGY RADIOTHERAPY

HIGH-HEAD HYDROELECTRIC POWER PLANTS
Prior to August 1978 HYDROELECTRIC POWER PLANTS was used.
Capacity
Hoover Powerplant uprating, 10:30164 (RA;US)
Design
Design concept of Shuikou Hydroelectric Project, China, 10:30148 (RA;US)
Efficiency
Optimizing operating efficiency at Hoover Powerplant, 10:30189 (RA;US)
Maintenance
Rehabilitation of TVA's Ocoee No. 2 Project, 10:30169 (RA;US)
Modifications
Hoover Powerplant uprating, 10:30164 (RA;US)
Rehabilitation of TVA's Ocoee No. 2 Project, 10:30169 (RA;US)

Optimization
Optimizing operating efficiency at Hoover Powerplant, 10:30189 (RA;US)
Performance
Hoover Powerplant uprating, 10:30164 (RA;US)
Site Selection
Design concept of Shuikou Hydroelectric Project, China, 10:30148 (RA;US)

HIGH-LEVEL RADIOACTIVE WASTES
After-Heat
Effects of heat from high-level waste on performance of deep geological repository components. Report of a technical committee meeting on effects of heat from radioactive waste in deep geological repositories organized by the IAEA and held in Stockholm, 28 August-2 September 1983, 10:29932 (R;XA)
Decontamination
I-129 analysis in radioactive waste, 10:29920 (R;US)
Monitored Retrievable Storage
Need for and feasibility of monitored retrievable storage: a preliminary analysis, 10:29918 (R;US)
Screening and identification of sites for a proposed Monitored Retrievable Storage Facility, 10:29919 (R;US)
Packaging
Long-term performance of materials used for high-level waste packaging. Third quarterly report, Year Three, October-December 1984. Vol. 3, 10:31471 (R;US)
Repository environmental parameters relevant to assessing the performance of high-level waste packages, 10:29952 (R;US)
Radioactive Waste Disposal
Costs for handling and disposal of high level radioactive wastes and spent fuels, 10:29973 (R;SE;In Swedish)
Critical parameters for a high-level waste repository. Volume 1. Basalt, 10:29953 (R;US)
Evaluation of commercial repository capacity for the disposal of defense high-level waste, 10:29914 (R;US)
KBS annual report 1979. Including summaries of technical reports issued during 1979, 10:29974 (R;SE)
KBS Technical report 1-120 (1977-1978). Summaries, 10:29938 (R;SE)
Performance Assessment National Review Group, 10:29917 (R;US)
Permeability and fluid chemistry studies of the Topopah Spring Member of the Paintbrush Tuff, Nevada Test Site: Part II, 10:29988 (R;US)
Salt deposits in the United States and regional geologic characteristics important for storage of radioactive waste, 10:29991 (R;US)
Technical test description of activities to determine the potential for spent fuel oxidation in a tuff repository, 10:29930 (R;US)
Uranium, thorium isotopic analyses and uranium-series ages of calcite and opal, and stable isotopic compositions of calcite from drill cores UE25a No. 1, USW G-2 and USW G-3/GU-3, Yucca Mountain, Nevada, 10:29990 (R;US)
Radioactive Waste Processing
One third linear scale Joule Ceramic Melter - Progress report April 1983-March 1984, 10:29904 (R;GB)
Recovery of neptunium. Literature survey, 10:29936 (R;JP;In Japanese)
Use of Co-60 gamma irradiation to simulate decomposition of tetraphenylborate precipitates from high-level radioactive waste, 10:29923 (R;US)
Vitrification of high-level radioactive waste in a pilot-scale liquid-fed ceramic melter, 10:29965 (R;US)
Underground Disposal
Applications of geochemical modeling to high-level nuclear waste disposal at the Hanford site, Washington, 10:29946 (RA;US)
Applications of geochemical modeling to site characterization and radionuclide transport in the NNWSI project, 10:29948 (RA;US)
Chemical modeling of nuclear waste repositories in the salt repository project, 10:29949 (RA;US)
Matrix diffusion coefficients for the NNWSI waste package environment, 10:29947 (RA;US)
Thermodynamic problems in speciation modeling, 10:29941 (RA;US)
Vitrification
Nuclear Waste Treatment Program. Annual report for FY 1984, 10:29962 (R;US)
One third linear scale Joule Ceramic Melter - Progress report April 1983-March 1984, 10:29904 (R;GB)
Vitrification of high-level radioactive waste in a pilot-scale liquid-fed ceramic melter, 10:29965 (R;US)
Waste Forms
Chemical durability of alkali aluminosilicate glasses, 10:31556 (R;CA)
Waste-Rock Interactions
Effects of heat from high-level waste on performance of deep geological repository components. Report of a technical committee meeting on effects of heat from radioactive waste in deep geological repositories organized by the IAEA and held in Stockholm, 28 August-2 September 1983, 10:29932 (R;XA)

HIGH-VOLTAGE PULSE GENERATORS
Chemical Explosives
Explosive generators for low-cost pulsed power, 10:31812 (R;US)
Performance
Multi-megampere operation of plasma compression opening switches in planar geometry, 10:31806 (R;US)
Plasma Switches
Multi-megampere operation of plasma compression opening switches in planar geometry, 10:31806 (R;US)
Uses
Application of pulsed power in the simulation of severe natural lightning, 10:31809 (R;US)

HILBERT SPACE
Nonlinear Problems
Nonlinear semigroup whose generator is not dissipative, 10:32883 (J;US)

HISTAMINE
Labelling
Purification of ^{125}I iodohistamine, 10:31705 (RA;IL)
Purification
Purification of ^{125}I iodohistamine, 10:31705 (RA;IL)

HISTIDINE
Structural Chemical Analysis
Structure and synthesis of histopine, a histidine derivative produced by crown gall tumors, 10:32220 (J;US)

HISTONES
Phosphorylation
Extent of histone modifications and H1^{0} content during cell cycle progression in the presence of butyrate, 10:32364 (J;US)

HODOSCOPES
Performance
Performance of a lead-scintillator sandwich hodoscope with photodiode readout, 10:32020 (R;DE)
Scintillator-Photodiode Detectors
Performance of a lead-scintillator sandwich hodoscope with photodiode readout, 10:32020 (R;DE)

HOG FUEL
See WOOD WASTES

HOLIFIELD HEAVY ION RESEARCH FACILITY
See HHIRF

HOLMIUM
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)

HOLMIUM 161
High Spin States
Spin dependent deformation of ^{161}Ho probed by particle correlations, 10:32736 (RA;NL)
Nuclear Deformation
Spin dependent deformation of ^{161}Ho probed by particle correlations, 10:32736 (RA;NL)

HOMOGENEOUS PLASMA
Fluctuations
Fluctuation spectrum for linear gyroviscous MHD, 10:32901 (R;DE)

HOSPITALS
Design
Energy to recover, 10:31290 (RA;US)
Energy Conservation
School and hospital energy conservation incentives, 10:31262 (R;US)
Energy Consumption
Energy to recover, 10:31290 (RA;US)
Energy Efficiency
Energy to recover, 10:31290 (RA;US)
HOT ATOM CHEMISTRY
Ion-Molecule Collisions
Ion-molecule reactions and beam studies in relation to hot atom chemistry. Chapter 2-C, 10:31715 (BA;NL)
Meetings
12th international hot atom chemistry symposium, Balatonfuered, Hungary, 23-28 September 1984. Abstracts, 10:31709 (R;HU)
HOT CELLS
Aerosol Monitoring
New stack effluent monitoring system at the Risoe Hot Cell plant, 10:30018 (R;DK)
Fission Product Release
New stack effluent monitoring system at the Risoe Hot Cell plant, 10:30018 (R;DK)
Radiation Monitors
New stack effluent monitoring system at the Risoe Hot Cell plant, 10:30018 (R;DK)
HOT PLASMA
Distribution Functions
Electron heating by waves in the ion-cyclotron frequency range, 10:32924 (J;US)
Energy Absorption
Electron heating by waves in the ion-cyclotron frequency range, 10:32924 (J;US)
GORGON - a computer code for the calculation of energy deposition and the slowing down of ions in cold materials and hot dense plasmas, 10:33017 (R;DE)
Ion Temperature
New method for measuring ion temperatures in hot D—T plasma, 10:32968 (J;US)
Larmor Radius
Electron heating by waves in the ion-cyclotron frequency range, 10:32924 (J;US)
Plasma Diagnostics
New method for measuring ion temperatures in hot D—T plasma, 10:32968 (J;US)
HOT SPRINGS
Energy Source Development
Geothermal potential for commercial and industrial direct heat applications in Salida, Colorado. Final report, 10:30586 (R;US)
Water Chemistry
Evaluation of low-temperature geothermal potential in Utah and Goshen Valleys and adjacent areas, Utah. Part II. Water temperature and chemistry, 10:30583 (R;US)
HOT WATER HEATERS
See WATER HEATERS
HOUGH-POWELL DEVICES
See FLYING SPOT DIGITIZERS
HOUSEHOLDS
Energy Conservation
Evaluation of Minnesota utility home energy audit and retrofit loan programs, 10:31296 (J;US)
Energy Consumption
Comparative effects of high energy cost on black and white families at four economic income levels, 10:31175 (R;US)
HOUSES
Air Conditioning
Moisture Control in passive buildings in warm humid climates, 10:30524 (BA;US)
Air Infiltration
Air leakage characteristics and weatherization techniques for low-income housing, 10:31222 (RA;US)
Air leakage measurement and reduction techniques on electrically heated homes, 10:31223 (RA;US)
Analysis of infiltration by tracer gas technique, pressurization tests, and infrared scans, 10:31221 (RA;US)
Measurement-based calculation of infiltration in passive solar performance evaluation, 10:30497 (BA;US)
Air Quality
Indoor air pollution, 10:32127 (R;US)
Airtightness
Insulation and air tightness of six low-energy houses at Hjortekaer, Denmark, 10:31266 (R;DK)
Attached Greenhouses
Energy savings potential for attached sunspaces in different climates, 10:30530 (BA;US)
Sunspace performance and design flexibility in three climates, 10:30525 (BA;US)
The custom passive solar sunspace: some design alternatives, 10:30507 (BA;US)
Attics
Modeling of residential attics, 10:31227 (RA;US)
Cooling Load
Transient thermal response of an intermittently cooled massive building, 10:31233 (RA;US)
Daylighting
Effects of daylight on interior woods and wood finishes, 10:30413 (BA;US)
Evaluation of a solar thermal and daylighting system, 10:30462 (BA;US)
From vernacular to daylighting architecture historical aspects, 10:30434 (BA;US)
The Daylight Solar Vent: Flexible design, 10:30409 (BA;US)
Degree Days
Application of modified degree day procedures to a residential rating system, 10:31313 (BA;US)
Dehumidification
Moisture Control in passive buildings in warm humid climates, 10:30524 (BA;US)
Design
Smith House, Tannersville, New York, 10:30504 (BA;US)
The Van Teeckelenburgh Residence, 10:30505 (BA;US)
Direct Gain Systems
Effects of daylight on interior woods and wood finishes, 10:30413 (BA;US)
Medium density passive solar production housing, 10:30516 (BA;US)
Solar passive heating in Greece, 10:30520 (BA;US)
The 'Mabathoana House' In Qualing: A transitional modern design in Lesotho, 10:30430 (BA;US)
Three passive solar architectures in Tokyo, 10:30521 (BA;US)
Wood frame supported thermal mass floors, 10:30458 (BA;US)
Earth Berms
Instrumented performance study of a passive solar heated earth sheltered residence, 10:30373 (R;US)
Economics
The Energy-Efficient Home Project of Oregon, 10:31298 (BA;US)
Electric Power
Electric load in single family houses. Load analysis and simulation studies for local mains (Sweden), 10:31170 (R;SE;In Swedish)
Energy Conservation
Keeping experimental track of Bassens solar houses. Thermal and economical aspects, 10:30377 (R;FR;In French)
Energy Consumption
Energy savings potential of dehumidified roof pond residences, 10:30555 (BA;US)
Energy Efficiency
Annual thermal utility of internal gains, 10:30479 (BA;US)
Application of modified degree day procedures to a residential rating system, 10:31313 (BA;US)
Assessing solar and conservation retrofits in home rehabilitation programs for low and moderate income people, 10:30443 (BA;US)
Energy conservation to reduce summer cooling costs in Palm Springs, 10:31297 (BA;US)
Energy-efficient residence (EER-2). Final report, 10:31280 (R;US)
Overview of the results of the Residential Conservation Demonstration Program, 10:30442 (BA;US)

Performance of an energy efficient residence vs a conventional comparison home, 10:31232 (RA;US)
Smith House, Tannersville, New York, 10:30504 (BA;US)
The Energy-Efficient Home Project of Oregon, 10:31298 (BA;US)
The increased use of passive solar energy in single-family dwellings, Colorado Springs, CO, 10:30287 (BA;US)
The Umbach Residence as a responsible solar design for a cold, cloudy climate, 10:30506 (BA;US)
Transformations: The design process in residential retrofit active hand / passive design, 10:30503 (BA;US)

Floors
Wood frame supported thermal mass floors, 10:30458 (BA;US)

Foundations
Mathematical modeling and computer simulation of insulation systems in below grade applications, 10:31228 (RA;US)

Greenhouses
Instrumented performance study of a passive solar heated earth sheltered residence, 10:30373 (R;US)

Heat Gain
Annual thermal utility of internal gains, 10:30479 (BA;US)

Heating
Electric load in single family houses. Load analysis and simulation studies for local mains (Sweden), 10:31170 (R;SE;In Swedish)
Firing fast fuels on a small scale in densely built areas. Basic document, 10:30085 (R;SE;In Swedish)

Heating Load
Energy savings potential for attached sunspaces in different climates, 10:30530 (BA;US)

Indoor Air Pollution
Radon levels in metropolitan Denver homes, 10:30415 (BA;US)

Passive Solar Cooling Systems
Behavioral implications of living with passive solar homes, 10:30421 (BA;US)
Common errors in design and construction of passive solar homes: Results of a review of NMSEI technical assistance program, 10:30446 (BA;US)
Consumer retrofit responses, 10:30404 (BA;US)
From vernacular to daylighting architecture historical aspects, 10:30434 (BA;US)
Moisture Control in passive buildings in warm humid climates, 10:30524 (BA;US)
Passive solar homes: Owners react to their interior environments, 10:30414 (BA;US)
Passive Solar Design guidelines and evaluation criteria for builders, 10:30448 (BA;US)
Raising the "OPEN U" value by passive means, 10:30463 (BA;US)
Suncatcher Monitoring Project: three years of monitoring, 10:30517 (BA;US)
The courtyard: Passive cooling performance and shading variables, 10:30464 (BA;US)

The Umbach Residence as a responsible solar design for a cold, cloudy climate, 10:30506 (BA;US)
The Van Teeckelenburgh Residence, 10:30505 (BA;US)
Three passive solar architectures in Tokyo, 10:30521 (BA;US)
Total energy considerations for passive solar strategies in desert climates passive solar, 10:30465 (BA;US)
Transformations: The design process in residential retrofit active hand / passive design, 10:30503 (BA;US)
Your solar house thirty-five years later, 10:30452 (BA;US)

Passive Solar Water Heaters
Results of monitoring flat-plate, batch, and solar/wood domestic water heaters, 10:30537 (BA;US)

Radioecological Concentration
Radon levels in metropolitan Denver homes, 10:30415 (BA;US)

Roof Ponds
Energy savings potential of dehumidified roof pond residences, 10:30555 (BA;US)
Geographic limits for comfort in unassisted roof pond cooled residences, 10:30542 (BA;US)
Results of validated simulations of roof pond cooled residences, 10:30554 (BA;US)
The performance of a roof-pond solar house, The New Mexico State University experience, 10:30558 (BA;US)

Roofs
Effect of moisture on the thermal conductance of roofing systems, 10:31235 (RA;US)
The "folded plate roof" - a unique problem solver, 10:30512 (BA;US)

Shading
The courtyard: Passive cooling performance and shading variables, 10:30464 (BA;US)

Skylights
Overhead glazing and thermal comfort control, 10:30454 (BA;US)

Solar Architecture
An environmentally responsive residence for south Louisiana, 10:30467 (BA;US)
Assessing solar and conservation retrofits in home rehabilitation programs for low and moderate income people, 10:30443 (BA;US)
Designing and evaluating a solar subdivision, 10:30410 (BA;US)
Energy education for a major builder, 10:30445 (BA;US)
Passive solar houses without furnaces in the high Rockies, 10:30513 (BA;US)
Smith House, Tannersville, New York, 10:30504 (BA;US)
The Van Teeckelenburgh Residence, 10:30505 (BA;US)
Wingwalls to improve natural ventilation: full-scale results and design strategies, 10:30466 (BA;US)

Solar Cooling Systems
Construction and initial operation of a seasonal solar cooling system, 10:30358 (R;US)

Solar Heating Systems
Combined solar and surface earth heating for a small group of houses in Perstorp. Results of three years performance monitoring, 10:30357 (R;SE;In Swedish)
Sunstore experimental house in Sigtuna. Performance measurement and assessment 1981-1982, 10:30559 (R;SE;In Swedish)
Solar Space Heating
An experimental passive solar performance assessment on an earth-sheltered house, 10:30471 (BA;US)
Evaluation of a solar thermal and daylighting system, 10:30462 (BA;US)
Keeping experimental track of Bassens solar houses. Thermal and economical aspects, 10:30377 (R;FR;In French)
Sunstore experimental house in Sigtuna. Performance measurement and assessment 1981-1982, 10:30559 (R;SE;In Swedish)
Solar Water Heaters
Evaluation of a solar thermal and daylighting system, 10:30462 (BA;US)
Solar Water Heating
Combined solar and surface earth heating for a small group of houses in Perstorp. Results of three years performance monitoring, 10:30357 (R;SE;In Swedish)
Space Heating
Application of modified degree day procedures to a residential rating system, 10:31313 (BA;US)
Subsurface Structures
Mathematical modeling and computer simulation of insulation systems in below grade applications, 10:31228 (RA;US)
Temperature Control
Overhead glazing and thermal comfort control, 10:30454 (BA;US)
Thermal Comfort
Geographic limits for comfort in unassisted roof pond cooled residences, 10:30542 (BA;US)
Overhead glazing and thermal comfort control, 10:30454 (BA;US)
Passive solar houses without furnaces in the high Rockies, 10:30513 (BA;US)
Raising the "OPEN U" value by passive means, 10:30463 (BA;US)
Thermal Efficiency
Method of rating the thermal efficiency of a home envelope relative to an energy efficient standard, 10:31229 (RA;US)
Thermal Insulation
Comparative studies of vapor condensation potentials in wood framed walls, 10:31236 (RA;US)
Comparison of BTR measurements, 10:31224 (RA;US)
Field study of moisture damage in walls insulated without a vapor barrier, 10:31234 (RA;US)
Field survey of the performance properties of insulation used to retrofit cavity walls of residences, 10:31240 (RA;US)
Insulation and air tightness of six low-energy houses at Hjortekaer, Denmark, 10:31266 (R;DK)
Linear regression techniques in analysis of the Blouin superinsulated house, 10:31319 (BA;US)
The Timberloft: A superinsulated house for cold climates, 10:31323 (BA;US)
The Wall Report- A "value insulation" approach to determining the cost effectiveness of residential wall construction, 10:31317 (BA;US)
Thermal Mass
Building as hearth- The articulation of building mass in Colorado architecture, 10:30519 (BA;US)
Thermosyphon Effect
Medium density passive solar production housing, 10:30516 (BA;US)
Trombe Walls
A thermal history of the Kelbaugh House, 10:30518 (BA;US)
Medium density passive solar production housing, 10:30516 (BA;US)
Solar passive heating in Greece, 10:30520 (BA;US)
The 'Mabathoana House' In Qualing: A transitional modern design in Lesotho, 10:30430 (BA;US)
Ventilation
A design procedure to size windows for naturally ventilated rooms, 10:30405 (BA;US)
Ventilation Systems
Wingwalls to improve natural ventilation: full-scale results and design strategies, 10:30466 (BA;US)
Walls
Calorimeter for measuring heat flow through walls, 10:31225 (RA;US)
Economic considerations in insulating masonry and wood-frame walls of single-family housing, 10:31230 (RA;US)
Economic comparison and thermal performance of several different insulated wall constructions, 10:31231 (RA;US)
Effective thermal performance of an insulated standard stud wall containing air gaps, 10:31242 (RA;US)
The Wall Report- A "value insulation" approach to determining the cost effectiveness of residential wall construction, 10:31317 (BA;US)
Ventilation of back space of building enclosure siding for solar heat gain reduction, 10:31237 (RA;US)
Windows
Dynamic response of conventional residential construction to solar radiation through windows during the heating season, 10:31226 (RA;US)

HPD DEVICES

Cooper River rediversion project, St. Stephen Powerplant, St. Stephen, Carolina: engineering considerations and instructions for field personnel, 10:30104 (R;US)
Reviews
National hydropower study, 10:30101 (RA;US)
Schedules
TVA's weekly scheduling model: overview and implementation, 10:30180 (RA;US)
Technology Transfer
Case study of US-China cooperation in unified resource development, 10:30098 (RA;US)
Turbogenerators
Acoustic flowmeters for hydro-turbine efficiency measurement, 10:30185 (RA;US)
Case studies in hydroelectric turbine rehabilitation, 10:30175 (RA;US)
Computer analysis and field correlation from the hydraulic transient program CORA, 10:30144 (RA;US)
Conversion of mechanical governors to electrical governors, 10:30174 (RA;US)
Equipment selection and operation policy aided by micro-computer, 10:30191 (RA;US)
New technology for modernization of existing hydraulic turbines, 10:30172 (RA;US)
Recent developments of the Turgo Impulse Turbine, 10:30157 (RA;US)
Renovation of the Lloyd Shoals hydro excitation system, 10:30167 (RA;US)
Water Reservoirs
Environmental impact of reservoir on the Merse River, Italy, 10:30254 (RA;US)

HYDROELECTRICITY
See HYDROELECTRIC POWER

HYDROFLUORIC ACID
Health Hazards
Personnel protection equipment for use with laser chemicals, 10:32376 (R;US)
Monitoring
Upgrading auxiliary facility outleakage and combustion detection. Final project report, 10:30027 (R;US)

HYDROGEN
Adsorption
Initial oxidation of Zn(0001) surfaces: H_2 adsorption and XPS studies, 10:31505 (J;US)
Adsorption Heat
Characterization of catalysts with metal-support effects and of the species adsorbed on their surfaces. Progress report, September 1, 1984-August 30, 1985, 10:31656 (R;US)
Atomic Beam Sources
Cooling high intensity atomic hydrogen beams to liquid helium temperatures, 10:32478 (R;US)
Atomic Models
Hidden symmetry, separation of variables and interbasis expansions in the two-dimensional hydrogen atom, 10:32494 (R;SU;In Russian)
Atom-Molecule Collisions
Quantum mechanical reactive scattering via exchange kernels: Infinite order exchange on a grid, 10:32511 (J;US)
Vibrational excitation of CH_3F by collisions with "hot" H and D atoms, 10:32519 (J;US)
Chemical Bonds
Photokinetic aspects of specific hydrogen bonding in all-trans retinal at room temperature, 10:32225 (J;GB)
Chemical Reaction Kinetics
"Direct" calculation of quantum mechanical rate constants via path integral methods: Application to the reaction path Hamiltonian, with numerical test for the $H+H_2$ reaction in 3D, 10:31661 (J;US)
Kinetics of the reactions of NCO radicals with H_2 and NO using laser photolysis—laser induced fluorescence, 10:31662 (J;US)
Molecular dynamics study of the reaction $H_2+OH \rightarrow H_2O+H$, 10:31663 (J;US)
Separation of gas mixtures by supported complexes, 10:31671 (R;US)
Chemisorption
Influence of adsorbed Bi on the chemisorption properties of Pt(111):H_2, CO, and O_2, 10:31501 (J;US)
Collisions
Orientation dependence of the $H + D_2$ reaction cross section: steric model vs. trajectory calculations, 10:32531 (J;US)
Vibrational relaxation in H_2 molecules by wall collisions: Applications to negative ion source processes, 10:32528 (J;US)
Combustion
Evaluation of containment failure modes and fission product releases during core meltdown accidents in a BWR with a Mark III containment, 10:30886 (RA;US)
Hydrogen combustion in nuclear plant accidents and associated containment loads, 10:31040 (J;NL)
Kinetics of the reactions of NCO radicals with H_2 and NO using laser photolysis—laser induced fluorescence, 10:31662 (J;US)
Molecular dynamics study of the reaction $H_2+OH \rightarrow H_2O+H$, 10:31663 (J;US)
Combustion Properties
Alternate fuels for maritime use, 10:31324 (RA;US)
Compression
Preliminary considerations for the gasdynamic precompression of solid molecular hydrogen, 10:32540 (R;US)
Containment Buildings
Hydrogen combustion in nuclear plant accidents and associated containment loads, 10:31040 (J;NL)
Desorption
Initial oxidation of Zn(0001) surfaces: H_2 adsorption and XPS studies, 10:31505 (J;US)
Deuteration
Dynamics of atomic hydrogen and deuterium recombination on the stepped Pt(557) crystal surface, 10:31664 (J;US)
Diffusion
Note on the transport of hydrogen from a waste canister, 10:29981 (RA;SE)
Permeation of hydrogen through nickel electroplate, 10:31486 (RA;US)
Dissociation
Structure-sensitive catalytic dehydrogenation of hydrogen donors over iron sulfides: new methods for increasing coal depolymerization under mild conditions. Final report, July 1, 1983-December 31, 1984, 10:31657 (R;US)
Electron-Molecule Collisions
Electron storage ring beam lifetime dependence on pressure and pumping speed, 10:32008 (J;US)

Energy Supplies
Hydrogen in future energy supplies (Denmark), 10:30061 (RA;DK;In Danish)
Energy-Level Density
Vibrational relaxation in H_2 molecules by wall collisions: Applications to negative ion source processes, 10:32528 (J;US)
Excited States
Vibrational relaxation in H_2 molecules by wall collisions: Applications to negative ion source processes, 10:32528 (J;US)
G Value
Radiolytic gas generation rates from Hanford RHO-CAW sludge and double-shell slurry immobilized in grout, 10:31576 (R;US)
Leaks
Experimental evaluation of working gas containment in the automotive Stirling engine, 10:31417 (RA;US)
Metallurgical Effects
Methane-bubble formation in hydrogen-charged Fe-30 ppM C, 10:31434 (R;US)
Partial Pressure
Mechanistic study of the hydrodesulfurization of methanethiol over tungsten disulfide; a survey of rare earth sulfides for hydrodesulfurization activity, 10:31673 (R;US)
Photon-Molecule Collisions
Experimental x-ray scattering cross sections for H_2 and rare atomic gases, 10:32481 (R;US)
Solids
Preliminary considerations for the gasdynamic precompression of solid molecular hydrogen, 10:32540 (R;US)
Symmetry
Hidden symmetry, separation of variables and interbasis expansions in the two-dimensional hydrogen atom, 10:32494 (R;SU;In Russian)
Temperature Measurement
Effective hydrogen gas temperature in a cryopumped beam line vessel, 10:33058 (J;US)
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)
Vapor Pressure
Effective hydrogen gas temperature in a cryopumped beam line vessel, 10:33058 (J;US)
Vibrational States
Vibrational relaxation in H_2 molecules by wall collisions: Applications to negative ion source processes, 10:32528 (J;US)

HYDROGEN 1 MINUS BEAMS
Beam Bunching
Proposed bunching scheme for a polarized H^- injector, 10:31983 (R;US)
Beam Monitoring
Noninterceptive techniques for the measurement of longitudinal parameters for intense H^- beams, 10:31901 (R;US)
Beam-Plasma Systems
Beam potential measurement of an intense H^- beam by use of the emissive probe technique, 10:32496 (R;US)

HYDROGEN 1 TARGET
Neutron Reactions
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Polarization in n-p and n-d scattering at 16,9 and 21,6 MeV, 10:32675 (RA;ZA)

HYDROGEN 2
See DEUTERIUM

HYDROGEN 3
See TRITIUM

HYDROGEN BROMIDES
See HYDROBROMIC ACID

HYDROGEN CHLORIDES
See HYDROCHLORIC ACID

HYDROGEN CYANIDES
See HYDROCYANIC ACID

HYDROGEN DEUTERIDE
Kinetic Energy
Dynamics of atomic hydrogen and deuterium recombination on the stepped Pt(557) crystal surface, 10:31664 (J;US)
Optical Properties
Calculations of collision-induced optical gain in high-density mixtures of D2 or HD with a buffer gas, 10:31757 (R;AU)

HYDROGEN DONOR REACTIONS
See HYDROGEN TRANSFER

HYDROGEN EMBRITTLEMENT
Research Programs
Hydrogen embrittlement testing. [Final report], 10:31442 (R;US)

HYDROGEN FLUORIDES
See HYDROFLUORIC ACID

HYDROGEN FUELS
Combustion Properties
Chemical kinetic modeling of hydrocarbon combustion, 10:30076 (J;GB)

HYDROGEN HYDROXIDES
See WATER

HYDROGEN IONS
See also HYDROGEN IONS 1 MINUS
Configuration Interaction
Spectroscopic constants for tritiated and deuterated H3(+), 10:32533 (J;CA)

HYDROGEN IONS 1 MINUS
For H_1^- ions.
Ion Density
Hydrogen vibrational population distributions and negative ion generation in tandem high density hydrogen discharges, 10:32529 (J;US)
Vibrational States
Hydrogen vibrational population distributions and negative ion generation in tandem high density hydrogen discharges, 10:32529 (J;US)

HYDROGEN LOGS
See NEUTRON-GAMMA LOGGING

HYDROGEN MINUS 1 BEAMS
See HYDROGEN 1 MINUS BEAMS

HYDROGEN NITRATES
See NITRIC ACID

HYDROGEN PEROXIDE
Biochemical Reaction Kinetics
Nature of oxygen containing radicals in radiation chemistry and photochemistry of aqueous solutions. Final progress report, July 1982-July 1983, 10:32349 (R;US)
Biological Effects
Nature of oxygen containing radicals in radiation chemistry and photochemistry of aqueous solutions. Final progress report, July 1982-July 1983, 10:32349 (R;US)

HYDROGEN PHOSPHATES
See PHOSPHORIC ACID

HYDROGEN PRODUCTION
Electrolysis
Hydrogen production at low-head hydropower plants, 10:30198 (RA;US)
Feasibility Studies
Interfacing the tandem mirror fusion reactor to a hydrogen thermochemical plant, 10:30058 (J;US)
Photoelectrolysis
Catalyzed photodissociation of water, 10:30059 (J;US)
Photolysis
Catalysis of photochemical hydrogen production by metal dithiolenes in aqueous organic solvents, 10:30057 (R;DE;In German)
Thermochemical Processes
Interfacing the tandem mirror fusion reactor to a hydrogen thermochemical plant, 10:30058 (J;US)
TMR Reactors
Interfacing the tandem mirror fusion reactor to a hydrogen thermochemical plant, 10:30058 (J;US)

HYDROGEN STORAGE
Chemisorption
Thermocompressor or heat pump using metal hydrides, 10:31050 (R;FR;In French)

Hydrides
Electrochemical investigation of hydrogen storage in metal hydrides, 10:30060 (J;US)
HYDROGEN SULFATES
See SULFURIC ACID
HYDROGEN SULFIDES
Absorption
Novel sorbents for high temperature regenerative H_2S removal. Quarterly report No. 4, November 1984-January 1985, 10:29619 (R;US)
Removal
Novel sorbents for high temperature regenerative H_2S removal. Quarterly report No. 4, November 1984-January 1985, 10:29619 (R;US)
Synthesis
Structure-sensitive catalytic dehydrogenation of hydrogen donors over iron sulfides: new methods for increasing coal depolymerization under mild conditions. Final report, July 1, 1983-December 31, 1984 (To determine whether hydrogen sulfide formation occurs by a Rideal-type mechanism (hydrogen molecules reacting directly with surface sulfur) or a Langmuir-Hindshelwood-type mechanism (dissociated hydrogen reacting with surface sulfur)), 10:31657 (R;US)
Vapor Pressure
Thermodynamics of multi-polar molecules: the perturbed-anisotropic-chain theory, 10:31670 (R;US)
HYDROGEN TRANSFER
Catalysis
Transition metal catalysis of hydrogen shuttling in coal liquefaction. Quarterly technical progress report, December 1, 1984-February 28, 1985, 10:29637 (R;US)
HYDROGENATION
Catalysts
Hydrotreatment catalyst activity enhancement. Quarterly report No. 7, February 1, 1985-April 30, 1985, 10:29636 (R;US)
Mechanistic study of the hydrodesulfurization of methanethiol over tungsten disulfide; a survey of rare earth sulfides for hydrodesulfurization activity, 10:31673 (R;US)
Promotion effects on the synthesis of higher alcohols. 11th quarterly report, January-March 1985, 10:30068 (R;US)
Thermal component of residuum conversion in two-stage coal liquefaction, 10:29639 (R;US)
Chemical Reaction Kinetics
Promotion effects on the synthesis of higher alcohols. 11th quarterly report, January-March 1985, 10:30068 (R;US)
Comparative Evaluations
Mechanistic study of the hydrodesulfurization of methanethiol over tungsten disulfide; a survey of rare earth sulfides for hydrodesulfurization activity, 10:31673 (R;US)
Deactivation
Hydrotreatment catalyst activity enhancement. Quarterly report No. 7, February 1, 1985-April 30, 1985, 10:29636 (R;US)
Yields
Promotion effects on the synthesis of higher alcohols. 11th quarterly report, January-March 1985, 10:30068 (R;US)
HYDROLOGY
Gamma Spectroscopy
Method of radioactive tracer samples with ion exchange resins for spectrometric analysis with Ge(Li) detector, 10:32183 (R;RO;In Romanian)
Remote Sensing
Remote sensing of hydrologic transport processes using spot simulation data. Final report, August 1, 1983-April 30, 1985, 10:32385 (R;US)
HYDROTHERMAL CONVECTIVE SYSTEMS
See HYDROTHERMAL SYSTEMS
HYDROTHERMAL SYSTEMS
Electrical Surveys
Indications of mineral zoning in a fossil hydrothermal system at the Meager Creek geothermal prospect, British Columbia, Canada, from induced polarization studies, 10:30579 (R;US)
HYDROXYACETIC ACID
See GLYCOLIC ACID
HYDROXYBENZENE
See PHENOL
HYDROXYL RADICALS
Chemical Reaction Kinetics
Molecular dynamics study of the reaction $H_2+OH \rightarrow H_2O+H$, 10:31663 (J;US)
Combustion
Molecular dynamics study of the reaction $H_2+OH \rightarrow H_2O+H$, 10:31663 (J;US)
HYPERONS

Far-infrared imaging of tokamak plasma, 10:32945 (J;US)
Spatial Resolution
Far-infrared imaging of tokamak plasma, 10:32945 (J;US)
INTERFEROMETRY
Data Analysis
Determination of experimental tokamak plasma profiles using maximum-entropy analysis, 10:32960 (J;US)
INTERMEDIATE BOSONS
Composite Models
Looking for weak-boson compositeness via form factors, 10:32612 (J;US)
Radiative Decay
Phenomenological coupling of excited lepton to Z^0 and Z^0 decay to hard γ, 10:32618 (J;US)
INTERMEDIATE-LEVEL RADIOACTIVE WASTES
Ground Disposal
Fully engineered shallow trench design concepts for disposal of low and intermediate level radioactive waste. Interim report, 10:29940 (R;GB)
Packaging
Optimization of activity loading of low and medium level waste packages, 10:29939 (R;DE;In German)
Pelletizing
Cold pressed and sintered barium sulphate ceramic waste forms for direct immobilisation of medium level Magnox waste, 10:29908 (R;GB)
Radioactive Waste Disposal
AERE contracts with DOE on the treatment and disposal of intermediate level wastes. Annual report for 1983/84, 10:29903 (R;GB)
Fully engineered shallow trench design concepts for disposal of low and intermediate level radioactive waste. Interim report, 10:29940 (R;GB)
Radioactive Waste Processing
Cold pressed and sintered barium sulphate ceramic waste forms for direct immobilisation of medium level Magnox waste, 10:29908 (R;GB)
Underground Disposal
Migration processes in a model deep repository for the disposal of intermediate level nuclear waste, 10:30008 (R;GB)
INTERMETALLIC COMPOUNDS
Corrosion
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985 (Nickel Iron Aluminides), 10:29616 (R;US)
Tensile Properties
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985 (Nickel Iron Aluminides), 10:29616 (R;US)

COULOMB IONIZATION
Differential Cross Sections
Theory of electron-impact atomic ionization cross sections. Annual summary report, 1 July 1984-30 June 1985, 10:32475 (R;US)
IONIZATION CALORIMETERS
See SHOWER COUNTERS

IONIZATION CHAMBERS

Sensitivity

Theoretical and experimental determination of neutron sensitivity for high-pressure ionization chambers filled with CO_2. Final report for the period 1 July 1981-30 June 1984, 10:32024 (R;XA;In Russian)

Specifications

Theoretical and experimental determination of neutron sensitivity for high-pressure ionization chambers filled with CO_2. Final report for the period 1 July 1981-30 June 1984, 10:32024 (R;XA;In Russian)

IONIZING RADIATIONS

See also GAMMA RADIATION
X RADIATION

Biological Radiation Effects

Effects of ionizing radiation and review of the Young-Woollard document, 10:32294 (R;CA)

IONOPHORESIS

See ELECTROPHORESIS

IONOSPHERE

See also D REGION

Charge Carriers

Current carriers for the field-aligned current system, 10:32463 (R;US)

Mapping

Bistatic LIDAR experiment proposed for the shuttle/tethered satellite system missions, 10:32075 (J;US)

Photometry

Bistatic LIDAR experiment proposed for the shuttle/tethered satellite system missions, 10:32075 (J;US)

Plasma Waves

Effects of finite-current-channel width on the current convective instability. Memorandum report, October 1983-October 1984, 10:32457 (R;US)

IONS

Ions in solutions are indexed as compounds; ions in gases by the precoordinated descriptor consisting of the element name and the term ions; ions in beams by assigning either the specific name if available, e.g. ARGON 40 BEAMS

See also ARGON IONS

IOWA

Geologic Deposits

Geochemistry of sulfate evaporites in Iowa, 10:32388 (RA;US)

IPNS-I SYNCHROTRON

Intense Pulsed Neutron Source.

Beam Transport

Beam intensity increases at the intense pulsed neutron source accelerator, 10:31834 (R;US)

Magnetrons

Performance of the H^- ion source for the intense pulsed neutron source, 10:31941 (R;US)

Performance

Beam intensity increases at the intense pulsed neutron source accelerator, 10:31834 (R;US)

IRIDIUM

Fabrication

Forming of metal components for radioisotope heat sources, 10:30056 (R;US)

IRIDIUM 191

Diagnostic Uses

Single-photon ultrashort-lived radionuclides: symposium proceedings, 10:32257 (R;US)

Isotope Production

Development of the osmium-191 → iridium-191m radionuclide generator. Annual report, 10:31696 (R;US)

Radioisotope Generators

Current status of the Os-191 → Ir-191m generator, 10:32258 (R;US)

IRIDIUM 192

Isotope Production

Production of radio-isotopes, 10:31695 (RA;ZA)

IRIDIUM COMPLEXES

Chemical Reaction Kinetics

Separation of gas mixtures by supported complexes, 10:31671 (R;US)

IRIDIUM HYDRIDES

Catalytic Effects

Mechanistic studies of carbon monoxide reduction. Final technical report, 10:30065 (R;US)

IRON

Biological Effects

Distinguishing effects of anemia and muscle iron deficiency on exercise bioenergetics in the rat, 10:32359 (J;US)

Catalytic Effects

Catalytic activity of western coal fly ashes on the reduction of flue gas NO/sub x/, 10:29668 (R;US)
In situ combustion, 10:29768 (RA;US)
New catalysts for the indirect liquefaction of coal. First quarterly technical report, August 1-October 31, 1981, 10:30066 (R;US)

Grain Size

Methane-bubble formation in hydrogen-charged Fe-30 ppM C (Ferrovac E (30 ppM C)), 10:31434 (R;US)

Hydrogen Embrittlement

Methane-bubble formation in hydrogen-charged Fe-30 ppM C (Ferrovac E (30 ppM C)), 10:31434 (R;US)

Ion Implantation

Creation of tailored surfaces using selective oxidation of ion-implanted materials, 10:31506 (J;US)

Mass Spectroscopy

Systematics of multielement determination with resonance ionization mass spectrometry and thermal atomization, 10:31642 (J;US)

Mechanical Properties

Tritium-helium effects in metals, 10:32994 (R;US)

Nutritional Deficiency

Distinguishing effects of anemia and muscle iron deficiency on exercise bioenergetics in the rat, 10:32359 (J;US)

Oxidation

Creation of tailored surfaces using selective oxidation of ion-implanted materials, 10:31506 (J;US)

Proton Reactions

Validation of the intra-nuclear-cascade-evaporation model for particle production, 10:32791 (R;DE)

Recovery

[Mining and mineral-related research]. Final report, October 1, 1982-September 30, 1983, 10:29614 (R;US)

Tensile Properties

Tritium-helium effects in metals, 10:32994 (R;US)

X-Ray Fluorescence Analysis

X-ray fluorescence analysis of uranium concentrates, 10:31637 (TG;US)

IRON 54 TARGET

Neutron Reactions

Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)

Proton Reactions

Excitation of $\Delta L=0$ spin-flip transitions in the $N=28$ isotones by 201 MeV proton inelastic scattering, 10:32703 (R;FR)

IRON 55

Isotope Production

Report of the Researh Group. Development of new measuring techniques and maintenance of laboratory standards, 10:30050 (RA;ZA)

Radioecological Concentration

Annual report of the Surface Air Sampling Program, 10:32157 (R;US)

IRON 56 TARGET
Electron Reactions
Deep inelastic scattering of charged leptons and quark distributions in nuclei, 10:32563 (RA;DE)
Neutron Reactions
Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)
IRON ALLOYS
Oxidation
Oxidation of $Ni_{60}Fe_{40}(100)$ in the presence of sulfur, 10:31502 (J;US)
Phase Diagrams
Revision of the uranium-iron phase diagram, 10:31515 (J;NL)
Physical Radiation Effects
Effect of damage rates and different kinds of irradiation on the ductility of amorphous $Fe_{40}Ni_{40}B_{20}$, 10:31447 (R;DE)
Sorptive Properties
Oxidation of $Ni_{60}Fe_{40}(100)$ in the presence of sulfur, 10:31502 (J;US)
IRON BROMIDES
Electronic Structure
Electric field gradient and electronic structure of linear-bonded halide compounds, 10:31558 (R;BR)
IRON CHLORIDES
Electronic Structure
Electric field gradient and electronic structure of linear-bonded halide compounds, 10:31558 (R;BR)

4π-mode acceleration in the KEK 20 MeV linac, 10:31956 (RA;JP;In Japanese)
Beam Monitors
Observation of the beam structure in 20 MeV linac, 10:31968 (RA;JP)
Beam Transport
Focusing system of the PF 2.5 GeV linac and its operation, 10:31957 (RA;JP;In Japanese)
KEK PHOTON FACTORY
Beam Injection
Operation of PF injector throuch a minicomputer network, 10:31966 (RA;JP;In Japanese)
Beam Monitors
Beam monitors in the transport line of the photon factory storage ring, 10:31970 (RA;JP;In Japanese)
Beam Transport
Design of PF beam-transport-line, 10:31971 (RA;JP;In Japanese)
Linear Accelerators
Beam blow up in the PF 2.5 GeV linac, 10:31963 (RA;JP;In Japanese)
Energy gain of the PF 2.5 GeV linac, 10:31962 (RA;JP;In Japanese)
PF 2.5 GeV linac accelerator unit assembly and alignment, 10:31852 (RA;JP;In Japanese)
PF 2.5 GeV linac accelerator tube fabrication, 10:31961 (RA;JP;In Japanese)
Photon factory 2.5 GeV electron linac, 10:31851 (RA;JP;In Japanese)
Present status of the RF source of the Photon Factory injector linac, 10:31964 (RA;JP;In Japanese)
KENTUCKY
Oil Sand Deposits
Dravo solvent extraction process for tar sand: update, 10:29835 (RA;US)
Heavy oil from Kentucky tar sands via a wet combustion process, 10:29825 (RA;US)
KERNKRAFTWERK BIBLIS
See BIBLIS-A REACTOR
KERNKRAFTWERK GOESGEN-DAENIKEN
See GOESGEN REACTOR
KEROSENE
Data Compilation
Petroleum Supply Monthly, March 1985, 10:29777 (R;US)
KETONES
See also ACETONE
PROGESTERONE
TESTOSTERONE
Pyrolysis
Formation of benzene by the pyrolysis of 4-vinylcyclohexene regiospecific formation of anthracenes in the pyrolysis of dibenzobuerones and related systems, 10:31674 (R;US)
KICKER MAGNETS
Design
Ferrite kicker magnet for the LAMPF switchyard upgrade, 10:31981 (R;US)
Pulse Generators
Ferrite kicker magnet for the LAMPF switchyard upgrade, 10:31981 (R;US)
KILO AMP BEAM CURRENTS
Above 1000 amp.
Temperature Measurement
Measurement and interpretation of electron angle at MABE beam stop, 10:31908 (R;US)
KINASES (PHOSPHOTRANSFERASES)
See PHOSPHOTRANSFERASES
KINK INSTABILITY
Magnetohydrodynamics
Normal mode analysis for linear resistive magnetohydrodynamics, 10:32900 (R;DE)
KLYSTRONS
Planning
Development of a 150 MW S-band klystron, 10:31850 (RA;JP;In Japanese)
KNOCK-ON ELECTRONS
See ELECTRONS
KOBAYASHI-MASKAWA MATRIX
Matrix Elements
Calculation of the $D^+ \rightarrow$ anti ksup(0)esup(+)ωsub(e) transition formfactor and the Usub(cs) element of the Kobajashi-Maskawa matrix, 10:32602 (R;SU)
KOREA (SOUTH)
See REPUBLIC OF KOREA
KRSKO REACTOR
Krsko, Yugoslavia
Computerized Simulation
Modelling of small-break LOCA for NPP Krsko using RELAP5/MOD1 code, 10:30940 (RA;XA)
Loss of Coolant
Modelling of small-break LOCA for NPP Krsko using RELAP5/MOD1 code, 10:30940 (RA;XA)
Safety Engineering
Modelling of small-break LOCA for NPP Krsko using RELAP5/MOD1 code, 10:30940 (RA;XA)
KRYPTON
Adducts
Rydberg states of the $ArCO_2$ and $KrCO_2$ van der Waals molecules, 10:32515 (J;US)
Excited States
Report of the Van de Graaff Group: atomic physics. Radiative lifetimes in Kr III, 10:32498 (RA;ZA)
Report of the Van de Graaff Group: atomic physics. Beam-foil mean lifetime in Kr II obtained, 10:32499 (RA;ZA)
Ion Spectroscopy
Report of the Van de Graaff Group: atomic physics. Beam-foil mean lifetime in Kr II obtained, 10:32499 (RA;ZA)
Ion-Atom Collisions
Report of the Van de Graaff Group: atomic physics. Inner-shell excitation mechanisms in ion-atom collisions, 10:32500 (RA;ZA)
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
Vacancies
Report of the Van de Graaff Group: atomic physics. Inner-shell excitation mechanisms in ion-atom collisions, 10:32500 (RA;ZA)
KRYPTON 81
Diagnostic Uses
Single-photon ultrashort-lived radionuclides: symposium proceedings, 10:32257 (R;US)
KRYPTON 85
Distillation
Distillation as a means of separating krypton from the off-gas of a reprocessing plant for graphite-coated HTR fuel elements, 10:29937 (R;DE;In German)
Radioactive Waste Storage
Long-term storage of ^{85}Kr in amorphous zeolite 5A, 10:29928 (R;XE)
KRYPTON 86 REACTIONS
Deep Inelastic Heavy Ion Reactions
Channel dependent sharing of the excitation energy in quasielastic reactions between $^{208}Pb + {}^{86}Kr$, 10:32741 (R;DE)
Inclusive Interactions
Channel dependent sharing of the excitation energy in quasielastic reactions between $^{208}Pb + {}^{86}Kr$, 10:32741 (R;DE)

KRYPTON COMPOUNDS
Photoionization
Rydberg states of the $ArCO_2$ and $KrCO_2$ van der Waals molecules, 10:32515 (J;US)
Rydberg States
Rydberg states of the $ArCO_2$ and $KrCO_2$ van der Waals molecules, 10:32515 (J;US)
KRYPTON FLUORIDE LASERS
Research Programs
Annual report to the Laser Facility Committee 1984, 10:33029 (R;GB)
KRYPTONATES
See KRYPTON COMPOUNDS

L

LA REINA REACTOR
See RESEARCH REACTORS
LABELLED COMPOUNDS
Compounds labelled with either stable or radioactive isotopes.
See also RADIOPHARMACEUTICALS
TRITIUM COMPOUNDS
Chemical Preparation
Preparation of high specific activity 2,4-dichloro phenoxy acetic acid (5-^{3}H), 10:31701 (RA;IL)
Synthesis of tritium labelled triglycerides, 10:31702 (RA;IL)
Synthesis of (-)-^{125}I-iodopindolol, 10:31704 (RA;IL)
LABORATORY ANIMALS
Research Programs
Institute of Laboratory Animal Resources 1983 annual report, 10:32209 (R;US)
Institute of Laboratory Animal Resources 1982 annual report, 10:32210 (R;US)
LAKES
Effective use of cooling lakes and cooling towers in hybrid cooling systems. Completion report, July 1983-August 1984, 10:30655 (R;US)
Energy Budgets
Progress report: Health Sciences Division, 1983 January 1-June 30, 10:32012 (R;CA)
Evaporation
LEEM - a lake energy and evaporation model user's manual, 10:32181 (R;CA)
Freezing
Lake ice occurrence as a possible detector of atmospheric CO_2 effects on climate. Second annual progress report, 1 December 1983-31 May 1985, 10:32131 (R;US)
Heat Storage
Lake water heating systems. Seminar of the Council for Building Research, May 1982, 10:31258 (R;SE;In Swedish)
Melting
Lake ice occurrence as a possible detector of atmospheric CO_2 effects on climate. Second annual progress report, 1 December 1983-31 May 1985, 10:32131 (R;US)
Radioactive Waste Disposal
Qualitative evaluation of long-term processes governing the behaviour of uranium mill tailings placed in deep lakes, 10:29933 (R;CA)
Qualitative evaluation of long-term processes governing the behaviour of uranium mill tailings placed in deep lakes. Annexes (Study conducted for the Atomic Energy Control Board), 10:29934 (R;CA)
Temperature Distribution
Lake Vaettern as a heat source for heat pump. A regional investigation, 10:31257 (R;SE;In Swedish)
LAMBDA NEUTRAL
See LAMBDA PARTICLES
LAMBDA PARTICLES
Particle Production
Neutral strange particle production in K^+p interactions at 32 GeV/c, 10:32561 (R;SU;In Russian)
LAMPF II SYNCHROTRON
RF Systems
Rf program for LAMPF II, 10:31898 (R;US)
LAMPF LINAC
Beam Bunching
Proposed bunching scheme for a polarized H^- injector, 10:31983 (R;US)
Beam Extraction
Beam line windows at LAMPF, 10:31986 (R;US)
Beam Transport
Measurement and resulting first and second order approximations for a 9 degree bending magnet in LAMPF's 750-keV transport, 10:31899 (R;US)
Computerized Control Systems
Optimizing data access in the LAMPF control system, 10:31982 (R;US)
Kicker Magnets
Ferrite kicker magnet for the LAMPF switchyard upgrade, 10:31981 (R;US)
Modifications
Major facility overhauls at LAMPF, 10:31985 (R;US)
Polarized Beams
Proposed bunching scheme for a polarized H^- injector, 10:31983 (R;US)
Remote Handling Equipment
Recent advances in remote handling at LAMPF, 10:31984 (R;US)
Storage Rings
Los Alamos Proton Storage Ring fast-extraction kicker system, 10:31980 (R;US)
Los Alamos high-current proton storage ring: a status report, 10:32006 (R;US)
LAND FILLS
See SANITARY LANDFILLS
LAND LEASING
Economic Impact
Economic impacts of proposed changes to the Federal Tar Sand Leasing program, 10:29855 (RA;US)
LAND RECLAMATION
Comparative Evaluations
Effects of reclamation methods on groundwater quality and resaturation rates, 10:29702 (RA;US)
LAND TRANSPORT
Packaging
Stowing of radioactive materials package during land transport. Third phase, 10:29898 (R;XE;In French and English)
LANDFILLS
See SANITARY LANDFILLS
LANDFORMS
See GEOMORPHOLOGY
LANGMUIR OSCILLATIONS
See PLASMA WAVES
LANTHANUM
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
LANTHANUM CHROMITES
See CHROMIUM OXIDES
LANTHANUM OXIDES
LANTHANUM COMPOUNDS
See also LANTHANUM OXIDES
LANTHANUM SULFIDES
Structural Chemical Analysis
Chemistry of transuranium elements and compounds, 10:31712 (RA;US)
LANTHANUM OXIDES
Structural Chemical Analysis
Electron optical and microanalytical studies of precipitation in ceramic systems. Progress report, July 1, 1983-June 30, 1984, 10:31527 (R;US)
LANTHANUM SULFIDES
Catalytic Effects
Mechanistic study of the hydrodesulfurization of methanethiol over tungsten disulfide; a survey of rare earth sulfides for hydrodesulfurization activity, 10:31673 (R;US)
LASER CAVITIES
Gain
Cavity supermodes for gain-saturated diode laser arrays, 10:31768 (J;US)

Oscillation Modes
Cavity supermodes for gain-saturated diode laser arrays, 10:31768 (J;US)

LASER FUSION REACTORS
Carbon Dioxide Lasers
Lasers for controlled thermonuclear fusion, 10:33016 (RA;SU;In Russian)
Design
Inertial confinement fusion: Present status and future potential, 10:33066 (J;US)
Reactor Technology
Inertial confinement fusion: Present status and future potential, 10:33066 (J;US)

LASER MATERIALS
Bibliographies
Bibliography of Soviet laser developments, Number 67, September-October 1983, 10:31756 (R;US)
Evaluation
Spectroscopic investigation of materials for frequency-agile laser systems. Final report, 15 January 1982-14 January 1985, 10:31758 (R;US)

LASER MIRRORS
Damage
Pulsed D_2-F_2 chain-laser damage to coated window and mirror components, 10:31763 (R;US)

LASER RADIATION
Beam-Plasma Systems
Increased hot-electron production at quarter-critical density in long-scalelength, laser-plasma interactions. Memorandum report, September-October 1984, 10:32980 (R;US)
Energy Absorption
Plasma initiation/flow chamber to study cw-laser-beamed energy absorption in light gases. Annual report, 1 February 1983-30 January 1984, 10:32535 (R;US)

LASER SPECTROSCOPY
See also RAMAN SPECTROSCOPY
Spectroscopic investigation of materials for frequency-agile laser systems. Final report, 15 January 1982-14 January 1985, 10:31758 (R;US)

LASER TARGETS
Fabrication
Noncontact thermal gradient method for fabrication of uniform cryogenic inertial fusion target, 10:33056 (J;US)
Heat Transfer
Thermal transport measurements of uv laser irradiated spherical targets, 10:32990 (R;US)
Surface Coating
Noncontact thermal gradient method for fabrication of uniform cryogenic inertial fusion target, 10:33056 (J;US)

LASER-PRODUCED PLASMA
Boundary Layers
Experimental evidence of charge separation (double layer) in laser produced plasmas, 10:32895 (RA;IL)
Brillouin Effect
Microwave modeling of laser plasma interactions. Final report, 10:33042 (R;US)
Electric Potential
Experimental evidence of charge separation (double layer) in laser produced plasmas, 10:32895 (RA;IL)
Electron Density
Four-frame holographic probing system for plasma density measurement (invited), 10:32942 (J;US)
Heat Transfer
Non-local contribution to thermal transport, 10:32892 (RA;IL)
Plasma Diagnostics
Approaches to ultrafast neutron detectors, 10:32972 (J;US)
Four-frame holographic probing system for plasma density measurement (invited), 10:32942 (J;US)
Ultrafast turnoff laser triggered gating system for microchannel-plate intensified x-ray spectrometers, 10:32934 (J;US)
Shock Waves
Analytical model for creation and decay of strong shock waves caused by a trapezoidal laser pulse, 10:32894 (RA;IL)
Simulation
Microwave modeling of laser plasma interactions. Final report, 10:33042 (R;US)

LASERS
Light Amplification by Stimulated Emission of Radiation.
See also CHEMICAL LASERS
FREE ELECTRON LASERS
GAS LASERS
SEMICONDUCTOR LASERS
SOLID STATE LASERS
X-RAY LASERS
Bibliographies
Bibliography of Soviet laser developments, Number 67, September-October 1983, 10:31756 (R;US)
Excitation
Population inversion in laser-initiated vacuum arcs. Annual report, 1 February 1984-31 January 1985, 10:32476 (R;US)
Occupational Safety
Personnel protection equipment for use with laser chemicals, 10:32376 (R;US)
Optical Pumping
Population inversion in laser-initiated vacuum arcs. Annual report, 1 February 1984-31 January 1985, 10:32476 (R;US)
Optical Systems
Electro-optic harmonic conversion to switch a laser beam out of a cavity, 10:33063 (P;US)
Pulsed D_2-F_2 chain-laser damage to coated window and mirror components, 10:31763 (R;US)
Transparent electrode for optical switch, 10:33062 (P;US)

LASL
Particle Beam Fusion Accelerator
Revision of and documentation for the standard version of the Poisson-Group codes, 10:31863 (R;US)

LATENT HEAT STORAGE
Heat Transfer
Theoretical and numerical study of a heat storage model using fusion heat, 10:30563 (R;FR;In French)
Phase Change Materials
Study of phase transitions of macroscopic and dispersed salt hydrates. Application to low temperature heat storage, 10:31049 (R;FR;In French)

LATIN AMERICA

LATTICE FIELD THEORY
Bag Model
Analysis of the Z(N) strong coupling model fo the SU(N) deconfinement transition, 10:32643 (RA;DE)
Computerized Simulation
Microcanonical simulation of QCD with quarks, 10:32642 (RA;DE)
Ground States
Exact ground-state properties of the SU(2) Hamiltonian lattice gauge theory, 10:32654 (J;US)
Intermediate Coupling
Crossover from strong to weak coupling in lattice gauge theory with dynamical fermions, 10:32657 (J;US)
Phase Transformations
Thermodynamics of SU(2) gauge theory with dynamical, light fermions, 10:32658 (J;US)
Series Expansion
Breakdown of the 1/N expansion in the continuum limit of strong coupling lattice QCD, 10:32650 (R;BR)
SO-3 Groups
Crossover from strong to weak coupling in lattice gauge theory with dynamical fermions, 10:32657 (J;US)
SU-2 Groups
Exact ground-state properties of the SU(2) Hamiltonian lattice gauge theory, 10:32654 (J;US)
Thermodynamics of SU(2) gauge theory with dynamical, light fermions, 10:32658 (J;US)

Symmetry

Breakdown of the 1/N expansion in the continuum limit of strong coupling lattice QCD, 10:32650 (R;BR)

Virtual Particles

Virtual quark loops and the phase transitions in lattice quantum chromodynamics at finite temperature, 10:32645 (RA;DE)

LATTICES (CRYSTAL)

LAWRENCE LIVERMORE LABORATORY

Research Programs

Nuclear Chemistry Division annual report FY83, 10:31713 (R;US)

LAYERS

See also BOUNDARY LAYERS
OZONE LAYER

Mixing

Calculation of mixed depth for some metal-Si systems, 10:31427 (R;US)

LEACHING

Field Tests

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 1. Final report. Report for June 1980-June 1984, 10:29676 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 2. Appendices A through C. Final report, June 1980-June 1984, 10:29677 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 3. Appendices D and E. Final report, June 1980-June 1984, 10:29678 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 4. Appendix F. Final report, June 1980-June 1984, 10:29679 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 5. Appendix G. Final report, June 1980-June 1984, 10:29680 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 6. Appendix H. Final report, June 1980-June 1984, 10:29681 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 7. Appendix I. Final report, June 1980-June 1984, 10:29682 (R;US)

Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 8. Appendix J. Final report, June 1980-June 1984, 10:29683 (R;US)

LEAD

Anaerobic Digestion

Anaerobic microbial transformations in subsurface environments: project description, 10:32186 (R;US)

Autoionization

Exit channels of autoionization resonances in atoms, 10:32480 (R;US)

Emission Spectroscopy

Spectrochemical determination of impurities in aluminium alloys by DC arc technique, 10:31634 (R;IL;In Hebrew)

Health Hazards

Estimating risks of lead-induced hemoglobin decrements under conditions of uncertainty: methodology, pilot judgments, and illustrative calculations, 10:32346 (R;US)

Lung Clearance

Lung clearance, translocation, and acute toxicity of arsenic, beryllium, cadmium, cobalt, lead, selenium, vanadium, and ytterbium oxides following deposition in rat lung, 10:32356 (J;US)

PIXE Analysis

Report of the Van de Graaff Group: nuclear analysis. Environmental lead analysis, 10:31632 (RA;ZA)

Proton Reactions

Polarization transfer in inelastic scattering and pionic models of the EMC effect, 10:32673 (R;US)

Validation of the intra-nuclear-cascade-evaporation model for particle production, 10:32791 (R;DE)

Toxicity

Lung clearance, translocation, and acute toxicity of arsenic, beryllium, cadmium, cobalt, lead, selenium, vanadium, and ytterbium oxides following deposition in rat lung, 10:32356 (J;US)

Voltametry

Studies of the analyte-carrier interface in multicomponent flow injection analysis, June 1, 1984-March 15, 1985, 10:31594 (R;US)

LEAD 194

Energy Levels

Coexistence of spherical and deformed states in neutron deficient Pb isotopes, 10:32727 (RA;NL)

Isomeric Nuclei

Coexistence of spherical and deformed states in neutron deficient Pb isotopes, 10:32727 (RA;NL)

LEAD 196

Energy Levels

Coexistence of spherical and deformed states in neutron deficient Pb isotopes, 10:32727 (RA;NL)

Isomeric Nuclei

Coexistence of spherical and deformed states in neutron deficient Pb isotopes, 10:32727 (RA;NL)

LEAD 208

Giant Resonance

Neutron decay of the giant monopole resonance (GMR) in ^{208}Pb, 10:32744 (RA;NL)

Isotonic Nuclei

RITSSCHIL. A novel shell-model approach applied to light and heavy nuclei, 10:32779 (R;NL)

Neutron Emission

Neutron decay of the giant monopole resonance (GMR) in ^{208}Pb, 10:32744 (RA;NL)

Nuclear Structure

RITSSCHIL. A novel shell-model approach applied to light and heavy nuclei, 10:32779 (R;NL)

Pionic Atoms

Strong interaction effects in pionic ^{208}Pb, 10:32746 (RA;NL)

LEAD 208 TARGET

Alpha Reactions

Neutron decay of the giant monopole resonance (GMR) in ^{208}Pb, 10:32744 (RA;NL)

Study of the reaction α+Pb at 600 MeV, 10:32748 (R;FR;In French)

Argon 40 Reactions

Aspects of hydrodynamical flow in view of recent high and intermediate energy heavy ion data, 10:32719 (RA;DE)

First results from GANIL, 10:32680 (R;FR)

Momentum flow in the 800 MeV/n Ar+Pb reaction, 10:32743 (RA;DE)

Giant Resonance

Probing the microstructure of the GDR in Pb-208, 10:32832 (RA;IL)

Krypton 86 Reactions

Channel dependent sharing of the excitation energy in quasielastic reactions between ^{208}Pb + ^{86}Kr, 10:32741 (R;DE)

Neutron Reactions

Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)

Proton Reactions

Analyzing power for the inelastic continuum with 200 MeV protons, 10:32714 (J;NL)

LEAD 210

Radioecological Concentration

Annual report of the Surface Air Sampling Program, 10:32157 (R;US)

LEAD-ACID BATTERIES

Cost Benefit Analysis

Updated cost estimate and benefit analysis of customer-owned battery energy storage, 10:31103 (R;US)

Cost Estimation

Updated cost estimate and benefit analysis of customer-owned battery energy storage, 10:31103 (R;US)

Performance Testing

Energy storage and the best facility progress report, 10:31067 (RA;US)

Performance and evaluation results, 10:31066 (RA;US)

Testing of sealed lead-acid batteries. Revision, 10:31106 (R;US)

LEAK DETECTORS
Calibration
Management of vacuum leak-detection processes, calibration, and standards, 10:31799 (J;US)
Standards

DEUTERIUM
NITROGEN 15
NITROGEN 16
OXYGEN 16
TRITIUM
Emission Spectra
Study of the light particle emission in the transition region of mechanisms on SARA, 10:32700 (R;FR;In French)
Shell Models
RITSSCHIL. A novel shell-model approach applied to light and heavy nuclei, 10:32779 (R;NL)
LIGHT SCATTERING
Raman Effect
Single-pulse Raman scattering studies of heterogeneous explosive materials, 10:32072 (J;US)
Wave Forms
Slit-scan flow cytometer for recording simultaneous waveforms, 10:32076 (J;US)
LIGHT SOURCES
Radioluminescence
Light your runways and taxiways without electricity, 10:30055 (R;US)
Safety
Light your runways and taxiways without electricity, 10:30055 (R;US)

LIGHT WATER COOLED REACTORS
See WATER COOLED REACTORS
LIGHTING SYSTEMS
  Computerized Simulation
    CEL-1: conservation of electric lighting. Software, 10:31282 (R;US)
  Control Systems
    Daylighting, dimming & design, 10:31322 (BA;US)
  Design
    The neglected half of commercial daylighting design reporting: Selecting the controls, fixtures, bulbs, and ballasts, 10:31304 (BA;US)
  Energy Efficiency
    CEL-1: conservation of electric lighting. Software, 10:31282 (R;US)
LIGHTNING
  Simulation
    Application of pulsed power in the simulation of severe natural lightning, 10:31809 (R;US)
LIGHTNING ARRESTERS
  Design
    Characteristics of artificially contaminated metal oxide surge arresters by equivalent fog method and fog method, 10:31820 (TG;US)
  Testing
    Characteristics of artificially contaminated metal oxide surge arresters by equivalent fog method and fog method, 10:31820 (TG;US)
LIGNITE
  Combustion
    Production of mineral wool from lignite coal slag, 10:29647 (R;US)
  Flash Hydropyrolysis Process
    Flash hydropyrolysis and methanolysis of coal with hydrogen and methane, 10:29617 (R;US)
LIMERICK-1 REACTOR
Limerick, Pennsylvania, USA
  Reactor Licensing
    Safety Evaluation Report related to the operation of Limerick Generating Station, Units 1 and 2 (Docket Nos. 50-352 and 50-353). Supplement No. 4, 10:30966 (R;US)
  Reactor Safety
    Safety Evaluation Report related to the operation of Limerick Generating Station, Units 1 and 2 (Docket Nos. 50-352 and 50-353). Supplement No. 4, 10:30966 (R;US)
  Risk Assessment
    Review of selected topics from PRA studies: system dependencies, human interactions, and containment event trees, 10:30864 (R;US)
LIMERICK-2 REACTOR
Limerick, Pennsylvania, USA
  Reactor Licensing
    Safety Evaluation Report related to the operation of Limerick Generating Station, Units 1 and 2 (Docket Nos. 50-352 and 50-353). Supplement No. 4, 10:30966 (R;US)
  Reactor Safety
    Safety Evaluation Report related to the operation of Limerick Generating Station, Units 1 and 2 (Docket Nos. 50-352 and 50-353). Supplement No. 4, 10:30966 (R;US)
  Risk Assessment
    Review of selected topics from PRA studies: system dependencies, human interactions, and containment event trees, 10:30864 (R;US)
LIMITERS
  Design
    Limiter, 10:33064 (P;US)
  Evaporation
    Experimental measurements of melting and vaporization due to simulated plasma disruptions, 10:33059 (J;US)
  Lifetime
    Experimental measurements of melting and vaporization due to simulated plasma disruptions, 10:33059 (J;US)
  Melting
    Experimental measurements of melting and vaporization due to simulated plasma disruptions, 10:33059 (J;US)
LINACS
See LINEAR ACCELERATORS
LINEAR ACCELERATORS
See also FMIT LINAC
KEK LINAC
LAMPF LINAC
QUADRUPOLE LINACS
STANFORD LINEAR COLLIDER
    Collective effects in the free electron laser (FEL), 10:31759 (R;US)
  Beam Bunching
    Beam bunch probes of RIKEN heavy ion LINAC, 10:31952 (RA;JP;In Japanese)
    Beam bunching in the PF linac injector, 10:31959 (RA;JP;In Japanese)
    Proposed high-current injector for the Osaka University single bunch electron linear accelerator, 10:31972 (RA;JP;In Japanese)
    Wake field generated by a high-current single bunch, 10:31960 (RA;JP;In Japanese)
  Beam Injection
    RFQ-funneling, 10:31934 (TG;US)
  Beam Monitors
    Beam profile monitor using Cerenkov light, 10:31953 (RA;JP;In Japanese)
    Secondary electron profile monitor, 10:31951 (RA;JP;In Japanese)
  Beam Position
    Real time beam position monitor, 10:31969 (RA;JP;In Japanese)
  Beam Profiles
    Beam blow up in the PF 2.5 GeV linac, 10:31963 (RA;JP;In Japanese)
    Energy gain of the PF 2.5 GeV linac, 10:31962 (RA;JP;In Japanese)
    Studies on electron injector of linac for picosecond single pulse, (1), 10:31958 (RA;JP;In Japanese)
  Beam Transport
    Kinetic loss experiments on Mite, 10:31869 (R;US)
  Construction
    PF 2.5 GeV linac accelerator unit assembly and alignment, 10:31852 (RA;JP;In Japanese)
  Drift Tubes
    PF 2.5 GeV linac accelerator tube fabrication, 10:31961 (RA;JP;In Japanese)
  Electron Beams
    Present status of the 500-MeV electron linac and the 600-MeV storage ring at Electrotechnical Laboratory (ETL), 10:31841 (RA;JP;In Japanese)
    Present status of the 35 MeV linac at N.E.R.L. Univ. of Tokyo, 10:31842 (RA;JP;In Japanese)
    RADLAC technology review, 10:31871 (R;US)
  Fuel Management
    Accelerators and alternative nuclear fuel management options, 10:31837 (R;CA)
  Ion Sources
    ECR heavy ion source for linac, (1), 10:31950 (RA;JP;In Japanese)
  Kilo Amp Beam Currents
    Four stage HELIA experiment, 10:31868 (R;US)
    High brightness cathode experiments on the experimental test accelerator (ETA). Final report, 10:31912 (R;US)
    Technology of magnetically driven accelerators, 10:31913 (R;US)
  Magnetic Fields
    Technology of magnetically driven accelerators, 10:31913 (R;US)
  Magnetic Insulation
    Kinetic loss experiments on Mite, 10:31869 (R;US)
  Maintenance
    Present status of the JAERI linac, 10:31843 (RA;JP;In Japanese)
    Present status of the 38 MeV Osaka University Electron Linac, 10:31846 (RA;JP;In Japanese)
    Status report on the variable frequency heavy-ion linac, RILAC, 10:31844 (RA;JP;In Japanese)
  Meetings
    Proceedings of the 7th meeting on linear accelerators, 10:31856 (R;JP;In Japanese)

Mode Selection
Beam-cavity interaction measurements in a DAW structure, 10:31862 (R;US)
Penning Ion Sources
Production of various ions with PIC type ion source at RIKEN Heavy Ion Linac, 10:31949 (RA;JP;In Japanese)
Performance
Four stage HELIA experiment, 10:31868 (R;US)
Photon factory 2.5 GeV electron linac, 10:31851 (RA;JP;In Japanese)
Present status of INS injector linac, 10:31847 (RA;JP;In Japanese)
Planning
80 MeV injector linac for BSF future project, 10:31854 (RA;JP;In Japanese)
Positrons
Positron generator linac, 10:31973 (RA;JP;In Japanese)
Reliability
Present status of the 45 MeV electron linac of Hokkaido University, 10:31849 (RA;JP;In Japanese)
RF Systems
Present status of the RF source of the Photon Factory injector linac, 10:31964 (RA;JP;In Japanese)
Spark Gaps
Compact, low jitter, triggered spark gap, 10:31867 (R;US)
Specifications
Positron generator linac, 10:31973 (RA;JP;In Japanese)
Uses
Progress in medical and industrial electron linear accelerator technology, 10:31853 (RA;JP)
LINEAR PROGRAMMING
Algorithms
Practical approach to Karmarkar's algorithm, 10:33104 (R;US)
LINERS
Backfilling
Compressive tests on Bullflex bags with different filler materials, 10:29699 (R;BE;In French)
Materials
Test report for linings for couplings and brakes for use in mining machines for surface and underground workings in which there is assumed to be a fire or explosion hazard due to the possible occurrence of methane/or coal dust/air mixtures, 10:29712 (TG;GB)
Refractories
Heat conduction through layered refractory linings, 10:31784 (J;US)
LINOLEIC ACID
Hydrogenation
Investigation of tritium removal by means of organic compounds. Catalytic hydrogenation (tritiation) of linoleic acid, 10:33007 (R;DE)
LIOUVILLE THEOREM
Equations of Motion
Geometric proof of Liouville's theorem, 10:32870 (R;AT)
LIPOPROTEINS
Chemical Properties
Characterization of sheep lung lymph lipoproteins: chemical and physical properties, 10:32222 (J;US)
Physical Properties
Characterization of sheep lung lymph lipoproteins: chemical and physical properties, 10:32222 (J;US)
LIQUEFIED GASES
See also LIQUEFIED NATURAL GAS
LIQUEFIED PETROLEUM GASES
Mixing Heat
Heat-of-mixing experiments for liquefied gases. Annual report, November 1983-October 1984, 10:29806 (R;US)
LIQUEFIED NATURAL GAS
Accidents
Flame-acceleration mechanisms under conditions of partial confinement. Final report, February 1983-August 1984, 10:29807 (R;US)
Storage Facilities
Risks in the transport and storage of liquefied natural gas. Subproject 5-2: investigation into building damage, 10:29809 (R;GB)
Transport
Risks in the transport and storage of liquefied natural gas. Subproject 5-2: investigation into building damage, 10:29809 (R;GB)
LIQUEFIED PETROLEUM GASES
Data Compilation
Petroleum Supply Monthly, March 1985, 10:29777 (R;US)
LIQUID CRYSTALS
Crystal-Phase Transformations
Comment on "Dislocation-loop theory of the nematic—smectic A—smectic C multicritical point", 10:32844 (J;US)
Dislocations
Comment on "Dislocation-loop theory of the nematic—smectic A—smectic C multicritical point", 10:32844 (J;US)
LIQUID EFFLUENTS
See LIQUID WASTES
LIQUID FUELS
See also FUEL OILS
GASOLINE
KEROSENE
Multiphase Flow
KIVA computer program for multidimensional chemically reactive fluid flows with fuel sprays, 10:29804 (R;US)
LIQUID METAL TEST FACILITIES
See TEST FACILITIES
LIQUID METAL-WATER REACTIONS
See MOLTEN METAL-WATER REACTIONS
LIQUID SCINTILLATION DETECTORS
Efficiency
Fusion gamma diagnostics, 10:32958 (J;US)
Energy Resolution
Fusion gamma diagnostics, 10:32958 (J;US)
LIQUID WASTES
See also WASTE WATER
Isotope Applications
Flow rate measurements in the sewage pipeline of the major area of Athens, 10:30052 (R;GR;In Greek)
LITHIUM
Experimental lithium system. Final report, 10:32996 (R;US)
Auger Electron Spectroscopy
Ultrahigh vacuum reaction chamber/transfer mechanism attached to an Auger electron spectrometer for the study of the reactions of clean lithium surfaces, 10:31496 (J;US)
Chemical Reactions
Ultrahigh vacuum reaction chamber/transfer mechanism attached to an Auger electron spectrometer for the study of the reactions of clean lithium surfaces, 10:31496 (J;US)
Compatibility
Experiments for liquid metal embrittlement of fusion reactor materials by liquid lithium, 10:31466 (R;DE;In German)
Deposition
Surface layers for rechargeable lithium cells, 10:31073 (RA;US)
Surface Cleaning
Ultrahigh vacuum reaction chamber/transfer mechanism attached to an Auger electron spectrometer for the study of the reactions of clean lithium surfaces, 10:31496 (J;US)
LITHIUM 6 TARGET
Alpha Reactions
E2 strength of the lowest resonance in ^{6}Li(α,γ): Collective effects in the 1p shell, 10:32693 (J;US)
Lithium 7 Reactions
Description of (^{7}Li, ^{7}Be) charge-exchange reactions within the framework of microscopic DWBA, 10:32671 (R;SU;In Russian)
Neutron Reactions
R-matrix analysis of the ^{7}Li system with peripheral channel overlap exchange effects, 10:32690 (R;US)
LITHIUM 7 REACTIONS
Charge-Exchange Reactions
Description of (^{7}Li, ^{7}Be) charge-exchange reactions within the framework of microscopic DWBA, 10:32671 (R;SU;In Russian)
LITHIUM COMPOUNDS
See also LITHIUM HYDRIDES
LITHIUM OXIDES

Crystal Structure
Neutron diffraction study of lithium hydrogen phthalate monohydrate: A material with two very short intramolecular OxxxHxxxO hydrogen bonds, 10:31677 (J;US)
Electric Conductivity
Polymer electrolytes: an investigation of some poly (N-propylaziridine)/lithium salt compositions, 10:31104 (R;GB)

LITHIUM HYDRIDES
Chemical Reactions
Transition metal catalysis of hydrogen shuttling in coal liquefaction. Quarterly technical progress report, December 1, 1984-February 28, 1985, 10:29637 (R;US)

LITHIUM OXIDES
Tritium Recovery
In-pile test of tritium release from lithium oxide. An evaluation study on neutronics and thermohydraurics of sweep gas capsule packed with Li$_2$ O pellets, 10:33013 (R;JP;In Japanese)

LITHIUM-SULFUR BATTERIES
Electrodes
Lithium-alloy/metal sulfide battery research, 10:31084 (RA;US)
Research Programs
Lithium-alloy/metal sulfide battery research, 10:31084 (RA;US)

LIVER
Biological Functions
Characterization of the detoxifying function of the liver as evidenced by [^{13}C, ^{15}N]methacetin, 10:32292 (RA;DD;In German)
PIXE Analysis
Report of the Van de Graaff Group: nuclear analysis. The effect of nicotine on the trace element composition of rat liver, 10:31628 (RA;ZA)
Radionuclide Kinetics
Possibilities and problems in mathematical interpretation of data in tracer kinetics, 10:32244 (RA;DD;In German)

LIXIVIATION
See LEACHING

LIZARDS
Diet
Dietary pathways through lizards of the Alligator Rivers Region, 10:30014 (R;AU)

LMFBR TYPE REACTORS
See also CLINCH RIVER BREEDER REACTOR
EBR-2 REACTOR
After-Heat Removal
Acceptability of local boiling during shutdown heat removal, 10:30848 (R;US)
Comparative Evaluations
Economic analysis of fusion breeders, 10:32985 (R;US)
Control Rod Worths
Studies of LMFBR: method of analysis and some results, 10:30737 (R;BR;In Portuguese)
Doppler Coefficient
Studies of LMFBR: method of analysis and some results, 10:30737 (R;BR;In Portuguese)
Fission Products
Distribution of fission products in an LMFBR: summary, 10:30857 (R;US)
Fuel Assemblies
Forced-convection boiling tests performed in parallel simulated LMR fuel assemblies, 10:30733 (R;US)
Fuel Cycle
Proposed fuel cycle for the Integral Fast Reactor, 10:30736 (R;US)
Fuel Element Failure
Distribution of fission products in an LMFBR: summary, 10:30857 (R;US)
Fuel-Cladding Interactions
Fuel-cladding chemical interaction in mixed oxide liquid metal fast breeder reactors: a review, 10:30745 (R;IN)
Heat Pipes
Fast reactor power plant design having heat pipe heat exchanger, 10:30750 (P;US)
Loss of Flow
Investigation of fuel and clad relocation during LMFBR initiation phase accidents: the STAR experiment program, 10:31034 (R;US)
Pipes
Characterization of modified 9 Cr-1 Mo steel extruded pipe, 10:30744 (R;US)
Power Distribution
Studies of LMFBR: method of analysis and some results, 10:30737 (R;BR;In Portuguese)
Reactor Accidents
Accommodation of unprotected accidents by inherent safety design features in metallic and oxide-fueled LMFBRs, 10:30849 (R;US)
Scoping studies of vapor behavior during a severe accident in a metal-fueled reactor, 10:30850 (R;US)
Reactor Components
Activity report of Reactor Engineering Laboratory, 1981, 10:30746 (R;IN)
Reactor Core Disruption
Comparison of sodium aerosol codes, 10:30927 (R;XE)
Incorporation of phenomenological uncertainties in safety analysis - application to LMFBR core disruptive accident energetics, 10:30878 (RA;US)
Intercomparison test of various aerosol measurement techniques, 10:30928 (R;XE)
Quantitative analysis of the effect of complex internals on LMFBR containment during energetic accidents, 10:30852 (R;US)
Role of fuel bubble phenomenology in assessment of LMFBR source term, 10:30851 (R;US)
Reactor Cores
Analysis of ZPR-9 Assembly 31, the Advanced Fuels Program Carbide: Benchmark Critical Assembly, 10:30747 (R;IN)
Evaluation of a hanging core support concept for LMR application, 10:30734 (R;US)
Reactor Kinetics
Analysis of ZPR-9 Assembly 31, the Advanced Fuels Program Carbide: Benchmark Critical Assembly, 10:30747 (R;IN)
ORIGEN-S data libraries, 10:30686 (RA;US)
Reactor Materials
Characterization of modified 9 Cr-1 Mo steel extruded pipe, 10:30744 (R;US)
Heat to heat variations in the creep rupture strength of a modified AISI 316 grade stainless steel, 10:30748 (R;IN)
Properties of concrete at elevated temperatures, 10:30742 (R;US)
Thermo-mechanical analysis of concrete in LMFBR programs, 10:30749 (J;NL)
Reactor Safety
Computer code EURDYN-1MP (release 1) for plane fluid-structure systems: user's manual, 10:30925 (R;XE)
Research Programs
Activity report of Reactor Engineering Laboratory, 1981, 10:30746 (R;IN)
Risk Assessment
Incorporation of phenomenological uncertainties in safety analysis - application to LMFBR core disruptive accident energetics, 10:30878 (RA;US)
Specifications
Some basic considerations about the Brazilian nuclear program, 10:30738 (R;BR;In Portuguese)
Spent Fuel Elements
Proposed fuel cycle for the Integral Fast Reactor, 10:30736 (R;US)
Steam Generators
Steam generator model for real-time analysis, 10:30735 (R;US)
Supports
Evaluation of a hanging core support concept for LMR application, 10:30734 (R;US)

LNG

LOSS OF COOLANT
Overview of TRAC-BD1 (Version 12) assessment studies, 10:31025 (R;US)
After-Heat Removal
Temperature estimations in air cooled fuel elements on an open pool research reactor core after loss of coolant, 10:30859 (R;GR)
Computer Calculations
TRAC-PF1 LOCA calculations using fine-node and coarse-node input models, 10:31016 (R;US)
Computer Codes
Aspects of small-break LOCA analysis using few volumes (RELAP5 computer code), 10:30938 (RA;XA)
Comparisons of analysis on Rosa-III Run 912 test. A BWR small break LOCA simulation, 10:30932 (RA;XA)
Computer code application, verification and development for small-break LOCA analysis, 10:30933 (RA;XA)
Computer codes development and application in NPPRI to analyse small and medium LOCA, 10:30937 (RA;XA)
Demands on small-break LOCA codes from the licensing point of view, 10:30931 (RA;XA)
Pre-test analysis of PMK experiments (RELAP4/MOD3 and MOD6 computer codes), 10:30939 (RA;XA)
RELAP5 user experiences, 10:30936 (RA;XA)
Computerized Simulation
Analysis of small-small-break LOCA sequences in the Oconee-1 power plant, 10:30982 (RA;US)
Aspects of small-break LOCA analysis using few volumes (RELAP5 computer code), 10:30938 (RA;XA)
CANDU LOCA experiments comparisons with the FIREBIRD-III and RELAP5 codes, 10:30946 (RA;XA)
Computer codes development and application in NPPRI to analyse small and medium LOCA, 10:30937 (RA;XA)
Fast simulation of small-break LOCA (SBLOCA) transients, 10:30941 (RA;XA)
Pre-test analysis of PMK experiments (RELAP4/MOD3 and MOD6 computer codes), 10:30939 (RA;XA)
TBL analysis by best estimate codes, 10:31000 (RA;US)
Data Covariances
Computer code application, verification and development for small-break LOCA analysis, 10:30933 (RA;XA)
Heat Transfer
18° sector system test (ESTA-II), 10:31004 (RA;US)
BWR core cooling in refill/reflood phase, 10:31002 (RA;US)
Evaluation of heat transfer coefficient in aiding mixed convection on a vertical flat plate with uniform heat flux, 10:30776 (RA;IL)
Influence of increasing hydrogen concentration on the heat transfer phenomena during boildown, 10:30926 (R;XE)
Measurement of two-phase flow at the core upper plenum interface under simulated reflood conditions (PWR; BWR), 10:30845 (R;US)
Results of CCTF upper plenum injection tests, 10:30978 (RA;US)
RODSWELL: a computer code for the thermomechanical analysis of fuel rods under LOCA conditions. Part I: models and code description, 10:30922 (R;XE)
Status of CCTF/SCTF test programs, 10:30979 (RA;US)
TBL analysis by best estimate codes, 10:31001 (RA;US)
Temperature estimations in air cooled fuel elements on an open pool research reactor core after loss of coolant, 10:30859 (R;GR)
TRAC analyses for CCTF and SCTF tests and UPTF design/operation, 10:30980 (RA;US)
Hydraulics
18° sector system test (ESTA-II), 10:31004 (RA;US)
BWR core cooling in refill/reflood phase, 10:31002 (RA;US)
Features of transients following loss-of-coolant accidents and emergency core cooling systems in pressure-tube boiling water reactors, 10:30943 (RA;XA)
Influence of increasing hydrogen concentration on the heat transfer phenomena during boildown, 10:30926 (R;XE)
Measurement of two-phase flow at the core upper plenum interface under simulated reflood conditions (PWR; BWR), 10:30845 (R;US)
Results of CCTF upper plenum injection tests, 10:30978 (RA;US)
Status of CCTF/SCTF test programs, 10:30979 (RA;US)
TBL analysis by best estimate codes, 10:31001 (RA;US)
TRAC analyses for CCTF and SCTF tests and UPTF design/operation, 10:30980 (RA;US)
Meetings
Experimental and modelling aspects of small-break LOCA. Proceedings of a specialists' meeting organized by the IAEA and held in Budapest, Hungary, 3-7 October 1983, 10:30681 (R;XA)
Polymers
Synergy effect in accident simulation (PWR), 10:31786 (R;FR;In French)
Reactor Safety Experiments
BWR upper plenum mixing test, 10:31003 (RA;US)
CANDU LOCA experiments comparisons with the FIREBIRD-III and RELAP5 codes, 10:30946 (RA;XA)
LOCA/ECCS integral tests with Two Bundle Loop, 10:30999 (RA;US)
TBL analysis by best estimate codes, 10:31000 (RA;US)
TBL analysis by best estimate codes, 10:31001 (RA;US)
Research Programs
Synopsis of experimental activities on small-break LOCA, 10:30934 (RA;XA)
Rewetting
Development of a mathematical model for studying rewetting of reactor fuel elements after a loss-of-coolant accident, 10:30949 (R;DE;In German)
Scale Models
Pre-test analysis of PMK experiments (RELAP4/MOD3 and MOD6 computer codes), 10:30939 (RA;XA)
Simulation
Assessment of the adequacy of ORNL instrumentation in reflood test facilities, 10:31010 (R;US)
Comparisons of analysis on Rosa-III Run 912 test. A BWR small break LOCA simulation, 10:30932 (RA;XA)
Description of the Semiscale Mod-2C Facility, including scaling principle and current measurement capabilities, 10:30862 (R;US)
LOBI-MOD2 small-break and special transients research, 10:30935 (RA;XA)

- **Test Facilities**

Autoradiography
Cigarette smoke and plutonium, 10:32354 (RA;US)
Biological Radiation Effects
Inhalation hazards to uranium miners, 10:32328 (RA;US)
Carcinomas
Inhalation hazards to uranium miners, 10:32328 (RA;US)
Computerized Tomography
133-xenon regional cardio-pulmonary examinations with radiocirculograph and with computed scintillation gamma camera, MB 9100-9101, 10:32266 (RA;HU)
Delayed Radiation Effects
Inhaled plutonium oxide in dogs, 10:32329 (RA;US)
Dynamic Function Studies
Determination of residual volume and intrapulmonal mixing ratio of gases by means of ^{15}N, 10:32277 (RA;DD;In German)
Neoplasms
Inhaled plutonium oxide in dogs, 10:32329 (RA;US)
Low-level ^{238}PuO$_2$ lifespan studies, 10:32330 (RA;US)
Radiation Doses
Inhaled plutonium oxide in dogs, 10:32329 (RA;US)
Low-level ^{238}PuO$_2$ lifespan studies, 10:32330 (RA;US)
Radionuclide Kinetics
Gut-related studies of radionuclide toxicity, 10:32332 (RA;US)
Volume
Determination of residual volume and intrapulmonal mixing ratio of gases by means of ^{15}N, 10:32277 (RA;DD;In German)
X-Ray Detection
Livermore phantom as a calibration standard in the assessment of plutonium in lungs, 10:32818 (R;GB)
LUTETIUM
Mass Spectroscopy
Systematics of multielement determination with resonance ionization mass spectrometry and thermal atomization, 10:31642 (J;US)
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
LUTETIUM 175
Hyperfine Structure
Effect of optical saturation on hyperfine intensities in optogalvanic spectroscopy, 10:32525 (J;US)
Spectral Shift
Effect of optical saturation on hyperfine intensities in optogalvanic spectroscopy, 10:32525 (J;US)
LUTETIUM 176
Hyperfine Structure
Effect of optical saturation on hyperfine intensities in optogalvanic spectroscopy, 10:32525 (J;US)
Spectral Shift
Effect of optical saturation on hyperfine intensities in optogalvanic spectroscopy, 10:32525 (J;US)
LWBR TYPE REACTORS
Breeding Ratio
Effect of neutron spectra on the plutonium discharge composition, 10:30775 (RA;IL)
Reactor Kinetics
Effect of neutron spectra on the plutonium discharge composition, 10:30775 (RA;IL)
LWGR TYPE REACTORS
ECCS
Features of transients following loss-of-coolant accidents and emergency core cooling systems in pressure-tube boiling water reactors, 10:30943 (RA;XA)
Loss of Coolant
Features of transients following loss-of-coolant accidents and emergency core cooling systems in pressure-tube boiling water reactors, 10:30943 (RA;XA)
LWR TYPE REACTORS
See WATER COOLED REACTORS
LYMPH NODES
Scintiscanning
Tc-99m antimony trisulfide colloid for lymphoscintigraphy, 10:32262 (RA;IL)

LYMPHOCYTES
Radiosensitivity
DNA metabolism and poly(ADP-ribose)-synthesis in lymphocytes of persons exposed to low doses of ionizing radiation, 10:32326 (R;AT;In German)
LYMPHOID CELLS
See LYMPHOCYTES
LYSINE
Metabolism
Metabolic amino acid requirements determined by means of ^{15}N-labelled amino acids, 10:32238 (RA;DD;In German)

METAMORPHIC ROCKS
Boreholes
Evaluation of technology for large- and small-diameter boreholes to characterize crystalline rock, 10:32400 (R;US)
Porosity
Porosity measurements of crystalline rocks by laboratory and geophysical methods, 10:32401 (R;GB)
Testing
Evaluation of technology for large- and small-diameter boreholes to characterize crystalline rock, 10:32400 (R;US)
METEOROLOGY
Data Acquisition Systems
Contribution to the development of solar and meteorological stations in Senegal: microcomputer controlled measuring station and solar tracking system, 10:30276 (R;FR;In French)
Meetings
Guidelines for atmospheric measurements in support of electro-optical systems testing, 10:32112 (R;US)
METHANATION
Chemical Reaction Kinetics
ASPEN sensitivity study for the Great Plains Gasification Plant. Technical progress report, May 1-31, 1985, 10:29620 (R;US)
Computerized Simulation
ASPEN sensitivity study for the Great Plains Gasification Plant. Technical progress report, May 1-31, 1985, 10:29620 (R;US)
METHANE
Biosynthesis
Biogas energy for Hawaiian small farms and homesteads, HI-11. Final report, 10:30071 (R;US)
Covered, anaerobic, wastewater lagoon primary treatment system, the "anaerobic cell". Technical completion report, 10:31374 (R;US)
Methane fermentation of substrate mixtures. Kinetic and microbiological aspects, 10:30073 (R;FR;In French)
Methane fermentation of agricultural residues. Utilization in farming, 10:30062 (R;FR;In French)
Methane production from cellulosic wastes: kinetic studies, 10:30064 (R;FR;In French)
Production of a usable energy source by anaerobic digestion of rum waste, 10:30069 (R;PR)
Combustion
Coalescence/dispersion modeling of turbulent combustion in a jet stirred reactor, 10:31718 (R;US)
Combustion Properties
Alternate fuels for maritime use, 10:31324 (RA;US)
Ecological Concentration
Geological origins in the prognosis of gas-bearing qualities in coal-bearing strata for the purpose of solving the problems of gas hazard in mine workings (Variation with depth, metamorphism, etc.), 10:29710 (TG;GB)
G Value
Radiolytic gas generation rates from Hanford RHO-CAW sludge and double-shell slurry immobilized in grout, 10:31576 (R;US)
Production
Evaluation of in-place gas, reserves and production potential of coalbed gas using a vertical boreholes pattern. Final report, September 1, 1983-December 31, 1984 (Mary Lee Coal Warrior Field, Alabama), 10:29695 (R;US)
Resource Assessment
Evaluation of in-place gas, reserves and production potential of coalbed gas using a vertical boreholes pattern. Final report, September 1, 1983-December 31, 1984 (Mary Lee Coal Warrior Field, Alabama), 10:29695 (R;US)
Synthesis
Flash hydropyrolysis and methanolysis of biomass with hydrogen and methane, 10:30063 (R;US)
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)
METHANOL
Combustion
Investigation of the flame speeds of propane/methanol gas mixtures, 10:31723 (R;US)
Dissociation
Enhanced coal liquefaction by hydropyrolysis in supercritical fluids. Quarterly report, October-December 1984, 10:29634 (R;US)
Equations of State
Enhanced coal liquefaction by hydropyrolysis in supercritical fluids. Quarterly report, October-December 1984, 10:29634 (R;US)
Phase Studies
Enhanced coal liquefaction by hydropyrolysis in supercritical fluids. Quarterly report, October-December 1984, 10:29634 (R;US)
Enthalpy and phase behavior of coal derived liquid mixtures. Technical progress report, January-March 1985, 10:29658 (R;US)
Solvent Properties
Rotational reorientation dynamics at high pressures: rhodamine 6G in ethanol from 1 bar to 6 kbar, 10:31678 (J;US)
Synthesis
Flash hydropyrolysis and methanolysis of biomass with hydrogen and methane, 10:30063 (R;US)
Vapor Pressure
Enthalpy and phase behavior of coal derived liquid mixtures. Technical progress report, January-March 1985, 10:29658 (R;US)
METHANOL FUELS
Pure methanol, methanol-water mixtures, or methanol with additives; for methanol-gasoline mixtures, use GASOHOL.
Combustion Properties
Neat methanol as a fuel for compression ignition engines in transit bus operation, 10:31403 (RA;US)
Results of the Coordinating Research Council methanol-gasoline blends program, 10:31394 (RA;US)
METHANOL PLANTS

Geothermal Energy
Geothermics, an alternate energy source for power generation, 10:30577 (RA;US)
MFTF DEVICES
Prior to October 1977, MX DEVICES was used to index this concept.
Electric Potential
Plasma potential formation and measurement in TMX-U and MFTF-B (invited), 10:32953 (J;US)
Maintenance
Maintenance and availability considerations for MFTF-B upgrade, 10:32982 (R;US)
Operation
Plasma modeling of MFTF-B and the sensitivity to vacuum conditions, 10:33060 (J;US)

Plasma Confinement
Plasma potential formation and measurement in TMX-U and MFTF-B (invited), 10:32953 (J;US)
Plasma Diagnostics
Plasma potential formation and measurement in TMX-U and MFTF-B (invited), 10:32953 (J;US)
Plasma Simulation
Plasma modeling of MFTF-B and the sensitivity to vacuum conditions, 10:33060 (J;US)
Vacuum Systems
Plasma modeling of MFTF-B and the sensitivity to vacuum conditions, 10:33060 (J;US)

MHD CHANNELS
Cathodes
Analytical investigations of the effects of cathode nonuniformities on magnetohydrodynamic (MGD) generator characteristics, 10:31185 (TA;US)
Control Systems
The effect of current control circuits on magnetohydrodynamic generator performance, 10:31184 (TA;US)
Electrical Faults
Analytical investigations of the effects of cathode nonuniformities on magnetohydrodynamic (MGD) generator characteristics, 10:31185 (TA;US)
Equipment Protection Devices
The effect of current control circuits on magnetohydrodynamic generator performance, 10:31184 (TA;US)

MHD GENERATORS
See also COAL-FIRED MHD GENERATORS
Cathodes
Effects of cathode slag polarization on magnetohydrodynamic generator performance, 10:31182 (TA;US)
Comparative Evaluations
Results from comparative analysis of different magnetohydrodynamic generator and power train designs for early commercial power plant applications, 10:30657 (TA;US)
Design
Results from comparative analysis of different magnetohydrodynamic generator and power train designs for early commercial power plant applications, 10:30657 (TA;US)
Performance
Effects of cathode slag polarization on magnetohydrodynamic generator performance, 10:31182 (TA;US)
Slags
Effects of cathode slag polarization on magnetohydrodynamic generator performance, 10:31182 (TA;US)

MHD POWER PLANTS
Economic Analysis
The role of MHD in the energy future, 10:30656 (J;US)

MICA
Surface Properties
AES studies of palladium films formed on copper and mica, 10:31521 (J;NL)

MICE
Blood Formation
Analysis of the hematopoietic effects of new dominant spotting (W) mutations of the mouse. I. Influence upon hematopoietic stem cells, 10:32233 (J;DK)
Dominant Mutations
Analysis of the hematopoietic effects of new dominant spotting (W) mutations of the mouse. I. Influence upon hematopoietic stem cells, 10:32233 (J;DK)
Genetic Radiation Effects
Genetic and somatic effects in animals maintained on tritiated water. Special consideration of tritium distribution, turnover and microdosimetry, 10:32322 (RA;JP)
Radionuclide Kinetics
Genetic and somatic effects in animals maintained on tritiated water. Special consideration of tritium distribution, turnover and microdosimetry, 10:32322 (RA;JP)

MICELLAR-POLYMER FLOODING

MILITARY EQUIPMENT
Tires
Field measurement of tension in a T-142 tank track, 10:31751 (R;US)

MILITARY FACILITIES
Buildings
Automated building design review using BLAST (Building Loads Analysis and System Thermodynamics). Final report, 10:31192 (R;US)
New control design principles based on measured performance and energy analysis of HVAC (heating, ventilating, and air-conditioning) systems. Interim report, 10:31193 (R;US)
Energy Conservation
Factors that influence the implementation of energy-saving technologies at Naval shore facilities, 10:31377 (R;US)
Intra-organizational environment of technological change: insights from the Navy's Energy Program, 10:31190 (R;US)
Heat Recovery Equipment
Heat-recovery incineration: a summary of operational experience. Final report, 10:31372 (R;US)
Reliability, availability, and maintainability of the heat-recovery incinerator at Naval Station Mayport. Final report, October 1981-March 1983, 10:31371 (R;US)
Waste Disposal
Reliability, availability, and maintainability of the heat-recovery incinerator at Naval Station Mayport. Final report, October 1981-March 1983, 10:31371 (R;US)

MILITARY PERSONNEL
Attitudes
Factors that influence the implementation of energy-saving technologies at Naval shore facilities, 10:31377 (R;US)
Radiation Monitoring
Analysis of radiation exposure for naval personnel at Operation Sandstone. Technical report, 10:32103 (R;US)

MILL TAILINGS
Chemical Composition
Uranium mill tailings neutralization: contaminant complexation and tailings leaching studies, 10:29951 (R;US)
Coverings
A field experiment on tailings reclamation: radon flux versus earthen cover depth, 10:29997 (BA;US)
A review of long-term rock durability: Implications for survivability of riprap used to protect uranium mill tailings, 10:30005 (BA;US)
A systematic approach to designing surface covers for uranium mill tailings, 10:29999 (BA;US)
Cost and effectiveness of radon barrier systems, 10:30000 (BA;US)
Effect of rock cover on multilayer radon barrier effectiveness, 10:29998 (BA;US)
Riprap Design considerations for long-term protection of uranium mill tailings, 10:30004 (BA;US)
Selection and testing of rock for armoring uranium tailings impoundments, 10:29950 (R;US)
Drainage
Interior drains for open pit disposal of uranium mill tailings, 10:30006 (BA;US)
Environmental Effects
Chemical transport beneath a uranium mill tailings pile, Riverton, Wyoming, 10:30003 (BA;US)
Evaluation of inactive uranium mill tailings sites for liner requirements: Characterization and interaction of tailings, soil, and liner materials, 10:29995 (BA;US)
Radon emanation characteristics of uranium mill tailings, 10:30001 (BA;US)
Hydrology
Recent hydrological observations from the Riverton and Maybell tailings piles, 10:29996 (BA;US)
Leachates
Interaction of acidic leachate with soil materials at Lucky McPathfinder mill, Gas Hills, Wyoming, 10:30002 (BA;US)
Leaching
Evaluation of inactive uranium mill tailings sites for liner requirements: Characterization and interaction of tailings, soil, and liner materials, 10:29995 (BA;US)
Moisture
Radon emanation characteristics of uranium mill tailings, 10:30001 (BA;US)
PH Value
Uranium mill tailings neutralization: contaminant complexation and tailings leaching studies, 10:29951 (R;US)
Physical Properties
Radon emanation characteristics of uranium mill tailings, 10:30001 (BA;US)

- **Radioactive Waste Disposal**
  - Interior drains for open pit disposal of uranium mill tailings, 10:30006 (BA;US)
  - Qualitative evaluation of long-term processes governing the behaviour of uranium mill tailings placed in deep lakes, 10:29933 (R;CA)
  - Qualitative evaluation of long-term processes governing the behaviour of uranium mill tailings placed in deep lakes. Annexes (Study conducted for the Atomic Energy Control Board), 10:29934 (R;CA)
- **Radioactive Waste Processing**
  - Evaluation of tailings stabilization methods, 10:29925 (RA;CA)
- **Radiochemistry**
  - Recent radiochemistry observations at the Riverton and Maybell tailings piles, 10:30021 (BA;US)
- **Radionuclide Migration**
  - A field experiment on tailings reclamation: radon flux versus earthen cover depth, 10:29997 (BA;US)
  - A systematic approach to designing surface covers for uranium mill tailings, 10:29999 (BA;US)
  - Cost and effectiveness of radon barrier systems, 10:30000 (BA;US)
  - Effect of rock cover on multilayer radon barrier effectiveness, 10:29998 (BA;US)
  - Estimation of radiological impact from transportation of uranium mill tailings: Part II: Dispersion and dosimetry, 10:29902 (BA;US)
  - Interaction of acidic leachate with soil materials at Lucky McPathfinder mill, Gas Hills, Wyoming, 10:30002 (BA;US)
- **Remedial Action**
  - Estimation of radiological impact from transportation of uranium mill tailings: Part II: Dispersion and dosimetry, 10:29902 (BA;US)
  - Recent hydrological observations from the Riverton and Maybell tailings piles, 10:29996 (BA;US)
  - The status of the uranium mill tailings remedial actions project (UMTRAP), 10:30032 (BA;US)
- **Solidification**
  - Evaluation of tailings stabilization methods, 10:29925 (RA;CA)
- **Stabilization**
  - Interim stabilization of uranium mill tailings, 10:29994 (BA;US)
- **Transport**
  - Estimation of radiological impact from transportation of uranium mill tailings: Part II: Dispersion and dosimetry, 10:29902 (BA;US)
- **Water Removal**
  - Analysis of drainage and consolidation at typical uranium mill tailings sites, 10:29954 (R;US)

MILLSTONE-1 REACTOR
- *Waterford, Connecticut, USA*
- **Regulations**
  - Conformance to Regulatory Guide 1.97, Millstone Nuclear Power Station, Unit No. 1 (Docket No. 50-245), 10:30758 (R;US)

MINE ROADWAYS
- Methane emission in workings and some characteristic gas conditions in a brown coal mine (Study of methane accumulations at the roof, eg. at junctions), 10:29711 (TG;GB)
- **Liners**
  - All-weather storage of compressible inserts as fixed to reinforced concrete roadway panels, 10:29698 (R;BE;In French)
  - Behaviour of an initial section of circular stone-drift lined with concrete panels featuring embedded inserts, 10:29700 (R;BE;In French)
  - Compressive tests on Bullflex bags with different filler materials, 10:29699 (R;BE;In French)
  - Tests on reinforced concrete blocks with embedded inserts, 10:29697 (R;BE;In French)
- **Strata Control**
  - Tests on reinforced concrete blocks with embedded inserts, 10:29697 (R;BE;In French)

MINE-MOUTH GENERATING PLANTS

MOLECULES
MOLECULES
Absorption Spectra
Computation of two surface properties by coordinate-space propagator techniques, 10:32514 (J;US)
Adsorption
Calculated inverse photoemission cross sections from adsorbed molecules, 10:32840 (J;US)
Coulomb Ionization
Direct Coulomb ionization of the 1s σ molecular orbital by slow heavy projectiles following hyperbolic paths, 10:32505 (R;BR)
Desorption
Electron and photon stimulated desorption from organic molecular solids: final state leading to desorption, 10:32507 (R;US)
Electronic Structure
Computation of two surface properties by coordinate-space propagator techniques, 10:32514 (J;US)
Excited States
Studies of collisional and nonlinear radiative process for development of coherent uv and xuv sources. Final report, November 1983-November 1984, 10:32477 (R;US)
Photoemission
Calculated inverse photoemission cross sections from adsorbed molecules, 10:32840 (J;US)
MOLLUSCS
See also CLAMS
Hatching
Building heat conservation and the feasibility of solar hot water heating in Long Island shellfish hatcheries, 10:31355 (R;US)
Temperature Effects
Progress report: Health Sciences Division, 1982 April 1-June 30, 10:32011 (R;CA)
MOLTEN CARBONATE FUEL CELLS
Prior to June 1980 this information was indexed with the descriptors HIGH-TEMPERATURE FUEL CELLS + MOLTEN SALTS + CARBONATES.
Electrodes
Thermodynamics of the corrosion of chromium in molten carbonates, 10:31186 (R;US)
Materials
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
MOLTEN METAL-WATER REACTIONS
Pressure Dependence
Steam explosion experiments with single drops of iron oxide melted with a CO_2 laser. Part II. Parametric studies, 10:31007 (R;US)
Simulation
Steam explosion experiments with single drops of iron oxide melted with a CO_2 laser. Part II. Parametric studies, 10:31007 (R;US)

ORIGEN-S data libraries, 10:30686 (RA;US)
MOLTEN SALTS
Heat Storage
Molten Salt Thermal Energy Storage Subsystem Research Experiment. Volume II. Final technical report, 10:30351 (R;US)
Molten Salt Thermal Energy Storage Subsystem Research Experiment. Volume I. Executive summary, 10:30350 (R;US)
MOLYBDENUM
Catalytic Effects
Integrated two-stage coal liquefaction steady-state performance. The Advanced Coal Liquefaction R and D Facility, Wilsonville, Alabama. Final report, 10:29641 (R;US)
Mass Spectroscopy
Systematics of multielement determination with resonance ionization mass spectrometry and thermal atomization, 10:31642 (J;US)
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
Sulfidation
Integrated two-stage coal liquefaction steady-state performance. The Advanced Coal Liquefaction R and D Facility, Wilsonville, Alabama. Final report, 10:29641 (R;US)
X-Ray Fluorescence Analysis
X-ray fluorescence analysis of uranium concentrates, 10:31637 (TG;US)
MOLYBDENUM 98
E0-Transitions
E0 transitions in light fission fragments, 10:32725 (RA;NL)
MOLYBDENUM ALLOYS
See also INCONEL 617
STAINLESS STEEL-316
Mechanical Properties
Effect of microstructure on the fatigue behavior of Fe-C-X alloys. Final report, July 1, 1983-November 16, 1984 (Fe-0.2C-1Mn; Fe-0.2C-2Mo; Fe-0.2C-4Mo), 10:31443 (R;US)
Stability
Stability of amorphous metal films on semiconductor substrates. Progress report, July-December 1984 (Ni-Nb, W-Si, Mo-Si), 10:31444 (R;US)
Tensile Properties
Effect of strain rate and temperature on the tensile behaviour of uranium - 2sup(w)/o molybdenum, 10:31474 (R;GB)
Effect of cooling rate from the γ-phase on the strain-rate sensitivity of a uranium 2 sup(w)/o molybdenum alloy, 10:31475 (R;GB)
MOLYBDENUM OXIDES
Catalytic Effects
Development of significantly improved catalysts for coal liquefaction and upgrading of coal extracts. Final report, September 28, 1981-February 28, 1985, 10:29624 (R;US)
Sulfidation
Novel sorbents for high temperature regenerative H_2S removal. Quarterly report No. 4, November 1984-January 1985, 10:29619 (R;US)
MOLYBDENUM SILICIDES
Corrosion Resistance
Refractory material which is resistant to oxidation and hot corrosion at temperatures of 1000-1600°C, 10:31508 (TG;US)
MONGRELS
See DOGS
MONITORS

  - Production of secondary ions by heavy-ion bombardment of rare-gas targets, 10:31948 (RA;JP;In Japanese)

NEONATES
- **Radiation Doses**
  - Fetal and juvenile radiotoxicity, 10:32331 (RA;US)
- **Radiosensitivity**
  - Neonatal low dose γ-irradiation induced fertility disorders in mature female rats, 10:32304 (RA;IL)

NEOPLASMS
- *See also CARCINOMAS*
  - *MELANOMAS*
- **Radioinduction**
  - Inhaled plutonium oxide in dogs, 10:32329 (RA;US)
  - Low-level $^{239}PuO_2$ lifespan studies, 10:32330 (RA;US)

NEPTUNIUM
- **Environmental Transport**
  - Radionuclide diffusion and mobilities in compacted bentonite, 10:32178 (R;SE)
- **Geochemistry**
  - Temperature dependence of actinide solubilities and speciation, 10:29945 (RA;US)

NEPTUNIUM 237
Muonic Atoms
Pionic and muonic X-ray studies of ^{237}Np, 10:32492 (RA;NL)
Pionic Atoms
Pionic and muonic X-ray studies of ^{237}Np, 10:32492 (RA;NL)
Quadrupole Moments
Pionic and muonic X-ray studies of ^{237}Np, 10:32492 (RA;NL)
Solvent Extraction
Recovery of neptunium. Literature survey, 10:29936 (R;JP;In Japanese)
NEPTUNIUM CARBONATES
Solubility
Actinide solution equlibria and solubilities in geologic systems, 10:29979 (R;SE)
Stability
Actinide solution equlibria and solubilities in geologic systems, 10:29979 (R;SE)
NEPTUNIUM COMPLEXES
Stability
Determination of stability constants of the carbonate complexes of uranium and neptunium, 10:29944 (RA;US)
NEPTUNIUM COMPOUNDS
See also NEPTUNIUM CARBONATES
NEPTUNIUM HYDROXIDES
Solubility
Temperature dependence of actinide solubilities and speciation, 10:29945 (RA;US)
NEPTUNIUM HYDROXIDES
Solubility
Actinide solution equlibria and solubilities in geologic systems, 10:29979 (R;SE)
Stability
Actinide solution equlibria and solubilities in geologic systems, 10:29979 (R;SE)
NETWORKS (COMPUTER)
See COMPUTER NETWORKS
NEUTRAL ATOM BEAM INJECTION
Plasma Guns
Development of rf plasma generators for neutral beams, 10:33055 (J;US)
Plasma Production
Development of rf plasma generators for neutral beams, 10:33055 (J;US)
NEUTRETTOS

ELECTRON NEUTRINOS
MUON NEUTRINOS
SOLAR NEUTRINOS
Eigenstates
Mixing of a heavy neutrino with the electron neutrino, 10:32614 (J;US)
Mass
Second-order fermion masses, 10:32659 (J;US)
Radiative Decay
Primordial deuterium and neutrino decays, 10:32609 (R;AU)
NEUTRON ACTIVATION ANALYSIS
See ACTIVATION ANALYSIS
NEUTRON REACTIONS
NEUTRON CAMERAS
Electron Guns
Neutron streak camera electron gun design, 10:32961 (J;US)
Streak Photography
Neutron streak camera electron gun design, 10:32961 (J;US)
Time Resolution
Approaches to ultrafast neutron detectors, 10:32972 (J;US)
NEUTRON CAPTURE
See NEUTRON REACTIONS
NEUTRON DETECTORS
See also ACTIVATION DETECTORS
HE-3 COUNTERS
New thermal neutron solid-state electronic detector based on HgI$_2$ crystals, 10:32032 (R;IL;In Hebrew)
NEUTRON DIFFRACTION
Angular Distribution
MCANG - a group data library of cumulative angular distributions of elastically scattered neutrons for Monte Carlo calculations, 10:32810 (R;DD;In German)
Computer Calculations
MCANG - a group data library of cumulative angular distributions of elastically scattered neutrons for Monte Carlo calculations, 10:32810 (R;DD;In German)
Peaks
Profile refinement of powder diffraction patterns using the Voigt function, 10:32807 (R;GB)
NEUTRON DIFFUSION EQUATION
Finite Difference Method
Elaboration of a nodal method to solve the steady state multigroup diffusion equation. Study and use of the multigroup diffusion code DAHRA, 10:32802 (R;DZ;In French)
NEUTRON DOSIMETRY
Dielectric Track Detectors
Development and application of the electrochemical etching technique, 10:32022 (R;US)
Dose Rates
XSDOSE: a module for calculating fluxes and dose rates at points outside a shield, 10:30789 (RA;US)
One-Dimensional Calculations
SAS2: a coupled one-dimensional depletion and shielding analysis code, 10:31744 (RA;US)
Research Programs
Progress report: Health Sciences Division, 1983 July 1-December 31, 10:32817 (R;CA)
S Codes
SAS2: a coupled one-dimensional depletion and shielding analysis code, 10:31744 (RA;US)
NEUTRON ECONOMY
See NEUTRON FLUX
NEUTRON EMISSION
Differential Cross Sections
DDXPLOT: a program to plot the energy angle double-differential cross sections, 10:33092 (R;JP;In Japanese)
NEUTRON EVAPORATION
See NEUTRON EMISSION
NEUTRON FLUX
Calculation Methods
XSDOSE: a module for calculating fluxes and dose rates at points outside a shield, 10:30789 (RA;US)
Spatial Distribution
Measurement of fast neutron flux profile across the inner face of the MAPP-1 end-shield during reactor commissioning, 10:30835 (R;IN)
Transformations
Transformation law for response fluxes within the collision probability method, 10:30777 (R;XA)
NEUTRON FLUX DENSITY
See NEUTRON FLUX
NEUTRON MATTER
See NUCLEAR MATTER
NEUTRON RADIOGRAPHY
Uses
Technological advances at Pelindaba, 10:31787 (RA;ZA)
NEUTRON REACTIONS
Capture
Averaged neutron capture data and their applications to reaction mechanism, 10:32778 (RA;NL)
Parity non-conservation in the radiative capture of polarized neutrons by ^{35}Cl, 10:32699 (R;FR)
Cross Sections
Calculated neutron-induced cross sections for /sup 63,65/Cu /sup 58,60/Ni, and ^{52}Cr from 1 to 20 MeV and comparisons with experiments, 10:32709 (R;US)
Fast-neutron interaction with niobium, 10:32717 (R;US)

Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Neutron cross sections of ^{89}Y analysed in terms of the level structure and reaction mechanisms, 10:32711 (RA;ZA)
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Fast-neutron cross sections of elemental indium; decay scheme of ^{115}In and optical model parameters, 10:32732 (RA;ZA)
Elastic Scattering
Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)
Fission
Parameters of the multilevel analysis of the Pu-239 cross sections in resonance region, 10:32750 (R;SU;In Russian)
Inelastic Scattering
Measurement and analysis of neutron emission spectrum under niobium nucleus bombardment by 14 MeV neutrons, 10:32718 (R;SU;In Russian)
Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)
Magnetic Spectrometers
Facility for the investigation of (n, charged particle) reactions, 10:32018 (R;GR)
Pickup Reactions
R-matrix analysis of the ^{7}Li system with peripheral channel overlap exchange effects, 10:32690 (R;US)
Resonance
Simple neutron resonances, 10:32776 (RA;NL)
Scattering
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Polarization in n-p and n-d scattering at 16,9 and 21,6 MeV, 10:32675 (RA;ZA)
NEUTRON SOURCES
Excludes reactors even when used as neutron sources.
Calibration
Effects of neutron energy spectrum on the efficiency calibration of epithermal neutron detectors, 10:32970 (J;US)
Efficiency
Effects of neutron energy spectrum on the efficiency calibration of epithermal neutron detectors, 10:32970 (J;US)
Energy Spectra
Effects of neutron energy spectrum on the efficiency calibration of epithermal neutron detectors, 10:32970 (J;US)
Penning Ion Sources
Investigation of the ion source of a neutron tube, 10:31888 (TJ;US)
Reviews
Sealed neutron tubes foreword, 10:30054 (TJ;US)
NEUTRON SPECTRA
Calculation Methods
COUPLE: SCALE system module to process problem-dependent cross sections and neutron spectral data for ORIGEN-S analyses, 10:30791 (RA;US)
NEUTRON SPECTROMETERS
Crystals
Lorentz factors for large-mosaic crystals, 10:32047 (J;DK)
Design
^{3}He gas scintillation spectrometer for fusion neutron measurements, 10:32971 (J;US)
Energy Resolution
^{3}He gas scintillation spectrometer for fusion neutron measurements, 10:32971 (J;US)
Observations on ^{3}He neutron spectrometry, 10:32029 (R;US)
Fabrication
^{3}He gas scintillation spectrometer for fusion neutron measurements, 10:32971 (J;US)
He-3 Counters
Observations on ^{3}He neutron spectrometry, 10:32029 (R;US)
Optimization
^{3}He gas scintillation spectrometer for fusion neutron measurements, 10:32971 (J;US)
NEUTRON SPECTROSCOPY
Proportional Counters
Measurement of neutron spectra with hydrogen proportional counters. Part 1. Spectrometry system and calibration, 10:32015 (R;GB)
NEUTRON STARS
Thermonuclear Reactions
X-ray bursts: observation versus theory, 10:32446 (R;US)
NEUTRON TRANSPORT
Boundary-Value Problems
Albedo operators and H-equations for generalized kinetic models, 10:32813 (J;US)
Computer Calculations
Approximation of angular distributions for elastically scattered neutrons, 10:32800 (R;SU;In Russian)
NEUTRON TRANSPORT THEORY
See also MULTIGROUP THEORY
Boltzmann Equation
XSDRNPM-S: a one-dimensional discrete-ordinates code for transport analysis, 10:30788 (RA;US)
One-Dimensional Calculations
XSDRNPM-S: a one-dimensional discrete-ordinates code for transport analysis, 10:30788 (RA;US)
NEUTRON-GAMMA LOGGING
Well Logging Equipment
Analytical model for a pulsed neutron gauge, 10:32078 (R;DK)
NEUTRONS
Photon Transport
Investigations of an ionizing radiation transport in a nitrogen-containing medium, 10:32801 (R;SU;In Russian)
Transmission
Investigations of an ionizing radiation transport in a nitrogen-containing medium, 10:32801 (R;SU;In Russian)
NEVADA TEST SITE
Boreholes
Lithologic logs of selected exploratory and emplacement drill holes in areas 9 and 10, Nevada Test Site, 10:32392 (R;US)
Geology
Structural geology report: Spent Fuel Test - Climax Nevada Test Site, 10:29989 (R;US)
Granites
Logging of post-test and CCH record core samples for the Spent Fuel Test-Climax, 10:32406 (R;US)
Plants
Status of endangered and threatened plant species on Nevada Test Site: a survey, Parts 1 and 2. Appendix C: collection records for the taxa considered, 10:32180 (R;US)
Radioactive Waste Disposal
Permeability and fluid chemistry studies of the Topopah Spring Member of the Paintbrush Tuff, Nevada Test Site: Part II (Fluids collected during permeability experiments), 10:29988 (R;US)
Radioactive Waste Management
Commercial Nuclear Waste Research and Development Program. Quarterly report, January-March 1985, 10:29916 (R;US)
NEW ENGLAND
See FEDERAL REGION I
NEW JERSEY
Remedial Action
Phase II remedial action at the former Middlesex Sampling Plant and associated properties. Final report. Volume 3 , 10:30025 (R;US)
Phase II remedial action at the former Middlesex Sampling Plant site and associated properties. Final report. Volume 1, 10:30024 (R;US)
NEW ZEALAND
Energy Supplies
Regional energy planning: a review. Final report, 10:31115 (R;NZ)
Natural Radioactivity
Annual terrestrial gamma radiation dose to the population of the urban Christchurch area, 10:32176 (R;NZ)
Nuclear Physics
Nuclear Physics Group progress report July-December 1981, 10:32665 (R;NZ)

  - **Research Programs**
    - Report on applications of nuclear science in New Zealand, 1981-1982, 10:33074 (R;NZ)
    - Stable Isotope Group 1982 progress report, 10:32311 (R;NZ)
  - **Residential Buildings**
    - Demonstration of a hot-water-heater pump system. Final report, 10:31284 (R;NZ)
    - Domestic market potential for solid-fuel burners. Final report, 10:31283 (R;NZ)
  - **Rivers**
    - Deuterium in New Zealand rivers and streams, 10:32196 (R;NZ)
- NEWBORNS
  - *See NEONATES*
- NGL
  - *See NATURAL GAS LIQUIDS*
- NICKEL
  - **Absorption Spectroscopy**
    - Characterization and comparison of vanadyl and nickel compounds in heavy crude petroleums and asphaltenes by reverse-phase and size-exclusion liquid chromatography/graphite furnace atomic absorption spectrometry, 10:31644 (J;US)
  - **Anaerobic Digestion**
    - Anaerobic microbial transformations in subsurface environments: project description, 10:32186 (R;US)
  - **Atom Transport**
    - Single atom surface diffusion of sulfur on Ni(111), 10:31660 (J;US)
  - **Catalytic Effects**
    - In situ combustion, 10:29768 (RA;US)
    - Integrated two-stage coal liquefaction steady-state performance. The Advanced Coal Liquefaction R and D Facility, Wilsonville, Alabama. Final report, 10:29641 (R;US)
    - Promotion effects on the synthesis of higher alcohols. 11th quarterly report, January-March 1985, 10:30068 (R;US)
  - **Chemical Vapor Deposition**
    - Real time measurement of deposition initiation and rate in laser chemical vapor deposition, 10:31495 (J;US)
  - **Ellipsometry**
    - Ellipsometric investigation of Be(0001) oxidation, 10:31504 (J;US)
  - **Emission Spectroscopy**
    - Spectrochemical determination of impurities in aluminium alloys by DC arc technique, 10:31634 (R;IL;In Hebrew)
  - **Laser-Radiation Heating**
    - Real time measurement of deposition initiation and rate in laser chemical vapor deposition, 10:31495 (J;US)
  - **Liquid Column Chromatography**
    - Characterization and comparison of vanadyl and nickel compounds in heavy crude petroleums and asphaltenes by reverse-phase and size-exclusion liquid chromatography/graphite furnace atomic absorption spectrometry, 10:31644 (J;US)
  - **Mass Spectroscopy**
    - Systematics of multielement determination with resonance ionization mass spectrometry and thermal atomization, 10:31642 (J;US)
  - **Oxidation**
    - Ellipsometric investigation of Be(0001) oxidation, 10:31504 (J;US)
    - Optimization of the NiCrAl-Y/ZrO-Y2O3 thermal barrier system, 10:31535 (R;US)
  - **Permeability**
    - Permeation of hydrogen through nickel electroplate, 10:31486 (RA;US)
  - **Physical Radiation Effects**
    - Pulsed x-ray induced damage to metal and multilayer mirrors, 10:31507 (J;US)
  - **Production**
    - Synthesis of ultrafine ceramic and metallic powders in a thermal argon rf plasma, 10:31533 (R;US)
  - **Pyrolysis**
    - Real time measurement of deposition initiation and rate in laser chemical vapor deposition, 10:31495 (J;US)
  - **Sulfidation**
    - Integrated two-stage coal liquefaction steady-state performance. The Advanced Coal Liquefaction R and D Facility, Wilsonville, Alabama. Final report, 10:29641 (R;US)
  - **Surface Properties**
    - Single atom surface diffusion of sulfur on Ni(111), 10:31660 (J;US)
- NICKEL 58 TARGET
  - **Deuteron Reactions**
    - Elastic scattering of polarized deuteron at intermediate energies, 10:32704 (R;FR)
  - **Electron Reactions**
    - Contribution of $2(h/2\pi)\omega$ transitions to the excitation of 0^+ states in ^{58}Ni and ^{26}Mg in inelastic electron scattering, 10:32698 (RA;NL)
  - **Neutron Reactions**
    - Calculated neutron-induced cross sections for /sup 63,65/Cu /sup 58,60/Ni, and ^{52}Cr from 1 to 20 MeV and comparisons with experiments, 10:32709 (R;US)
  - **Nitrogen 14 Reactions**
    - Subthreshold pion production: An intranuclear N-N collision interpretation, 10:32694 (J;US)
- NICKEL 60 TARGET
  - **Argon 40 Reactions**
    - First results from GANIL, 10:32680 (R;FR)
  - **Neutron Reactions**
    - Calculated neutron-induced cross sections for /sup 63,65/Cu /sup 58,60/Ni, and ^{52}Cr from 1 to 20 MeV and comparisons with experiments, 10:32709 (R;US)
  - **Proton Reactions**
    - Analyzing power for the inelastic continuum with 200 MeV protons, 10:32714 (J;NL)
- NICKEL ALLOYS
  - *See also NICKEL BASE ALLOYS*
  - **Physical Radiation Effects**
    - Effect of damage rates and different kinds of irradiation on the ductility of amorphous $Fe_{40}Ni_{40}B_{20}$, 10:31447 (R;DE)
  - **Stability**
    - Stability of amorphous metal films on semiconductor substrates. Progress report, July-December 1984 (Ni-Nb, W-Si, Mo-Si), 10:31444 (R;US)
- NICKEL BASE ALLOYS
  - *See also HASTELLOY C*
  - **Order Parameters**
    - Local atomic order of a Ni-12.7 at.% Al alloy quenched from 1323 K, 10:31519 (J;DK)
  - **Oxidation**
    - Oxidation of $Ni_{60}Fe_{40}$(100) in the presence of sulfur, 10:31502 (J;US)
  - **Sorptive Properties**
    - Oxidation of $Ni_{60}Fe_{40}$(100) in the presence of sulfur, 10:31502 (J;US)
- NICKEL COMPLEXES
  - **Catalytic Effects**
    - Transition metal catalysis of hydrogen shuttling in coal liquefaction. Quarterly technical progress report, December 1, 1984-February 28, 1985, 10:29637 (R;US)
  - **Chemical Reactions**
    - Transition metal catalysis of hydrogen shuttling in coal liquefaction. Quarterly technical progress report, December 1, 1984-February 28, 1985, 10:29637 (R;US)
  - **Radiolysis**
    - Ligand metal interrelationships Part II. The effect of the change from square planar to octahedral coordination on the pKa of the ligand in unsaturated tetraaza-macrocyclic nickel complexes. A pulse radiolytic study, 10:31690 (RA;IL)
- NICKEL OXIDES
  - **Electrochemistry**
    - Semiconductor electrochemistry approach to the study of oxide films on nickel, iron, zinc, and cadmium electrodes, 10:31091 (RA;US)
- NICKEL SILICIDES
  - **Synthesis**
    - Report of the Van de Graaff Group: solid state and materials research. The influence of Au on the formation of cobalt and nickel silicides, 10:31574 (RA;ZA)

NICKEL-HYDROGEN BATTERIES
Design
Design and development of a sealed 100-Ah hydrogen-nickel oxide battery, 10:31063 (RA;US)
Performance
Design and development of a sealed 100-Ah hydrogen-nickel oxide battery, 10:31063 (RA;US)
NICKEL-ZINC BATTERIES
Battery Separators
Development of a supported liquid membrane as a nickel-zinc secondary battery separator, 10:31053 (R;US)
Electrodes
Cycle-Life testing of porous alkaline zinc electrodes, 10:31096 (RA;US)
Membranes
Development of multicomponent transport theory and transport data for membranes in concentrated electrolytes, 10:31093 (RA;US)
Supported liquid membrane separators, 10:31095 (RA;US)
Zinc-nickel oxide battery membrane separator studies and theoretical system analysis and testing, 10:31092 (RA;US)
NICOTINAMIDE-ADENINE DINUCLEOTIDE
See NAD
NICOTINAMIDE-ADENINE DINUCLEOTIDE PHOSPHA
See NADP
NICOTINE
Biological Effects
Report of the Van de Graaff Group: nuclear analysis. The effect of nicotine on the trace element composition of rat liver, 10:31628 (RA;ZA)
NIKHEF
Research Programs
NIKHEF annual report 1983, 10:32663 (R;NL;In Dutch)
NINE MILE POINT-2 REACTOR
Scriba, New York, USA
Cost Benefit Analysis
Final Environmental Statement related to the operation of Nine Mile Point Nuclear Station, Unit No. 2 (Docket No. 50-410), 10:30832 (R;US)
Environmental Impact Statements
Final Environmental Statement related to the operation of Nine Mile Point Nuclear Station, Unit No. 2 (Docket No. 50-410), 10:30832 (R;US)
NIOBIUM
Mechanical Properties
Tritium-helium effects in metals, 10:32994 (R;US)
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
Tensile Properties
Tritium-helium effects in metals, 10:32994 (R;US)
NIOBIUM 93 REACTIONS
Deep Inelastic Heavy Ion Reactions
Aspects of hydrodynamical flow in view of recent high and intermediate energy heavy ion data, 10:32719 (RA;DE)
Collective flow of nuclear matter, 10:32697 (RA;DE)
Participant region radii from 4 π detection of proton-proton correlations in relativistic heavy ion reactions, 10:32702 (RA;DE)
NIOBIUM 93 TARGET
Neutron Reactions
Fast-neutron interaction with niobium, 10:32717 (R;US)
Measurement and analysis of neutron emission spectrum under niobium nucleus bombardment by 14 MeV neutrons, 10:32718 (R;SU;In Russian)
Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)
Niobium 93 Reactions
Aspects of hydrodynamical flow in view of recent high and intermediate energy heavy ion data, 10:32719 (RA;DE)
Collective flow of nuclear matter, 10:32697 (RA;DE)
Participant region radii from 4 π detection of proton-proton correlations in relativistic heavy ion reactions, 10:32702 (RA;DE)
Proton Reactions
Validation of the intra-nuclear-cascade-evaporation model for particle production, 10:32791 (R;DE)
NIOBIUM ALLOYS
Extrusion
Effect of extrusion texture on the linear thermal contraction and mechanical properties of the uranium-2.4 wt% niobium alloy, 10:31517 (J;NL)
Grain Size
Experimental attempt to achieve microstructure variations through temperature/time permutations for a nonwrought powder metallurgy uranium-6 niobium alloy, 10:31493 (R;US)
Hot Pressing
Experimental attempt to achieve microstructure variations through temperature/time permutations for a nonwrought powder metallurgy uranium-6 niobium alloy, 10:31493 (R;US)
Mechanical Properties
Experimental attempt to achieve microstructure variations through temperature/time permutations for a nonwrought powder metallurgy uranium-6 niobium alloy, 10:31493 (R;US)
Shape Memory Effect
Shape memory effect in uranium-niobium alloys below room temperature. Final report (6.2 to 7.0 wt % Nb), 10:31492 (R;US)
Stability
Stability of amorphous metal films on semiconductor substrates. Progress report, July-December 1984 (Ni-Nb, W-Si, Mo-Si), 10:31444 (R;US)
Tensile Properties
Effect of extrusion texture on the linear thermal contraction and mechanical properties of the uranium-2.4 wt% niobium alloy, 10:31517 (J;NL)
Thermal Expansion
Effect of extrusion texture on the linear thermal contraction and mechanical properties of the uranium-2.4 wt% niobium alloy, 10:31517 (J;NL)
NIOBIUM COMPOUNDS
Electron-Phonon Coupling
Phonon dispersion curves of nonstoichiometric Nb_3Ge, 10:31497 (J;US)
Phonons
Phonon dispersion curves of nonstoichiometric Nb_3Ge, 10:31497 (J;US)
NITRATES
See also AMMONIUM NITRATES
PETN
Anaerobic Digestion
Anaerobic microbial transformations in subsurface environments, 10:32348 (R;US)
NITRIC ACID
Chemical Reactions
Linear alkane chains in coals, 10:29649 (RA;US)
Low temperature chemical fragmentation of coal, 10:29650 (RA;US)
Clathrates
Structural study of HNO_3-graphite intercalation compounds by neutron diffraction, 10:31562 (RA;IL)
Corrosive Effects
Examination of transpassive nitric acid corrosion behavior of different austenitic stainless steels by prolongated Huey-testing (65% HNO_3, 120°C, 720 h), 10:31465 (R;DE;In German)
NITRIC ACID ESTERS
See also PETN
Activation Energy
Detonations of solid explosives. Final report, 1 November 1982-31 October 1984, 10:32081 (R;US)
Agglomeration
Aggregation and interactions of tributyl phosphate and tricaprylmethylammonium nitrate in hexane by osmometry, 10:31655 (J;US)

Electric Conductivity
Aggregation and interactions of tributyl phosphate and tricaprylmethylammonium nitrate in hexane by osmometry, 10:31655 (J;US)
NITRIC OXIDE
NO.
Chemical Reaction Kinetics
Kinetics of the reactions of NCO radicals with H_2 and NO using laser photolysis—laser induced fluorescence, 10:31662 (J;US)
Combustion
Kinetics of the reactions of NCO radicals with H_2 and NO using laser photolysis—laser induced fluorescence, 10:31662 (J;US)
NITRO COMPOUNDS
See also NITROMETHANE
Activation Energy
Experimental studies of chemical reactivity during shock initiation of hexanitrostilbene, 10:32095 (R;US)
Electron Density
Electron density distribution analysis for nitroguanidine, 10:32087 (R;US)
Sensitivity
Sensitivity and performance characterization of DINGU (1,4-dinitroglycoluril (DINGU)), 10:32090 (R;US)
Synthesis
Sensitivity and performance characterization of DINGU (1,4-dinitroglycoluril (DINGU)), 10:32090 (R;US)
NITROGEN
Activation Analysis
Optimization of measurement conditions at determining the nitrogen content in a grain using the gamma-activation method, 10:31615 (R;SU;In Russian)
Adsorption
Out-of-plane orientation of N_2 molecules adsorbed on graphite, 10:31563 (RA;IL)
Diffusion
Formation, ion modification, and annealing of VN, 10:31526 (R;US)
G Value
Radiolytic gas generation rates from Hanford RHO-CAW sludge and double-shell slurry immobilized in grout, 10:31576 (R;US)
Metabolism
Kinetic characterization of $^{13}NH_3$ and [^{13}N]glutamine metabolism in rabbit heart, 10:32361 (J;US)
Raman Spectra
Interpreting coherent anti-Stokes Raman spectra measured with multimode Nd:YAG pump lasers, 10:32526 (J;US)
Removal
Advanced coal liquefaction catalyst development. Quarterly progress report No. 9, October 1-December 31, 1983, 10:29623 (R;US)
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)
NITROGEN 14 REACTIONS
Compound-Nucleus Reactions
Subthreshold pion production: An intranuclear N-N collision interpretation, 10:32694 (J;US)
NITROGEN 15
Excretion
Studies on the influence of the thyroid activity on the nitrogen balance using ^{15}N-glycine, 10:32254 (RA;DD;In German)
Quantitative Chemical Analysis
Determination of endogenous nitrogen in the chyme using ^{15}N tracers, 10:32291 (RA;DD;In German)
Retention
Kinetic studies on nitrogen and protein metabolism in dwarfish children using ^{15}N as tracer, 10:32255 (RA;DD;In German)
Studies on the influence of the thyroid activity on the nitrogen balance using ^{15}N-glycine, 10:32254 (RA;DD;In German)
NITROGEN 16
Beta-Minus Decay
Measurement of the $^{16}N(2^-,g.s.) \to {}^{16}O(0^+,g.s.)+e^- +$nu-bar/sub e/ beta-decay branching ratio, 10:32692 (J;US)
NITROGEN COMPOUNDS
See also CYANATES
NITRATES
NITROGEN HYDRIDES
NITROGEN OXIDES
Chemical Reaction Kinetics
Kinetics of the reactions of NCO radicals with H_2 and NO using laser photolysis—laser induced fluorescence, 10:31662 (J;US)
Combustion
Kinetics of the reactions of NCO radicals with H_2 and NO using laser photolysis—laser induced fluorescence, 10:31662 (J;US)
Ion Exchange Chromatography
Chromatographic separation of NPN compounds as a routine method for the analytical evaluation of ^{15}N tests in man (with special reference to hepatopathies), 10:32217 (RA;DD;In German)
Metabolism
Importance of ^{15}N-labelled yeast protein as tracer, 10:32243 (RA;DD;In German)
NITROGEN DIOXIDE
NO_2.
Chemical Reaction Yield
Real time analysis of PETN detonation products, 10:32085 (R;US)
Mass Spectra
Real time analysis of PETN detonation products, 10:32085 (R;US)
Pollution Sources
Indoor air pollution, 10:32127 (R;US)
Predissociation
Structure and predissociation dynamics of electronically excited nitrogen dioxide: A resonance Raman study, 10:32510 (J;US)
Raman Spectra
Structure and predissociation dynamics of electronically excited nitrogen dioxide: A resonance Raman study, 10:32510 (J;US)
NITROGEN HYDRIDES
See also AMMONIA
Infrared Spectra
Detection of the bending fundamental band of DN^+Z by diode laser absorption spectroscopy, 10:32520 (J;US)
NITROGEN IONS
Infrared Spectra
Observation of the ν_2 (bending) fundamental of the HN_2^+ ion at 14.6 micrometers, 10:32530 (J;US)
NITROGEN NITRIDES
See NITROGEN
NITROGEN OXIDES
See also NITRIC OXIDE
NITROGEN DIOXIDE
NITROUS OXIDE
Absorption Spectra
High-resolution spectroscopy of the N_2O in the far infrared using a tunable diode laser, 10:32482 (R;BR;In Portuguese)
Air Pollution Abatement
Advanced furnace concepts - commercial unit heater. Annual report, October 1983-September 1984, 10:31832 (R;US)
Bench-scale process evaluation of reburning and sorbent injection for in-furnace NOx/SOx reduction. Final report, October 1983-October 1984, 10:31368 (R;US)
Overview of EPA's (Environmental Protection Agency's) LIMB technology development program, 10:32146 (R;US)
Air Pollution Monitoring
NOx emissions near a heat pump with gas motor, 10:32140 (R;GB)
Corrosive Effects
Effects of acid deposition on the properties of portland cement concrete: state of knowledge, 10:31577 (R;US)

Diffusion
Evaluation of source strength and dispersion model predictions with data from large nitrogen tetroxide field experiments, 10:32149 (R;US)
Ecological Concentration
Forecasting future industrial SO_2 and NO/sub x/ emissions. Revised, 10:31118 (R;US)
Electron-Molecule Collisions
Atomic processes in electron beam channels. Final report, November 13, 1981-October 30, 1983, 10:32508 (R;US)
Environmental Transport
NOx emissions near a heat pump with gas motor, 10:32140 (R;GB)
Evaporation
Evaluation of source strength and dispersion model predictions with data from large nitrogen tetroxide field experiments, 10:32149 (R;US)
Laser Spectroscopy
High-resolution spectroscopy of the N_2O in the far infrared using a tunable diode laser, 10:32482 (R;BR;In Portuguese)
Recombination
Atomic processes in electron beam channels. Final report, November 13, 1981-October 30, 1983, 10:32508 (R;US)
Reduction
Catalytic activity of western coal fly ashes on the reduction of flue gas NO/sub x/, 10:29668 (R;US)
Sampling
Throughfall rate and chemistry studies: Whiteface Mountain, 10:32132 (R;US)
NITROMETHANE
Lattice Parameters
Structure of potassium tetrakis(isothiocyanato)cobaltate(II) monohydrate nitromethane solvate, $K_2[Co(NCS)_4].H_2O.2CH_3NO_2$, at 120 K by neutron diffraction, 10:31665 (J;DK)
Monoclinic Lattices
Structure of potassium tetrakis(isothiocyanato)cobaltate(II) monohydrate nitromethane solvate, $K_2[Co(NCS)_4].H_2O.2CH_3NO_2$, at 120 K by neutron diffraction, 10:31665 (J;DK)
NITROUS OXIDE
N_2O.
Air Pollution
Influence of the biosphere on the release of N_2O from mineral nitrogenous fertilizers, 10:32138 (R;DE;In German)
G Value
Radiolytic gas generation rates from Hanford RHO-CAW sludge and double-shell slurry immobilized in grout, 10:31576 (R;US)
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
NMR SPECTROMETERS
Computerized Control Systems
Computer-controlled device for detection of nuclear resonance in transient radicals in liquids, 10:32077 (J;GB)
Performance
Computer-controlled device for detection of nuclear resonance in transient radicals in liquids, 10:32077 (J;GB)

Surveys
Nuclear engineering enrollment and degrees, 1984: data summary, 10:33069 (R;US)

NUCLEAR EVAPORATION
See EVAPORATION MODEL

NUCLEAR EXPLOSION DETECTION
Seismic Detection
Frequency dependence of q in the mantle underlying the shield areas of Eurasia. Final technical report, 15 November 1982-30 December 1984, 10:32109 (R;US)
Testing the hypothesis of TTBT (Threshold Test Ban Treaty) compliance, and magnitude-yield regression for explosions in granite. Final technical report, 15 November 1982-30 December 1984, 10:32108 (R;US)

NUCLEAR EXPLOSIONS
Specifically named single nuclear explosions are listed by name and the word EVENT, e.g., BOXCAR EVENT. All projects involving nuclear explosions are listed by the project name and the word PROJECT, e.g., PLOWSHARE PROJECT.
See also CROSSROADS PROJECT
DOMINIC PROJECT
Dosimetry
Analysis of radiation exposure for naval personnel at Operation Sandstone. Technical report, 10:32103 (R;US)
Electromagnetic Pulses
Study to assess the effects of magnetohydrodynamic electromagnetic pulse on electric power systems. Phase I, final report. Volume 3, 10:32105 (R;US)
Environmental Impacts
Nuclear winter: environmental and human consequences of nuclear war - a selected bibliography, 10:31133 (R;US)
Explosions
Densification and reactivity enhancement during the ignition of nuclear weapons. Pt. 1. An analytical approximation of the Guderley implosive densification, 10:32104 (R;DE;In German)
Fission Products
Piggyback satellite packages, 10:32099 (R;US)
Hydrodynamics
Densification and reactivity enhancement during the ignition of nuclear weapons. Pt. 1. An analytical approximation of the Guderley implosive densification, 10:32104 (R;DE;In German)
Implosions
Densification and reactivity enhancement during the ignition of nuclear weapons. Pt. 1. An analytical approximation of the Guderley implosive densification, 10:32104 (R;DE;In German)
Infrared Spectra
High-altitude nuclear-detonation optical infrared effects, 10:32098 (R;US)
Radiation Effects
Analysis of radiation exposure for naval personnel at Operation Sandstone. Technical report, 10:32103 (R;US)
Simulation
Material-response models and ground-motion calculations for high-explosive tests in G-Tunnel tuff. Technical report, 10:32080 (R;US)
Underground Explosions
Laboratory investigation of containment of underground explosions. Technical report, 10:32102 (R;US)
Underwater Explosions
Operation Crossroads. Atomic bomb tests Able and Baker conducted at Bikini Atoll, Marshall Islands on 1 July 1946 and 25 July 1946. Volume 1. History of Director of Ship Material report, 10:32100 (R;US)
Operation Crossroads. Atomic bomb tests Able and Baker conducted at Bikini Atoll, Marshall Islands on 1 July 1946 and 25 July 1946. Volume 3. Appendix v: pictorial review. History of Director of Ship Material report, 10:32101 (R;US)

NUCLEAR FACILITIES

THIOLS
Biological Effects
Kinetic characterization of $^{13}NH_3$ and $[^{13}N]$glutamine metabolism in rabbit heart, 10:32361 (J;US)
Chemical Bonds
Photoelectron spectroscopic study of bonding in inorganic and organometallic compounds (Boron trihalides; silyl amines; thiazyl fluorides; borane adducts; transition metal complexes with isocyanides and olefins), 10:31658 (R;US)
Electrochemistry
Sulfolanes as electrolytic solvents for rechargeable lithium batteries, 10:31087 (RA;US)
Mutagenesis
Mutagen-induced changes in cellular deoxycytidine triphosphate and thymidine triphosphate in Chinese hamster ovary cells, 10:32341 (J;US)
Pyrolysis
Enhanced coal liquefaction by hydropyrolysis in supercritical fluids. Quarterly report, October-December 1984 (Pyrolysis of benzyl phenyl ether; benzyl phenyl sulfide in water and in water and methanol), 10:29634 (R;US)
Supercritical Gas Extraction
Enhanced coal liquefaction by hydropyrolysis in supercritical fluids. Quarterly report, October-December 1984 (Pyrolysis of benzyl phenyl ether; benzyl phenyl sulfide in water and in water and methanol), 10:29634 (R;US)

ORGANIC WASTES
See also *AGRICULTURAL WASTES*
STILLAGE
Recycling
Integrated renewable energy/organic waste recycling system. Final report, July 31, 1982, 10:30070 (R;US)

ORGANIZATIONAL MODELS
Sociology
Politics of schism: routinization and social control in the International Socialists/Socialist Workers' Party, 10:33070 (R;US)

ORGANOMETALLIC COMPOUNDS
For compounds of metals and semimetals with organic compounds, but only when the metal or semimetal is directly bound to carbon.
Chemical Preparation
Synthesis of tetrabutyl tin and its performance characteristics in liquid scintillation counting for radioimmunoassay, 10:31591 (R;IN)
Chemical Reactions
Synthesis of aryl halides via organoborane chemistry, 10:31680 (J;ZZ)
Nuclear Magnetic Resonance
Transition-metal mediated formation and cleavage of carbon-hydrogen bonds: hydrogenolysis of trinuclear alkylidyne clusters and oxidative addition of carbon-hydrogen bonds to rhenium, 10:31675 (R;US)
Purification
Synthesis of tetrabutyl tin and its performance characteristics in liquid scintillation counting for radioimmunoassay, 10:31591 (R;IN)

ORNL
Flywheel Energy Storage
Strategic defense initiative, 10:30751 (R;US)
Isotope Production Reactors
Neutronic calculations for a new high flux reactor, 10:30838 (R;US)
Radioactive Waste Disposal
Monitoring of surface deformation and microseismicity applied to radioactive waste disposal through hydraulic fracturing at Oak Ridge National Laboratory, 10:29913 (R;US)
Space Power Reactors
Strategic defense initiative, 10:30751 (R;US)
Space Weapons
Strategic defense initiative, 10:30751 (R;US)

OSCILLATIONS (PLASMA)

Thermoelectric Properties
Electrical and thermal transport property studies of high-temperature thermoelectric materials. Interim report, 15 August 1983-15 May 1984, 10:31523 (R;US)
OXIDOREDUCTASES
Code number 1.
Inactivation
Oxidation of biologically active reducing substances by ozone, 10:32227 (J;US)
OXOPROPANE
See ACETONE
OXYFLUORIDES
Specific compounds should be indexed by coordination of a descriptor of the form (CATION) COMPOUNDS and the above anion descriptor.
Chemical Preparation
Method for fluorination of actinide fluorides and oxyfluorides using O_2F_2, 10:31714 (P;US)
OXYGEN
Absorption Spectroscopy
Determination of pyrolyzable oxygen in ambient particulate matter, 10:31653 (J;US)
Temperature-programmed evolved gas analysis for determining pyrolyzable oxygen, 10:31654 (J;US)
Alpha Reactions
Comparative analysis of proton and alpha-particle interactions with C, O and Ag, Br nuclei at 4.5 GeV/c per nucleon, 10:32688 (R;SU;In Russian)
Biochemical Reaction Kinetics
Nature of oxygen containing radicals in radiation chemistry and photochemistry of aqueous solutions. Final progress report, July 1982-July 1983, 10:32349 (R;US)
Biological Effects
Nature of oxygen containing radicals in radiation chemistry and photochemistry of aqueous solutions. Final progress report, July 1982-July 1983, 10:32349 (R;US)
Chemical Reaction Yield
Real time analysis of PETN detonation products, 10:32085 (R;US)
Chemisorption
Influence of adsorbed Bi on the chemisorption properties of Pt(111):H_2, CO, and O_2, 10:31501 (J;US)
G Value
Radiolytic gas generation rates from Hanford RHO-CAW sludge and double-shell slurry immobilized in grout, 10:31576 (R;US)
Ion Spectroscopy
Report of the Van de Graaff Group: atomic physics. Beam-foil spectroscopy of single-ionized oxygen, 10:32497 (RA;ZA)
Mass Spectra
Real time analysis of PETN detonation products, 10:32085 (R;US)
Proton Reactions
Comparative analysis of proton and alpha-particle interactions with C, O and Ag, Br nuclei at 4.5 GeV/c per nucleon, 10:32688 (R;SU;In Russian)
Reduction
Electrocatalysts for oxygen electrodes, 10:31100 (RA;US)
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
OXYGEN 16
Energy Levels
Measurement of the $^{16}N(2^-,g.s.)\rightarrow {}^{16}O(0^+,g.s.)+e^- +$nu-bar/sub e/ beta-decay branching ratio, 10:32692 (J;US)
OXYGEN 16 REACTIONS
Quark Matter
Quark-gluon plasma with a 15 GeV/N ^{16}O beam, 10:32768 (RA;DE)
OXYGEN 16 TARGET
Deuteron Reactions
Elastic scattering of polarized deuteron at intermediate energies, 10:32704 (R;FR)
Proton Reactions
Inelastic scattering of polarized protons and nuclear deformation in ^{16}O, ^{18}O, 10:32687 (R;FR)
OXYGEN 18 TARGET
Proton Reactions
Inelastic scattering of polarized protons and nuclear deformation in ^{16}O, ^{18}O, 10:32687 (R;FR)
OXYGEN EFFECT (RADIOBIOLOGY)
See OXYGEN
OXYGEN ENRICHMENT
Membranes
Development and demonstration of a spiral-wound thin-film composite membrane system for the economical production of oxygen-enriched air, Phase IV. Final report, January 1, 1983-December 31, 1984, 10:31552 (R;US)
OXYGEN HYDRIDES

Passive solar houses and electric utilities, an impacts analysis, 10:30289 (BA;US)
Degree Days
A method to adjust heating and cooling load calculations for different altitudes, 10:30483 (BA;US)
Design
Common errors in design and construction of passive solar homes: Results of a review of NMSEI technical assistance program, 10:30446 (BA;US)
Passive Solar Design guidelines and evaluation criteria for builders, 10:30448 (BA;US)
Passive solar strategies as a logic for improved architectural design: two prototypes for modular housing, 10:30508 (BA;US)
Passive solar houses without furnaces in the high Rockies, 10:30513 (BA;US)
Senior citizen housing project at Roosevelt, NJ, 10:30468 (BA;US)
The Umbach Residence as a responsible solar design for a cold, cloudy climate, 10:30506 (BA;US)
Transformations: The design process in residential retrofit active hand / passive design, 10:30503 (BA;US)
Economics
The increased use of passive solar energy in single-family dwellings, Colorado Springs, CO, 10:30287 (BA;US)
Education
Curriculum for the Los Alamos method, 10:30451 (BA;US)
Electric Heating
Comparison of single-zone gas and multi-zone electric heating systems for passive solar homes in the northern United States, 10:30526 (BA;US)
Financial Incentives
Passive solar homes: Incentives for ownership and satisfaction associated with functional characteristics, 10:30425 (BA;US)
Forecasting
Prospects of solar heating in energy system of the future (Denmark), 10:30398 (RA;DK;In Danish)
Glazing Materials
Product update on options for north-facing glazing, 10:30532 (BA;US)
Heat Pipes
A gas-fired heat pipe zone heater for passive solar buildings, 10:30453 (BA;US)
High performance passive solar heating systems with heat pipe energy transfer and latent heat storage, 10:30531 (BA;US)
Heating Load
A method to adjust heating and cooling load calculations for different altitudes, 10:30483 (BA;US)
Annual thermal utility of internal gains, 10:30479 (BA;US)
Historical Aspects
Your solar house thirty-five years later, 10:30452 (BA;US)
Human Factors
Behavioral implications of living with passive solar homes, 10:30421 (BA;US)
Occuptant effects and interactions in passive solar commercial buildings: Preliminary findings from the US DOE passive solar commercial buildings program, 10:30408 (BA;US)
The human element-influences on solar design and performance, 10:30417 (BA;US)
Human Factors Engineering
Size preferences and user reactions to direct gain and indirect gain configurations, 10:30422 (BA;US)
Latent Heat Storage
High performance passive solar heating systems with heat pipe energy transfer and latent heat storage, 10:30531 (BA;US)
New directions for building thermal storage, 10:30359 (R;US)
Marketing
A better understanding of the potential passive solar market, 10:30288 (BA;US)
Marketing Research
Marketing and technical research: Solar users in Arkansas, 10:30285 (BA;US)
Monitoring
Class C survey data versus computer predictions: A comparison between field data and simulations, 10:30496 (BA;US)
Comparison of vertical high performance glazing to sloped double glazing with movable insulation, 10:30484 (BA;US)
Heating season from the Bonneville Power Administration Class B passive solar monitoring program, 10:30432 (BA;US)
Heating season performance and thermal characteristics of the NCSU solar house, 10:30491 (BA;US)
Instrumentation and data analysis for building energy monitoring, 10:30433 (BA;US)
Measured performance of 50 passive solar residences in the US, 10:30435 (BA;US)
Measurement-based calculation of infiltration in passive solar performance evaluation, 10:30497 (BA;US)
Monitored heating season performance of the Mount Airy public library building, 10:30426 (BA;US)
Passive solar and utility load management: Implications for design performance goals and time-of-use utility rates, 10:30495 (BA;US)
Performance of passive solar and energy conserving houses in California--Class B monitoring, 10:30437 (BA;US)

Suncatcher Monitoring Project: three years of monitoring, 10:30517 (BA;US)
The DOE passive solar commercial buildings program: Preliminary results of performance evaluation, 10:30427 (BA;US)
The Massachusetts multi-family passive solar program: A comparison of monitoring data to design tool predictions, 10:30436 (BA;US)
Natural Convection
Heat distribution by natural convection, 10:30499 (BA;US)
Occupants
Behavioral implications of living with passive solar homes, 10:30421 (BA;US)
The impact of occupants on the performance of passive solar commercial buildings, 10:30424 (BA;US)
Performance
An experimental passive solar performance assessment on an earth-sheltered house, 10:30471 (BA;US)
Assessment of passive features in residential buildings, 10:30429 (BA;US)
Class C survey data versus computer predictions: A comparison between field data and simulations, 10:30496 (BA;US)
Comparison of vertical high performance glazing to sloped double glazing with movable insulation, 10:30484 (BA;US)
Extension of the un-utilizability method for multiple-aperture passive systems, 10:30477 (BA;US)
Heating season from the Bonneville Power Administration Class B passive solar monitoring program, 10:30432 (BA;US)
Heating season performance and thermal characteristics of the NCSU solar house, 10:30491 (BA;US)
High performance passive solar heating systems with heat pipe energy transfer and latent heat storage, 10:30531 (BA;US)
Instrumentation and data analysis for building energy monitoring, 10:30433 (BA;US)
Measured performance of 50 passive solar residences in the US, 10:30435 (BA;US)
Measured total performance of a solar home using concrete masonry, 10:30498 (BA;US)
Measurement-based calculation of infiltration in passive solar performance evaluation, 10:30497 (BA;US)
Monitored heating season performance of the Mount Airy public library building, 10:30426 (BA;US)
Passive solar design analysis utilizing electronic spreadsheets, 10:30480 (BA;US)
Passive solar and utility load management: Implications for design performance goals and time-of-use utility rates, 10:30495 (BA;US)
Performance of passive solar and energy conserving houses in California--Class B monitoring, 10:30437 (BA;US)
Performance and evaluation of a passive solar superinsulated residence in the Northeast, 10:30500 (BA;US)
Performance evaluation of a thermosiphon/blockbed system, 10:30541 (BA;US)
Producing solar savings calculations using a CP/M-based electronics spread sheet, 10:30482 (BA;US)
Senior citizen housing project at Roosevelt, NJ, 10:30468 (BA;US)
The DOE passive solar commercial buildings program: Preliminary results of performance evaluation, 10:30427 (BA;US)
The human element-influences on solar design and performance, 10:30417 (BA;US)
The impact of occupants on the performance of passive solar commercial buildings, 10:30424 (BA;US)
The Massachusetts multi-family passive solar program: A comparison of monitoring data to design tool predictions, 10:30436 (BA;US)
The Residential Energy Manual: An example of use and comparison of results to detailed computer simulation, 10:30486 (BA;US)
Your solar house thirty-five years later, 10:30452 (BA;US)
Performance Testing
Analysis of validation data sets in the Class A Performance Evaluation Program, 10:30474 (BA;US)
International Energy Agency Task VIII: description and selected results, 10:30523 (BA;US)
Passive solar/gas fired heating system characterization and development, 10:30493 (BA;US)
Results from the Pala Passive Solar Project, 10:30475 (BA;US)
Phase Change Materials
An integrated phase change heating and cooling system for retrofit and new construction, 10:30529 (BA;US)
Public Opinion
Consumer retrofit responses, 10:30404 (BA;US)
Recommendations
Conservation and solar guidelines, 10:30439 (BA;US)
Passive Solar Design guidelines and evaluation criteria for builders, 10:30448 (BA;US)
Research Programs
Energy strategy selector for small office design, 10:30406 (BA;US)
International Energy Agency Task VIII: description and selected results, 10:30523 (BA;US)
Passive and hybrid solar technologies program summary, 10:30362 (R;US)
Retrofitting
[Solar energy]. Review of progress, 1983, 10:30400 (R;IN)
Computer-aided energy savings redesign of the exterior envelope of an apartment building, 10:31220 (RA;US)
Consumer retrofit responses, 10:30404 (BA;US)
Solar elements as classical counterpoint: passive solar design and the revitalization of historic buildings, 10:30510 (BA;US)
Transformations: The design process in residential retrofit active hand / passive design, 10:30503 (BA;US)
Scale Models
Development of an inexpensive passive solar simulation technique using small-scale models, 10:30438 (BA;US)
Test boxes for comparative and competitive experiments teaching passive solar design, 10:30449 (BA;US)
Self-Pumping Systems
Vapor phase heat transport concepts, 10:30380 (R;US)
Sensible Heat Storage
Real site study of a solar passive house with long time heat storage in the ground, 10:30378 (R;FR;In French)
Surveys
Passive solar homes: Owners react to their interior environments, 10:30414 (BA;US)
Systems Analysis
Passive solar design analysis utilizing electronic spreadsheets, 10:30480 (BA;US)
Technology Assessment
Solar passive heating in Greece, 10:30520 (BA;US)
Vapor phase heat transport concepts, 10:30380 (R;US)
Test Facilities
Passive solar/gas fired heating system characterization and development, 10:30493 (BA;US)
Thermal Efficiency
Suncatcher Monitoring Project: three years of monitoring, 10:30517 (BA;US)
Total energy considerations for passive solar strategies in desert climates passive solar, 10:30465 (BA;US)
Thermal Energy Storage Equipment
A state of the art thermosiphon system, 10:30528 (BA;US)
HVAC control in passive/hybrid buildings with remote thermal storage, 10:30460 (BA;US)
Thermal Insulation
Performance and evaluation of a passive solar superinsulated residence in the Northeast, 10:30500 (BA;US)
Thermal Mass
Performance evaluation of a thermosiphon/blockbed system, 10:30541 (BA;US)
The effect of thermal mass in exterior walls on energy consumption in commercial buildings, 10:31316 (BA;US)
Thermosyphon Effect
A state of the art thermosiphon system, 10:30528 (BA;US)
PASSIVE SOLAR WATER HEATERS
Comparative Evaluations
Results of monitoring flat-plate, batch, and solar/wood domestic water heaters, 10:30537 (BA;US)
Computerized Simulation
Results of testing and modeling passive solar DHW systems, 10:30539 (BA;US)

Design
Large passive "breadbox" water heater, 10:30535 (BA;US)
Performance
Evaluation of performance for a breadbox solar water heater in Iowa, 10:30399 (R;US)
Performance of integrated passive solar water heaters in U.S. climates, 10:30538 (BA;US)
Performance Testing
Results of monitoring flat-plate, batch, and solar/wood domestic water heaters, 10:30537 (BA;US)
Results of testing and modeling passive solar DHW systems, 10:30539 (BA;US)
Thermal Efficiency
Performance of integrated passive solar water heaters in U.S. climates, 10:30538 (BA;US)
Results of testing and modeling passive solar DHW systems, 10:30539 (BA;US)
Thermal Insulation
Superinsulated batch heaters for freezing climates, 10:30536 (BA;US)

PASTEURIZATION
Solar Process Heat
Milk pasteurization using solar energy, 10:30379 (R;FR;In French)

PBFA
See PARTICLE BEAM FUSION ACCELERATOR

PBX DEVICES
PBX is essentially the old PDX with a rearrangement of the divertor coils. The resultant plasma is "beam-shaped" with a goal of 10 percent beta. MHD properties will be studied.
Alpha Particles
Charge exchange recombination spectroscopy as a plasma diagnostic tool (invited), 10:32943 (J;US)
Charged-Particle Transport
Charge exchange recombination spectroscopy as a plasma diagnostic tool (invited), 10:32943 (J;US)
Impurities
Charge exchange recombination spectroscopy as a plasma diagnostic tool (invited), 10:32943 (J;US)
Ion Temperature
Charge exchange recombination spectroscopy measurements of ion temperature and plasma rotation in PBX, 10:32941 (J;US)
Charge exchange recombination spectroscopy as a plasma diagnostic tool (invited), 10:32943 (J;US)
Plasma Diagnostics
Charge exchange recombination spectroscopy measurements of ion temperature and plasma rotation in PBX, 10:32941 (J;US)
Charge exchange recombination spectroscopy as a plasma diagnostic tool (invited), 10:32943 (J;US)

PDX DEVICES
Alpha Particles
Charge exchange recombination spectroscopy as a plasma diagnostic tool (invited), 10:32943 (J;US)
Beam Injection Heating
Neutral beam species measurements using in situ Rutherford backscatter spectrometry, 10:32974 (J;US)
Charged-Particle Transport
Charge exchange recombination spectroscopy as a plasma diagnostic tool (invited), 10:32943 (J;US)
Chemical Composition
Neutral beam species measurements using in situ Rutherford backscatter spectrometry, 10:32974 (J;US)
First Wall
Measurement of the wall radiation in soft x-ray region in PDX (abstract), 10:33051 (J;US)
Impurities
Charge exchange recombination spectroscopy as a plasma diagnostic tool (invited), 10:32943 (J;US)
Ion Temperature
Charge exchange recombination spectroscopy as a plasma diagnostic tool (invited), 10:32943 (J;US)
Plasma Confinement
Princeton Plasma Physics Laboratory annual report, October 1, 1982-September 30, 1983, 10:33028 (R;US)
Plasma Diagnostics
Charge exchange recombination spectroscopy as a plasma diagnostic tool (invited), 10:32943 (J;US)
Neutral beam species measurements using in situ Rutherford backscatter spectrometry, 10:32974 (J;US)
X-Ray Spectra
Measurement of the wall radiation in soft x-ray region in PDX (abstract), 10:33051 (J;US)

PEAT
Chemical Preparation
Development of a pulverized fuel from specially treated peat, 10:29643 (R;SE;In Swedish)
Combustion
Pellets as fuel II. A study of methods and ways of development in the combustion of pellets, 10:29726 (R;SE;In Swedish)
Gasification
Gasification of biomass and peat. Progress report for the period 810701-830630, 10:29642 (R;SE;In Swedish)
Mining
Full depth method for peat mining. Stage 2, 10:29707 (R;SE;In Swedish)
Machine system Rejlers for peat production, 10:29706 (R;SE;In Swedish)
System IUC. Optimization of milled peat production, 10:29708 (R;SE;In Swedish)
Mining Equipment
Full depth method for peat mining. Stage 2, 10:29707 (R;SE;In Swedish)
Physical Properties
Classification of peat. An investigation of the physical properties of peat and the methods of determination, 10:29666 (R;SE;In Swedish)
Quality Control
Importance of storage on peat quality, 10:29663 (R;SE;In Swedish)
Storage
Importance of storage on peat quality, 10:29663 (R;SE;In Swedish)
Technology Utilization
Pellets as fuel II. A study of methods and ways of development in the combustion of pellets, 10:29726 (R;SE;In Swedish)
Water Removal
Development and testing of a novel mechanical device for dewatering peat. Quarterly technical progress report, 1 July-30 September 1984, 10:29714 (R;US)

PEGMATITES
Selected mineral associations in radioactive and REE occurrences in the Baie-Johan-Beetz area, Quebec. A progress report, 10:29859 (RA;CA)
Petrogenesis
Thermally induced chemical migration: a natural analog approach. Progress report, September 1984-September 1985, 10:32409 (R;US)

PELLETS (FUEL)
See FUEL PELLETS

PENETRATORS
Wave Propagation
Nonlinear propagation of elastoplastic waves in Ke penetrators. (Excerpts), 10:31500 (TG;US)

PENNING ION SOURCES
Performance
Production of various ions with PIC type ion source at RIKEN Heavy Ion Linac, 10:31949 (RA;JP;In Japanese)

PENNSYLVANIA
Radioactivity
Outdoor radon monitoring at Canonsburg, Pennsylvania, 1980-1983, 10:32161 (R;US)

PENSTOCKS
Cost
Optimization and selection of penstock and power equipment minihydro installations, 10:30133 (RA;US)
Optimization
Optimization and selection of penstock and power equipment minihydro installations, 10:30133 (RA;US)

PENTAERYTHRITOL TETRANITRATE
See PETN

PENTANE
Solubility
Variation of gas chromatographic retentions with carrier pressure and composition, 10:31649 (J;US)
Thermodynamic Properties
Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
PENTANOLS
Solvent Properties
Rotational reorientation dynamics at high pressures: rhodamine 6G in ethanol from 1 bar to 6 kbar, 10:31678 (J;US)
PENTYL ALCOHOLS
See PENTANOLS
PEOPLE
See HUMAN POPULATIONS
PEOPLES REPUBLIC OF CHINA
See CHINA
PEPTIDES
Nuclear Magnetic Resonance
NMR of ^{13}C enriched amino acids and peptides, 10:32226 (J;US)
PEROVSKITE CRYSTAL STRUCTURE
See CUBIC LATTICES
PERSONNEL
Studies of groups of persons employed in a particular field of endeavor. For studies on individuals in a group see also MAN.
See also MILITARY PERSONNEL
MINERS
REACTOR OPERATORS
Health Hazards
Health and environmental effects document for oil shale: 1984, 10:29843 (R;US)
Studies of the Scottish oil shale industry. Volume 3. Causes of death of Scottish oil shale workers. Final report, 10:29842 (R;US)
Medical Surveillance
37-year medical follow-up of Manhattan Project Pu workers, 10:32334 (J;GB)
Mortality
Updated follow-up of long-term Chalk River employees, 10:32295 (R;CA)
Radiation Doses
Radiation exposures for DOE and DOE contractor employees - 1983. Sixteenth annual report, 10:32297 (R;US)
PERSONNEL DOSIMETRY
Statistical Data
1983 statistical results of the Official Personal Dosimetry Service, 10:32298 (R;DE;In German)
Tissue-Equivalent Detectors
Development and application of the electrochemical etching technique, 10:32022 (R;US)
PERSONNEL FILM DOSIMETRY
See PERSONNEL DOSIMETRY
PERTURBATION THEORY
Iterative Methods
Core design and operation optimization methods based on time-dependent perturbation theory, 10:30779 (R;IL)
PESTICIDES
See also HERBICIDES
Liquid Column Chromatography
Capillary supercritical fluid chromatography/mass spectrometry with electron impact ionization, 10:31640 (J;US)
Mass Spectroscopy
Capillary supercritical fluid chromatography/mass spectrometry with electron impact ionization, 10:31640 (J;US)
PETN
Activation Energy
Three-dimensional hydrodynamic hot-spot model, 10:32083 (R;US)
Detonations
Real time analysis of PETN detonation products, 10:32085 (R;US)
Three-dimensional hydrodynamic hot-spot model, 10:32083 (R;US)
Hydrodynamics
Three-dimensional hydrodynamic hot-spot model, 10:32083 (R;US)
Precipitation
Effect of precipitation variables on the specific surface and explosion characteristics of pentaerythritol tetranitrate, 10:32086 (R;US)
Sensitivity
Effect of precipitation variables on the specific surface and explosion characteristics of pentaerythritol tetranitrate, 10:32086 (R;US)
PETRA STORAGE RING
Drift Chambers
Upgrading the CELLO track detector, 10:32027 (R;DE)
PETROLEUM
Limited to crude oil; see also COAL LIQUIDS, SHALE OIL, etc.
See also RESIDUAL PETROLEUM
Allocations
Department of Energy's participation in the International Energy Agency's recent worldwide oil-sharing test (allocation systems test - AST-4). Hearing before a Subcommittee of the Committee on Government Operations, House of Representatives, Ninety-Eighth Congress, First Session, September 22, 1983, 10:29789 (B;US)
API Gravity
Status of Strategic Petroleum Reserve activities as of March 31, 1985, 10:29801 (R;US)
Chemical Analysis
Chemical characterization of heavy ends of light petroleum, of heavy petroleum, and of liquids derived from other fossil sources, 10:29792 (RA;US)
Chemical characterization of heavy ends of light petroleum, of heavy petroleum, and of liquids derived from other fossil sources, 10:29794 (RA;US)
Chemical Composition
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Combustion
Conversion of oil-designed utility boilers to pulverized coal or coal-water mixture firing. Final report, 10:29722 (R;US)
Consumption Rates
Geopolitics of energy: a global perspective on energy, technology, and employment, 10:30100 (RA;US)
Data Compilation
Energy Facts, 1984, 10:29781 (R;US)
Petroleum Supply Monthly, March 1985, 10:29777 (R;US)
Petroleum Supply Annual, 1984. Volume 2, 10:29779 (R;US)
Petroleum Supply Annual, 1984. Volume 1, 10:29778 (R;US)
Density
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Distillation
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Energy Consumption
Monthly Energy Review, February 1985, 10:31172 (R;US)
Enhanced Recovery
DOE report examines enhanced oil recovery constraints, 10:29771 (J;US)
EOR national potential, 10:29754 (RA;US)
Steamflooding, 10:29767 (RA;US)
Technology appraisal, 10:29755 (RA;US)
Forecasting
Oil prospect, 10:31154 (R;CA)
Fractionation
Supercritical fluid chromatography/supersonic jet spectroscopy. Progress report, February 1, 1985-April 30, 1985, 10:29790 (R;US)
Gas Chromatography
Supercritical fluid chromatography/supersonic jet spectroscopy. Progress report, February 1, 1985-April 30, 1985, 10:29790 (R;US)
Physical Properties
Chemistry of contaminated petroleum fuels, 10:29793 (RA;US)

Stability and processing research for crudes, intermediate and process streams and finished fuel, 10:29772 (RA;US)
Thermophysical properties of real and synthetic fluid mixtures derived from fossil substances, 10:29664 (RA;US)
Pour Point
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Prices
International energy emergency system: issues and sources, 10:31142 (R;US)
Production
Commercial scale demonstration: enhanced oil recovery by micellar-polymer flood. Seventh annual report, October 1983-September 1984, 10:29751 (R;US)
Monthly Energy Review, February 1985, 10:31172 (R;US)
Multi-pattern low-tension demonstration flood, Big Muddy field. Technical progress report, January-March 1985, 10:29753 (R;US)
Process predictive screening models, 10:29756 (RA;US)
Review of the US energy situation, 10:31138 (RA;US)
Quantitative Chemical Analysis
Characterization and comparison of vanadyl and nickel compounds in heavy crude petroleums and asphaltenes by reverse-phase and size-exclusion liquid chromatography/graphite furnace atomic absorption spectrometry, 10:31644 (J;US)
Report of the Van de Graaff Group: nuclear analysis. Determination of silicon in crude and refined oils, 10:31625 (RA;ZA)
Refining
Direct utilization of aromatic feedstocks, 10:29797 (RA;US)
Stability and processing research for crudes, intermediate and process streams and finished fuel, 10:29772 (RA;US)
Research Programs
US fossil program - an overview, 10:29613 (RA;US)
Reserves
EOR national potential, 10:29754 (RA;US)
Estimated oil and gas reserves, Southern California Outer Continental Shelf, December 31, 1982, 10:29743 (R;US)
Geology and petroleum resources of basins in western China, 10:29744 (R;US)
Linking US oil and gas reserve estimates, 10:29742 (R;US)
Resource Development
Energy situation in Morocco and its perspectives, 10:31137 (RA;US)
Stability
Overview on assessment of crude oil and refined product quality during long-term storage, 10:29798 (R;US)
Sulfur Content
Status of Strategic Petroleum Reserve activities as of March 31, 1985, 10:29801 (R;US)
Supercritical Fluid Chromatography
Supercritical fluid chromatography/supersonic jet spectroscopy. Progress report, February 1, 1985-April 30, 1985, 10:29790 (R;US)
Supply and Demand
Oil prospect, 10:31154 (R;CA)
Supply Disruption
Department of Energy's participation in the International Energy Agency's recent worldwide oil-sharing test (allocation systems test - AST-4). Hearing before a Subcommittee of the Committee on Government Operations, House of Representatives, Ninety-Eighth Congress, First Session, September 22, 1983, 10:29789 (B;US)
Underground Storage
Overview on assessment of crude oil and refined product quality during long-term storage, 10:29798 (R;US)
Viscosity
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Gas displacement methods, 10:29762 (RA;US)

PETROLEUM COKE
See COKE
PETROLEUM PRODUCTS

PETROLEUM DEPOSITS
See also OIL FIELDS
Leasing
Final environmental impact statement: proposed 1985 Outer Continental Shelf oil and gas Lease Sale No. 111, offshore the Mid-Atlantic states, 10:29787 (R;US)
Issues surrounding continuation of the noncompetitive oil and gas lottery system, 10:29788 (R;US)
Oil Saturation
Effect of clay minerals on oil saturation determination, 10:29747 (RA;US)
Petroleum Geology
Geology and petroleum resources of basins in western China, 10:29744 (R;US)
Resource Assessment

Geology and petroleum resources of basins in western China, 10:29744 (R;US)
Resource Development
Arctic and offshore research. Technology status report, 10:29745 (R;US)
Stratigraphy
AAPG Eastern Section and US Department of Energy joint meeting, 10:29749 (J;US)
Geology and petroleum resources of basins in western China, 10:29744 (R;US)
Tectonics
Geology and petroleum resources of basins in western China, 10:29744 (R;US)

PETROLEUM DISTILLATES
Boiling point range 0-600°C.
Chemical Analysis
Chemical characterization of heavy ends of light petroleum, of heavy petroleum, and of liquids derived from other fossil sources, 10:29792 (RA;US)
Chemical Composition
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Data Compilation
Petroleum Supply Monthly, March 1985, 10:29777 (R;US)
Density
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Mass Spectroscopy
Chemical characterization of heavy ends of light petroleum, of heavy petroleum, and of liquids derived from other fossil sources, 10:29794 (RA;US)
Physical Properties
Chemistry of contaminated petroleum fuels, 10:29793 (RA;US)
Pour Point
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Production
Stability and processing research for crudes, intermediate and process streams and finished fuel, 10:29772 (RA;US)
Recovery
Chemistry of contaminated petroleum fuels, 10:29793 (RA;US)
Viscosity
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)

PETROLEUM INDUSTRY
Data Compilation
Petroleum Supply Annual, 1984. Volume 1, 10:29778 (R;US)
Meetings
AAPG Eastern Section and US Department of Energy joint meeting, 10:29749 (J;US)

PETROLEUM PRODUCTS
See also DIESEL FUELS
FUEL OILS
GASOLINE
KEROSENE
LIQUEFIED PETROLEUM GASES
LUBRICATING OILS
Data Compilation
Petroleum Supply Monthly, March 1985, 10:29777 (R;US)
Petroleum Supply Annual, 1984. Volume 2, 10:29779 (R;US)
Petroleum Supply Annual, 1984. Volume 1, 10:29778 (R;US)

Energy Consumption
Monthly Energy Review, February 1985, 10:31172 (R;US)
Production
Monthly Energy Review, February 1985, 10:31172 (R;US)
Sales
Petroleum Marketing Monthly, March 1985, 10:29780 (R;US)
Stability
Overview on assessment of crude oil and refined product quality during long-term storage, 10:29798 (R;US)
Underground Storage
Overview on assessment of crude oil and refined product quality during long-term storage, 10:29798 (R;US)
PETROLEUM REFINERIES
Data Compilation
Petroleum Supply Annual, 1984. Volume 1, 10:29778 (R;US)
Water Use
Water use, conservation and wastewater treatment alternatives for oil refineries in New Mexico, 10:29786 (R;US)
PETROLEUM SULFONATES
Electrical Properties
Order of mixing effects for aqueous surfactants, 10:29761 (RA;US)
PHANTOMS
Calibration Standards
Livermore phantom as a calibration standard in the assessment of plutonium in lungs, 10:32818 (R;GB)
PHASE CHANGE MATERIALS
Use with the specific phase change material (e.g. calcium chloride) when known.
Thermodynamic Properties
Advanced phase-change storage for passive solar heating analysis of materials and configuration, 10:30565 (BA;US)
PHENANTHRENE
Solvent Properties
Phase behavior of coal fluids: data for correlation development. Reporting period: November 1, 1984-April 30, 1985, 10:29635 (R;US)
Solvent tailoring in coal liquefaction based on critical properties of physical solvating agents and hydrogen donors. Progress report, August 1980-January 1981, 10:29621 (R;US)
PHENOL
Oxidation
Microanalysis of reaction products in sealed tube wet air oxidations by capillary gas chromatography, 10:31643 (J;US)
PHENOLS
See also PHENOL
Decomposition
Persistence of phenols in aquatic microcosms receiving chronic inputs of coal-derived oil, 10:29688 (J;NL)
Environmental Transport
Persistence of phenols in aquatic microcosms receiving chronic inputs of coal-derived oil, 10:29688 (J;NL)
Potentiometry
Characterization of coal surfaces. Technical progress report, 5 February 1985-20 May 1985, 10:29659 (R;US)
PHENYLALANINE
Catabolism
L-Phenylalanine and L-tyrosine catabolism by selected Streptomyces species, 10:32357 (J;US)
PHENYLETHYLENE
See STYRENE
PHI-1019 RESONANCES
Particle Production
Production and decay of the F-meson in e^+e^- annihilation at 10 GeV centre-of-mass energy, 10:32554 (R;DE)
Production of omega and phi mesons by 193 GeV/C pions and 250 GeV/C protons on a beryllium target, 10:32558 (R;US)
Rest Mass
Production and decay of the F-meson in e^+e^- annihilation at 10 GeV centre-of-mass energy, 10:32554 (R;DE)
Weak Hadronic Decay
Production and decay of the F-meson in e^+e^- annihilation at 10 GeV centre-of-mass energy, 10:32554 (R;DE)
PHI4-FIELD THEORY
Domain Structure
Domain walls at finite temperature, 10:32652 (R;BR)
Phase Transformations
Domain walls at finite temperature, 10:32652 (R;BR)
PHILADELPHIA ELECTRIC POWER REACTOR-1
See LIMERICK-1 REACTOR
PHILADELPHIA ELECTRIC POWER REACTOR-2
See LIMERICK-2 REACTOR
PHORBOL ESTERS
Biological Effects
TPA induces simultaneous alterations in the synthesis and organization of vimentin, 10:32365 (J;US)
PHOSPHORIC ACID
Ion Exchange
New developments in the technology of uranium recovery from phosphoric acid, 10:29883 (RA;IL)
PHOSPHORS
See also PLASTIC SCINTILLATORS
Fluorescence
Proposed method for remote thermometry in turbine engines (Eu-doped yttrium oxide), 10:32056 (R;US)
PHOSPHORUS
Combustion Products
System for the continuous generation of phosphorous aerosols from Red Phosphorus-Butyl Rubber. Final report, 10:31659 (R;US)
X-Ray Fluorescence Analysis
X-ray fluorescence analysis of uranium concentrates, 10:31637 (TG;US)
PHOSPHORYLASES
See PHOSPHOTRANSFERASES
PHOSPHOTRANSFERASES
Code number 2.7.1
Enzyme Activity
Specific gene mutations in L5178Y cells in culture: a report of the US Environmental Protection Agency gene-tox program, 10:32366 (J;NL)
PHOTOCATHODES
Pulse Techniques
Particle-in-cell simulations of the lasertron, 10:31861 (R;US)
PHOTOCONDUCTORS
Noise
Theory of deep level trap effects on generation-recombination noise in HgCdTe photoconductors, 10:31584 (J;US)
Performance
Theory of deep level trap effects on generation-recombination noise in HgCdTe photoconductors, 10:31584 (J;US)
Recombination
Theory of deep level trap effects on generation-recombination noise in HgCdTe photoconductors, 10:31584 (J;US)
Traps
Theory of deep level trap effects on generation-recombination noise in HgCdTe photoconductors, 10:31584 (J;US)
PHOTODISINTEGRATION
See PHOTONUCLEAR REACTIONS
PHOTOELECTRON SPECTROSCOPY
Interpretation of intensities in electron-momentum and photoelectron spectroscopies, 10:32486 (R;AU)
PHOTOGRAPHIC FILM DOSEMETERS
Quality Assurance
Quality assurance tests of the NRPB dental monitoring cassette, 10:32272 (R;GB)
PHOTOLYSIS
Catalysis
Catalysis of photochemical hydrogen production by metal dithiolenes in aqueous organic solvents, 10:30057 (R;DE;In German)
Chemical Reaction Kinetics
Photo-induced cleavage of water with radiolytically prepared heterogeneous platinum catalysts, 10:31692 (RA;IL)
PHOTOMAGNETIC EFFECT
See VISIBLE RADIATION
PHOTOMAGNETOELECTRIC EFFECT
See MAGNETIC FIELDS
PHOTOMETERS
Design
Optical-fiber-laser-photometer for In line measurements in the purex process, 10:32055 (R;DE;In German)

Performance Testing
Test of an optical fibre-laser-photometer with samples of the facility PUTE, 10:32054 (R;DE;In German)
PHOTON ACTIVATION ANALYSIS
See ACTIVATION ANALYSIS
PHOTONS
PHOTON DETECTION (GAMMA)
See GAMMA DETECTION
PHOTON-ELECTRON INTERACTIONS
Coupling
Coupled electron-photon transport calculations using the method of discrete ordinates, 10:32809 (R;US)
Discrete Ordinate Method
Coupled electron-photon transport calculations using the method of discrete ordinates, 10:32809 (R;US)
PHOTON-ION COLLISIONS
Investigations on multiphoton ionization and laser-ion beam photodissociation spectroscopy. Progress report, September 1, 1982-August 31, 1985, 10:31688 (R;US)
PHOTON-MOLECULE COLLISIONS
Desorption
Electron and photon stimulated desorption from organic molecular solids: final state leading to desorption, 10:32507 (R;US)
PHOTON-NUCLEON INTERACTIONS
Multipoles
Pion photoproduction in nucleons at low energies, 10:32596 (R;BR;In Portuguese)
Spin Orientation
Pion photoproduction in nucleons at low energies, 10:32596 (R;BR;In Portuguese)
PHOTON-PHOTON INTERACTIONS
Pair Production
Experimental results on hadron pair production by two photons, 10:32551 (R;DE)
Reviews
Survey of two-photon physics: What have we done, where are we going, 10:32576 (R;DE)
PHOTONS
See also COSMIC PHOTONS
Transmission
Investigations of an ionizing radiation transport in a nitrogen-containing medium, 10:32801 (R;SU;In Russian)
PHOTONUCLEAR REACTIONS
Threshold Energy
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Photodisintegration of the deuteron near threshold, 10:32676 (RA;ZA)
PHOTOREACTIVATION
Stimulation
Stimulation of Escherichia coli DNA photoreactivating enzyme activity by adenosine 5'-triphosphate, 10:32340 (J;US)
PHOTOSYNTHESIS
Biochemical Reaction Kinetics
Primary photosynthesis studies, 10:32216 (RA;US)
Chemical Reaction Kinetics
Mechanisms of photochemical energy conversion by chlorophyll. Technical progress report, March 1, 1983-March 1, 1985, 10:30299 (R;US)
Mathematical Models
Use of the short-lived radioisotopes ^{11}C and ^{13}N to study nitrogen uptake and photosynthate translocation in fodder beet, 10:32236 (R;NZ)
PHOTOSYNTHETIC BACTERIA
Photosynthetic Reaction Centers
Primary photosynthesis studies, 10:32216 (RA;US)
PHOTOSYNTHETIC REACTION CENTERS
Structural Chemical Analysis
Primary photosynthesis studies, 10:32216 (RA;US)
PHOTOVOLTAIC CELLS
See also SOLAR CELLS
Standards
What should DOE do to help establish voluntary consensus standards for measuring and rating the performance of PV modules, 10:30548 (R;US)
PHOTOVOLTAIC CONVERSION
Research Programs
Photovoltaics technology program summary, 10:30297 (R;US)
PHOTOVOLTAIC POWER PLANTS
Construction
The ARCO 1 megawatt Photovoltaic Power Plant, 10:30340 (BA;US)
Design
Design and construction of the SMUDPV1 1-MW photovoltaic power plant. Final report I, 10:30332 (R;US)
The ARCO 1 megawatt Photovoltaic Power Plant, 10:30340 (BA;US)
Financing
Economic aspects of photovoltaic power generation for the utility industry: the third-party financing option, 10:30341 (BA;US)
Performance
SMUDPV1 quarterly performance report II, January-March 1985, 10:30331 (R;US)
PHOTOVOLTAIC POWER SUPPLIES
Total solar: Hybrid photovoltaic, passive-hot-water and illumination fluorescent-concentrator solar-energy system, 10:30527 (BA;US)
Combined Collectors
First-year operational results for the Dallas-Fort Worth Airport linear fresnel lens photovoltaic/photothermal system, 10:30339 (BA;US)
Design
Technical aspects of future photovoltaic power systems, 10:30346 (BA;US)
The Lovington Square shopping center photovoltaic system, 10:30343 (BA;US)
Efficiency
The limits of photovoltaic conversion efficiency- a review, 10:30344 (BA;US)
Financial Incentives
Photovoltaic industry progress through 1984, 10:30337 (R;US)
Forecasting
Photovoltaics in the future Danish energy system (Denmark), 10:30336 (RA;DK;In Danish)
Technical aspects of future photovoltaic power systems, 10:30346 (BA;US)
Manufacturers
Photovoltaic industry progress through 1984, 10:30337 (R;US)
Market
Photovoltaic industry progress through 1984, 10:30337 (R;US)
Operation
Airport solar photovoltaic concentrator, Phase III. Project status report No. ASPCP III-8, February 1, 1984-March 31, 1984, 10:30333 (R;US)
Airport solar photovoltaic concentrator, Phase III. Project status report No. ASPCP III-9, April 1, 1984-May 31, 1984, 10:30334 (R;US)
Airport solar photovoltaic concentrator, Phase III. Project status report No. ASPCP III-10, June 1, 1984-September 30, 1984, 10:30335 (R;US)
Performance
First-year operational results for the Dallas-Fort Worth Airport linear fresnel lens photovoltaic/photothermal system, 10:30339 (BA;US)
First year operation of the Phoenix Sky Harbor solar photovoltaic concentrator project, 10:30342 (BA;US)
Second-generation linear fresnel lens concentrating photovoltaic collectors, 10:30345 (BA;US)
The Lovington Square shopping center photovoltaic system, 10:30343 (BA;US)
PHTHALATES
Crystal Structure
Neutron diffraction study of lithium hydrogen phthalate monohydrate: A material with two very short intramolecular OxxxHxxxO hydrogen bonds, 10:31677 (J;US)
PHWR TYPE REACTORS
See also AGESTA REACTOR
ATUCHA REACTOR
POINT LEPREAU-1 REACTOR

ECCS
Experimental and analytical studies pertaining to small-break LOCA in Pressurised Heavy Water Reactors, 10:30944 (RA;XA)
Loss of Coolant
Experimental and analytical studies pertaining to small-break LOCA in Pressurised Heavy Water Reactors, 10:30944 (RA;XA)
Mixed Oxide Fuels
Thorium fuels for heavy water reactors. Romanian experience, 10:30728 (RA;XA)
Primary Coolant Circuits
Experimental and analytical studies pertaining to small-break LOCA in Pressurised Heavy Water Reactors, 10:30944 (RA;XA)
Risk Assessment
Accident sequence identification for Indian PHWRs, 10:30914 (RA;US)
Thorium Cycle
Thorium fuels for heavy water reactors. Romanian experience, 10:30728 (RA;XA)

PHYSICAL RADIATION EFFECTS
Computerized Simulation
Transient two-dimensional simulation of SEU in a CMOS SRAM cell, 10:31814 (R;US)
Meetings
IAEA advisory group meeting on nuclear data for radiation damage assessment and related safety aspects, Vienna, 12-16 October 1981. Summary report, 10:31459 (R;XA)

PHYSICS
See also *ATOMIC PHYSICS*
HIGH ENERGY PHYSICS
NUCLEAR PHYSICS

SOLID STATE PHYSICS
Meetings
Programme of the autumn meeting of the Dutch Society of Physics held at ECN, Petten, October 19, 1984, 10:32660 (R;NL)

PICEANCE CREEK BASIN
Resource Development
Oil shale in the Piceance Basin: an analysis of land use issues, 10:29853 (R;US)

PIERCE ELECTRON GUNS
Plasma Instability
Particle simulations of the low-α Pierce diode, 10:33047 (J;US)

PIG ION SOURCES
See *PENNING ION SOURCES*

PIGE ANALYSIS
See *PROTON REACTIONS*

PIGMENT CELLS
See *PIGMENTS*

PIGMENTS
See also *HEMOGLOBIN*
Biochemical Reaction Kinetics
Photokinetic aspects of specific hydrogen bonding in all-trans retinal at room temperature, 10:32225 (J;GB)

PILES
See *FOUNDATIONS*

PINS (FUEL)
See *FUEL PINS*

PION CONDENSATION
Density and entropy of the pion excitations in the nuclear matter, 10:32790 (R;SU;In Russian)

PION DETECTION
Cherenkov Counters
π0-4π. A π^0 high solid angle detector and spectrometer, 10:32026 (R;FR;In French)

PION MINUS REACTIONS
Capture
Mechanism of ^{3}He(π^-,pn) reaction, 10:32678 (J;US)
Particle Production
Production of omega and phi mesons by 193 GeV/C pions and 250 GeV/C protons on a beryllium target, 10:32558 (R;US)
Rescattering
Mechanism of ^{3}He(π^-,pn) reaction, 10:32678 (J;US)

PION MINUS-PROTON INTERACTIONS
Particle Production
Investigation of D(1285) and E(1420) meson production in exclusive interactions of negatively charged pions and kaons at the momentum 32,5 GeV/c, 10:32560 (R;SU;In Russian)

PION REACTIONS
See also *PION MINUS REACTIONS*
Delta-1236 Resonances
Pion deuteron scattering and the ΔN interaction, 10:32605 (R;BR)
Elastic Scattering
Elastic scattering of low energy pions, 10:32685 (RA;NL)
Pion deuteron scattering and the ΔN interaction, 10:32605 (R;BR)
Pion nucleon-nucleon system in a three-body model with heavy meson exchanges. Application to: πd-πd, πd-NN and NN-NN at intermediate energies, 10:32674 (R;FR;In French)
Inelastic Scattering
Pion nucleon-nucleon system in a three-body model with heavy meson exchanges. Application to: πd-πd, πd-NN and NN-NN at intermediate energies, 10:32674 (R;FR;In French)
Vertex Functions
Vertex function for pion-deuteron-dibaryon coupling, 10:32606 (R;BR)

PIONIC ATOMS
Binding Energy
Calculations of deeply bound pionic states in heavy and superheavy atoms, 10:32490 (R;DE)
Level Widths
Anomalous strong interaction in pionic atoms of Mg and Al, 10:32491 (RA;NL)
Strong Interactions
Anomalous strong interaction in pionic atoms of Mg and Al, 10:32491 (RA;NL)
Strong interaction effects in pionic ^{208}Pb, 10:32746 (RA;NL)
X-Ray Spectra
Pionic and muonic X-ray studies of ^{237}Np, 10:32492 (RA;NL)

PION-NUCLEON INTERACTIONS
Elastic Scattering
Systematics of πN scattering in chiral soliton models, 10:32616 (J;US)

PIONS
See also *PIONS NEUTRAL*
Coherent Production
Mechanism for coherent production of pions from the decay of resonances, 10:32608 (R;AU)
Leptonic Decay
Chiral symmetry breaking and the pion, 10:32598 (RA;DE)
Particle Decay
Relativistic wavefunction at the origin and the pion decay constant, 10:32591 (R;US)
Particle Production
Coincidence measurement of charged pions and forwards emitted light fragments in the reaction of 1 GeV ^{12}C+^{12}C, 10:32682 (RA;DE)
Mean field approach to pion production in intermediate energy heavy ion collisions, 10:32696 (RA;DE)
Photoproduction
Pion photoproduction in nucleons at low energies, 10:32596 (R;BR;In Portuguese)
Rest Mass
Chiral symmetry breaking and the pion, 10:32598 (RA;DE)

PIONS NEUTRAL
Particle Production
Subthreshold pion production: An intranuclear N-N collision interpretation, 10:32694 (J;US)

PIPE FITTINGS
Friction Factor
Coal water mixture development. Quarterly technical progress report, first quarter 1985 (Vs Reynolds No. for coal slurries), 10:29713 (R;US)

PIPELINE QUALITY GAS
See *HIGH BTU GAS*

PIPELINES
Cathodic Protection
Effectiveness of cathodic protection. Annual report, January-December 1981, 10:29812 (R;US)
Detection
Underground obstacle detection and mapping system. Final report, 10:32051 (R;US)
Flow Rate
Flow rate measurements in the sewage pipeline of the major area of Athens, 10:30052 (R;GR;In Greek)
Fluid Flow
Analysis of drag reducing agents for use at the Strategic Petroleum Reserve site at West Hackberry, Louisiana, 10:29803 (R;US)
Isotope Applications
Flow rate measurements in the sewage pipeline of the major area of Athens, 10:30052 (R;GR;In Greek)
PIPES
See also PENSTOCKS
Crack Propagation
Evaluation of stress corrosion crack growth in BWR piping systems, 10:30690 (R;US)
Cracks
Evaluation of stress corrosion crack growth in BWR piping systems, 10:30690 (R;US)
Deposits
Plating-out of droplets and particles with diameter from 1-9 μm in horizontal pipes and in 90° pipe bends, 10:31740 (R;DE;In German)
Extrusion
Characterization of modified 9 Cr-1 Mo steel extruded pipe, 10:30744 (R;US)
Friction Factor
Coal water mixture development. Quarterly technical progress report, first quarter 1985 (Vs Reynolds No. for coal slurries), 10:29713 (R;US)
Reliability
Reliability analysis of stiff versus flexible piping. Final project report, 10:30814 (R;US)
Stress Corrosion
Evaluation of stress corrosion crack growth in BWR piping systems, 10:30690 (R;US)
PIXE ANALYSIS
Prior to October 1980, this concept was indexed to X-RAY EMISSION ANALYSIS.
Analysis of materials by RBS and PIXE, 10:31610 (RA;CS;In Czech)
Report of the Van de Graaff Group: nuclear analysis. Determination of silicon in crude and refined oils, 10:31625 (RA;ZA)
PLANETARY EVOLUTION
Radioactivation
Cosmic-ray-produced gamma rays in planetary surfaces, 10:32427 (R;US)
PLANETARY NEBULAE
Infrared Spectra
Far-infrared line observations of planetary nebulae. 1: the 0 III spectrum, 10:32440 (R;US)
PLANETS
See also EARTH PLANET
Gamma Spectroscopy
Cosmic-ray-produced gamma rays in planetary surfaces, 10:32427 (R;US)
PLANKTON
Nuclear Explosion Detection
Marine Sample Exploitation Project: estimates regarding the sensitivity and technology for the detection of nuclear explosion debris in the marine environment, 10:32110 (R;US)
PLANNED COMMUNITIES
Energy Efficiency
Energy efficient community and sub-division design for Tumbler Ridge, British Columbia: Passive solar and other dimensions, 10:30412 (BA;US)
Solar Architecture
Designing and evaluating a solar subdivision, 10:30410 (BA;US)
PLANT GROWTH
Photosynthesis
Use of the short-lived radioisotopes ^{11}C and ^{13}N to study nitrogen uptake and photosynthate translocation in fodder beet, 10:32236 (R;NZ)
PLANT GROWTH REGULATORS
Labelling
Preparation of high specific activity 2,4-dichloro phenoxy acetic acid (5-^{3}H), 10:31701 (RA;IL)
PLANT TISSUES
Morphology
Nodules are induced on alfalfa roots by Agrobacterium tumefaciens and Rhizobium trifolii containing small segments of the Rhizobium meliloti nodulation region, 10:32231 (J;US)
PLANTS

HOMOGENEOUS PLASMA
HOT PLASMA
LASER-PRODUCED PLASMA
Alfven Waves
Resistive spectrum of configurations without magnetic shear, 10:32903 (R;DE)
Drift Instability
Simulation of the ion-beam-driven drift instability in a magnetic trap. I, 10:32927 (J;US)
Electric Potential
Numerical simulations of current-limited double layers observed in a linear mirror device, 10:32925 (J;US)
Electrostatics
Theory of resistivity-gradient-driven turbulence, 10:32926 (J;US)
Energy Spectra
Some rigorous results concerning spectral theory for ideal MHD, 10:32884 (R;US)
Hamiltonians
Transformation of Hamiltonians to near action-angle form, 10:32916 (R;US)
Impurities
Impurity monitoring by laser-induced fluorescence techniques (invited), 10:32962 (J;US)
Magnetohydrodynamics
Nonlinear resistive helical states in reversed-field pinches, 10:32928 (J;US)
Some rigorous results concerning spectral theory for ideal MHD, 10:32884 (R;US)
Mathematical Models
Progress report 1 October 1980-30 September 1983 of the section 'Plasma Physics' of the 'Institute for Theoretical Physics' at the Leopold Franzens University, Innsbruck, Austria, 10:32541 (R;AT;In German)
Some rigorous results concerning spectral theory for ideal MHD, 10:32884 (R;US)

Multi-Parameter Analysis
Proposed method for fast determination of plasma parameters, 10:32898 (R;DE)
Nonlinear Problems
Application of nonlinear methods to some current problems in fusion plasma physics. Final report, 10:32887 (R;US)
Nonlinear resistive helical states in reversed-field pinches, 10:32928 (J;US)
Numerical simulations of current-limited double layers observed in a linear mirror device, 10:32925 (J;US)
Simulation of the ion-beam-driven drift instability in a magnetic trap. I, 10:32927 (J;US)
Statistical theory of cubic langmuir turbulence, 10:32978 (J;US)
Theory of resistivity-gradient-driven turbulence, 10:32926 (J;US)
Shock Waves
Simulations of high—Mach-number collisionless perpendicular shocks in astrophysical plasmas, 10:32468 (J;US)
Turbulence
Scale separation closure and Alfven wave turbulence, 10:32889 (R;US)
Statistical theory of cubic langmuir turbulence, 10:32978 (J;US)
Theory of resistivity-gradient-driven turbulence, 10:32926 (J;US)
PLASMA ACCELERATION
High energy plasma accelerators, 10:32891 (R;US)
PLASMA ACCELERATORS
See PLASMA GUNS
PLASMA CONFINEMENT
See also INERTIAL CONFINEMENT
Alpha Reactions
Nuclear techniques for determining the spatial and energy distribution of fast-confined alpha particles in ignited D—T plasma, 10:32973 (J;US)
Plasma Diagnostics
Nuclear techniques for determining the spatial and energy distribution of fast-confined alpha particles in ignited D—T plasma, 10:32973 (J;US)
PLASMA DIAGNOSTICS
Alpha Detection
Alpha particle diagnostic based on damping of lower hybrid waves, 10:32967 (J;US)
Beam-Plasma Systems
Plasma potential formation and measurement in TMX-U and MFTF-B (invited), 10:32953 (J;US)
Cherenkov Counters
Detector development for γ-ray diagnostics of D-T fusion reactions, 10:32966 (J;US)
Compton Spectrometers
Detector development for γ-ray diagnostics of D-T fusion reactions, 10:32966 (J;US)
Computerized Control Systems
TFTR diagnostic control and data acquisition system, 10:32957 (J;US)
Computerized Tomography
CO_2 laser interferometer array for Big Dee, 10:32946 (J;US)
Data Acquisition Systems
Phaedrus diagnostic system, 10:32955 (J;US)
TFTR diagnostic control and data acquisition system, 10:32957 (J;US)
Data Analysis
Determination of experimental tokamak plasma profiles using maximum-entropy analysis, 10:32960 (J;US)
Electric Probes
Energy and density measurements of sloshing ions in tandem-mirror-experiment upgrade using solid-state probe techniques, 10:32923 (J;US)
Langmuir probe on ISX-B, 10:32912 (R;US)
Plasma-edge studies using carbon resistance probes, 10:32931 (J;US)
Electron Cyclotron-Resonance
Electron cyclotron emission diagnostics for mirror devices (invited), 10:32944 (J;US)
Electron Multiplier Detectors
TARA diagnostic set, 10:32956 (J;US)
Electron-Ion Collisions
Coordinated research program at IAEA on atomic collision data for plasma diagnostics, 10:32906 (R;JP)
Electrostatic Analyzers
Neutral beam species measurements using in situ Rutherford backscatter spectrometry, 10:32974 (J;US)
Emission Spectroscopy
Charge exchange recombination spectroscopy measurements of ion temperature and plasma rotation in PBX, 10:32941 (J;US)
Feasibility Studies
^{3}He gas scintillation spectrometer for fusion neutron measurements, 10:32971 (J;US)
Alpha particle diagnostic based on damping of lower hybrid waves, 10:32967 (J;US)
Nuclear techniques for determining the spatial and energy distribution of fast-confined alpha particles in ignited D—T plasma, 10:32973 (J;US)
Fluorescence Spectroscopy
Impurity monitoring by laser-induced fluorescence techniques (invited), 10:32962 (J;US)
Gamma Detection
Fusion gamma diagnostics, 10:32958 (J;US)
Gamma Spectrometers
Nuclear techniques for determining the spatial and energy distribution of fast-confined alpha particles in ignited D—T plasma, 10:32973 (J;US)
Gas Scintillation Detectors
^{3}He gas scintillation spectrometer for fusion neutron measurements, 10:32971 (J;US)
Heterodyne Receivers
Fast scanning heterodyne receiver for the measurement of the time evolution of the electron temperature profile on the Tokamak Fusion Test Reactor, 10:32949 (J;US)
Holography
Four-frame holographic probing system for plasma density measurement (invited), 10:32942 (J;US)
In-Beam Spectroscopy
Plasma potential formation and measurement in TMX-U and MFTF-B (invited), 10:32953 (J;US)
Infrared Spectrometers
Development and application of multichannel collective scattering systems, 10:32965 (J;US)
Interferometers
Far-infrared imaging of tokamak plasma, 10:32945 (J;US)
TARA diagnostic set, 10:32956 (J;US)
Interferometry
Determination of experimental tokamak plasma profiles using maximum-entropy analysis, 10:32960 (J;US)
Far-infrared laser diagnostic on ELMO Bumpy Torus and extreme far-forward laser scattering on the Impurity Study Experiment, 10:32948 (J;US)
Four-frame holographic probing system for plasma density measurement (invited), 10:32942 (J;US)
Ion Probes
Plasma potential formation and measurement in TMX-U and MFTF-B (invited), 10:32953 (J;US)
Ion Spectroscopy
Plasma potential formation and measurement in TMX-U and MFTF-B (invited), 10:32953 (J;US)
Laser Spectroscopy
Evolution of low-density Thomson scattering on ELMO Bumpy Torus, 10:32964 (J;US)
Impurity monitoring by laser-induced fluorescence techniques (invited), 10:32962 (J;US)
TFTR Thomson scattering system, 10:32963 (J;US)
Light Scattering
Far-infrared laser scattering in the ACT-I toroidal device, 10:32932 (J;US)
Liquid Scintillation Detectors
Fusion gamma diagnostics, 10:32958 (J;US)
Magnet Coils
Magnetic diagnostics and feedback control on TFTR (invited), 10:32952 (J;US)
Mass Spectrometers
EparallelB end-loss-ion analyzer for Tandem-Mirror Experiment-Upgrade, 10:32976 (J;US)

Small mass spectrometer probe for analyzing hydrogen ion species, 10:32068 (J;US)

Mass Spectroscopy
- EparallelB end-loss-ion analyzer for Tandem-Mirror Experiment-Upgrade, 10:32976 (J;US)
- Neutral beam species measurements using in situ Rutherford backscatter spectrometry, 10:32974 (J;US)

Michelson Interferometer
- CO_2 laser interferometer array for Big Dee, 10:32946 (J;US)

Microwave Amplifiers
- High-frequency gyrotron scattering diagnostic for instability studies on TARA, 10:32947 (J;US)

Microwave Equipment
- Electron cyclotron emission diagnostics for mirror devices (invited), 10:32944 (J;US)

Monochromators
- Absolute calibration of a ten-channel grating polychromator for electron temperature measurements on Princeton large torus, 10:32950 (J;US)

Multi-Channel Analyzers
- Measurement of the wall radiation in soft x-ray region in PDX (abstract), 10:33051 (J;US)

Neodymium Lasers
- Statistical optics applied to high-power glass lasers, 10:31769 (J;US)

Neutron Cameras
- Approaches to ultrafast neutron detectors, 10:32972 (J;US)
- Neutron streak camera electron gun design, 10:32961 (J;US)

Neutron Detectors
- Collimated ZnS (Ag)-detector array for Tokamak Fusion Test Reactor neutron source strength radial profile measurements, 10:32969 (J;US)

Neutron Dosimetry
- New method for measuring ion temperatures in hot D—T plasma, 10:32968 (J;US)

Neutron Sources
- Effects of neutron energy spectrum on the efficiency calibration of epithermal neutron detectors, 10:32970 (J;US)

Neutron Spectrometers
- ^{3}He gas scintillation spectrometer for fusion neutron measurements, 10:32971 (J;US)
- Nuclear techniques for determining the spatial and energy distribution of fast-confined alpha particles in ignited D—T plasma, 10:32973 (J;US)

Optical Radar
- Lidar-Thomson scattering. Final report, 15 June 1984, 10:32910 (R;DE)

Optical Spectrometers
- Study of impurity radiation on the PLT and TFTR tokamaks with high-resolution, time-resolving spectrometers, 10:32939 (J;US)
- TFTR Thomson scattering system, 10:32963 (J;US)

Optical Systems
- Application of optical phase conjugation to plasma diagnostics (invited), 10:32954 (J;US)
- Far-infrared laser scattering in the ACT-I toroidal device, 10:32932 (J;US)

Plasma Waves
- Alpha particle diagnostic based on damping of lower hybrid waves, 10:32967 (J;US)

Polarimeters
- Far-infrared imaging of tokamak plasma, 10:32945 (J;US)
- Magnetic field measurements based on the Zeeman splitting of forbidden transitions, 10:32940 (J;US)

Pressure Gages
- Tandem-Mirror Experiment-Upgrade neutral pressure measurement diagnostic systems, 10:32959 (J;US)

Probes
- Characterization of laboratory plasmas with probes, 10:32930 (J;US)
- Phaedrus diagnostic system, 10:32955 (J;US)

Reviews
- Characterization of laboratory plasmas with probes, 10:32930 (J;US)
- TARA diagnostic set, 10:32956 (J;US)

Spectrometers
- Improved performance for large area triple layer microchannel-plate detector for a neutral particle spectrometer in Doublet III, 10:32975 (J;US)
- Irradiation effects on components of spectroscopic measurement device for JT-60 diagnostics, 10:32904 (R;JP;In Japanese)

Spectroscopy
- Charge exchange recombination spectroscopy as a plasma diagnostic tool (invited), 10:32943 (J;US)

Streak Cameras
- Microchannel plate streak camera, 10:32937 (J;US)

Streak Photography
- Approaches to ultrafast neutron detectors, 10:32972 (J;US)
- Fiber-optic spectral-streak equalizer, 10:32067 (J;US)

Thomson Scattering
- Development and application of multichannel collective scattering systems, 10:32965 (J;US)
- Evolution of low-density Thomson scattering on ELMO Bumpy Torus, 10:32964 (J;US)
- Instrument to synchronize Thomson scattering diagnostic measurements with MHD acitivity in a tokamak, 10:32914 (R;US)
- TFTR Thomson scattering system, 10:32963 (J;US)

Ultraviolet Spectrometers
- Study of impurity radiation on the PLT and TFTR tokamaks with high-resolution, time-resolving spectrometers, 10:32939 (J;US)

X-Ray Spectrometers
- Simulation of bent crystal spectrometers, 10:32933 (J;US)
- Tokamak Fusion Test Reactor horizontal high-resolution Bragg x-ray spectrometer (abstract), 10:32938 (J;US)
- Ultrafast turnoff laser triggered gating system for microchannel-plate intensified x-ray spectrometers, 10:32934 (J;US)

X-Ray Spectroscopy
- Fast multichannel electron temperature diagnostic for TFTR using x-ray imaging, 10:32936 (J;US)
- Monte-Carlo error analysis in x-ray spectral deconvolution, 10:32881 (J;US)

Zeeman Effect
- Magnetic field measurements based on the Zeeman splitting of forbidden transitions, 10:32940 (J;US)

PLASMA DRIFT

Interactions
- Three-drift-wave interaction at finite parallel wavelength: Bifurcations and transition to turbulence, 10:32902 (R;DE)

Plasma Instability
- Three-drift-wave interaction at finite parallel wavelength: Bifurcations and transition to turbulence, 10:32902 (R;DE)

PLASMA FOCUS DEVICES

Electron Beams
- Operation of a plasma focus device as a compact electron accelerator, 10:31887 (J;US)

Neutron Emission
- Two phases of neutron production in the Poseidon plasma focus, 10:32897 (R;DE)

Plasma Betatrons
- Operation of a plasma focus device as a compact electron accelerator, 10:31887 (J;US)

Plasma Instability
- Four-fluid description of turbulent plasma focus dynamics, 10:32896 (R;DE)

PLASMA GUNS

Efficiency
- Energy efficiency of the CTX magnetized coaxial plasma source, 10:33020 (R;US)

Fabrication
- Lanthanum hexaboride tapered filament in a plasma source, 10:32977 (J;US)

Feasibility Studies
- Development of rf plasma generators for neutral beams, 10:33055 (J;US)

Uses
- Development of rf plasma generators for neutral beams, 10:33055 (J;US)

PLASMA HEATING
Ion Beams
Energy spectra of slowed-down neutrals from the heating beams in ASDEX, 10:32907 (R;NL)
Shock Heating
Plasma heating at collisionless shocks due to the kinetic cross-field streaming instability, 10:32547 (J;US)
Waveguides
Improved directional couplers for overmoded waveguide systems, 10:32908 (R;DE)
PLASMA JETS
Instability
Four phase model for turbulent instabilities calculation in plasma jets, 10:32909 (R;DE;In German)
PLASMA MACROINSTABILITIES
See also BALLOONING INSTABILITY
FLUTE INSTABILITY
KINK INSTABILITY
TEARING INSTABILITY
Computer Codes
User's manual for the FLORA equilibrium and stability code, 10:32920 (R;US)
PLASMA OSCILLATIONS
See PLASMA WAVES
PLASMA (QUARK)
See QUARK MATTER
PLASMA SHEATH
Drift Instability
Microstability properties of the sheath region of a field-reversed configuration, 10:32929 (J;US)
PLASMA SWITCHES
Performance
Multi-megampere operation of plasma compression opening switches in planar geometry, 10:31806 (R;US)
PLASMA WAVES
Convective Instabilities
Effects of finite-current-channel width on the current convective instability. Memorandum report, October 1983-October 1984, 10:32457 (R;US)
Cylindrical Configuration
Spectrum of resistive MHD modes in cylindrical plasmas, 10:32979 (J;GB)
Dispersion Relations
Development and application of multichannel collective scattering systems, 10:32965 (J;US)
Magnetohydrodynamics
Spectrum of resistive MHD modes in cylindrical plasmas, 10:32979 (J;GB)
Relativistic Range
Relativistic saturation of 'beat waves', 10:32918 (R;GB)
Saturation
Relativistic saturation of 'beat waves', 10:32918 (R;GB)
Shear
Effects of magnetic shear on lower hybrid waves in the suprauroral region. Final report, 1 April 1983-31 March 1984, 10:32458 (R;US)
Wave Propagation
Relativistic saturation of 'beat waves', 10:32918 (R;GB)
PLASMIDS
Recombinant DNA
Differential behavior of plasmids containing chromosomal DNA insertions of various sizes during transformation and conjugation in Haemophilus influenzae, 10:32232 (J;US)
PLASTIC SCINTILLATION COUNTERS
See PLASTIC SCINTILLATION DETECTORS
PLASTIC SCINTILLATION DETECTORS
Calibration
Construction and calibration of a simple scintillation counter for monitoring radioactive gases in ducts, 10:32013 (R;GB)
Fabrication
Construction and calibration of a simple scintillation counter for monitoring radioactive gases in ducts, 10:32013 (R;GB)
PLASTIC SCINTILLATORS
Performance
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Response of thin film plastic scintillators to fission fragments, 10:32031 (RA;ZA)
Response Functions
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Response of thin film plastic scintillators to fission fragments, 10:32031 (RA;ZA)
PLASTICS
See also POLYSTYRENE
POLYURETHANES
THERMOPLASTICS
Surface Coating
Production of selective optical coatings on plastic sheet. Final report, 10:31281 (R;XE)
Uses
Technological and economic aspects of the use of plastics for solar engineering, 10:30549 (R;AT;In German)
PLATES
Thicker than SHEETS or FOILS.
Destructive Testing
Destructive examination of test plates 1 and 2 of the defects detection trials (DDT), 10:31796 (R;XE)
PLATINUM
Catalytic Effects
Gasification of disordered carbons (chars). Final report, 10:29618 (R;US)
Photo-induced cleavage of water with radiolytically prepared colloidal platinum catalysts, 10:31691 (RA;IL)
Photo-induced cleavage of water with radiolytically prepared heterogeneous platinum catalysts, 10:31692 (RA;IL)
Sorptive Properties
Characterization of catalysts with metal-support effects and of the species adsorbed on their surfaces. Progress report, September 1, 1984-August 30, 1985, 10:31656 (R;US)
Influence of adsorbed Bi on the chemisorption properties of Pt(111):H_2, CO, and O_2, 10:31501 (J;US)
Thermal Cycling
Multipurpose pan development, 10:29893 (R;US)
Thermal Expansion
Multipurpose pan development, 10:29893 (R;US)
PLATINUM ALLOYS
Electric Conductivity
Suppression of spin fluctuations by alloying in UPt_3, 10:31509 (J;US)
Specific Heat
Suppression of spin fluctuations by alloying in UPt_3, 10:31509 (J;US)
Spin Waves
Suppression of spin fluctuations by alloying in UPt_3, 10:31509 (J;US)
PLATINUM COMPLEXES
Chemical Preparation
Pb/sub 0.77/K/sub 0.23/[Pt$(CN)_4$].1.5H_2O: a new type of partially oxidized tetracyanoplatinate salt, 10:31522 (J;GB)
Electric Conductivity
Pb/sub 0.77/K/sub 0.23/[Pt$(CN)_4$].1.5H_2O: a new type of partially oxidized tetracyanoplatinate salt, 10:31522 (J;GB)
PLATINUM METAL ALLOYS
See also PALLADIUM ALLOYS
PLATINUM ALLOYS
RUTHENIUM ALLOYS
Electronic Structure
Noble metals as incipient transition metals, 10:31435 (R;US)
PLESIOTHERAPY
See RADIOTHERAPY
PLT DEVICES
Blackbody Radiation
Absolute calibration of a ten-channel grating polychromator for electron temperature measurements on Princeton large torus, 10:32950 (J;US)
Electron Temperature
Absolute calibration of a ten-channel grating polychromator for electron temperature measurements on Princeton large torus, 10:32950 (J;US)
Impurities
Study of impurity radiation on the PLT and TFTR tokamaks with high-resolution, time-resolving spectrometers, 10:32939 (J;US)

Lower Hybrid Heating
Princeton Plasma Physics Laboratory annual report, October 1, 1982-September 30, 1983, 10:33028 (R;US)
Plasma Diagnostics
Plasma-edge studies using carbon resistance probes, 10:32931 (J;US)
Study of impurity radiation on the PLT and TFTR tokamaks with high-resolution, time-resolving spectrometers, 10:32939 (J;US)
Plasma Scrape-Off Layer
Plasma-edge studies using carbon resistance probes, 10:32931 (J;US)
X-Ray Spectroscopy
Study of impurity radiation on the PLT and TFTR tokamaks with high-resolution, time-resolving spectrometers, 10:32939 (J;US)
PLUMES
Atmospheric Circulation
Development of a model to estimate dispersion of elevated releases in the shear-dominated boundary layer. Final report, 10:32143 (R;US)
Diffusion
Evaluation of the 2DFLOW and hybrid complex-terrain dispersion models with the 1980 ASCOT data base from The Geysers. Final report, 10:32118 (R;US)
PLUTONIUM
Biological Effects
37-year medical follow-up of Manhattan Project Pu workers, 10:32334 (J;GB)
Environmental Transport
Radionuclide diffusion and mobilities in compacted bentonite, 10:32178 (R;SE)
Geochemistry
Temperature dependence of actinide solubilities and speciation, 10:29945 (RA;US)
Isotope Ratio
Feasibility study of plutonium isotopic analysis of resin beads by nondestructive gamma-ray spectroscopy, 10:30038 (R;US)
Nondestructive Analysis
Integrated nondestructive assay system for a new plutonium scrap recovery facility, 10:30037 (R;US)
Photometry
Optical-fiber-laser-photometer for In line measurements in the purex process, 10:32055 (R;DE;In German)
Test of an optical fibre-laser-photometer with samples of the facility PUTE, 10:32054 (R;DE;In German)
Recovery
Method for fluorination of actinide fluorides and oxyfluorides using O_2F_2, 10:31714 (P;US)
Spatial Dose Distributions
Cigarette smoke and plutonium, 10:32354 (RA;US)
X-Ray Detection
Livermore phantom as a calibration standard in the assessment of plutonium in lungs, 10:32818 (R;GB)
PLUTONIUM 238
Alpha Decay
Self-irradiation effects in ^{238}Pu-substituted zirconolite. Pt. 1. Temperature dependence of damage, 10:31540 (J;NL)
Denatured Fuel
Denaturing plutonium with fusion breeders, 10:32999 (RA;IL)
Gamma Spectroscopy
Feasibility study of plutonium isotopic analysis of resin beads by nondestructive gamma-ray spectroscopy, 10:30038 (R;US)
Radioecological Concentration
Annual report of the Surface Air Sampling Program, 10:32157 (R;US)
PLUTONIUM 239
Gamma Spectroscopy
Feasibility study of plutonium isotopic analysis of resin beads by nondestructive gamma-ray spectroscopy, 10:30038 (R;US)
Measurement control for plutonium isotopic measurements using gamma-ray spectrometry, 10:30044 (R;US)
Inhalation
Low-level $^{239}PuO_2$ lifespan studies, 10:32330 (RA;US)
Personnel Monitoring
External measurement of ^{239}Pu in human lung with a NaI-CsI Phoswich detector, 10:32307 (RA;IL)
Radiobiology
Fetal and juvenile radiotoxicity, 10:32331 (RA;US)
Radioecological Concentration
Annual report of the Surface Air Sampling Program, 10:32157 (R;US)
Determining the number and size of soil aliquots for assessing particulate contaminant concentrations, 10:32179 (J;US)
Study on radioactive contamination of the Baltic Sea in 1979-1980, 10:32200 (R;SU;In Russian)
PLUTONIUM 239 TARGET
Neutron Reactions
Parameters of the multilevel analysis of the Pu-239 cross sections in resonance region, 10:32750 (R;SU;In Russian)
PLUTONIUM 240
Fission
Microscopic analysis of collective dynamics in low energy fission, 10:32749 (R;FR)
Gamma Spectroscopy
Feasibility study of plutonium isotopic analysis of resin beads by nondestructive gamma-ray spectroscopy, 10:30038 (R;US)
Radioecological Concentration
Determining the number and size of soil aliquots for assessing particulate contaminant concentrations, 10:32179 (J;US)
Study on radioactive contamination of the Baltic Sea in 1979-1980, 10:32200 (R;SU;In Russian)
PLUTONIUM 241
Gamma Spectroscopy
Feasibility study of plutonium isotopic analysis of resin beads by nondestructive gamma-ray spectroscopy, 10:30038 (R;US)
PLUTONIUM CARBONATES
Solubility
Actinide solution equlibria and solubilities in geologic systems, 10:29979 (R;SE)
Stability
Actinide solution equlibria and solubilities in geologic systems, 10:29979 (R;SE)
PLUTONIUM COMPOUNDS
See also PLUTONIUM CARBONATES
PLUTONIUM FLUORIDES
PLUTONIUM HYDROXIDES
PLUTONIUM OXIDES
Solubility
Temperature dependence of actinide solubilities and speciation, 10:29945 (RA;US)
Surface Contamination
Investigation of the liability of surface contamination arising from plutonium containing solutions, 10:30022 (R;GB)
PLUTONIUM DIOXIDE
Burnup
Test of calorimetry for high burn-up plutonium, 10:30033 (R;XE)
Calorimetry
Test of calorimetry for high burn-up plutonium, 10:30033 (R;XE)
PLUTONIUM FLUORIDES
Filtration
Multipurpose pan development, 10:29893 (R;US)
PLUTONIUM HYDROXIDES
Solubility
Actinide solution equlibria and solubilities in geologic systems, 10:29979 (R;SE)
Stability
Actinide solution equlibria and solubilities in geologic systems, 10:29979 (R;SE)
PLUTONIUM ISOTOPES
See also PLUTONIUM 238
PLUTONIUM 239
PLUTONIUM 240
PLUTONIUM 241
Isobaric Analogs
Isopin violating decay of the IAS, 10:32777 (RA;NL)
PLUTONIUM OXIDES
See also PLUTONIUM DIOXIDE
Inhalation
Inhaled plutonium oxide in dogs, 10:32329 (RA;US)

PLUTONIUM RECYCLE
  Mixed Oxide Fuels
    KWU/ALKEM experience in thermal Pu-recycling, 10:30713 (RA;XA)
PMMA
  Chemical Properties
    Identification of chemical and physical phenomena affecting the durability of silvered polymer (PMMA) mirrors, 10:30551 (R;US)
  Combustion Products
    Soot and radiation in free boundary layer flames, 10:31719 (R;US)
  Physical Properties
    Identification of chemical and physical phenomena affecting the durability of silvered polymer (PMMA) mirrors, 10:30551 (R;US)
PNA
  See POLYCYCLIC AROMATIC HYDROCARBONS
PNEUMOCONIOSES
  Epidemiology
    Studies of the Scottish oil shale industry. Final report. Volume 2. Shale workers' pneumoconiosis and skin conditions: epidemiological surveys of surviving ex-shale workers, 10:29841 (R;US)
POINT LEPREAU-1 REACTOR
  St. John, New Brunswick, Canada
  Primary Coolant Circuits
    Innovative ultrasonics for power plant commissioning, 10:30731 (R;CA)
  Steam Generators
    Start-up support for New Brunswick Electric's Point Lepreau nuclear steam generators, 10:30724 (R;CA)
POINT POLLUTANT SOURCES
  Used for general articles when sources are not named.
  Mathematical Models
    Evaluation of rural air-quality simulation models. Appendix g. Statistical tables for PPSP (Power Plant Siting Program), 10:30659 (R;US)
POISONS (CHEMICAL)

POTASSIUM
Diffusion
Alkali atom impact reactions on coal combustion substrates. Quarterly report Nos. 6 and 7, November 15, 1984-June 15, 1985 and March 15, 1985-June 15, 1985, 10:29723 (R;US)
POTASSIUM 43
Excited States
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. The level structure, gamma-ray branching and mean lifetimes of states in ^{43}Sc, ^{43}K and ^{55}Mn, 10:32705 (RA;ZA)
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Spins of excited states in ^{43}Sc, ^{43}K and the mechanism of$^{48'50}\mathrm{Ti}(p,p',\gamma)^{48'50}\mathrm{Ti}$ and $^{40'50}\mathrm{Ti}(\alpha,\alpha'\gamma)^{48'50}\mathrm{Ti}$ reactions at Ep = 6 MeV and Eα = 12 MeV, 10:32706 (RA;ZA)
Lifetime
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. The level structure, gamma-ray branching and mean lifetimes of states in ^{43}Sc, ^{43}K and ^{55}Mn, 10:32705 (RA;ZA)
Spin
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Spins of excited states in ^{43}Sc, ^{43}K and the mechanism of$^{48'50}\mathrm{Ti}(p,p',\gamma)^{48'50}\mathrm{Ti}$ and $^{40'50}\mathrm{Ti}(\alpha,\alpha'\gamma)^{48'50}\mathrm{Ti}$ reactions at Ep = 6 MeV and Eα = 12 MeV, 10:32706 (RA;ZA)
POTASSIUM CARBONATES
Catalytic Effects
Catalyzed gasification of coal: isotope and XPS studies. Reporting period: February 16, 1985-May 15, 1985, 10:29632 (R;US)
Catalyzed gasification of coal: isotope and XPS studies. Reporting period: November 15, 1982-February 14, 1983, 10:29633 (R;US)
Labelling
Catalyzed gasification of coal: isotope and XPS studies. Reporting period: November 15, 1982-February 14, 1983, 10:29633 (R;US)
POTASSIUM CHLORIDES
Specific Heat
Specific heat measurements in KCN:KCL mixed crystals, 10:31567 (R;BR;In Portuguese)
POTASSIUM COMPOUNDS
See also POTASSIUM CARBONATES
POTASSIUM CHLORIDES
POTASSIUM HYDROXIDES
POTASSIUM PHOSPHATES
POTASSIUM SULFATES
Color Centers
Color centers in KCN: ferro-elastic alignment and free optical absorption of phonons, 10:31566 (R;BR;In Portuguese)
Electric Dipoles
Electric dipole ordering in alkali-cyanides: NaCN and KCN, 10:31578 (R;BR)
Lattice Parameters
Structure of potassium tetrakis(isothiocyanato)cobaltate(II) monohydrate nitromethane solvate, $K_2[Co(NCS)_4].H_2O.2CH_3NO_2$, at 120 K by neutron diffraction, 10:31665 (J;DK)
Monoclinic Lattices
Structure of potassium tetrakis(isothiocyanato)cobaltate(II) monohydrate nitromethane solvate, $K_2[Co(NCS)_4].H_2O.2CH_3NO_2$, at 120 K by neutron diffraction, 10:31665 (J;DK)
Specific Heat
Specific heat measurements in KCN:KCL mixed crystals, 10:31567 (R;BR;In Portuguese)
POTASSIUM HYDROXIDES
Thermodynamic Properties
Experimental evaluation of the thermodynamic properties of concentrated aqueous potassium hyroxide solutions. Final report, 10:31683 (R;US)

POTASSIUM PHOSPHATES
Refractivity
Refractive indices and thermo-optic coefficients of nonlinear crystals isomorphic to KH_2PO_4, 10:31766 (R;US)
Thermodynamic Properties
Refractive indices and thermo-optic coefficients of nonlinear crystals isomorphic to KH_2PO_4, 10:31766 (R;US)
POTASSIUM SULFATES
Reduction
Alkali atom impact reactions on coal combustion substrates. Quarterly report Nos. 6 and 7, November 15, 1984-June 15, 1985 and March 15, 1985-June 15, 1985, 10:29723 (R;US)
POTENTIAL SCATTERING
Scattering Lengths
To the theory of scattering by two potentials, 10:32865 (R;SU;In Russian)
POWDERS
Neutron Diffraction
Profile refinement of powder diffraction patterns using the Voigt function, 10:32807 (R;GB)
POWER CONDITIONING CIRCUITS
Electric Power
Advanced converter technology. Final report, May 23, 1979-December 31, 1984, 10:30653 (R;US)
Magnetic Circuits
Advanced converter technology. Final report, May 23, 1979-December 31, 1984, 10:30653 (R;US)
Switching Circuits
Advanced converter technology. Final report, May 23, 1979-December 31, 1984, 10:30653 (R;US)
Transformers
Advanced converter technology. Final report, May 23, 1979-December 31, 1984, 10:30653 (R;US)
POWER DEMAND
Forecasting
Documentation of forecasting models for Chelan County PUD No. 1, 10:31166 (R;US)
POWER DISTRIBUTION
Simulation
Studies of LMFBR: method of analysis and some results, 10:30737 (R;BR;In Portuguese)

After-Heat
Improved decay heat model for DSNP, 10:30773 (RA;IL)
Data Compilation
Licensed operating reactors. Status summary report, data as of March 31, 1985. Volume 9, No. 4 , 10:30669 (R;US)
Design
Light-water reactor research and development, 10:31135 (R;US)
Economics
Light-water reactor research and development, 10:31135 (R;US)
Fuel Cans
Comprehensive comparison of out-of-pile and in-pile bundle investigations on fuel rod deformation behavior during loss of coolant accidents, 10:30840 (R;DE;In German)
Fuel Rods
DEPTH-CHARGE static and time-dependent perturbation/sensitivity system for nuclear reactor core analysis. Revision I, 10:30821 (R;US)
Loss of Coolant
Comprehensive comparison of out-of-pile and in-pile bundle investigations on fuel rod deformation behavior during loss of coolant accidents, 10:30840 (R;DE;In German)
Demands on small-break LOCA codes from the licensing point of view, 10:30931 (RA;XA)
Evaluation of heat transfer coefficient in aiding mixed convection on a vertical flat plate with uniform heat flux, 10:30776 (RA;IL)
Power Generation
Licensed operating reactors. Status summary report, data as of March 31, 1985. Volume 9, No. 4 , 10:30669 (R;US)
Primary Coolant Circuits
Transient three-phase three-component systems. Part 1. Formulation of the system of differential equations, 10:31039 (TG;US)
Reactor Accidents
Transient three-phase three-component systems. Part 1. Formulation of the system of differential equations, 10:31039 (TG;US)
Reactor Cores
Core design and operation optimization methods based on time-dependent perturbation theory, 10:30779 (R;IL)
Reactor Licensing
Demands on small-break LOCA codes from the licensing point of view, 10:30931 (RA;XA)
Reactor Operation
Licensed operating reactors. Status summary report, data as of March 31, 1985. Volume 9, No. 4 , 10:30669 (R;US)
Licensee Event Report (LER) compilation for month of April 1985. Volume 4, No. 4, 10:31005 (R;US)

Reactor Safety
Licensee Event Report (LER) compilation for month of April 1985. Volume 4, No. 4, 10:31005 (R;US)
Reliability
Light-water reactor research and development, 10:31135 (R;US)
Safety
Light-water reactor research and development, 10:31135 (R;US)
Steam Generators
SIGNI. A simplified lumped-parameter steam generator model, 10:30774 (RA;IL)
POWER SERIES
Iterative Methods
Zeroes of infinite series, 10:33090 (R;BR)
POWER SUBSTATIONS
Term is used for an assembly of equipment in an electric power system for the transmission, transformation, or switching of electric energy.
Construction
Draft supplement to the environmental statement fiscal year 1976 proposed program. Facility location evaluation for Hangman Creek Area service study area 76-8, 10:32206 (R;US)
Environmental Impact Statements
Final environmental statement: proposed fiscal year 1975 program, Bonneville Power Administration, 10:32208 (R;US)
Environmental Impacts
Draft supplement, final environmental impact statement. Bonneville Power Administration proposed fiscal year 1979 program: facility location supplement, southwest Oregon area service, Buckely-Summer Lake 500 kV line, 10:30658 (R;US)
Forests
Draft supplement to the environmental statement fiscal year 1975 proposed program. Facility location evaluation for Sappho service study area 75-13, 10:32202 (R;US)
POWER SUPPLIES
See also PHOTOVOLTAIC POWER SUPPLIES
Activation Energy
Electric-discharge excitation and energy source integration. Final report, 30 January 1980-31 December 1983, 10:32536 (R;US)
Equipment Interfaces
Supermite vacuum interface design, 10:33037 (R;US)
POWER SYSTEMS
Includes electric power networks with associated generating and transmission facilities.
See also RANKINE CYCLE POWER SYSTEMS
SOLAR-ASSISTED POWER SYSTEMS
Electromagnetic Pulses
Study to assess the effects of magnetohydrodynamic electromagnetic pulse on electric power systems. Phase I, final report. Volume 3, 10:32105 (R;US)
Failures
Nuclear power plant design: contribution of probabilistic methods and their application to a total loss of electric power supplies, 10:30911 (RA;US)
Operation

PROTON BEAMS
Electron Cooling
Phase-space cooling of ion beams, 10:31892 (R;CH)
Rutherford Scattering
Rutherford scattering applied to the study of hydrogen in amorphous silicon, 10:32495 (RA;JP;In Japanese)
Stochastic Cooling
Phase-space cooling of ion beams, 10:31892 (R;CH)
PROTON REACTIONS
Breakup Reactions
Comparative analysis of proton and alpha-particle interactions with C, O and Ag, Br nuclei at 4.5 GeV/c per nucleon, 10:32688 (R;SU;In Russian)
Capture
Nucleon-nucleus reactions at ultrarelativistic energies, 10:32617 (J;US)
Charge-Exchange Reactions
Specificity of ^{71}Ga(p,n)^{71}Ge at 35 MeV for Gamow-Teller strength, 10:32708 (R;US)
Inclusive Interactions
Short-range and long-range correlations in the p-Xe scattering at 200 GeV, 10:32721 (RA;DE)
Inelastic Scattering
Analyzing power for the inelastic continuum with 200 MeV protons, 10:32714 (J;NL)
Excitation of $\Delta L=0$ spin-flip transitions in the $N=28$ isotones by 201 MeV proton inelastic scattering, 10:32703 (R;FR)
Inelastic scattering of polarized protons and nuclear deformation in ^{16}O, ^{18}O, 10:32687 (R;FR)
Nucleon-nucleus reactions at ultrarelativistic energies, 10:32617 (J;US)
Polarization transfer in inelastic scattering and pionic models of the EMC effect, 10:32673 (R;US)
Semiclassical calculation of the nuclear response function at high momentum, 10:32786 (R;FR)
Knock-Out Reactions
Report of the Research Group. Analyzing-power measurements on quasi-free (p,pα) knockout from ^{9}Be at 150MeV, 10:32677 (RA;ZA)
Validation of the intra-nuclear-cascade-evaporation model for particle production, 10:32791 (R;DE)
Particle Production
Charged-hyperon production by 400-GeV protons, 10:32567 (J;US)
Production of omega and phi mesons by 193 GeV/C pions and 250 GeV/C protons on a beryllium target, 10:32558 (R;US)
Pickup Reactions
(p,d) and (p,t) reactions on ^{9}Be at Esub(p)=50 and 72 MEV, 10:32689 (RA;SU;In Russian)
Polarization-Asymmetry Ratio
Analyzing power for the inelastic continuum with 200 MeV protons, 10:32714 (J;NL)
Report of the Research Group. Analyzing-power measurements on quasi-free (p,pα) knockout from ^{9}Be at 150MeV, 10:32677 (RA;ZA)
Spallation
Multifragment production in high-energy proton nucleus collisions, 10:32720 (RA;DE)
Two-Nucleon Transfer Reactions
Anomalies in the heavy Hg isotopes, 10:32747 (R;FR)
PROTON-ANTIPROTON INTERACTIONS
Annihilation
Nucleon-antinucleon interaction and the quark model, 10:32599 (RA;DE)
Comparative Evaluations
Comparison of C-jet events with accelerator results, 10:32415 (R;BR)
Elastic Scattering
Theoretical predictions for pp and p anti p elastic scattering in the TeV energy domain, 10:32582 (RA;XC)
Total cross section and diffractive processes at the large hadron collider (LHC), 10:32580 (RA;XC)
Inclusive Interactions
Compositeness: The supercollider frontier, 10:32583 (RA;XC)

Monte Carlo Method
Comparison of C-jet events with accelerator results, 10:32415 (R;BR)
Total Cross Sections
Theoretical predictions for pp and p anti p elastic scattering in the TeV energy domain, 10:32582 (RA;XC)
Total cross section and diffractive processes at the large hadron collider (LHC), 10:32580 (RA;XC)

Reactor Components
ATV-system and its use, 10:30897 (RA;US)
Compilation of contract research for the Materials Engineering Branch, Division of Engineering Technology. Annual report for FY 1984. Volume 3, 10:30685 (R;US)
Distributions of component failure rates, estimated from LER data, 10:30900 (RA;US)
Licensee contractor and vendor inspection status report. Quarterly report, January-March 1985. Volume 9, No. 1, 10:30760 (R;US)
Long-term embrittlement of cast duplex stainless steels in LWR systems. Annual report, October 1983-September 1984, 10:30689 (R;US)
Operating experience analysis contribution to probabilistic risk assessment: development and use of EDF data collection systems, 10:30896 (RA;US)

Reactor Control Systems
New surveillance and control techniques and their application to nuclear power plant with particular reference to 1300 MW, 10:30827 (TJ;GB)

Reactor Cooling Systems
Impact of colloidal chemistry on radioactivity transport in nuclear power plants, 10:30678 (R;US)
Thermal hydraulics of a feed-water pipe breakage with a back-pressure check valve, 10:30956 (R;US)

Reactor Core Disruption
BNL severe accident sequence experiments and analysis program, 10:30989 (RA;US)
COBRA-NC application to containment analysis, 10:30990 (RA;US)
Degraded core analysis, 10:30993 (RA;US)
Degraded core study using the multidimensional COMMIX code, 10:30856 (R;US)
Insights gained from in-depth reviews of several industry generated PRAs, 10:30881 (RA;US)
Radionuclide release to the environment under specific LWR accident conditins, 10:30996 (RA;US)

Reactor Cores
EPRI core materials program, 10:30994 (RA;US)
Hydrodynamics of single- and two-phase flow in inclined rod arrays, 10:30671 (R;US)
Impact of extended burnups on core design, 10:30701 (RA;XA)
Thorium fuel cycles in light water reactors (NASAP fuel cycle analysis). Monthly project status report, December 1978, 10:30755 (R;US)

Reactor Instrumentation
Assessment of Class 1E pressure transmitter response when subjected to harsh environment screening tests, 10:30687 (R;US)
New surveillance and control techniques and their application to nuclear power plant with particular reference to 1300 MW, 10:30827 (TJ;GB)

Reactor Kinetics
Comparison between WIMS and ANISN-CINDER code systems, 10:30692 (RA;IL)

Reactor Materials
Compilation of contract research for the Materials Engineering Branch, Division of Engineering Technology. Annual report for FY 1984. Volume 3, 10:30685 (R;US)
Light water reactor pressure vessel simulation (LWR-PVS) program, 10:30675 (R;US)
Pressurized-thermal-shock test of 6-in.-thick pressure vessels. PTSE-1: investigation of warm prestressing and upper-shelf arrest, 10:31020 (R;US)
Tensile properties of irradiated nuclear grade pressure vessel welds for the third HSST irradiation series, 10:30688 (R;US)

Reactor Operation
Operating reactors licensing actions summary. Volume 5, No. 3, 10:30761 (R;US)
Report to Congress on abnormal occurrences, October-December 1984. Volume 7, No. 4, 10:30961 (R;US)

Reactor Safety
BNL severe accident sequence experiments and analysis program, 10:30989 (RA;US)
BWR safety research in Japanese industry, 10:30998 (RA;US)
EPRI core materials program, 10:30994 (RA;US)
FRAPCON-2 assessment: power reactor fuel performance data and code evaluation status, 10:30992 (RA;US)
Hydrogen Problems in Reactor Safety Research, 10:30842 (R;DE;In German)
Introductory user's manual for the US Nuclear Regulatory Commission Reactor Safety Research Data Bank. Revision 3, 10:31006 (R;US)
Perspectives on technical issues evolving from the source term reassessment, 10:30997 (RA;US)
Reactor safety research programs. Quarterly report, October-December 1984. Volume 4, 10:31011 (R;US)
Steam explosion studies at Winfrith, 10:30988 (RA;US)
US Department of Energy extended burnup program, 10:30995 (RA;US)

Reactor Safety Experiments
Description of the Semiscale Mod-2C Facility, including scaling principle and current measurement capabilities, 10:30862 (R;US)
Investigation of dispersed flow heat transfer phenomena and assessment of TRAC-PF1/MOD1 heat transfer correlations, 10:30977 (RA;US)
Status of CCTF/SCTF test programs, 10:30979 (RA;US)
TRAC analyses for CCTF and SCTF tests and UPTF design/operation, 10:30980 (RA;US)

Reactor Simulators
Description of the Semiscale Mod-2C Facility, including scaling principle and current measurement capabilities, 10:30862 (R;US)
Isolation of small malfunctions in a PWR power plant, 10:30952 (RA;IL)
Recent developments in the DSNP simulation language, 10:30771 (RA;IL)

Reactor Sites
SMACS - a system of computer programs for probabilistic seismic analysis of structures and subsystems. Volume II. Example problem, 10:30833 (R;US)

Regulations
Relationship between regulatory issues and probabilistic risk assessments, 10:30844 (R;US)

Reliability
European Reliability Data System: main developments and use, 10:30895 (RA;US)

Risk Assessment
Advanced design of PWR through probabilistic safety analysis, 10:30915 (RA;US)
ATV-system and its use, 10:30897 (RA;US)
Containment event tree analysis for source term frequency estimation, 10:30885 (RA;US)
Degraded core analysis, 10:30993 (RA;US)
Development of transient initiating event frequencies for use in probabilistic risk assessments, 10:31012 (R;US)
Development of systems performance standards based on probabilistic risk assessments, 10:30874 (RA;US)
Insights gained from in-depth reviews of several industry generated PRAs, 10:30881 (RA;US)
Operating experience analysis contribution to probabilistic risk assessment: development and use of EDF data collection systems, 10:30896 (RA;US)
PWR S_2D sequence analysis with THALES code system, 10:30887 (RA;US)
Relationship between regulatory issues and probabilistic risk assessments, 10:30844 (R;US)
Review of probabilistic containment analyses and some suggested improvements, 10:30882 (RA;US)
Uncertainty bands in CCDF risk curves; their importance in decision making processes, 10:30880 (RA;US)

Spent Fuels
Application of detailed fission-product decay gamma spectra in the calculation of photoneutron spectra from $D(\gamma,n)$ reactions in PWR fuel, 10:30715 (R;US)

Steam Generators
Analytic studies pertaining to steam generator tube rupture accidents, 10:31017 (R;US)

Thorium Cycle
Thorium fuel cycles in light water reactors (NASAP fuel cycle analysis). Monthly project status report, December 1978, 10:30755 (R;US)

Transient Overpower Accidents
GT2F: a computer code for estimating light water reactor fuel rod failures, 10:31022 (R;US)

Transients
Light-water-reactor safety fuel systems research programs. Quarterly progress report, July-September 1984. Volume 3, 10:31015 (R;US)
Pressurized-thermal-shock test of 6-in.-thick pressure vessels. PTSE-1: investigation of warm prestressing and upper-shelf arrest, 10:31020 (R;US)

Two-Phase Flow
Fast simulation of small-break LOCA (SBLOCA) transients, 10:30941 (RA;XA)

Vulnerability
Vital areas at nuclear power plants, 10:30957 (R;US)

PYRENE

Ion Microprobe Analysis
Secondary ion mass spectrometry of pyrene: enhancement of molecular ion emission by antimony trichloride, 10:31650 (J;US)

Mass Spectroscopy
Secondary ion mass spectrometry of pyrene: enhancement of molecular ion emission by antimony trichloride, 10:31650 (J;US)

Solvent Properties
Phase behavior of coal fluids: data for correlation development. Reporting period: November 1, 1984-April 30, 1985, 10:29635 (R;US)
Solvent tailoring in coal liquefaction based on critical properties of physical solvating agents and hydrogen donors. Progress report, August 1980-January 1981, 10:29621 (R;US)

PYROCARBON

See PYROLYTIC CARBON

PYROLYTIC CARBON

Deposition
Low temperature deposition of pyrocarbon coatings, 10:31564 (RA;IL)

PYROMETERS

Calibration
Effect of in-situ heat treatment on coal char reactivity. Part 2. Temperature measurement in flames. Progress report, January 1-March 31, 1985, 10:29724 (R;US)

Design
Effect of in-situ heat treatment on coal char reactivity. Part 2. Temperature measurement in flames. Progress report, January 1-March 31, 1985, 10:29724 (R;US)

Performance Testing
Effect of in-situ heat treatment on coal char reactivity. Part 2. Temperature measurement in flames. Progress report, January 1-March 31, 1985, 10:29724 (R;US)

PYROTECHNIC DEVICES

Sensitivity
Friction, impact, and electrostatic discharge sensitivities of energetic materials, 10:32091 (R;US)

Q

QUADRUPOLE LINACS

Beam Emittance
Transverse emittance of a 2.0-MeV RFQ beam with high brightness, 10:31904 (R;US)

Hydrogen 1 Minus Beams
Noninterceptive techniques for the measurement of longitudinal parameters for intense H^- beams, 10:31901 (R;US)

Performance
Cw operation of the FMIT RFQ accelerator, 10:31900 (R;US)

QUALITY ASSURANCE

Proposal for a quality assurance regulation for nuclear power plants, 10:30754 (R;GR;In Greek)

Radioecological Concentration
Annual report of the Surface Air Sampling Program, 10:32157 (R;US)

QUANTUM CHROMODYNAMICS

Chiral Symmetry
Chiral symmetry breaking and the pion, 10:32598 (RA;DE)

Lagrangian Function
Effective Lagrangian in two-dimensional electrodynamics with anomalous moment, 10:32647 (R;SU;In Russian)

Lattice Field Theory
Microcanonical simulation of QCD with quarks, 10:32642 (RA;DE)
Status of deconfinement in lattice QCD, 10:32644 (RA;DE)
Virtual quark loops and the phase transitions in lattice quantum chromodynamics at finite temperature, 10:32645 (RA;DE)

Nuclear Structure
New quantum chromodynamical viewpoint in nuclear structure, 10:32760 (RA;DE)

Reviews
Introduction to Quantum Chromodynamics, 10:32649 (R;BR;In Portuguese)

Series Expansion
Breakdown of the 1/N expansion in the continuum limit of strong coupling lattice QCD, 10:32650 (R;BR)

Symmetry
Breakdown of the 1/N expansion in the continuum limit of strong coupling lattice QCD, 10:32650 (R;BR)

QUANTUM ELECTRODYNAMICS

Dyons
Monopole-fermion and dyon-fermion bound states. Pt. 4, 10:32588 (R;DE)

Magnetic Monopoles
Monopole-fermion and dyon-fermion bound states. Pt. 3, 10:32587 (R;DE)

QUANTUM FIELD THEORY

See also LATTICE FIELD THEORY
PHI4-FIELD THEORY
QUANTUM CHROMODYNAMICS
QUANTUM ELECTRODYNAMICS
QUANTUM GRAVITY

Axial-Vector Currents
Axial and parity anomalies and vacuum charge: A direct approach, 10:32655 (J;US)

Gauge Invariance
Axial and parity anomalies and vacuum charge: A direct approach, 10:32655 (J;US)

Monte Carlo Method
Monte Carlo method in field theories, 10:32651 (R;BR;In Portuguese)
Sigma Model
Beta-functions of the nonlinear σ-models on some noncompact symmetric spaces, 10:32861 (R;SU;In Russian)
QUANTUM GRAVITY
Cosmological Models
Behaviour of the gravitational field around the initial singularity, 10:32854 (R;BR)
Lattice Field Theory
Strong coupling simulation of Euclidean quantum gravity, 10:32851 (R;DE)
QUANTUM MECHANICS
Monte Carlo Method
Comparison of energy estimators used in quantum Monte Carlo calculations, 10:32871 (J;US)
Resonance
Resonance widths and positions by an algebraic approach, 10:32876 (J;US)
Scattering
Quantum mechanical reactive scattering via exchange kernels: Infinite order exchange on a grid, 10:32511 (J;US)
Supersymmetry
Supersymmetric quantum mechanics and large-N expansions, 10:32631 (J;US)
QUANTUM OPERATORS
See also HAMILTONIANS
Phase Space
Quantum mechanics in the gaussian wave-packet phase space representation, 10:32856 (R;BR)
QUARK CONFINEMENT
See BAG MODEL
QUARK MATERIAL
See QUARK MATTER
QUARK MATTER
Detonation waves and quark matter formation in ultrarelativistic heavy ion reactions, 10:32767 (RA;DE)
Hadronic thermodynamics: Is there a limiting temperature, 10:32597 (RA;DE)
Quark-gluon plasma with a 15 GeV/N ^{16}O beam, 10:32768 (RA;DE)
QUARK MODEL
See also BAG MODEL
COLOR MODEL
Polarization effects in hadron fragmentation, 10:32603 (R;SU)
Particle Production
Quark-gluon model for particle production processes, 10:32601 (R;SU)
Proton-Antiproton Interactions
Nucleon-antinucleon interaction and the quark model, 10:32599 (RA;DE)
QUARK PLASMA
See QUARK MATTER
QUARK SEA
See QUARK MATTER
QUARK-GLUON PLASMA
See QUARK MATTER
QUARKONIUM
A hypothetical bound state of quark and antiquark.
Quantum Chromodynamics
Duality of two-point functions for confined non-relativistic quark-antiquark systems, 10:32590 (R;US)
QUARK-QUARK INTERACTIONS
SU-3 Groups
Twisted boundary conditions: a non-perturbative probe for pure non-abelian gauge theories, 10:32600 (R;NL)
QUARKS
Bound State
Mixing of tt-bar bound states with the Z boson, 10:32613 (J;US)
Composite Models
Unique chiral three-preon model of quarks and leptons, 10:32626 (J;US)
CP Invariance
Model for maximal CP nonconservation, 10:32630 (J;US)
Decay
Possibility of searching for Higgs boson in t-quarkonium decays, 10:32611 (J;US)
Kobayashi-Maskawa Matrix
Model for maximal CP nonconservation, 10:32630 (J;US)
Mass Formulae
Experimental consequences of family unification, 10:32573 (J;US)
Mass Spectra
Model for maximal CP nonconservation, 10:32630 (J;US)
Supersymmetry
Supersymmetric models for quarks and leptons with nonlinearly realized E_6 symmetry, 10:32627 (J;US)
QUARTZ
Physical Radiation Effects
Radiation-induced transient acoustic loss in quartz crystals, 10:31585 (J;US)
QUASIPARTICLE-PHONON MODEL
Seniority Number
Generalized seniority. A useful quantum number in nuclear spectroscopy, 10:32775 (RA;NL)
QUINOLINES
Gas Chromatography
Fate of basic nitrogen solvents in coal liquefaction. Final report, 10:29640 (R;US)
Infrared Spectra
Fate of basic nitrogen solvents in coal liquefaction. Final report, 10:29640 (R;US)
Mass Spectroscopy
Fate of basic nitrogen solvents in coal liquefaction. Final report, 10:29640 (R;US)
Solvent Properties
Fate of basic nitrogen solvents in coal liquefaction. Final report, 10:29640 (R;US)
QUINONES
Reduction
Improved coal conversion in CO/water systems. Quarterly report No. 2, December 4, 1984-March 3, 1985 (Polynaphthoquinone), 10:29638 (R;US)
Synthesis
Improved coal conversion in CO/water systems. Quarterly report No. 2, December 4, 1984-March 3, 1985 (Polynaphthoquinone), 10:29638 (R;US)

R

R-3
ADAM REACTOR
See AGESTA REACTOR
RACAH COEFFICIENTS
Calculation Methods
Denominator function for canonical SU(3) tensor operators, 10:32872 (J;US)
RACIAL GROUPS
See MINORITY GROUPS
RACKS (FUEL)
See FUEL RACKS
RADIATION ACCIDENTS
Dosimetry
1983 international intercomparison of nuclear accident dosimetry systems at Oak Ridge National Laboratory, 10:32327 (R;US)
Gamma Dosimetry
Twenty-first nuclear accident dosimetry intercomparison study, August 6-10, 1984, 10:32828 (R;US)
Neutron Dosimetry
Twenty-first nuclear accident dosimetry intercomparison study, August 6-10, 1984, 10:32828 (R;US)
RADIATION BURDEN
See RADIATION DOSES
RADIATION DETECTORS
See also CHERENKOV COUNTERS
DIELECTRIC TRACK DETECTORS

GRAVITATIONAL WAVE DETECTORS
IONIZATION CHAMBERS
NEUTRON DETECTORS
POSITION SENSITIVE DETECTORS
RADIOMETERS
SEMICONDUCTOR DETECTORS
SHOWER COUNTERS
STREAK CAMERAS
Monitoring system for a liquid-cooled nuclear fission reactor (PWR), 10:30720 (P;US)
Magnetometers
Series-parallel gradiometers for monopole detectors, 10:32039 (J;NL)
Performance Testing
Beta response of selected instruments, 10:32033 (R;US)
Quality Control
Quality control of nuclear medicine instruments, 10:32263 (R;XA)
RADIATION DOSE DISTRIBUTIONS
Biological Models
Requirements for a treatment planning system for radioimmunotherapy, 10:32278 (J;US)
RADIATION DOSES
Personnel Monitoring
Field measurements of mixed exposure of operators to radioactive aerosol, gas and quartz in confinement of mining equipment cabs during open-pit mining of high-grade uranium ores, 10:32310 (R;CA)
RADIATION DOSIMETRY
See DOSIMETRY
RADIATION EXPOSURE (DOSES)
See RADIATION DOSES
RADIATION HAZARDS
Risk Assessment
Risk estimates for the health effects of alpha radiation, 10:32309 (R;CA)
RADIATION HYGIENE
See RADIATION PROTECTION
RADIATION MONITORS
Research Programs
Progress report: Health Sciences Division, 1983 January 1-June 30, 10:32012 (R;CA)
RADIATION PROTECTION
Education
Health physics/radiation protection enrollments and degrees, 1984, 10:32377 (R;US)
Employment
Health physics/radiation protection enrollments and degrees, 1984, 10:32377 (R;US)
Research Programs
Reports on radiation protection R and D projects of the Federal Ministry of the Interior in the year 1983, 10:32820 (R;DE;In German)
Safety Standards
Conceptional background of the new radiation protection standards, 10:32821 (RA;AT;In German)
Review of environmental radiation protection standards, 10:32827 (R;GB)
Standards
Oevs-Communication 1984/I, 10:32823 (R;AT;In German)
Training
Radiation protection training for personnel employed in medical facilities, 10:32325 (R;US)
Radiation protection training at uranium hexafluoride and fuel fabrication plants, 10:30030 (R;US)
RADIATION PROTECTION LAWS
Comparative Evaluations
Review of environmental radiation protection standards, 10:32827 (R;GB)
Research Programs
Health Physics Department annual progress report 1 January-31 December 1983, 10:31130 (R;DK)
Reviews
Review of environmental radiation protection standards, 10:32827 (R;GB)
RADIATION SAFETY
See RADIATION PROTECTION
RADIATION SOURCES
For cosmic sources of radiation see also COSMIC GAMMA SOURCES, COSMIC RADIO SOURCES, and COSMIC X-RAY SOURCES.
See also LIGHT SOURCES
Coherent Radiation
Studies of collisional and nonlinear radiative process for development of coherent uv and xuv sources. Final report, November 1983-November 1984, 10:32477 (R;US)
RADIATION TRANSPORT
Discrete Ordinate Method
Coupled electron-photon transport calculations using the method of discrete ordinates, 10:32809 (R;US)
Mathematical Models
Radon entry into houses having a crawl space, 10:32166 (J;GB)
Monte Carlo Method
Monte Carlo techniques for analyzing deep penetration problems, 10:32798 (R;US)
RADIO EQUIPMENT
See also HETERODYNE RECEIVERS
Equipment Protection Devices
Nuclear electromagnetic pulse (EMP) protection manual for emergency broadcast radio stations and Emergency Operations Centers, 10:31808 (R;US)
Power Supplies
4.2 MW hydro power plant for Radio Station HCJB, Papallacta, Ecuador, S.A., 10:30120 (RA;US)
RADIO RECEIVERS
See RADIO EQUIPMENT
RADIO TRANSMITTERS
See RADIO EQUIPMENT
RADIOACTIVE AEROSOLS
Aerodynamics
Behavior of aerosols in a steam-air environment, 10:30846 (R;US)
Computer Codes
Comparison of sodium aerosol codes, 10:30927 (R;XE)
Diffusion
Numerical simulation(I) of field tracer experiment by a system for prediction of environmental emergency dose information (SPEEDI). Field experiment with a line source, 10:32158 (R;JP;In Japanese)
Particle Size
Intercomparison test of various aerosol measurement techniques, 10:30928 (R;XE)
Radiation Monitoring
Strontium-90 and cesium-137 in airborne dust from October, 1981 to March, 1982. Environmental and dietary materials, 10:32162 (RA;JP)
Radioactivity Transport
Behavior of aerosols in a steam-air environment, 10:30846 (R;US)
Radiometric Analysis
Filter paper counting system incorporating a segmented alpha particle detector, 10:32014 (R;GB)
Scrubbing
Technical bases and user's manual for the prototype of a Suppression Pool Aerosol Removal Code (SPARC), 10:31008 (R;US)
RADIOACTIVE BIOLOGICAL WASTES
See BIOLOGICAL WASTES
RADIOACTIVE WASTES
RADIOACTIVE CLOUDS
Radiation Doses
Computer code for calculating a γ-external dose from a randomly distributed radioactive cloud, 10:32159 (R;JP;In Japanese)
RADIOACTIVE EFFLUENTS
Air Cleaning Systems
18th DOE nuclear airborne waste management and air cleaning conference: proceedings. Volume 1, 10:30009 (R;US)
RADIOACTIVE GASEOUS WASTES
See RADIOACTIVE WASTES
RADIOACTIVE MATERIALS
See also FISSION PRODUCTS
RADIOACTIVE WASTES

Environmental Transport
Migration of radionuclides in fissured rock - The influence of micropore diffusion and longitudinal dispersion, 10:29975 (R;SE)
Transport
Mutual emergency assistance in the event of accident during transport of radioactive materials within the member states of the European Community, 10:29897 (R;XE)
RADIOACTIVE PARTICULATES
See RADIOACTIVE AEROSOLS
RADIOACTIVE TRACERS
See RADIOPHARMACEUTICALS
RADIOACTIVE WASTE DISPOSAL
18th DOE nuclear airborne waste management and air cleaning conference: proceedings. Volume 1, 10:30009 (R;US)
Comparative Evaluations
Qualitative evaluation of long-term processes governing the behaviour of uranium mill tailings placed in deep lakes, 10:29933 (R;CA)
Qualitative evaluation of long-term processes governing the behaviour of uranium mill tailings placed in deep lakes. Annexes (Study conducted for the Atomic Energy Control Board), 10:29934 (R;CA)
Computer Codes
Directory of computer programs for assessment of radioactive waste disposal in geological formations, 10:29926 (R;XE)
Cost
Costs for handling and disposal of high level radioactive wastes and spent fuels, 10:29973 (R;SE;In Swedish)
Environmental Impacts
Qualitative evaluation of long-term processes governing the behaviour of uranium mill tailings placed in deep lakes, 10:29933 (R;CA)
Qualitative evaluation of long-term processes governing the behaviour of uranium mill tailings placed in deep lakes. Annexes (Study conducted for the Atomic Energy Control Board), 10:29934 (R;CA)
Hydraulic Conductivity
Some simple calculations of potential fields in rock mass underneath two typified topographies, 10:29982 (RA;SE)
Hydrology
Water flow in bedrock; estimation of influence of transmissive shaft and borehole, 10:29980 (RA;SE)
Legal Aspects
Examination of KBS-3 by SSI, 10:29987 (R;SE;In Swedish)
Radionuclide Migration
Note on the impact of transverse dispersion and immediately dissolved radionuclides, 10:30020 (RA;SE)
Research Programs
KBS annual report 1982. Summaries of technical reports issued during 1982, 10:29976 (R;SE)
KBS Annual Report 1983. Including summaries of technical reports issued during 1983, 10:29985 (R;SE)
Progress report: Health Sciences Division, 1982 January 1 to March 31, 10:32010 (R;CA)
Progress report: Health Sciences Division, 1983 July 1-December 31, 10:32817 (R;CA)
Safety
KBS annual report 1979. Including summaries of technical reports issued during 1979, 10:29974 (R;SE)
KBS Technical report 1-120 (1977-1978). Summaries, 10:29938 (R;SE)
Review of methodologies used in safety analyses of nuclear waste disposal, 10:29912 (R;GB)
Site Selection
Applications of geochemical modeling to site characterization and radionuclide transport in the NNWSI project, 10:29948 (RA;US)
Geobotanical investigation of the Vaalputs Site, 10:30015 (RA;ZA)
Permeability and fluid chemistry studies of the Topopah Spring Member of the Paintbrush Tuff, Nevada Test Site: Part II, 10:29988 (R;US)
Review of current investigations, problems and future work with regard to radioactive waste disposal, 10:29960 (RA;ZA)
RADIOACTIVE WASTE FACILITIES
Economic Impact
Socioeconomic Data Base Report for the Paradox Basin, Utah. Letters and verification forms for personal communication data, 10:29959 (R;US)
Site Selection
Location recommendation for surface facilities for the prospective Yucca Mountain Nuclear Waste Repository, 10:29970 (R;US)
Project profile of CRYSTL: Phase I and Phase II, 10:29915 (R;US)
Screening and identification of sites for a proposed Monitored Retrievable Storage Facility, 10:29919 (R;US)
Socioeconomic Data Base Report for the Paradox Basin, Utah. Letters and verification forms for personal communication data, 10:29959 (R;US)
Social Impact
Socioeconomic Data Base Report for the Paradox Basin, Utah. Letters and verification forms for personal communication data, 10:29959 (R;US)
RADIOACTIVE WASTE MANAGEMENT
18th DOE nuclear airborne waste management and air cleaning conference: proceedings. Volume 1, 10:30009 (R;US)
18th DOE nuclear airborne waste management and air cleaning conference: proceedings. Volume 2, 10:30010 (R;US)
RADIOACTIVE WASTE PROCESSING
Adsorption
Development of the flowsheet used for decontaminating high-activity-level water at TMI-2. Draft, 10:30853 (R;US)
Research Programs
KBS annual report 1982. Summaries of technical reports issued during 1982, 10:29976 (R;SE)
Nuclear Waste Treatment Program. Annual report for FY 1984, 10:29962 (R;US)
RADIOACTIVE WASTE STORAGE
Abandoned Shafts
Analysis of the risk assessment of a waste repository for radioactive waste from the decommissioning of nuclear power plants, 10:30028 (R;DE;In German)
Hydrology
Recent hydrological observations from the Riverton and Maybell tailings piles, 10:29996 (BA;US)
Planning
Final disposal of spent nuclear fuel. Standard programme for site investigations, 10:29978 (R;SE)
Research Programs
KBS Annual Report 1983. Including summaries of technical reports issued during 1983, 10:29985 (R;SE)
RADIOACTIVE WASTES

Research Programs
Institut fuer Kernchemie, Univ. Mainz. Annual report 1983, 10:31708 (R;DE;In German)
Radiochemistry Division annual progress report for 1982, 10:29891 (R;IN)
RADIODIAGNOSIS (RADIONUCLIDES)
See NUCLEAR MEDICINE

RADIOECOLOGY
Bibliographies
Radionuclides in terrestrial ecosystems. Radioecological computer-based bibliography (Supplement to main report), 10:32175 (R;GB)
RADIOFREQUENCY SYSTEMS
See RF SYSTEMS
RADIOGRAPHY (BIOMEDICAL)
See BIOMEDICAL RADIOGRAPHY
RADIOGRAPHY (INDUSTRIAL)
See INDUSTRIAL RADIOGRAPHY
RADIOISOTOPE GENERATORS
Design
Development of the osmium-191 → iridium-191m radionuclide generator. Annual report, 10:31696 (R;US)
Feasibility Studies
Development of the osmium-191 → iridium-191m radionuclide generator. Annual report, 10:31696 (R;US)
Impurities
Report of the Van de Graaff Group: nuclear analysis. Radioactive impurities in technetium 99m generators, 10:30049 (RA;ZA)
Technetium 99
Report of the Van de Graaff Group: nuclear analysis. Radioactive impurities in technetium 99m generators, 10:30049 (RA;ZA)
RADIOISOTOPE HEAT SOURCES
Containers
Forming of metal components for radioisotope heat sources, 10:30056 (R;US)
Thermal Insulation
Development and characterization of carbon-bonded carbon fiber insulation for radioisotope space power systems, 10:31546 (R;US)
RADIOISOTOPE MIGRATION
See RADIONUCLIDE MIGRATION
RADIOISOTOPE-LABELLED DRUGS
See RADIOPHARMACEUTICALS
RADIOISOTOPES
Isotope Production
Production of radio-isotopes, 10:31695 (RA;ZA)
RADIOLOGICAL PERSONNEL
Education
Standing of industrial radiography in South Africa, 10:31788 (RA;ZA)
Radiation Protection
Report of the Research Group. Radiation safety and regulatory aspects, 10:32825 (RA;ZA)
RADIOLOGICAL PROTECTION
See RADIATION PROTECTION
RADIOMETERS
Design
Investigation of non-intrusive radiometers for entrained gasifier temperature measurement. Fourth quarterly report, August 1-October 31, 1984. Revision 3, 10:32034 (R;US)
Fabrication
Investigation of non-intrusive radiometers for entrained gasifier temperature measurement. Fourth quarterly report, August 1-October 31, 1984. Revision 3, 10:32034 (R;US)
Performance Testing
Investigation of non-intrusive radiometers for entrained gasifier temperature measurement. Fourth quarterly report, August 1-October 31, 1984. Revision 3, 10:32034 (R;US)
RADIOMETRIC ANALYSIS
Calibration
Review of recent developments in radiometric calibration facilities, 10:32397 (RA;ZA)
Gold
Appraisal of a collimated radiometric face scanner for the in situ determination of gold and uranium in Witwatersrand mines, 10:29862 (RA;ZA)
Uranium
Appraisal of a collimated radiometric face scanner for the in situ determination of gold and uranium in Witwatersrand mines, 10:29862 (RA;ZA)
RADIOMETRIC SURVEYS
Review of current research, problems and future trends with regard to geochemical techniques for uranium exploration and recent developments in radon detection, 10:29879 (RA;ZA)
RADIONUCLIDE MIGRATION
In environment.
Computerized Simulation
Benchmarking NNWSI flow and transport codes: COVE 1 results, 10:30019 (R;US)
Guidelines for selecting codes for ground-water transport modeling of low-level waste burial sites. Executive summary, 10:30016 (R;US)
Mathematical Models
Migration of radionuclides in unconsolidated materials. Equilibrium transport models, 10:30007 (R;CA)
Research Programs
Progress report: Health Sciences Division, 1982 April 1-June 30, 10:32011 (R;CA)
Progress report: Health Sciences Division, 1983 January 1-June 30, 10:32012 (R;CA)
Tracer Techniques
Cesium as an activatable tracer for studying biological intrusion of plant roots into waste burial areas, 10:31641 (J;CH)
RADIONUCLIDE TRANSFER (IN ENVIRONMENT)
See RADIONUCLIDE MIGRATION
RADIONUCLIDES
See RADIOISOTOPES
RADIOPHARMACEUTICALS
Biological Effects
Report of the Van de Graaff Group: nuclear analysis. The effect of verapamil on the incidence of ventricular fibrillation in relation to changes in regional left ventricular blood flow, 10:32269 (RA;ZA)
RADIOPROTECTIVE SUBSTANCES
See also GLUTATHIONE
Biochemical Reaction Kinetics
Mechanism of action of radioprotectors Part I. Effect of WR-2721 and cysteamine on DNA strand breaks, 10:32299 (RA;IL)
Efficiency
Increased survival of irradiated mammalian cells afforded by WR-2721 and activated microsomal preparation, 10:32300 (RA;IL)
RADIOSURGERY
See RADIOTHERAPY
RADIOTHERAPY
Proceedings of the 12. congress of Hungarian radiologists held at Debrecen, Hungary, 27-29 August 1984. Abstracts of papers, 10:32268 (R;HU;In several languages)
Ion Beams
Treatment planning with ion beams, 10:32824 (R;US)
Planning
Requirements for a treatment planning system for radioimmunotherapy, 10:32278 (J;US)
Treatment planning with ion beams, 10:32824 (R;US)
Research Programs
Activities of Working Group on Atomic, Molecular and Nuclear Data for Medical Science, 10:32803 (R;JP;JA)
Side Effects
Precision, high dose radiotherapy: helium ion treatment of uveal melanoma, 10:32337 (J;US)
RADIUM
Chemical Analysis
Barium and radium in water-treatment-plant wastes. Report for September 1983-May 1984, 10:31363 (R;US)
RADIUM 226
Gamma Spectroscopy
Radioactive equilibrium studies on four Canadian uranium reference ores, 10:29858 (RA;CA)
Radioecological Concentration
Behaviour of radium in waterways and aquifers. Final report of the Coordinated Research Programme on source, distribution, movement and deposition of radium in inland

waterways and aquifers sponsored by the IAEA from 1976 to 1980, 10:32194 (R;XA)

Radiometric Analysis

Radioactive equilibrium studies on four Canadian uranium reference ores, 10:29858 (RA;CA)

RADIUM C

See BISMUTH 214

RADIUM D

See LEAD 210

RADIUM F

See POLONIUM 210

RADON

Counting Techniques

Accumulation of radon in a measuring chamber during different variants of measurement, 10:31593 (R;GR)

Parameters of chambers for radon extraction from liquid samples, 10:31592 (R;GR;In Greek)

Diffusion

Radon emanation characteristics of uranium mill tailings, 10:30001 (BA;US)

Geochemical Surveys

Evaluation of the alpha-track method of geothermal prospecting, 10:32395 (R;NZ)

Pollution Sources

Indoor air pollution, 10:32127 (R;US)

Solubility

Parameters of chambers for radon extraction from liquid samples, 10:31592 (R;GR;In Greek)

RADON 220

Radiation Monitoring

Radon measurements in mines and dwellings, 10:32160 (R;DE)

RADON 222

Diffusion

Emanation coefficients for Rn in sized coal fly ash, 10:29687 (J;GB)

Radon entry into houses having a crawl space, 10:32166 (J;GB)

Ecological Concentration

Outdoor radon monitoring at Canonsburg, Pennsylvania, 1980-1983, 10:32161 (R;US)

Radiation Monitoring

Radon entry into houses having a crawl space, 10:32166 (J;GB)

RAILWAYS

Economic Policy

Effects of railroad regulatory reform on coal and electricity. Draft, 10:29736 (R;US)

RAMAN SPECTROSCOPY

Prior to March 1983 this concept was indexed to RAMAN SPECTRA.

Single-pulse Raman scattering studies of heterogeneous explosive materials, 10:32072 (J;US)

Accuracy

Interpreting coherent anti-Stokes Raman spectra measured with multimode Nd:YAG pump lasers, 10:32526 (J;US)

RANKINE CYCLE

Working Fluids

Determination of the thermodynamic properties of heavy organic fluids and research of compounds adapted to low temperature Ranking cycles, 10:31559 (R;FR;In French)

RANKINE CYCLE POWER SYSTEMS

Waste Heat Utilization

Utilization of industrial waste heat by ORC systems (Organic Rankine cycle systems), 10:30652 (R;XE;In German)

RARE EARTH ALLOYS

See also CERIUM ALLOYS
PRASEODYMIUM ALLOYS

Lattice Parameters

Structure of Rsub(1-x)Gasub(2(1+x)) (0<=x<=0.33) and its relation to RGa_6 and Ga, 10:31449 (RA;IL)

Magnetic Susceptibility

Magnetic and Moessbauer studies on rare-earth-containing Heusler alloys Pd_2RSn (R = Tb—Yb), 10:31498 (J;US)

RARE GASES

See also ARGON
HELIUM
KRYPTON
NEON
RADON
XENON

Energy Absorption

Plasma initiation/flow chamber to study cw-laser-beamed energy absorption in light gases. Annual report, 1 February 1983-30 January 1984, 10:32535 (R;US)

Photon-Atom Collisions

Experimental x-ray scattering cross sections for H_2 and rare atomic gases, 10:32481 (R;US)

RATE STRUCTURE

Calculation Methods

Chelan County PUD No. 1 formal education services: topics B.7 and B.8, 10:31167 (R;US)

RATS

Biological Stress

Utilization of some essential and non-essential amino acids after parenteral application to rats studied by ^{15}N tracer technique, 10:32240 (RA;DD;In German)

Habitat

Report of the Van de Graaff Group: NUCOR Isotope Unit. Location of mole-rat food stores, 10:32211 (RA;ZA)

Survival Time

Low-level $^{239}PuO_2$ lifespan studies, 10:32330 (RA;US)

RAYLEIGH-TAYLOR INSTABILITY

Stabilization

Stabilization of the Rayleigh-Taylor instability by a shaped ion beam, 10:32893 (RA;IL)

REACTIVITY (CHEMICAL)

See ACTIVATION ENERGY

REACTOR ACCIDENTS

See also DESIGN BASIS ACCIDENTS
FUEL ELEMENT FAILURE
LOSS OF COOLANT
LOSS OF FLOW
MELTDOWN
REACTOR CORE DISRUPTION
TRANSIENT OVERPOWER ACCIDENTS

Effects of control system failures on transients and accidents at a General Electric boiling water reactor. Volume 2. Appendices, 10:31031 (R;US)

Evaluation of Station Blackout accidents at nuclear power plants. Technical findings related to Unresolved Safety Issue A-44. Draft report for comment, 10:30967 (R;US)

Activity Levels

Review of the status of validation of the computer codes used in the severe accident source term reassessment study (BMI-2104) (PWR; BWR), 10:31032 (R;US)

Computer Codes

Review of the status of validation of the computer codes used in the severe accident source term reassessment study (BMI-2104) (PWR; BWR), 10:31032 (R;US)

RL5SORT/RL5PLOT. A graphite package for the JRC-Ispra IBM version of RELAP5/MOD1, 10:30920 (R;XE)

TRAP-MELT2 user's manual, 10:31026 (R;US)

Computerized Simulation

Comparison of uncertainty and sensitivity analysis techniques for computer models, 10:31013 (R;US)

Environmental protection as a factor in reducing the radiological effects due to an accident in a nuclear power plant, 10:30929 (RA;IL)

Faster-than-real-time simulation of nuclear reactor accidents: the TRAC-NPA code, 10:30958 (R;US)

Data Acquisition Systems

Introductory user's manual for the US Nuclear Regulatory Commission Reactor Safety Research Data Bank. Revision 3, 10:31006 (R;US)

Emergency Plans

Management of severe accidents. Extending plant operating procedures into the severe accident regime. Vol. 2, 10:31024 (R;US)

Environmental Impacts

Environmental protection as a factor in reducing the radiological effects due to an accident in a nuclear power plant, 10:30929 (RA;IL)

Fission Product Release

Assessment of thermal gradient tube results from the HI series of fission product release tests, 10:31019 (R;US)

Behavior of aerosols in a steam-air environment, 10:30846 (R;US)

Chemical factors affecting fission product transport in BWR severe accidents, 10:30984 (RA;US)
ESF collection effectiveness, a study in fine particle dynamics (PWR; BWR), 10:31033 (R;US)
Fission product transport analysis in a loss of decay heat removal accident at Browns Ferry, 10:30985 (RA;US)
Perspectives on technical issues evolving from the source term reassessment, 10:30997 (RA;US)
Preliminary results of the KFK molten core/concrete experimental β facility, 10:30986 (RA;US)
Review of the status of validation of the computer codes used in the severe accident source term reassessment study (BMI-2104) (PWR; BWR), 10:31032 (R;US)
Transport and release of fission products during nuclear reactor accident, 10:31041 (BA;KR)

Heat Transfer
Faster-than-real-time simulation of nuclear reactor accidents: the TRAC-NPA code, 10:30958 (R;US)
Implementation of the CDC version of RELAP5/MOD1/019 on an IBM compatible computer system (AMDAHL 470/V8), 10:30921 (R;XE)
Review of the status of validation of the computer codes used in the severe accident source term reassessment study (BMI-2104) (PWR; BWR), 10:31032 (R;US)
Transient three-phase three-component systems. Part 1. Formulation of the system of differential equations, 10:31039 (TG;US)

Human Factors
Safety/safeguards interactions during safety-related emergencies at Nuclear Power Reactor Facilities, 10:31018 (R;US)

Hydraulics
Faster-than-real-time simulation of nuclear reactor accidents: the TRAC-NPA code, 10:30958 (R;US)
Implementation of the CDC version of RELAP5/MOD1/019 on an IBM compatible computer system (AMDAHL 470/V8), 10:30921 (R;XE)
Review of the status of validation of the computer codes used in the severe accident source term reassessment study (BMI-2104) (PWR; BWR), 10:31032 (R;US)
Transient three-phase three-component systems. Part 1. Formulation of the system of differential equations, 10:31039 (TG;US)

Management
Management of severe accidents. Extending plant operating procedures into the severe accident regime. Vol. 2, 10:31024 (R;US)
Management of severe accidents. Perspectives on managing severe accidents in commercial nuclear power plants. Vol. 1, 10:31023 (R;US)

Meltdown
Preliminary results of the KFK molten core/concrete experimental β facility, 10:30986 (RA;US)
PWR S_2D sequence analysis with THALES code system, 10:30887 (RA;US)

Radiation Doses
Environmental protection as a factor in reducing the radiological effects due to an accident in a nuclear power plant, 10:30929 (RA;IL)
Numerical simulation(I) of field tracer experiment by a system for prediction of environmental emergency dose information (SPEEDI). Field experiment with a line source, 10:32158 (R;JP;In Japanese)

Radioactive Aerosols
Behavior of aerosols in a steam-air environment, 10:30846 (R;US)

Radioactivity Transport
TRAP-MELT2 user's manual, 10:31026 (R;US)

Safeguards
Safety/safeguards interactions during safety-related emergencies at Nuclear Power Reactor Facilities, 10:31018 (R;US)

Safety
Safety/safeguards interactions during safety-related emergencies at Nuclear Power Reactor Facilities, 10:31018 (R;US)

Simulation
Accident simulator development for probabilistic safety analysis, 10:30908 (RA;US)

Vapors
Scoping studies of vapor behavior during a severe accident in a metal-fueled reactor, 10:30850 (R;US)

REACTOR COMPONENTS
See also *BREEDING BLANKETS*
FUEL ELEMENTS
REACTOR COOLING SYSTEMS
REACTOR CORES
REACTOR EXPERIMENTAL FACILITIES

Contractors
Licensee contractor and vendor inspection status report. Quarterly report, January-March 1985. Volume 9, No. 1, 10:30760 (R;US)

Embrittlement
Long-term embrittlement of cast duplex stainless steels in LWR systems. Annual report, October 1983-September 1984, 10:30689 (R;US)

Failures
Analysis and use of operating experience in probabilistic risk assessment, 10:30899 (RA;US)
Analysis of dependent failures in the ORNL precursor study, 10:30869 (RA;US)
Common cause data analysis and implications in system modeling, 10:30866 (RA;US)
Common cause failure methods dealing with dependent failures; a comparative application to US diesel generator data based on licensee event reports, 10:30867 (RA;US)
Development of a generic data base for failure rate, 10:30901 (RA;US)
Distributions of component failure rates, estimated from LER data, 10:30900 (RA;US)
Multiple components malfunction scenarios--a classification technique with emphasis on shared-cause events, 10:30865 (RA;US)

Fasteners
Automatic capability to store and retrieve component data and to calculate structural integrity of these components, 10:30815 (R;US)

Outages
Evaluation of allowed outage time using PRA results, 10:30892 (RA;US)

Quality Control
Survey of materials and other problems of relevance in safety engineering, and an assessment of their reflection in regulatory guides for conventional and nuclear engineering (1. technical report), 10:30841 (R;DE;In German)

Reliability
Applications of NPRDS data to enhance nuclear plant design and operations, 10:30898 (RA;US)
ATV-system and its use, 10:30897 (RA;US)
Decision-theoretical methodology for reliability and risk allocation in nuclear power plants, 10:30875 (RA;US)
European Reliability Data System: main developments and use, 10:30895 (RA;US)
Operating experience analysis contribution to probabilistic risk assessment: development and use of EDF data collection systems, 10:30896 (RA;US)

Research Programs
Compilation of contract research for the Materials Engineering Branch, Division of Engineering Technology. Annual report for FY 1984. Volume 3 (PWR; BWR), 10:30685 (R;US)

Systems Analysis
Operating experience analysis contribution to probabilistic risk assessment: development and use of EDF data collection systems, 10:30896 (RA;US)

REACTOR CONTROL SYSTEMS

Computers
Ultra-reliable computer systems: an integrated approach for application in reactor safety systems, 10:30858 (R;US)

Display Devices
New surveillance and control techniques and their application to nuclear power plant with particular reference to 1300 MW, 10:30827 (TJ;GB)

Failures
Effects of control system failures on transients and accidents at a General Electric boiling water reactor. Volume 1. Main report, 10:31030 (R;US)
REACTOR CONTROL THEORY
See REACTOR KINETICS
REACTOR COOLING SYSTEMS
See also PRIMARY COOLANT CIRCUITS
RHR SYSTEMS
Activity Levels
Impact of colloidal chemistry on radioactivity transport in nuclear power plants, 10:30678 (R;US)
Corrosion
Impact of colloidal chemistry on radioactivity transport in nuclear power plants, 10:30678 (R;US)
Cracks
Thermal fatigue cracking in T-fittings of feed water systems. Development of testing methods for the determination of the depth of cracks, 10:31036 (R;SE;In English and Swedish)
Heat Transfer
Transition from single-phase forced convection to fully developed boiling (TRAC, DRUFAN and RELAP5 computer codes), 10:30812 (RA;XA)
Hydraulics
Thermal hydraulics of a feed-water pipe breakage with a back-pressure check valve, 10:30956 (R;US)
Hydrodynamics
Thermal hydraulics of a feed-water pipe breakage with a back-pressure check valve, 10:30956 (R;US)
Radioactivity Transport
Impact of colloidal chemistry on radioactivity transport in nuclear power plants, 10:30678 (R;US)
Ruptures
Thermal hydraulics of a feed-water pipe breakage with a back-pressure check valve, 10:30956 (R;US)
Tubes
Thermal fatigue cracking in T-fittings of feed water systems. Development of testing methods for the determination of the depth of cracks, 10:31036 (R;SE;In English and Swedish)
REACTOR CORE DISRUPTION
Computerized Simulation
Integrated TRAC/MIMAS analysis of core damage from a TMLB' sequence in Oconee-1, 10:30983 (RA;US)
Containment
Quantitative analysis of the effect of complex internals on LMFBR containment during energetic accidents, 10:30852 (R;US)
Corium
BNL severe accident sequence experiments and analysis program, 10:30989 (RA;US)
Evaporation
Role of fuel bubble phenomenology in assessment of LMFBR source term, 10:30851 (R;US)
Fission Product Release
Radionuclide release to the environment under specific LWR accident conditins, 10:30996 (RA;US)
Frequency Analysis
Core damage frequency results for the Clinch River Breeder Reactor, 10:30909 (RA;US)
Incorporation of phenomenological uncertainties in safety analysis - application to LMFBR core disruptive accident energetics, 10:30878 (RA;US)
Heat Transfer
Degraded core study using the multidimensional COMMIX code, 10:30856 (R;US)
Hydraulics
Degraded core study using the multidimensional COMMIX code, 10:30856 (R;US)
Molten Metal-Water Reactions
BNL severe accident sequence experiments and analysis program, 10:30989 (RA;US)
COBRA-NC application to containment analysis, 10:30990 (RA;US)
Radiation Hazards
Degraded core analysis, 10:30993 (RA;US)
Radioactive Aerosols
Comparison of sodium aerosol codes, 10:30927 (R;XE)
Intercomparison test of various aerosol measurement techniques, 10:30928 (R;XE)
REACTOR CORES
Burnup
Impact of extended burnups on core design, 10:30701 (RA;XA)
Construction
Option for the Brazilian nuclear project: necessity of fast breeder reactors and core design for an experimental fast reactor, 10:30741 (R;BR;In Portuguese)
Heat Transfer
Hydrodynamics of single- and two-phase flow in inclined rod arrays, 10:30671 (R;US)
Hydrodynamics
Hydrodynamics of single- and two-phase flow in inclined rod arrays, 10:30671 (R;US)
Natural Convection
Method for assessing reactor core cooling without forced circulation, 10:30947 (RA;XA)
Optimization
Core design and operation optimization methods based on time-dependent perturbation theory, 10:30779 (R;IL)
Reactivity Worths
Analysis of ZPR-9 Assembly 31, the Advanced Fuels Program Carbide: Benchmark Critical Assembly, 10:30747 (R;IN)
Reactor Materials
EPRI core materials program, 10:30994 (RA;US)
Specifications
Option for the Brazilian nuclear project: necessity of fast breeder reactors and core design for an experimental fast reactor, 10:30741 (R;BR;In Portuguese)
Supports
Evaluation of a hanging core support concept for LMR application, 10:30734 (R;US)
REACTOR DISMANTLING
Explosive Fracturing
Feasibility of dismantling the biological shield by the blast-hole technique. Final report, 10:31038 (TG;US)
Low-Level Radioactive Wastes
Analysis of the risk assessment of a waste repository for radioactive waste from the decommissioning of nuclear power plants, 10:30028 (R;DE;In German)
REACTOR EXPERIMENTAL FACILITIES
Research Programs
Modelling aspects and the research programme of the PMK-NVH test facility, 10:30693 (RA;XA)
Specifications
LOBI-MOD2 small-break and special transients research, 10:30935 (RA;XA)
Modelling aspects and the research programme of the PMK-NVH test facility, 10:30693 (RA;XA)
REACTOR FUEL ELEMENTS
See FUEL ELEMENTS
REACTOR FUELING
Improvements to critical path time for BWR refueling outages. Final report, 10:30677 (R;US)
Legal Aspects
Examination of KBS-3 by SSI, 10:29987 (R;SE;In Swedish)
REACTOR FUELS
See NUCLEAR FUELS
REACTOR INSTRUMENTATION
Pressure Gages
Assessment of Class 1E pressure transmitter response when subjected to harsh environment screening tests, 10:30687 (R;US)
Specifications
New surveillance and control techniques and their application to nuclear power plant with particular reference to 1300 MW, 10:30827 (TJ;GB)
REACTOR KINETICS
Variational-modal expansion method for space-time kinetics, 10:30807 (R;IN)
Burnup
ORIGEN-S: SCALE system module to calculate fuel depletion, actinide transmutation, fission product buildup and decay, and associated radiation source terms, 10:30792 (RA;US)

Computer Codes
CASSANDRE: a two-dimensional multigroup diffusion code for reactor transients analysis, 10:30770 (R;BE)
Computerized Simulation
Improved integration schemes in DSNP, 10:30772 (RA;IL)
Criticality
COMPOZ data guide, 10:30806 (RA;US)
FIDO input system, 10:30802 (RA;US)
KENO V.a: an improved Monte Carlo criticality program with supergrouping, 10:30795 (RA;US)
MARS: a multiple array system using combinatorial geometry, 10:30801 (RA;US)
MORSE-SGC/S for the SCALE system, 10:30794 (RA;US)
PICTURE: a printer plot package for making 2-D pictures of MARS geometries, 10:30805 (RA;US)
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 1. Control modules, 10:30780 (R;US)
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 2. Functional modules, 10:30785 (R;US)
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 3. Miscellaneous, 10:30796 (R;US)
SCALE free-form reading routines, 10:30799 (RA;US)
SCALE interactive input processor, 10:30803 (RA;US)
SCALE subroutine library, 10:30798 (RA;US)
SCALE system driver, 10:30797 (RA;US)
Standard composition library, 10:30800 (RA;US)
Cross Sections
COUPLE: SCALE system module to process problem-dependent cross sections and neutron spectral data for ORIGEN-S analyses, 10:30791 (RA;US)
ICE-S: module to mix multigroup cross sections, 10:30793 (RA;US)
Data Processing
ORIGEN-S data libraries, 10:30686 (RA;US)
Decay
ORIGEN-S: SCALE system module to calculate fuel depletion, actinide transmutation, fission product buildup and decay, and associated radiation source terms, 10:30792 (RA;US)
Delayed Neutron Precursors
Application of evaluated fission-product delayed-neutron precursor data in reactor kinetics calculations, 10:30778 (R;US)
Fission Products
ORIGEN-S: SCALE system module to calculate fuel depletion, actinide transmutation, fission product buildup and decay, and associated radiation source terms, 10:30792 (RA;US)
Multigroup Theory
ICE-S: module to mix multigroup cross sections, 10:30793 (RA;US)
Neutron Dosimetry
XSDOSE: a module for calculating fluxes and dose rates at points outside a shield, 10:30789 (RA;US)
Neutron Flux
Transformation law for response fluxes within the collision probability method, 10:30777 (R;XA)
XSDOSE: a module for calculating fluxes and dose rates at points outside a shield, 10:30789 (RA;US)
Neutron Transport Theory
XSDRNPM-S: a one-dimensional discrete-ordinates code for transport analysis, 10:30788 (RA;US)
Nuclear Data Collections
ORIGEN-S data libraries, 10:30686 (RA;US)
Standard composition library, 10:30800 (RA;US)
Self-Shielding
BONAMI-S: resonance self-shielding by the Bondarenko method, 10:30786 (RA;US)
NITAWL-S: scale system module for performing resonance shielding and working library production, 10:30787 (RA;US)
Shielding
COMPOZ data guide, 10:30806 (RA;US)
FIDO input system, 10:30802 (RA;US)
MARS: a multiple array system using combinatorial geometry, 10:30801 (RA;US)
PICTURE: a printer plot package for making 2-D pictures of MARS geometries, 10:30805 (RA;US)
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 1. Control modules, 10:30780 (R;US)
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 2. Functional modules, 10:30785 (R;US)
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 3. Miscellaneous, 10:30796 (R;US)
SCALE free-form reading routines, 10:30799 (RA;US)
SCALE interactive input processor, 10:30803 (RA;US)
SCALE subroutine library, 10:30798 (RA;US)
SCALE system driver, 10:30797 (RA;US)
Standard composition library, 10:30800 (RA;US)
Transmutation
ORIGEN-S: SCALE system module to calculate fuel depletion, actinide transmutation, fission product buildup and decay, and associated radiation source terms, 10:30792 (RA;US)
REACTOR LICENSING
Time Delay
Estimating the cost of delaying a nuclear power plant: methodology and application, 10:30769 (J;US)
REACTOR MAINTENANCE
Human Factors
Improvements to critical path time for BWR refueling outages. Final report, 10:30677 (R;US)
Maintenance Personnel Performance Simulation (MAPPS) model: description of model content, structure, and sensitivity testing. Volume 2, 10:30767 (R;US)
REACTOR MATERIALS
To be assigned in conjunction with the specific descriptor for the material used in a reactor, provided this descriptor is not yet upposted to reactor materials.
See also NUCLEAR FUELS
Reactor safety research programs. Quarterly report, October-December 1984. Volume 4, 10:31011 (R;US)
Chemical Reactions
Chemical factors affecting fission product transport in BWR severe accidents, 10:30984 (RA;US)
Compression Strength
Properties of concrete at elevated temperatures, 10:30742 (R;US)
Crack Propagation
Thermo-mechanical analysis of concrete in LMFBR programs, 10:30749 (J;NL)
Creep
Heat to heat variations in the creep rupture strength of a modified AISI 316 grade stainless steel, 10:30748 (R;IN)
Properties of concrete at elevated temperatures, 10:30742 (R;US)
Extrusion
Characterization of modified 9 Cr-1 Mo steel extruded pipe, 10:30744 (R;US)
Fabrication
Manufacturing process to reduce large grain growth in zirconium alloys, 10:30822 (P;US)
Fracture Properties
Pressurized-thermal-shock test of 6-in.-thick pressure vessels. PTSE-1: investigation of warm prestressing and upper-shelf arrest (PWR; BWR), 10:31020 (R;US)
Physical Radiation Effects
IAEA advisory group meeting on nuclear data for radiation damage assessment and related safety aspects, Vienna, 12-16 October 1981. Summary report, 10:31459 (R;XA)
Light water reactor pressure vessel simulation (LWR-PVS) program, 10:30675 (R;US)
Tensile properties of irradiated nuclear grade pressure vessel welds for the third HSST irradiation series, 10:30688 (R;US)
Radiation Effects
EPRI core materials program, 10:30994 (RA;US)

Research Programs
Compilation of contract research for the Materials Engineering Branch, Division of Engineering Technology. Annual report for FY 1984. Volume 3 (PWR; BWR), 10:30685 (R;US)
Tensile Properties
Tensile properties of irradiated nuclear grade pressure vessel welds for the third HSST irradiation series, 10:30688 (R;US)
Thermal Conductivity
Properties of concrete at elevated temperatures, 10:30742 (R;US)
Thermal Expansion
Properties of concrete at elevated temperatures, 10:30742 (R;US)
REACTOR OPERATION
Data Compilation
Licensee Event Report (LER) compilation for month of April 1985. Volume 4, No. 4, 10:31005 (R;US)
Systems Analysis
Use of PRA methodology for enhancing operational safety and reliability, 10:30910 (RA;US)
REACTOR OPERATORS
Training
Select review of the recent (1979-1983) behavioral research literature on training simulators, 10:30768 (R;US)
REACTOR PHYSICS
Use only for indexing articles of very broad coverage, such as annual reviews, text book, etc.
Research Programs
Activity report of Reactor Physics Section, 1982, 10:30808 (R;IN)
Activity report of Reactor Physics Section, 1983, 10:30809 (R;IN)

RESIDENCES
  See HOUSES
RESIDENTIAL BUILDINGS
  See also APARTMENT BUILDINGS
    HOUSES
    MOBILE HOMES
  Air Conditioning
    Evaporative cooling workshop. Final technical report, 10:31264 (R;US)
  Air Infiltration
    Comparison of measured and predicted infiltration using the LBL infiltration model, 10:31271 (R;US)
    One time measurement of the infiltration rate and conductive loss coefficient for houses in California--Class B sites, 10:30492 (BA;US)
  Cogeneration
    Research on modeling cogeneration-based residential energy systems in rowhouse and high-rise buildings. Final report, 10:31274 (R;US)
  Cooling
    Evaporative cooling workshop. Final technical report, 10:31264 (R;US)
  Degree Days
    Solar and internal gain adjustments in calculation of energy conservation savings, 10:31311 (BA;US)
  Design
    Case study of the Brookhaven House, 10:31259 (R;US)
  Direct Gain Systems
    A few examples of passive solar architecture in Switzerland, 10:30511 (BA;US)

Energy Accounting
  Proposed streamlined residential heating. Energy budget analysis by a variable temperature design method, 10:31219 (RA;US)
Energy Audits
  Program redesign based on reality, 10:31295 (R;US)
Energy Conservation
  Case study of the Brookhaven House, 10:31259 (R;US)
  Energy conservation code assessment. Volume 1. Final report, 10:31272 (R;US)
  Energy management in settlements with district heating, 10:31255 (R;SE;In Swedish)
  Program redesign based on reality, 10:31295 (R;US)
Energy Efficiency
  California's Point System - expansion and improvement, 10:30441 (BA;US)
  Conservation and solar guidelines, 10:30439 (BA;US)
  The California Triangle, 10:30444 (BA;US)
Energy Efficiency Standards
  Energy conservation opportunities in the building envelope through the enforcement of a mandatory energy code, 10:31211 (RA;US)
  Implementation of building energy standards in New York State, 10:31212 (RA;US)
Energy Management
  Integration of building and energy technology with on-site waste management in the year 2000. Final report, October 1979-September 1980, 10:31286 (R;US)
Energy Policy
  The California Triangle, 10:30444 (BA;US)
Evaporative Cooling
  Evaporative cooling workshop. Final technical report, 10:31264 (R;US)
Gas Heat Pumps
  Duplex Stirling gas-fired heat pump. Phase 2. Breadboard demonstration. Final report, May 1981-November 1982, 10:31285 (R;US)
Heat Gain
  Solar and internal gain adjustments in calculation of energy conservation savings, 10:31311 (BA;US)
Heat Pumps
  Demonstration of a hot-water-heater pump system. Final report, 10:31284 (R;NZ)
Modular Structures
  Passive solar strategies as a logic for improved architectural design: two prototypes for modular housing, 10:30508 (BA;US)
Passive Solar Cooling Systems
  Assessment of passive features in residential buildings, 10:30429 (BA;US)
  Comparison of design tools: Carried out by member countries of the EEC, 10:30522 (BA;US)
  Passive cooling systems for humid climates, 10:30396 (RA;US)
Passive Solar Heating Systems
  A few examples of passive solar architecture in Switzerland, 10:30511 (BA;US)
  Assessment of passive features in residential buildings, 10:30429 (BA;US)
  Case study of the Brookhaven House, 10:31259 (R;US)
  Comparison of design tools: Carried out by member countries of the EEC, 10:30522 (BA;US)
  Conservation and solar guidelines, 10:30439 (BA;US)
  Passive solar strategies as a logic for improved architectural design: two prototypes for modular housing, 10:30508 (BA;US)
  Senior citizen housing project at Roosevelt, NJ, 10:30468 (BA;US)
Radiation Monitoring
  Radon measurements in mines and dwellings, 10:32160 (R;DE)
Solar Air Conditioning
  Development of solar cooling with air and liquid systems at Colorado State University, 10:30392 (RA;US)
Solar Architecture
  Passive solar strategies as a logic for improved architectural design: two prototypes for modular housing, 10:30508 (BA;US)
  Senior citizen housing project at Roosevelt, NJ, 10:30468 (BA;US)
  The California Triangle, 10:30444 (BA;US)
Solar Equipment
  California's Point System - expansion and improvement, 10:30441 (BA;US)
Solar Heating
  Production of selective optical coatings on plastic sheet. Final report, 10:31281 (R;XE)
Solar Heating Systems
  Solar heating with seasonal heat storage in clay for 500 houses in Kristianstad. A feasibility study, 10:30560 (R;SE;In Swedish)
Space Heaters
  Domestic market potential for solid-fuel burners. Final report, 10:31283 (R;NZ)
Thermal Insulation
  Case study of the Brookhaven House, 10:31259 (R;US)
Walls
  Annual cycle moisture analysis, 10:31239 (RA;US)
Waste Management
  Integration of building and energy technology with on-site waste management in the year 2000. Final report, October 1979-September 1980, 10:31286 (R;US)
Water Heaters
  Demonstration of a hot-water-heater pump system. Final report, 10:31284 (R;NZ)
  Domestic market potential for solid-fuel burners. Final report, 10:31283 (R;NZ)
Windows
  Production of selective optical coatings on plastic sheet. Final report, 10:31281 (R;XE)

Pressure Vessels

Buoyancy effects in overcooling transients, 10:30974 (RA;US)

Integrated pressurized thermal shock (IPTS) program probabilistic fracture-mechanics analysis and results, 10:30975 (RA;US)

Reactor Accidents

RELAP5 thermal-hydraulic analyses of pressurized thermal shock sequences for the H.B. Robinson Unit 2 pressurized water reactor, 10:31014 (R;US)

Thermal Shock

RELAP5 thermal-hydraulic analyses of pressurized thermal shock sequences for the H.B. Robinson Unit 2 pressurized water reactor, 10:31014 (R;US)

Transients

Buoyancy effects in overcooling transients, 10:30974 (RA;US)

ROBOTS

Artificial Intelligence

Testbed for sensory control of intelligent machines, 10:31748 (R;US)

Test Facilities

Testbed for sensory control of intelligent machines, 10:31748 (R;US)

ROCK SALT

See SALT DEPOSITS

ROCK-FLUID INTERACTIONS

Prediction of mineral solubilities and diagenesis in rock/water association at high temperature, 10:29942 (RA;US)

ROCKS

See also IGNEOUS ROCKS
METAMORPHIC ROCKS
SEDIMENTARY ROCKS

Chemical Analysis

Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)

Hydraulic Conductivity

Analysis of the AECL/CEC field experiment on the transport of ^{82}Br through a single fracture, 10:29911 (R;GB)

Materials Testing

[Mining and mineral-related research]. Final report, October 1, 1982-September 30, 1983, 10:29614 (R;US)

Mechanical Tests

Geomechanical tests on rock samples from the KS 3 borehole (Dilsen), 10:29689 (R;BE;In French)

Removal

Underwater explosives detonations and structural responses, Guri Hydro Project, Venezuela, 10:30168 (RA;US)

Testing

Selection and testing of rock for armoring uranium tailings impoundments, 10:29950 (R;US)

Thermal Stresses

Effects of heat from high-level waste on performance of deep geological repository components. Report of a technical committee meeting on effects of heat from radioactive waste in deep geological repositories organized by the IAEA and held in Stockholm, 28 August-2 September 1983, 10:29932 (R;XA)

Weathering

A review of long-term rock durability: Implications for survivability of riprap used to protect uranium mill tailings, 10:30005 (BA;US)

Selection and testing of rock for armoring uranium tailings impoundments, 10:29950 (R;US)

RODS (FUEL)

See FUEL RODS

ROOF PONDS

Dehumidification

Energy savings potential of dehumidified roof pond residences, 10:30555 (BA;US)

Performance

Geographic limits for comfort in unassisted roof pond cooled residences, 10:30542 (BA;US)

Performance Testing

Results of validated simulations of roof pond cooled residences, 10:30554 (BA;US)

The performance of a roof-pond solar house, The New Mexico State University experience, 10:30558 (BA;US)

Thermal Efficiency

Energy savings potential of dehumidified roof pond residences, 10:30555 (BA;US)

ROOFS

Caving

Physical model study of caving under massive sandstone roof conditions at Moura, Queensland, 10:29693 (R;AU)

Design

The "folded plate roof" - a unique problem solver, 10:30512 (BA;US)

Solar Architecture

The "folded plate roof" - a unique problem solver, 10:30512 (BA;US)

Structural Models

Physical model study of caving under massive sandstone roof conditions at Moura, Queensland, 10:29693 (R;AU)

Thermal Insulation

Comparison between the conventional and the inverted additional insulation of the flat roofs, 10:31273 (R;DK;In Danish)

Direct approach to retrofitting - protected membrane roofing, 10:31252 (RA;US)

Effect of moisture on the thermal conductance of roofing systems, 10:31235 (RA;US)

Experimental investigation of the effect of added insulation on water vapor condensation in mobile home roof cavities, 10:31238 (RA;US)

Thermal spacers improve roof insulation performance of metal buildings, 10:31250 (RA;US)

ROOM AND PILLAR MINING

Research Programs

Research on ground stability in underground coal mining, 10:29709 (BA;US)

ROTORS
Dynamics
FEATURE: Finite-Element Analysis Tool for Utility Rotordynamic Evaluation. Volume 1. User's manual, 10:30646 (R;US)
Failures
Problems and limitations in hydrodynamic added-mass calculations, 10:30930 (RA;XA)
RUBBER INDUSTRY
Energy Demand
Industry's energy demand for space heating, 10:31350 (R;SE;In Swedish)
Heat Recovery
Industry's energy demand for space heating, 10:31350 (R;SE;In Swedish)
Waste Heat Utilization
Industry's energy demand for space heating, 10:31350 (R;SE;In Swedish)
RUBBERS
Combustion Products
System for the continuous generation of phosphorous aerosols from Red Phosphorus-Butyl Rubber. Final report, 10:31659 (R;US)
RUBIDIUM ISOTOPES
Radiochemical Analysis
Rb-Sr system. Chemical procedures, 10:31614 (R;NZ)
RURAL AREAS
Energy Systems
[Solar energy]. Review of progress, 1983, 10:30400 (R;IN)
RUSSELLVILLE-1 ARKANSAS REACTOR
See ARKANSAS-1 REACTOR
RUTHENIUM
Catalytic Effects
Method of wet oxidation treatment of waste water, 10:32191 (TG;GB)
Promotion effects on the synthesis of higher alcohols. 11th quarterly report, January-March 1985, 10:30068 (R;US)
RUTHENIUM ALLOYS
Electric Conductivity
Electrical resistivity of $ThRu_2$, 10:31512 (J;NL)
RUTHENIUM COMPLEXES
Chemical Reaction Kinetics
Separation of gas mixtures by supported complexes, 10:31671 (R;US)
Photochemical Reactions
Solar energy conversion in homogeneous solution. Final report, August 1, 1979-November 30, 1984. Revision, 10:31687 (R;US)
Photolysis
Solar energy conversion in homogeneous solution. Final report, August 1, 1979-November 30, 1984. Revision, 10:31687 (R;US)
RUTHENIUM COMPOUNDS
Catalytic Effects
Mechanistic studies of carbon monoxide reduction. Final technical report, 10:30065 (R;US)
RUTHERFORD SCATTERING
Analysis of materials by RBS and PIXE, 10:31610 (RA;CS;In Czech)
Report of the Van de Graaff Group: solid state and materials research. The characterisation of anti-reflection layers by Rutherford backscattering spectrometry, 10:31631 (RA;ZA)
RYDBERG STATES
Prior to April 1981, this concept was indexed to RYDBERG CORRECTION.
Angular Momentum
Calculation of collisional angular-momentum mixing of Rydberg states, 10:32501 (R;IL)

S

S CODES
Benchmarks
Benchmarking NNWSI flow and transport codes: COVE 1 results, 10:30019 (R;US)
Manuals
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 1. Control modules, 10:30780 (R;US)
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 2. Functional modules, 10:30785 (R;US)
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 3. Miscellaneous, 10:30796 (R;US)
SACCHARIDES
See also GLUCOPROTEINS
Membrane Transport
Sodium-sugar coupling stoichiometry in chick intestinal cells, 10:32358 (J;US)
SACCHAROMYCES
See also SACCHAROMYCES CEREVISIAE
Immobilized Cells
Immobilized yeasts: growth and metabolism, alcohol fermentation, 10:30077 (R;FR;In French)
SACCHAROMYCES CEREVISIAE
Immobilized Cells
Continuous ethanol production with yeasts adsorbed on a solid support, 10:30078 (R;FR;In French)
SAFE LOW POWER CRITICAL EXPERIMENT
See SLOWPOKE TYPE REACTORS
SAFEGUARDS

Safeguards Summary Event List (SSEL). Pre-NRC through December 31, 1984. Revision 10, 10:30042 (R;US)
SAFETY (NUCLEAR)
See RADIATION PROTECTION
SAFETY (REACTOR)
See REACTOR SAFETY
SAFETY STANDARDS
Comparative Evaluations
Review of environmental radiation protection standards, 10:32827 (R;GB)
SALINE ZONE
See OIL SHALES
PICEANCE CREEK BASIN
SALMON
Viral Diseases
Acquisition and transfer of fish health data, 10:32285 (RA;US)
Priority research needs concerning fish viruses prevalent among Columbia River basin salmonids, 10:32290 (RA;US)
Status of viral fish diseases in the Columbia River Basin, 10:32282 (RA;US)
SALMONELLA
Sister Chromatid Exchanges
Genotoxicity of tobacco smoke and tobacco smoke condensate, 10:32368 (J;NL)
SALT CAVERNS
Mathematical Models
Preliminary SPR thermal model description and results for WH-11 and BM-4 (Calculation of fluid temperatures within the caverns), 10:29802 (R;US)
Temperature Measurement
Preliminary SPR thermal model description and results for WH-11 and BM-4 (Calculation of fluid temperatures within the caverns), 10:29802 (R;US)
Waste Disposal
Using mined space for long-term retention of nonradioactive hazardous waste. Volume 2. Solution-mined salt caverns. Final report, August 1983-January 1985, 10:31367 (R;US)

SALT DEPOSITS
Creep
Pretest reference calculation for the 6.1 meter (20 ft) wide drifts of the Geomechanical Evaluation (WIPP Room G in situ experiment), 10:29972 (R;US)
Deformation
Pretest reference calculation for the 6.1 meter (20 ft) wide drifts of the Geomechanical Evaluation (WIPP Room G in situ experiment), 10:29972 (R;US)
Geochemistry
Chemical modeling of nuclear waste repositories in the salt repository project, 10:29949 (RA;US)
Geology
Salt deposits in the United States and regional geologic characteristics important for storage of radioactive waste, 10:29991 (R;US)
Permeability
WIPP horizon in situ permeability measurements. Final report, 10:32404 (R;US)
Porosity
WIPP horizon in situ permeability measurements. Final report, 10:32404 (R;US)
Radioactive Waste Disposal
Chemical modeling of nuclear waste repositories in the salt repository project, 10:29949 (RA;US)
Salt deposits in the United States and regional geologic characteristics important for storage of radioactive waste, 10:29991 (R;US)
Stresses
Pretest reference calculation for the 18-W/m^2 Mockup for Defense High-Level Waste (WIPP Room A in situ experiment), 10:29971 (R;US)
Pretest reference calculation for the 6.1 meter (20 ft) wide drifts of the Geomechanical Evaluation (WIPP Room G in situ experiment), 10:29972 (R;US)
Thermal Conductivity
Pretest reference calculation for the 18-W/m^2 Mockup for Defense High-Level Waste (WIPP Room A in situ experiment), 10:29971 (R;US)
Thermal Expansion
Pretest reference calculation for the 18-W/m^2 Mockup for Defense High-Level Waste (WIPP Room A in situ experiment), 10:29971 (R;US)
SALTON SEA GEOTHERMAL FIELD
Exploratory Wells
Deep hole studies, 10:30582 (RA;US)
Geologic Strata
Crustal structure and tectonics of the Imperial Valley region, California, 10:30581 (RA;US)
Geothermal Power Plants
Development operations: hypersaline geothermal brine utilization, Imperial County, California, 10:30592 (RA;US)
Resource Assessment
Plan for the DOE/Bechtel drilling and engineering program in the Salton Sea KGRA, 10:30568 (RA;US)
Seismic Surveys
Crustal structure and tectonics of the Imperial Valley region, California, 10:30581 (RA;US)
Well Drilling
Plan for the DOE/Bechtel drilling and engineering program in the Salton Sea KGRA, 10:30568 (RA;US)
SALTS
Use specific salts whenever possible
See also MOLTEN SALTS
Thermodynamic Properties
An integrated phase change heating and cooling system for retrofit and new construction, 10:30529 (BA;US)
SALYUT ORBITAL STATIONS
Thermoluminescent Dosemeters
Thermoluminescent dose measurements on board Salyut type orbital stations, 10:32028 (R;HU)
SAMARIUM
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
SAMARIUM BORIDES
Magnetic Properties
Magnitude and range of the RKKY interaction in $SmRh_4B_4$, 10:31525 (R;US)
Ruderman-Kittel Coupling
Investigation of the magnitude and range of the Ruderman-Kittel interaction in $SmRh_4B_4$ and $ErRh_4B_4$, 10:31539 (J;US)
Magnitude and range of the RKKY interaction in $SmRh_4B_4$, 10:31525 (R;US)
Superconductivity
Magnitude and range of the RKKY interaction in $SmRh_4B_4$, 10:31525 (R;US)
SAMARIUM SULFIDES
Critical Pressure
Semimetallic behaviour of SmS at high pressure, 10:31437 (R;FR)
SANDSTONES
Compression Strength
Geomechanical tests on rock samples extracted from the KS 9 and KS 12 boreholes, 10:29690 (R;BE;In French)
Permeability
Effects of water and stress upon permeability to gas of paludal and coastal sands: USDOE multiwell experiment (Mesa Verde sandstones from Garfield County, Colorado), 10:29805 (R;US)
Porosity
Effects of water and stress upon permeability to gas of paludal and coastal sands: USDOE multiwell experiment (Mesa Verde sandstones from Garfield County, Colorado), 10:29805 (R;US)
Tensile Properties
Geomechanical tests on rock samples extracted from the KS 9 and KS 12 boreholes, 10:29690 (R;BE;In French)
Wettability
Surface chemistry of reservoir rocks and their reaction with crude oil components, 10:29746 (RA;US)
SANITARY LANDFILLS
Leaching
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 1. Final report. Report for June 1980-June 1984, 10:29676 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 2. Appendices A through C. Final report, June 1980-June 1984, 10:29677 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 3. Appendices D and E. Final report, June 1980-June 1984, 10:29678 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 4. Appendix F. Final report, June 1980-June 1984, 10:29679 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 5. Appendix G. Final report, June 1980-June 1984, 10:29680 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 6. Appendix H. Final report, June 1980-June 1984, 10:29681 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 7. Appendix I. Final report, June 1980-June 1984, 10:29682 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 8. Appendix J. Final report, June 1980-June 1984, 10:29683 (R;US)
SANTA ROSA DEPOSIT
Chemical Composition
Application of carbon-13 and proton NMR to the average structure analysis of Athabasca, Santa Rosa, and Asphalt Ridge tar sand bitumens, 10:29830 (RA;US)
SAVANNAH RIVER PLANT
Radionuclide Migration
Tritium transport around nuclear faciliteis, 10:30011 (RA;JP)
Research Programs
Savannah River Laboratory monthly report, 10:33071 (R;US)
SAXON-WOODS POTENTIAL
See WOODS-SAXON POTENTIAL

SCALAR FIELDS
  Gravitational Interactions
    Gravitational coupling of scalar and fermion fields to matter vorticity: microscopic asymmetries, 10:32849 (R;BR)
SCALAR MESONS
  Particle Decay
    G(1590)-meson and possible characteristic features of a glueball, 10:32595 (R;SU)
SCANDINAVIA
  See also FINLAND
    NORWAY
    SWEDEN
  Energy Models
    Model specifications for energy models used in Scandinavia, 10:31114 (R;DK;In several languages)
SCANDIUM
  Quantitative Chemical Analysis
    Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
SCANDIUM 43
  Alpha Reactions
    Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Angular correlation measurements with $(\alpha,p\gamma)$ reactions, 10:32707 (RA;ZA)
  Excited States
    Report of the Van de Graaff Group: nuclear reactions and nuclear structure. The level structure, gamma-ray branching and mean lifetimes of states in ^{43}Sc, ^{43}K and ^{55}Mn, 10:32705 (RA;ZA)
    Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Spins of excited states in ^{43}Sc, ^{43}K and the mechanism of$^{48'50}$Ti$(p,p',\gamma)^{48'50}$Ti and $^{40'50}$Ti$(\alpha,\alpha'\gamma)^{48'50}$Ti reactions at $Ep = 6$ MeV and $E\alpha = 12$ MeV, 10:32706 (RA;ZA)
  Lifetime
    Report of the Van de Graaff Group: nuclear reactions and nuclear structure. The level structure, gamma-ray branching and mean lifetimes of states in ^{43}Sc, ^{43}K and ^{55}Mn, 10:32705 (RA;ZA)
  Spin
    Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Spins of excited states in ^{43}Sc, ^{43}K and the mechanism of$^{48'50}$Ti$(p,p',\gamma)^{48'50}$Ti and $^{40'50}$Ti$(\alpha,\alpha'\gamma)^{48'50}$Ti reactions at $Ep = 6$ MeV and $E\alpha = 12$ MeV, 10:32706 (RA;ZA)
SCANDIUM OXIDES
  Auger Electron Spectroscopy
    X-ray photoelectron and x-ray-induced Auger electron spectroscopic data, 1. 3d transition-metals (Sc, Ti, V, Ni) and related oxides, 10:32493 (R;JP)
SCANNING MEASURING PROJECTORS
  Computer Codes
    Dialog guide programs for operators of scanning-measuring projectors in the COSDES system. Part 2. Guide program realization, 10:33091 (R;SU;In Russian)
SCHEDULES
  Mathematical Models
    TVA's weekly scheduling model: overview and implementation, 10:30180 (RA;US)

Semiconductor drift chamber - an application of a novel charge transport scheme, 10:32046 (J;NL)
SEMICONDUCTOR JUNCTIONS
Charge Transport
Semiconductor drift chamber - an application of a novel charge transport scheme, 10:32046 (J;NL)
Depletion Layer
Semiconductor drift chamber - an application of a novel charge transport scheme, 10:32046 (J;NL)
SEMICONDUCTOR LASERS
Laser Cavities
Cavity supermodes for gain-saturated diode laser arrays, 10:31768 (J;US)
SEMICONDUCTOR MATERIALS
If possible index also the specific compounds.
Segregation
Radioactive tracer study of segregation in grown n-type thermoelectric alloys, 10:31565 (RA;IL)
SEMICONDUCTOR RESISTORS
Breakdown
Electroluminescence in ZnO varistors: Evidence for hole contributions to the breakdown mechanism, 10:31538 (J;US)

Electroluminescence
Electroluminescence in ZnO varistors: Evidence for hole contributions to the breakdown mechanism, 10:31538 (J;US)
Holes
Electroluminescence in ZnO varistors: Evidence for hole contributions to the breakdown mechanism, 10:31538 (J;US)
SEMICONDUCTOR STORAGE DEVICES
Physical Radiation Effects
Transient two-dimensional simulation of SEU in a CMOS SRAM cell, 10:31814 (R;US)
SENIOR CENTERS
See PUBLIC BUILDINGS
SENSE ORGANS DISEASES
Radioinduction
Precision, high dose radiotherapy: helium ion treatment of uveal melanoma, 10:32337 (J;US)
SEPARATION NOZZLE METHOD
Entropy
Production of value and entropy in separation nozzles. Numerical calculations based on molecular probe measurements, 10:29886 (R;DE;In German)
SEPARATION PROCESSES
See also LEACHING
PRECIPITATION SCAVENGING
Comparative Evaluations
Evaluation of advanced separation techniques for application to flue gas cleanup processes for the simultaneous removal of sulfur dioxide and nitrogen oxides, 10:29671 (R;US)
SERPUKHOV SYNCHROTRON
Neutron Beams
Neutral particle 4N channel of Serpukhov accelerator, 10:31895 (R;SU;In Russian)
Timing Circuits
Manual timer, 10:31945 (R;SU;In Russian)
SERUM (BLOOD)
See BLOOD SERUM
SEWAGE
See also SEWAGE SLUDGE
Heat Recovery
Heat recovery from sewage effluent by heat pumps for supply to the Enkoeping district heating system. A feasibility study, 10:31373 (R;SE;In Swedish)
SEWAGE SLUDGE
Anaerobic Digestion
Methane fermentation of substrate mixtures. Kinetic and microbiological aspects, 10:30073 (R;FR;In French)
SHALE OIL
Combustion Properties
Alternate fuels for maritime use, 10:31324 (RA;US)
Utilization of shale and coal derived fuels in diesel engines, 10:31401 (RA;US)
Natural Radioactivity
Radiological impact of atmospheric emissions from oil shale retorts, 10:29854 (J;GB)
Refining
Refining and upgrading of synfuels from coal and oil shales by advanced catalytic processes. Tenth Interim Report. Revised stock balances and updated cost estimates, 10:29735 (R;US)
Research Programs
US fossil program - an overview, 10:29613 (RA;US)
Thermodynamic Properties
Thermodynamic characterization of conversion-process oils as materials of continuous distribution. Annual report, January-December 1984, 10:29775 (R;US)
Toxicity
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
SHAPED CHARGES
Prior to August 1979 CHEMICAL EXPLOSIVES and SHAPE were used.
Performance
Explosive initiation by very small conical shaped charge jets, 10:32093 (R;US)
SHEARON HARRIS-1 REACTOR
See HARRIS-1 REACTOR
SHEATHS (FUEL)
See FUEL CANS
SHELL MODELS
Nuclear shell models only; for electron shell models use ELECTRONIC STRUCTURE.
See also INTERACTING BOSON MODEL
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Shell-model calculations in the s-d and f-p shells, 10:32794 (RA;ZA)
Computer Calculations
RITSSCHIL. A novel shell-model approach applied to light and heavy nuclei, 10:32779 (R;NL)
SHIELDING

Effective energy saving for motor ships, 10:31346 (RA;US)
Effectiveness of waterborne hull cleaning of aircraft carriers, 10:31337 (RA;US)
Energy conservation consideration in CVV hull form design, 10:31332 (RA;US)
Evaluation of various types of nozzle propellers and reaction fin as the device for the improvement of propulsive performance of high block coefficient ships, 10:31343 (RA;US)
Hull roughness, antifouling coatings and ship performance, 10:31336 (RA;US)
In-service roughness allowance: effects of drydocking, recoating and the passing of time, 10:31335 (RA;US)
Initial assessment of coal-fired ship operations. Final report, 10:29718 (R;US)
Marine steam power plant alternatives in the degrading fuel quality and increasing price environment, 10:31338 (RA;US)
Monitoring speed and power for fuel economy, 10:31330 (RA;US)
Part II - techniques based on propeller relationships, 10:31329 (RA;US)
Propellers for economy, 10:31342 (RA;US)
Prospect of sail-equipped motorship as assessed from experimental ship Daioh, 10:31333 (RA;US)
Prototype steam plant with fluid bed designed for uncertain energy conditions, 10:31345 (RA;US)
Ship weather routing, 10:31334 (RA;US)
Slurry fuels: the retrofittable alternative, 10:31344 (RA;US)
Some aspects of fuel economy in bulk carrier design and operation, 10:31331 (RA;US)
Study of local roughness effect on ship resistance for effective cleaning and protection of hull surface, 10:31341 (RA;US)
Ways to reduce slow steaming fuel consumption of steam turbine machinery through technical modifications, 10:31326 (RA;US)

Routing
Ship weather routing, 10:31334 (RA;US)

Sails
Prospect of sail-equipped motorship as assessed from experimental ship Daioh, 10:31333 (RA;US)

SHOCK WAVES

F Codes
Gas cloud explosions and their effect on nuclear power plant. Phase 1: basic development of explosion codes, 10:30924 (R;XE)

G Codes
Gas cloud explosions and their effect on nuclear power plant. Phase 1: basic development of explosion codes, 10:30924 (R;XE)

Mesh Generation
Gradient scaling for nonuniform meshes, 10:32539 (R;US)

Wave Propagation
Gas cloud explosions and their effect on nuclear power plant. Phase 1: basic development of explosion codes, 10:30924 (R;XE)

SHOPPING CENTERS

Photovoltaic Power Supplies
The Lovington Square shopping center photovoltaic system, 10:30343 (BA;US)

SHORT ROTATION CULTIVATION
Short-radiation woody crops production research in the South, 10:30296 (R;US)

Research Programs
Short rotation woody crops program, 10:30329 (BA;US)

SHOWER COUNTERS
Detects high energy gamma radiation or high energy particles on basis of cascade showers in layered absorbers.

Optical Fibers
Electromagnetic calorimetry using scintillating plastic fibres, 10:32016 (R;CH)

Performance
Performance of a lead-scintillator sandwich hodoscope with photodiode readout, 10:32020 (R;DE)

Plastic Scintillators
Electromagnetic calorimetry using scintillating plastic fibres, 10:32016 (R;CH)

SI SEMICONDUCTOR DETECTORS

Data Processing
Silicon drift chambers - first results and optimum processing of signals, 10:32041 (J;NL)

Performance
Silicon drift chambers - first results and optimum processing of signals, 10:32041 (J;NL)

Physical Radiation Effects
Radiation damage in silicon detectors, 10:32050 (J;NL)

Readout Systems
Development of high density readout for silicon strip detectors, 10:32043 (J;NL)

Reviews
Silicon detectors: New challenges, 10:32040 (J;NL)

SIALON
See ALUMINIUM OXIDES
SILICON NITRIDES

SIGMA MINUS

Beta-Minus Decay
Measurement of the electron asymmetry in the beta decay of polarized Σp hyperons, 10:32568 (J;US)

SIGMA MODEL

Supersymmetry
Nicolai maps on manifolds, 10:32628 (J;US)

SIGMA PARTICLES
See also SIGMA MINUS

Semileptonic Decay
New value for the electron asymmetry in $\Sigma \to ne\nu$ and hyperon semileptonic decays, 10:32619 (J;US)

SILANES

Chemical Composition
Ion chemistry in silane dc discharges, 10:31684 (J;US)

Chemistry
Ion chemistry in silane dc discharges, 10:31684 (J;US)

Plasma Production
Ion chemistry in silane dc discharges, 10:31684 (J;US)

SILICA
See also OPALS
Catalytic Effects
Promotion effects on the synthesis of higher alcohols. 11th quarterly report, January-March 1985, 10:30068 (R;US)
Corrosion
High temperature corrosion of ceramics. Progress report, June 15, 1984-June 14, 1985, 10:31528 (R;US)
Damage
Pulse duration dependence of 1064-nm laser damage thresholds of porous silica antireflection coatings on fused silica substrates, 10:31581 (R;US)
Physical Radiation Effects
Pulse duration dependence of 1064-nm laser damage thresholds of porous silica antireflection coatings on fused silica substrates, 10:31581 (R;US)
Removal
Method for removing oxide contamination from silicon carbide powders, 10:31666 (P;US)
Vapor Deposited Coatings
Real time measurement of deposition initiation and rate in laser chemical vapor deposition, 10:31495 (J;US)
SILICA GEL
Thermodynamic Properties
Reaction calorimetry for coal chemistry and catalysis. Quarterly report, February 1, 1985-April 30, 1985 (Heats of immersion of triphenylsilanol and silica gel), 10:29656 (R;US)
SILICEOUS ROCK
See SANDSTONES
SILICON
Absorption Spectra
Dangling bonds and sub-gap optical absorption in silicon, 10:31579 (R;US)
Chemical Vapor Deposition
Chemical vapor deposition of boron-doped hydrogenated amorphous silicon, 10:30320 (J;US)
Photovoltaic devices using hydrogenated amorphous silicon produced by the chemical vapor deposition of higher order silanes. Final report, 1 August 1982-31 August 1983, 10:30313 (R;US)
Crystal Growth
Model of amorphous silicon layer regrowth, 10:31570 (R;US)
Crystal Growth Methods
Solid/melt interface studies of high-speed silicon sheet growth. Final technical progress report, July 15, 1983-July 15, 1984, 10:30312 (R;US)
Crystal-Phase Transformations
Solid-solid phase transitions and soft phonon modes in highly condensed Si, 10:31586 (J;US)
Electric Conductivity
Chemical vapor deposition of boron-doped hydrogenated amorphous silicon, 10:30320 (J;US)
Electron Diffraction
Improved instrument for medium energy electron diffraction and microscopy of surfaces, 10:32071 (J;US)
Electron Microscopy
Improved instrument for medium energy electron diffraction and microscopy of surfaces, 10:32071 (J;US)
Electronic Structure
Chemical trends in ground- and excited-state properties of interstitial 3d impurities in silicon, 10:31588 (J;US)
Electronic structure of Si (111) interface between diamond and hexagonal phases, 10:31542 (J;GB)
Energy Gap
Chemical vapor deposition of boron-doped hydrogenated amorphous silicon, 10:30320 (J;US)
Interstitials
Chemical trends in ground- and excited-state properties of interstitial 3d impurities in silicon, 10:31588 (J;US)
Ion Collisions
Rutherford scattering applied to the study of hydrogen in amorphous silicon, 10:32495 (RA;JP;In Japanese)
Ion Implantation
Formation of amorphous silicon by light ion damage, 10:31571 (R;US)
Lattice Vibrations
Solid-solid phase transitions and soft phonon modes in highly condensed Si, 10:31586 (J;US)
Meetings
1985 amorphous silicon review meeting, 10:30311 (R;US)
Mixing
Calculation of mixed depth for some metal-Si systems, 10:31427 (R;US)
PIXE Analysis
Report of the Van de Graaff Group: nuclear analysis. Determination of silicon in crude and refined oils, 10:31625 (RA;ZA)
Research Programs
Solid/melt interface studies of high-speed silicon sheet growth. Final technical progress report, July 15, 1983-July 15, 1984, 10:30312 (R;US)
Scanning Electron Microscopy
Stress and efficiency studies in EFG. Quarterly progress report, January 1, 1985-March 31, 1985, 10:30301 (R;US)
Stability
Solid-solid phase transitions and soft phonon modes in highly condensed Si, 10:31586 (J;US)
Stress Analysis
Stress and efficiency studies in EFG. Quarterly progress report, January 1, 1985-March 31, 1985, 10:30301 (R;US)
X-Ray Fluorescence Analysis
X-ray fluorescence analysis of uranium concentrates, 10:31637 (TG;US)
SILICON ALLOYS
Manufacturing
Development of improved thermoelectric materials for space nuclear power systems. Sixth technical progress report, March 1985, 10:30837 (R;US)
Stability
Stability of amorphous metal films on semiconductor substrates. Progress report, July-December 1984 (Ni-Nb, W-Si, Mo-Si), 10:31444 (R;US)
SILICON CARBIDES
Corrosion
High temperature corrosion of ceramics. Progress report, June 15, 1984-June 14, 1985, 10:31528 (R;US)
Fabrication
Development of alpha silicon carbide components for gas turbine applications, 10:31408 (RA;US)
Performance Testing
Ceramic Applications in Turbine Engines (CATE) program summary, 10:31404 (RA;US)
Production
Synthesis of ultrafine ceramic and metallic powders in a thermal argon rf plasma, 10:31533 (R;US)
Purification
Method for removing oxide contamination from silicon carbide powders, 10:31666 (P;US)
Radiation Transport
Properties of SiC ceramics and application for microwave absorber, 10:31532 (RA;JP;In Japanese)
SILICON COMPLEXES
Thermoluminescence
Thermoluminescence dating of burnt cherts from the Alice Boer site (Brazil), 10:32384 (R;BR)
SILICON COMPOUNDS
See also SILANES, SILOXANES and SILICONES.
See also SILANES
SILICON CARBIDES
SILICON NITRIDES
SILICON OXIDES
Chemical Bonds
Photoelectron spectroscopic study of bonding in inorganic and organometallic compounds (Boron trihalides; silyl amines; thiazyl fluorides; borane adducts; transition metal complexes with isocyanides and olefins), 10:31658 (R;US)
Thermodynamic Properties
Reaction calorimetry for coal chemistry and catalysis. Quarterly report, February 1, 1985-April 30, 1985 (Heats of immersion of triphenylsilanol and silica gel), 10:29656 (R;US)

SILICON DIODES
Crystal Defects
Photoconductivity and electronic doping effects in hydrogenated amorphous silicon, 10:30322 (J;US)
Crystal Doping
Photoconductivity and electronic doping effects in hydrogenated amorphous silicon, 10:30322 (J;US)
Fabrication
Photoconductivity and electronic doping effects in hydrogenated amorphous silicon, 10:30322 (J;US)
Photoconductivity
Photoconductivity and electronic doping effects in hydrogenated amorphous silicon, 10:30322 (J;US)
SILICON HYDRIDES
See SILANES
SILICON NITRIDES
Chemical Preparation
Preparation of silicon nitride by pyrolysis of iminopolysilanes, 10:31531 (R;US)
Corrosion
High temperature corrosion of ceramics. Progress report, June 15, 1984-June 14, 1985, 10:31528 (R;US)
Fabrication
Ceramic life prediction methodology, 10:31411 (RA;US)
Fabrication of silicon nitride turbine engine components, 10:31407 (RA;US)
Injection molded silicon nitride for engine applications: fabrication and properties, 10:31410 (RA;US)
Mechanical Properties
Characterization of sintered reaction bonded silicon nitride, 10:31409 (RA;US)
Injection molded silicon nitride for engine applications: fabrication and properties, 10:31410 (RA;US)
Silicon nitride-fabrication, forming and properties. Literature survey, 10:31536 (R;IL;In Hebrew)
Oxidation
Characterization of sintered reaction bonded silicon nitride, 10:31409 (RA;US)
Performance Testing
Ceramic Applications in Turbine Engines (CATE) program summary, 10:31404 (RA;US)
Physical Properties
Silicon nitride-fabrication, forming and properties. Literature survey, 10:31536 (R;IL;In Hebrew)
Production
Silicon nitride-fabrication, forming and properties. Literature survey, 10:31536 (R;IL;In Hebrew)
Synthesis of ultrafine ceramic and metallic powders in a thermal argon rf plasma, 10:31533 (R;US)
Reviews
Silicon nitride-fabrication, forming and properties. Literature survey, 10:31536 (R;IL;In Hebrew)
Service Life
Ceramic life prediction methodology, 10:31411 (RA;US)

SOLAR ABSORBERS
SOLAR CELL ARRAYS
SOLAR CELLS
SOLAR COLLECTORS
SOLAR CONCENTRATORS
SOLAR COOLING SYSTEMS
SOLAR DRYERS
SOLAR HEATING SYSTEMS
SOLAR SIMULATORS
SOLAR STILLS
SOLAR WATER HEATERS
SOLAR WATER PUMPS
Materials
Technological and economic aspects of the use of plastics for solar engineering, 10:30549 (R;AT;In German)
Sizing
Sizing solar energy systems for agricultural applications and predicting seasonal energy applications and predicting seasonal energy utilization, 10:30534 (BA;US)
Tax Credits
Should the sun set on state solar tax credits: an Arizona perspective, 10:30291 (BA;US)
SOLAR FLARES
Gamma Radiation
Directivity of Bremsstrahlung radiation from relativistic beams and the gamma-rays from solar flares, 10:32445 (R;US)
SOLAR HEATING SYSTEMS
See also *PASSIVE SOLAR HEATING SYSTEMS*
SOLAR-ASSISTED HEAT PUMPS
Control Systems
Results of active solar control system testing and the performance effects of sensor degradation, 10:30402 (R;US)
Electric Power
Combined solar and surface earth heating for a small group of houses in Perstorp. Results of three years performance monitoring, 10:30357 (R;SE;In Swedish)
Energy Models
CEC (Commission of the European Communities) modelling group for solar-heating systems and domestic hot water. II, 10:30401 (R;XE)
Hybrid Systems
Construction and preliminary performance data on two commercial buildings with active charge/passive discharge solar systems, 10:30494 (BA;US)
Operation
Sunstore experimental house in Sigtuna. Performance measurement and assessment 1981-1982, 10:30559 (R;SE;In Swedish)
Payback Period
Keeping experimental track of Bassens solar houses. Thermal and economical aspects, 10:30377 (R;FR;In French)
Performance
Construction and preliminary performance data on two commercial buildings with active charge/passive discharge solar systems, 10:30494 (BA;US)
Performance Testing
Combined solar and surface earth heating for a small group of houses in Perstorp. Results of three years performance monitoring, 10:30357 (R;SE;In Swedish)
Keeping experimental track of Bassens solar houses. Thermal and economical aspects, 10:30377 (R;FR;In French)
Sunstore experimental house in Sigtuna. Performance measurement and assessment 1981-1982, 10:30559 (R;SE;In Swedish)
Research Programs
Active solar heating and cooling technology program summary, 10:30361 (R;US)
Seasonal Thermal Energy Storage
Bore hole heat store in rock. Investigation of an alternative heat store for the Soedertuna solar heating project, 10:30561 (R;SE;In Swedish)
Solar heating with seasonal heat storage in clay for 500 houses in Kristianstad. A feasibility study, 10:30560 (R;SE;In Swedish)
Sensible Heat Storage
Sunstore experimental house in Sigtuna. Performance measurement and assessment 1981-1982, 10:30559 (R;SE;In Swedish)
Thermal Energy Storage Equipment
Heat storage for solar heating systems, 10:30562 (R;DK;In Danish)
SOLAR INDUSTRY
Standards
[Solar industry standards]. Final technical report, 10:30292 (R;US)
SOLAR MODELS
See *STAR MODELS*
SOLAR NEUTRINOS
Prior to July, 1975 information was indexed to NEUTRINOS.
Neutrino Detection
Specificity of ^{71}Ga(p,n)^{71}Ge at 35 MeV for Gamow-Teller strength, 10:32708 (R;US)
SOLAR ONE POWER PLANT
See *BARSTOW SOLAR PILOT PLANT*
SOLAR PONDS
See also *ROOF PONDS*
Research Programs
[Solar energy]. Review of progress, 1983, 10:30400 (R;IN)
SOLAR PROCESS HEAT
Uses
Milk pasteurization using solar energy, 10:30379 (R;FR;In French)
SOLAR RADIATION
See also *DIRECT SOLAR RADIATION*

Availability
A graphical method for determining interflected daylight in clear climates, 10:31310 (BA;US)
Computer Graphics
A graphical method for determining interflected daylight in clear climates, 10:31310 (BA;US)
Mathematical Models
Spectral solar radiation - new data, 10:30280 (BA;US)
Regression Analysis
Techniques for the estimation of global irradiation from sunshine duration and global irradiation estimation for Italian locations, 10:30277 (R;XA)
Research Programs
Spectral solar radiation - new data, 10:30280 (BA;US)
Resource Assessment
Evaluating the solar resource: problems resulting from temporal, spatial and angular variations, 10:30283 (BA;US)
SOLAR REFLECTORS
Coatings
Polymer degradation on reflecting metal films: fourier transform infrared (FTIR) reflection-absorbance studies, 10:30553 (J;NL)
SOLAR REFRIGERATORS
Absorption Refrigeration Cycle
Second law analysis of a solid adsorption cycle for a solar refrigerator, 10:30394 (RA;US)
Heat Pipes
The optimization of a commercial refrigeration system (with ambient cooling, ice storage and superinsulation), 10:30540 (BA;US)
Optimization
The optimization of a commercial refrigeration system (with ambient cooling, ice storage and superinsulation), 10:30540 (BA;US)
Research Programs
Solar refrigeration activities in the Materials Research Institute, 10:30395 (RA;US)
Seasonal Thermal Energy Storage
The optimization of a commercial refrigeration system (with ambient cooling, ice storage and superinsulation), 10:30540 (BA;US)
Thermodynamics
Second law analysis of a solid adsorption cycle for a solar refrigerator, 10:30394 (RA;US)
Zeolites
Determination of properties of zeolite/refrigerant combinations for solar refrigeration systems. Final report, 10:30374 (R;US)
SOLAR SIMULATORS
Relative contributions of beam, sky, and ground components to diffusely reflected sunlight illuminance in physical models, 10:30440 (BA;US)
SOLAR SPACE HEATING
Educational Tools
Solar Energy Education. Renewable energy activities for earth science , 10:30363 (R;US)
SOLAR STILLS
Research Programs
Alternative energies and combinations of them, 10:30381 (RA;US)
SOLAR THERMAL CONVERSION
Use for overviews of solar thermal program.
Cost
Long-terms goals for solar thermal technology, 10:30349 (R;US)
Research Programs
Long-terms goals for solar thermal technology, 10:30349 (R;US)
Solar thermal technologies program summary, 10:30347 (R;US)
SOLAR THERMAL POWER PLANTS
See also DISTRIBUTED COLLECTOR POWER PLANTS
TOWER FOCUS POWER PLANTS
Latent Heat Storage
Theoretical and numerical study of a heat storage model using fusion heat, 10:30563 (R;FR;In French)
SOLAR TRACKING SYSTEMS
Computerized Control Systems
Contribution to the development of solar and meteorological stations in Senegal: microcomputer controlled measuring station and solar tracking system, 10:30276 (R;FR;In French)
Data Acquisition Systems
Contribution to the development of solar and meteorological stations in Senegal: microcomputer controlled measuring station and solar tracking system, 10:30276 (R;FR;In French)
SOLAR WATER HEATERS
See also PASSIVE SOLAR WATER HEATERS
Prospects of solar heating in energy system of the future, 10:30398 (RA;DK;In Danish)
Comparative Evaluations
Results of monitoring flat-plate, batch, and solar/wood domestic water heaters, 10:30537 (BA;US)
Data Acquisition Systems
Microordinator controlled measuring station for studying the materials of solar system components, 10:30375 (R;FR;In French)
Optimization
Microordinator controlled measuring station for studying the materials of solar system components, 10:30375 (R;FR;In French)
Performance Testing
Results of monitoring flat-plate, batch, and solar/wood domestic water heaters, 10:30537 (BA;US)
Research Programs
Alternative energies and combinations of them, 10:30381 (RA;US)
SOLAR WATER HEATING
Use for solar domestic water heating; not for process hot water.
Energy Models
CEC (Commission of the European Communities) modelling group for solar-heating systems and domestic hot water. II, 10:30401 (R;XE)
SOLAR WATER PUMPS
A passive solar water pump, 10:30455 (BA;US)
SOLAR WIND
Interactions
Research study of space plasma boundary processes. Final report, 1 October 1983-30 September 1984, 10:32464 (R;US)
Lithium Ions
Coupling of Newborn ions to the solar wind by electromagnetic instabilities and their interaction with the bow shcok, 10:32470 (J;US)
Solar Electrons
Data analysis of electron measurements of the plasma experiment aboard the HELIOS probes, 10:32437 (R;DE)
Variations
Solar wind variations and geomagnetic storms: A study of individual storms based on a high time resolution ISEE-3 data, 10:32473 (J;US)
SOLAR-ASSISTED HEAT PUMPS
Flat Plate Collectors
[Solar heat pump]. Final report, 10:30372 (R;US)
Meetings
Workshop on solar assisted heat pumps with ground coupled storage: proceedings, 10:30360 (R;IT)
Thermochemical Heat Storage
[Solar heat pump]. Final report, 10:30372 (R;US)
SOLAR-ASSISTED POWER SYSTEMS
Performance
Long-terms goals for solar thermal technology, 10:30349 (R;US)
SOLENOIDS
Test Facilities
Automated magnet testing facility, 10:31988 (R;US)
SOLID CLUSTERS
Adsorption
Cluster-size distributions for irreversible cooperative filling of lattices. I. Exact one-dimensional results for coalescing clusters, 10:32873 (J;US)

Agglomeration
Cluster-size distributions for irreversible cooperative filling of lattices. I. Exact one-dimensional results for coalescing clusters, 10:32873 (J;US)
SOLID ELECTROLYTES
Ionic Conductivity
Principles of superionic conduction, 10:31081 (RA;US)
SOLID FUELS
See also MIXED OXIDE FUELS
Burners
Domestic market potential for solid-fuel burners. Final report, 10:31283 (R;NZ)
Combustion
Firing fast fuels on a small scale in densely built areas. Basic document, 10:30085 (R;SE;In Swedish)
Hazards
Safe production and use of domestic fuels. Part 1. Prestudy, 10:29740 (R;FI;In Finnish)
Safety
Safe production and use of domestic fuels. Part 1. Prestudy, 10:29740 (R;FI;In Finnish)
SOLID SOLUTIONS
Bubbles
Kinetics of interfacial motion and bubble movement by vapor transport for a two-component solid solution, 10:32839 (J;US)
Interfaces
Kinetics of interfacial motion and bubble movement by vapor transport for a two-component solid solution, 10:32839 (J;US)
SOLID STATE LASERS
See also NEODYMIUM LASERS
Crystal Growth
Improved solid state laser sources. Final technical report, September 2, 1982-February 10, 1985. Volume 3, 10:31764 (R;US)
SOLID STATE PHYSICS
Research Programs
Progress report: Physics Division, 1982 January 1 to March 1, 10:33075 (R;CA)
Progress report: Physics Division, 1982 April 1-June 30, 10:32661 (R;CA)
Progress report 1983/1984 of the Institute for Theoretical Physics of the Technical University, Vienna (Institute for Theoretical Physics of the Technical University Vienna), 10:32833 (R;AT;In German)
SOLID WASTES
See also WOOD WASTES
Environmental Transport
Multi-solute subsurface transport modeling for energy solid wastes: highlights FY 1984, 10:32187 (R;US)
Ground Disposal
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 1. Final report. Report for June 1980-June 1984, 10:29676 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 2. Appendices A through C. Final report, June 1980-June 1984, 10:29677 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 3. Appendices D and E. Final report, June 1980-June 1984, 10:29678 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 4. Appendix F. Final report, June 1980-June 1984, 10:29679 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 5. Appendix G. Final report, June 1980-June 1984, 10:29680 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 6. Appendix H. Final report, June 1980-June 1984, 10:29681 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 7. Appendix I. Final report, June 1980-June 1984, 10:29682 (R;US)
Assessment of fluidized-bed-combustion solid wastes for land disposal. Volume 8. Appendix J. Final report, June 1980-June 1984, 10:29683 (R;US)
Incinerators
Heat-recovery incineration: a summary of operational experience. Final report, 10:31372 (R;US)
Waste Disposal
Using mined space for long-term retention of nonradioactive hazardous waste. Volume 2. Solution-mined salt caverns. Final report, August 1983-January 1985, 10:31367 (R;US)
Using mined space for long-term retention of nonradioactive hazardous waste. Volume 1. Conventional mines. Final report, August 1983-January 1985, 10:31366 (R;US)
SOLIDS
Fracture Mechanics
Fully plastic crack problems: solutions by a penalty method that pass the consistency check. Part I, 10:31428 (R;US)
Heat Flux
Report of the Van de Graaff Group: solid state and materials research. Heat flow in solids during pulsed laser irradiation, 10:31470 (RA;ZA)
Laser-Radiation Heating
Report of the Van de Graaff Group: solid state and materials research. Heat flow in solids during pulsed laser irradiation, 10:31470 (RA;ZA)
Multi-Photon Processes
Multiphoton absorption coefficients in solids: an universal curve, 10:32805 (R;BR)
Pulsed Irradiation
Report of the Van de Graaff Group: solid state and materials research. Heat flow in solids during pulsed laser irradiation, 10:31470 (RA;ZA)
SOLUTES
Diffusion
Physical model studies of dispersion in fracture systems, 10:30600 (R;US)
SOLVENT EXTRACTION
Chemical Reaction Kinetics
Kinetics of mass transfer on a drop bundle in the system uranyl nitrate nitric acid/tributyl phosphate, kerosene, 10:31609 (R;DE;In German)
Mass Transfer
Kinetics of mass transfer on a drop bundle in the system uranyl nitrate nitric acid/tributyl phosphate, kerosene, 10:31609 (R;DE;In German)
SOLVENT-REFINED COAL
Oxidation
Chemical changes in coal liquefaction, 10:29651 (RA;US)
SOLVENT-REFINING COAL PLANTS
See COAL PREPARATION PLANTS
SONDES
See PROBES
SOOT
Chemical Reaction Yield
Soot and radiation in free boundary layer flames, 10:31719 (R;US)
Particle Size
Laser diagnostic analyses of sooting flames. Final report, 1 October 1980-30 September 1984, 10:31717 (R;US)
Removal
Sound propagation in boilers and heat exchangers equipped with sonic sootblowing, 10:31828 (R;SE;In Swedish)
SORGHUM
Solar Drying
Low temperature techniques for drying sorghum with solar energy: experimentation and micro-computer simulation, 10:30376 (R;FR;In French)
SOUTH AFRICA
Accelerator Facilities
Annual report June 1984. [Council for Scientific and Industrial Research, Faure (South Africa). National Accelerator Centre], 10:31987 (R;ZA)
Radioactive Waste Disposal
Geobotanical investigation of the Vaalputs Site, 10:30015 (RA;ZA)
Review of current investigations, problems and future work with regard to radioactive waste disposal, 10:29960 (RA;ZA)

Radiometric Surveys
Review of the Karoo airborne radiometric survey, 10:29880 (RA;ZA)
SOUTH CAROLINA
Hydroelectric Power Plants
Cooper River rediversion project, St. Stephen Powerplant, St. Stephen, Carolina: engineering considerations and instructions for field personnel, 10:30104 (R;US)
SOUTH KOREA

SOUTHEAST REGION
See FEDERAL REGION IV
SOVIET UNION
See USSR
SOYBEAN PLANT
See GLYCINE HISPIDA
SPACE GROUPS
Mathematical Operators
Nonlinear semigroup whose generator is not dissipative, 10:32883 (J;US)
SPACE HEATERS
Gas Fuels
Passive solar/gas fired heating system characterization and development, 10:30493 (BA;US)
Performance Testing
Passive solar/gas fired heating system characterization and development, 10:30493 (BA;US)
SPACE HEATING
See also SOLAR SPACE HEATING
Comparative Evaluations
New thermostat for increased thermal comfort and energy saving, 10:31268 (R;DK)
Control
Study and achievement of a data transmission system using low voltage AC line for residential heating centralized control, 10:31270 (R;FR;In French)
Control Systems
Elimination of the outside influence in the prediction of optimum start control, 10:31278 (R;GB)
Preheat prediction models (revised), 10:31277 (R;GB)
Data Transmission Systems
Study and achievement of a data transmission system using low voltage AC line for residential heating centralized control, 10:31270 (R;FR;In French)
Ground Source Heat Pumps
Energy-efficient residence (EER-2). Final report, 10:31280 (R;US)
Mathematical Models
Preheat prediction models (revised), 10:31277 (R;GB)
Temperature Control
New thermostat for increased thermal comfort and energy saving, 10:31268 (R;DK)
Thermal Comfort
New thermostat for increased thermal comfort and energy saving, 10:31268 (R;DK)
SPACE HVAC SYSTEMS
Heating, ventilation, and air conditioning systems.
Control Systems
New control design principles based on measured performance and energy analysis of HVAC (heating, ventilating, and air-conditioning) systems. Interim report, 10:31193 (R;US)
SPACE LATTICES
See CRYSTAL LATTICES
SPACE POWER REACTORS
Economics
Aerospace technology and commercial nuclear power, 10:30753 (B;US)
Planning
Aerospace technology and commercial nuclear power, 10:30753 (B;US)
Reactor Control Systems
Aerospace technology and commercial nuclear power, 10:30753 (B;US)
Research Programs
Strategic defense initiative, 10:30751 (R;US)
Thermionic Fuel Elements
SP-100 thermionic technology program annual integrated technical progress report for the period ending September 30, 1984, 10:30752 (R;US)
Thermoelectric Materials
Development of improved thermoelectric materials for space nuclear power systems. Sixth technical progress report, March 1985, 10:30837 (R;US)
SPACE REFLECTION
See P INVARIANCE
SPACE SHUTTLES
Gamma Detection
Shuttle flight test of an advanced gamma-ray detection system. Semi-annual technical report, 1 July-31 December 1983, 10:32009 (R;US)
Optical Radar
Bistatic LIDAR experiment proposed for the shuttle/tethered satellite system missions, 10:32075 (J;US)
SPACE WEAPONS
Research Programs
Strategic defense initiative, 10:30751 (R;US)
SPACE-TIME
Dimensions
Measuring the dimension of space-time, 10:32646 (R;AT)
Measure Theory
Measuring the dimension of space-time, 10:32646 (R;AT)
SPARK GAPS
Breakdown
Model that predicts pulse charged gas switching breakdown phenomena, 10:33035 (R;US)
Statistical distribution of breakdown voltages in rep-rate spark gaps, 10:31811 (R;US)
Voltage Drop
Statistical distribution of breakdown voltages in rep-rate spark gaps, 10:31811 (R;US)
SPARK IGNITION ENGINES
Fuel Substitution
Advanced on-board storage concepts for compressed natural gas fueled automotive vehicles, 10:31396 (RA;US)
Investigation of the potential for improving efficiency of a spark ignition engine operating on natural gas - Phase I status report, 10:31395 (RA;US)
Performance
Investigation of the potential for improving efficiency of a spark ignition engine operating on natural gas - Phase I status report, 10:31395 (RA;US)
SPEAR
Stanford positron-electron asymmetric ring.
Magnetic Spectrometers
Mark III spectrometer, 10:32035 (J;NL)
SPECIFIC GRAVITY
See DENSITY
SPECIFIC VOLUME
See DENSITY
SPECIFIC WEIGHT
See DENSITY
SPECTRA (NEUTRON)
See NEUTRON SPECTRA
SPECTRA UNFOLDING
Computer Codes
AUTOP program package for spectrometric data on-line processing using small computers, 10:33093 (R;SU;In Russian)
Lectures
Unfolding methods in high-energy physics experiments, 10:33085 (R;DE)
SPECTROCHEMISTRY

MAGNETIC SPECTROMETERS
MASS SPECTROMETERS
NEUTRON SPECTROMETERS
NMR SPECTROMETERS
OPTICAL SPECTROMETERS
TIME-OF-FLIGHT SPECTROMETERS
ULTRAVIOLET SPECTROMETERS

X-RAY SPECTROMETERS
Electron Multiplier Detectors
Improved performance for large area triple layer microchannel-plate detector for a neutral particle spectrometer in Doublet III, 10:32975 (J;US)
Gamma Radiation
Irradiation effects on components of spectroscopic measurement device for JT-60 diagnostics, 10:32904 (R;JP;In Japanese)
Microchannel Electron Multipliers
Improved performance for large area triple layer microchannel-plate detector for a neutral particle spectrometer in Doublet III, 10:32975 (J;US)

SPEED REGULATORS
Performance
Conversion of mechanical governors to electrical governors, 10:30174 (RA;US)

SPENT FUEL CASKS
Capacity
Preliminary cost and risk analysis for transporting spent fuel and high-level wastes to candidate repository sites, 10:29900 (R;US)
Gamma Dosimetry
SAS2: a coupled one-dimensional depletion and shielding analysis code, 10:31744 (RA;US)
Leak Testing
Commercial Nuclear Waste Research and Development Program. Quarterly report, January-March 1985, 10:29916 (R;US)
Licensing
HTAS1: a two-dimensional heat transfer analysis of fuel casks, 10:31745 (RA;US)
Neutron Dosimetry
SAS2: a coupled one-dimensional depletion and shielding analysis code, 10:31744 (RA;US)
Safety
SAS2: a coupled one-dimensional depletion and shielding analysis code, 10:31744 (RA;US)
Shielding
MORSE-SGC/S for the SCALE system, 10:30794 (RA;US)
Shielding experiments for evaluating a shielding safety evaluation code system to spent fuel processing facilities, (4). Experiments for the assessment on source geometry of BWR spent fuel assemblies, 10:31738 (R;JP;In Japanese)
Thermal Analysis
HTAS1: a two-dimensional heat transfer analysis of fuel casks, 10:31745 (RA;US)
SCALE: a modular code system for performing standardized computer analyses for licensing evaluation. Volume 1. Control modules, 10:30780 (R;US)

SPENT FUEL ELEMENTS
Reprocessing
Proposed fuel cycle for the Integral Fast Reactor, 10:30736 (R;US)

SPENT FUEL STORAGE
See also DRY STORAGE
Feasibility Studies
Status of rod consolidation, 10:29899 (R;US)
Licensing
Status of rod consolidation, 10:29899 (R;US)
Planning
Final disposal of spent nuclear fuel. Standard programme for site investigations, 10:29978 (R;SE)
Research Programs
KBS annual report 1982. Summaries of technical reports issued during 1982, 10:29976 (R;SE)
KBS Annual Report 1983. Including summaries of technical reports issued during 1983, 10:29985 (R;SE)

SPENT FUELS
Air Transport
Analysis of NEPA/CEQ requirements with respect to nuclear materials transportation. Final report, 10:29901 (R;US)
By-Products
Irradiated fuel by-product separation research in Canada, 10:29894 (RA;XA)
Dose Rates
Calculational method for determining biological dose rates from irradiated research reactor fuel, 10:30031 (R;US)
Dry Storage
Commercial Nuclear Waste Research and Development Program. Quarterly report, January-March 1985, 10:29916 (R;US)
Fission Product Release
Analysis of transient fission gas release and swelling in oxide fuel, 10:30819 (R;US)
Helium retention. Summary of reports and memoranda, 10:29896 (R;SE)
Investigations
Helium retention. Summary of reports and memoranda, 10:29896 (R;SE)
Monitored Retrievable Storage
Need for and feasibility of monitored retrievable storage: a preliminary analysis, 10:29918 (R;US)
Neutron Spectra
Application of detailed fission-product decay gamma spectra in the calculation of photoneutron spectra from D(γ,n) reactions in PWR fuel, 10:30715 (R;US)
Packaging
Analysis of NEPA/CEQ requirements with respect to nuclear materials transportation. Final report, 10:29901 (R;US)
Photoneutrons
Application of detailed fission-product decay gamma spectra in the calculation of photoneutron spectra from D(γ,n) reactions in PWR fuel, 10:30715 (R;US)
Radioactive Waste Disposal
Costs for handling and disposal of high level radioactive wastes and spent fuels, 10:29973 (R;SE;In Swedish)
Evaluation of commercial repository capacity for the disposal of defense high-level waste, 10:29914 (R;US)
KBS annual report 1979. Including summaries of technical reports issued during 1979, 10:29974 (R;SE)
Performance Assessment National Review Group, 10:29917 (R;US)
Technical test description of activities to determine the potential for spent fuel oxidation in a tuff repository, 10:29930 (R;US)
Reprocessing
Irradiated fuel by-product separation research in Canada, 10:29894 (RA;XA)
Reviews
Helium retention. Summary of reports and memoranda, 10:29896 (R;SE)
Road Transport
Analysis of NEPA/CEQ requirements with respect to nuclear materials transportation. Final report, 10:29901 (R;US)
Risk comparisons for the transportation of spent fuel from nuclear reactors, 10:30023 (R;US)
Swelling
Analysis of transient fission gas release and swelling in oxide fuel, 10:30819 (R;US)

SPENT SHALES
Natural Radioactivity
Radiological impact of atmospheric emissions from oil shale retorts, 10:29854 (J;GB)

SPERM
See SPERMATOZOA

SPERMATIDS
See SPERMATOZOA

SPERMATOZOA
Malformations
Genotoxicity of tobacco smoke and tobacco smoke condensate, 10:32368 (J;NL)

SPHEROMAK DEVICES
Princeton Plasma Physics Laboratory annual report, October 1, 1982-September 30, 1983, 10:33028 (R;US)
Magnetic Field Configurations
Determination of CTX equilibria, 10:33019 (R;US)
Theoretical aspects of magnetic helicity, 10:33046 (R;US)
Plasma Confinement
Increased particle confinement with the use of external dc bias field in the CTX spheromak, 10:32905 (R;US)
Plasma Guns
Energy efficiency of the CTX magnetized coaxial plasma source, 10:33020 (R;US)

SPICES
Radiodisinfestation
Irradiation of Northwest agricultural products, 10:30053 (R;US)
Radiopreservation
Irradiation of Northwest agricultural products, 10:30053 (R;US)
SPILLWAY
Construction
Auxiliary spillway improves dam safety at minimal cost, 10:30267 (RA;US)
Spillway addition at TVA's Blue Ridge Project, 10:30268 (RA;US)
SPINACH
Solar Drying
Research on solar food drying at the University of California, Santa Cruz, 10:30533 (BA;US)
SPOIL BANKS
Revegetation
Effect of nitrogen-fixing growth on restored coal spoil banks, 10:29703 (RA;US)
SPRAY PONDS
See SPRAYS
SPRAYED COATINGS
Thermal Conductivity
Investigation of enhanced thermal barrier coating systems for diesel engine components, 10:31383 (RA;US)
SPRAYS
Structural Models
Modeling of engine sprays, 10:31412 (R;US)
SQUALANE
Vapor Pressure
Prediction of thermodynamic properties of coal derivatives. Progress report, September 1, 1984-August 31, 1985, 10:31669 (R;US)
SRC-II PROCESS
Chemical Reaction Kinetics
Optimization of various coal conversion systems. Final report, 10:29625 (R;US)
Computerized Simulation
Optimization of various coal conversion systems. Final report, 10:29625 (R;US)
Investment
Refining and upgrading of synfuels from coal and oil shales by advanced catalytic processes. Tenth Interim Report. Revised stock balances and updated cost estimates, 10:29735 (R;US)
SRM

Research Programs
Stable Isotope Group 1982 progress report, 10:32311 (R;NZ)
STACK DISPOSAL
Air Pollution
Development of a model to estimate dispersion of elevated releases in the shear-dominated boundary layer. Final report, 10:32143 (R;US)
STAINLESS STEEL-18-10
Corrosion
Examination of transpassive nitric acid corrosion behavior of different austenitic stainless steels by prolongated Huey-testing (65% HNO_3, 120°C, 720 h), 10:31465 (R;DE;In German)
STAINLESS STEEL-304
Gas Tungsten-Arc Welding
Interaction of trace elements and welding parameters on GTA weld shape (Variation with penetration and tip angle), 10:31476 (R;US)
Ion Implantation
Creation of tailored surfaces using selective oxidation of ion-implanted materials, 10:31506 (J;US)
Oxidation
Creation of tailored surfaces using selective oxidation of ion-implanted materials, 10:31506 (J;US)
Stress Corrosion
Evaluation of stress corrosion crack growth in BWR piping systems, 10:30690 (R;US)
STAINLESS STEEL-304L
X-Ray Fluorescence Analysis
X-ray fluorescence analysis of 304L stainless steel. Final report, 10:31785 (R;US)
STAINLESS STEEL-310
Corrosion
Examination of transpassive nitric acid corrosion behavior of different austenitic stainless steels by prolongated Huey-testing (65% HNO_3, 120°C, 720 h), 10:31465 (R;DE;In German)
STAINLESS STEEL-316
Creep
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Heat to heat variations in the creep rupture strength of a modified AISI 316 grade stainless steel, 10:30748 (R;IN)
High-temperature helium embrittlement (T> =0,45Tsub(M)) of metals, 10:31463 (R;DE;In German)
Ductility
Plastic flow and fracture of Ti-modified type-316 austenitic stainless steel after high temperature aging in hydrogen, 10:31451 (RA;IL)
Electron Collisions
Experimental measurements of melting and vaporization due to simulated plasma disruptions, 10:33059 (J;US)
Embrittlement
Simulating the CTR environment in the HVEM. Final report, September 1, 1975-August 31, 1984, 10:31446 (R;US)
Evaporation
Experimental measurements of melting and vaporization due to simulated plasma disruptions, 10:33059 (J;US)
Fracture Properties
Plastic flow and fracture of Ti-modified type-316 austenitic stainless steel after high temperature aging in hydrogen, 10:31451 (RA;IL)
Helium Embrittlement
High-temperature helium embrittlement (T> =0,45Tsub(M)) of metals, 10:31463 (R;DE;In German)
Hydrogen
Plastic flow and fracture of Ti-modified type-316 austenitic stainless steel after high temperature aging in hydrogen, 10:31451 (RA;IL)
Melting
Experimental measurements of melting and vaporization due to simulated plasma disruptions, 10:33059 (J;US)
Physical Radiation Effects
Simulating the CTR environment in the HVEM. Final report, September 1, 1975-August 31, 1984, 10:31446 (R;US)
STAINLESS STEEL-321
Fatigue
Mechanisms of fatigue in coal liquefaction environments. Progress report, 10:29622 (R;US)

STEAM CONDENSERS
Procurement
Condenser procurement guidelines. Final report, 10:30645 (R;US)
Specifications
Condenser procurement guidelines. Final report, 10:30645 (R;US)
STEAM GENERATORS
Computerized Simulation
Modelling of small-break LOCA for NPP Krsko using RELAP5/MOD1 code, 10:30940 (RA;XA)
SIGNI. A simplified lumped-parameter steam generator model, 10:30774 (RA;IL)
Heat Transfer
Steam generator model for real-time analysis, 10:30735 (R;US)
Hydraulics
Steam generator model for real-time analysis, 10:30735 (R;US)
Loss of Coolant
Modelling of small-break LOCA for NPP Krsko using RELAP5/MOD1 code, 10:30940 (RA;XA)
Mechanical Vibrations
Analysis of flow-induced vibration of heat exchanger and steam generator tube bundles using the AECL computer code PIPEAU-2, 10:30810 (R;CA)
Performance Testing
Enhanced oil recovery. Lovington steam test goes down as a silent roaring success, 10:29770 (J;US)
Start-up support for New Brunswick Electric's Point Lepreau nuclear steam generators, 10:30724 (R;CA)
Ruptures
Analytic studies pertaining to steam generator tube rupture accidents, 10:31017 (R;US)
STEAM TURBINES
Dynamics
Non-linear mathematical model of the dynamics of a turbine for saturated steam, 10:30816 (TG;GB)

Fuel Consumption
Ways to reduce slow steaming fuel consumption of steam turbine machinery through technical modifications, 10:31326 (RA;US)
Fuel Substitution
Alternate fuels for maritime use, 10:31324 (RA;US)
Modifications
Ways to reduce slow steaming fuel consumption of steam turbine machinery through technical modifications, 10:31326 (RA;US)
Stress Corrosion
Stress corrosion cracking in steam turbine disks: analysis of field and laboratory data. Final report, 10:30650 (R;US)
Turbine Blades
Stress corrosion cracking and corrosion fatigue of steam turbine materials, 10:30651 (R;US)
STEEL INDUSTRY
See METAL INDUSTRY
STEEL-22NIM0CR37
See STEEL-DIN-1-6751
STEEL-ASTM-A302
Heat Treatments
Exemplary representation of structural constitutions of steels used for nuclear power plant components, with particular emphasis on welding and heat treatment (5. technical report. Pt. 1), 10:31433 (R;DE;In German)
Mechanical Properties
Exemplary representation of structural constitutions of steels used for nuclear power plant components, with particular emphasis on welding and heat treatment (5. technical report. Pt. 1), 10:31433 (R;DE;In German)
Microstructure
Exemplary representation of structural constitutions of steels used for nuclear power plant components, with particular emphasis on welding and heat treatment (5. technical report. Pt. 1), 10:31433 (R;DE;In German)
STEEL-ASTM-A508
Physical Radiation Effects
Tensile properties of irradiated nuclear grade pressure vessel welds for the third HSST irradiation series, 10:30688 (R;US)
Tensile Properties
Tensile properties of irradiated nuclear grade pressure vessel welds for the third HSST irradiation series, 10:30688 (R;US)
STEEL-ASTM-A533
Mechanical Properties
ORNL characterization of Heavy-Section Steel Technology Program plates 01, 02, and 03, 10:31472 (R;US)
STEEL-ASTM-A533-B
Cracks
Clad interface crack detection and sizing. Final report, 10:30918 (R;US)
Fracture Properties
Clad interface crack detection and sizing. Final report, 10:30918 (R;US)
STEEL-DIN-1-4301
Embrittlement
Experiments for liquid metal embrittlement of fusion reactor materials by liquid lithium, 10:31466 (R;DE;In German)
STEEL-DIN-1-6310
Heat Treatments
Exemplary representation of structural constitutions of steels used for nuclear power plant components, with particular emphasis on welding and heat treatment (5. technical report. Pt. 1), 10:31433 (R;DE;In German)
Investigations on the behaviour of reactor pressure vessel material 20 MnMoNi 55 during heat and stress relieving treatments. Vol. 1 and 2, 10:31432 (R;DE;In German)
Mechanical Properties
Exemplary representation of structural constitutions of steels used for nuclear power plant components, with particular emphasis on welding and heat treatment (5. technical report. Pt. 1), 10:31433 (R;DE;In German)
Microstructure
Exemplary representation of structural constitutions of steels used for nuclear power plant components, with particular emphasis on welding and heat treatment (5. technical report. Pt. 1), 10:31433 (R;DE;In German)
Stress Relaxation
Investigations on the behaviour of reactor pressure vessel material 20 MnMoNi 55 during heat and stress relieving treatments. Vol. 1 and 2, 10:31432 (R;DE;In German)
STEEL-DIN-1-6751
Heat Treatments
Exemplary representation of structural constitutions of steels used for nuclear power plant components, with particular emphasis on welding and heat treatment (5. technical report. Pt. 1), 10:31433 (R;DE;In German)
Mechanical Properties
Exemplary representation of structural constitutions of steels used for nuclear power plant components, with particular emphasis on welding and heat treatment (5. technical report. Pt. 1), 10:31433 (R;DE;In German)
Microstructure

Algorithms
New algebraic tables of SU(2) quantities, 10:32879 (R;BR)
SU-3 GROUPS
Mathematical Operators
Denominator function for canonical SU(3) tensor operators, 10:32872 (J;US)
Polynomials
Denominator function for canonical SU(3) tensor operators, 10:32872 (J;US)
SU-5 GROUPS
Symmetry Breaking
Nonminimal SU(5) model, 10:32629 (J;US)
SUBCONTRACTORS
See CONTRACTORS
SUBSURFACE STRUCTURES
Detection
Underground obstacle detection and mapping system. Final report, 10:32051 (R;US)
Heat Losses
Mathematical modeling and computer simulation of insulation systems in below grade applications, 10:31228 (RA;US)
SUBURBS
See URBAN AREAS
SUGAR CANE
Energy Source Development
Fuel oils from higher plants, 10:30305 (R;US)

SUGAR INDUSTRY
  Energy Demand
    Industry's energy demand for space heating, 10:31350 (R;SE;In Swedish)
  Heat Recovery
    Industry's energy demand for space heating, 10:31350 (R;SE;In Swedish)
  Waste Heat Utilization
    Industry's energy demand for space heating, 10:31350 (R;SE;In Swedish)
SUGARS
  See SACCHARIDES
SULFATES
  See also ACID SULFATES
    CESIUM SULFATES
    POTASSIUM SULFATES
    SODIUM SULFATES
    ZINC SULFATES
  Anaerobic Digestion
    Anaerobic microbial transformations in subsurface environments, 10:32348 (R;US)
SULFHYDRYL COMPOUNDS
  See THIOLS
SULFONATES
  For salts of sulfonic acids; for esters see SULFONIC ACID ESTERS.
  See also PETROLEUM SULFONATES
  Adsorption
    Behavior of surfaces with adsorbed materials, 10:29757 (RA;US)
SULFUR
  Adsorption
    Oxidation of $Ni_{60}Fe_{40}$(100) in the presence of sulfur, 10:31502 (J;US)
  Diffusion
    Single atom surface diffusion of sulfur on Ni(111), 10:31660 (J;US)
  Removal
    Advanced coal liquefaction catalyst development. Quarterly progress report No. 9, October 1-December 31, 1983, 10:29623 (R;US)
  X-Ray Fluorescence Analysis
    X-ray fluorescence analysis of uranium concentrates, 10:31637 (TG;US)
SULFUR COMPOUNDS
  See also SULFATES
    SULFUR OXIDES
  Separation Processes
    Chemical characterization of heavy ends of light petroleum, of heavy petroleum, and of liquids derived from other fossil sources, 10:29792 (RA;US)
SULFUR DIOXIDE
  Air Pollution Monitoring
    DIAL lidar measurements of atmospheric pollutants (SO_2, O_3) during the Fos-Berre 83 experiment, 10:32126 (R;FR)
  Biological Effects
    Effects of sulphur dioxide on plants with special reference to biochemical and physiological responses, 10:32351 (R;DD;In German)
    Transfer of SO_2 and effects on plants, 10:32347 (R;FR;In French)
  Chemical Reactions
    Ultrahigh vacuum reaction chamber/transfer mechanism attached to an Auger electron spectrometer for the study of the reactions of clean lithium surfaces, 10:31496 (J;US)
  Corrosive Effects
    Effects of acid deposition on the properties of portland cement concrete: state of knowledge, 10:31577 (R;US)
  Ecological Concentration
    Comment on local source impacts at Hubbard Brook, New Hampshire, 10:32152 (J;US)
    Forecasting future industrial SO_2 and NO/sub x/ emissions. Revised, 10:31118 (R;US)
  Foliar Uptake
    Transfer of SO_2 and effects on plants, 10:32347 (R;FR;In French)
  Recovery
    Recovery of sulfur and lime from waste gypsum, 10:31360 (RA;US)
  Sampling
    Throughfall rate and chemistry studies: Whiteface Mountain, 10:32132 (R;US)
  Thermodynamic Properties
    Prediction of second and cross virial coefficients of blended mobile phases in gas chromatography, 10:31648 (J;US)
  Vapor Pressure
    Thermodynamics of multi-polar molecules: the perturbed-anisotropic-chain theory, 10:31670 (R;US)
SULFUR HYDRIDES
  See HYDROGEN SULFIDES
SULFUR IONS
  Ion-Atom Collisions
    Evidence for uncorrelated electron capture and K-shell excitation in S^{13+}/He collisions, 10:32523 (J;US)
SULFUR ISOTOPES
  Isotope Ratio
    Geochemistry of sulfate evaporites in Iowa, 10:32388 (RA;US)
SULFUR OXIDES
  See also SULFUR DIOXIDE
  Air Pollution Abatement
    Bench-scale process evaluation of reburning and sorbent injection for in-furnace NOx/SOx reduction. Final report, October 1983-October 1984, 10:31368 (R;US)
    Overview of EPA's (Environmental Protection Agency's) LIMB technology development program, 10:32146 (R;US)
SULFUR SULFIDES
  See SULFUR
SULFURIC ACID
  Lung Clearance
    Clearance of sulfuric acid-introduced ^{35}S from the respiratory tracts of rats, guinea pigs and dogs following inhalation or instillation, 10:32363 (J;US)
SUN
  Luminosity
    Solar variability observed through changes in solar figure and mean diameter, 10:32419 (R;US)
SUPERCOMPUTERS
    Supercomputers and symbolic computation. Technical report for period ending 4 June 1984, 10:33078 (R;US)
    Very large least-squares problems and supercomputers, 10:32878 (R;US)
  Programming
    BLAS (Basic Linear Algebra Subroutines), linear algebra modules, and supercomputers. Technical report for period ending 15 December 1984, 10:33079 (R;US)
  Uses
    Some ideas for decomposing the domain of elliptic partial differential equations in the Schwarz process, 10:33106 (R;US)
SUPERCONDUCTING CABLES
  Heat Transfer
    Enhanced heat transfer computations for internally cooled cable superconductor, 10:31741 (R;US)
  Physical Radiation Effects
    Electrical resistivity change in Cu and Al stabilizers of superconducting magnets after low-temperature neutron irradiation, 10:33010 (R;JP;In Japanese)
SUPERCONDUCTING CAVITY RESONATORS
  Comparative Evaluations
    Superconductors for pulsed rf accelerators, 10:31872 (R;US)
  Superconductors
    Superconductors for pulsed rf accelerators, 10:31872 (R;US)
SUPERCONDUCTING COILS
  Electromagnets
    Superconducting coils electromagnet of the Orsay IPN project, 10:31838 (R;FR;In French)
SUPERCONDUCTING COMPOSITES
  Critical Current
    Processing and problems in manufacturing MJR billets of four separate compositions for Lawrence Livermore National Laboratory, 10:31750 (R;US)
  Production
    Processing and problems in manufacturing MJR billets of four separate compositions for Lawrence Livermore National Laboratory, 10:31750 (R;US)

SUPERCONDUCTING DEVICES
Restricted to general or review articles and bibliographies.
See also *SUPERCONDUCTING CAVITY RESONATORS*
SUPERCONDUCTING MAGNETS
Heat Exchangers
Survey of the state-of-the-art of miniature cryocoolers for superconductive devices. Final report, 10:31727 (R;US)
SUPERCONDUCTING FILMS
Fabrication
Synthesis and characterization of superconducting electronic materials. Final technical report, 1 July 1982-30 September 1984, 10:31728 (R;US)
Layers
Composition modulation measurements in thin 2D-superconducting multilayers, 10:31733 (R;FR)
Tunnel Effect
Synthesis and characterization of superconducting electronic materials. Final technical report, 1 July 1982-30 September 1984, 10:31728 (R;US)
SUPERCONDUCTING MAGNETS
Computerized Simulation
Two-dimensional magnetic field numerical simulation of 3 T superconducting dipole with iron yoke, 10:31897 (R;SU;In Russian)
Magnetic Field Configurations
Magnet-field design considerations for a high-energy superconducting cyclotron, 10:32003 (J;US)
Neutrons
High magnetic field and very low temperature cryomagnet for neutron scattering experiments, 10:31732 (R;FR)
Solenoids
Stability and vibrations of internal windings of high-current superconducting solenoid magnets. Technical report, 10:31729 (R;US)
Stability
Stability and vibrations of internal windings of high-current superconducting solenoid magnets. Technical report, 10:31729 (R;US)
SUPERCONDUCTING SUPER COLLIDER
Alignment
Survey and alignment requirements and techniques for the SSC, 10:31881 (RA;US)
Antiproton Beams
Beam cooling and anti-proton production, 10:31878 (RA;US)
Beam Currents
Limitations on beam intensity, 10:31884 (RA;US)
Beam Dumps
Injection, extraction and beam abort system for the SSC, 10:31997 (RA;US)
Beam Dynamics
Determination of the dynamic aperture of circular accelerators by the perturbation theory method, 10:31930 (RA;US)
Estimate of the longitudinal and transverse impedances for the superconducting super collider, 10:31927 (RA;US)
Intra-beam scattering with vertical dispersion, 10:31920 (RA;US)
Note on aperture limits from collective instabilities, 10:31932 (RA;US)
Single beam collective effects in the SSC, 10:31915 (RA;US)
Single particle stability, 10:31875 (RA;US)
Beam Extraction
Injection, extraction and beam abort system for the SSC, 10:31997 (RA;US)
Beam Injection
Injection, extraction and beam abort system for the SSC, 10:31997 (RA;US)
Some remarks on the injection into the SSC, 10:31998 (RA;US)
Beam Luminosity
Primary parametric relationships, 10:31914 (RA;US)
Beam Monitors
Aperture requirements for the beam position monitor and closed orbit distortions, 10:31931 (RA;US)
Coupling impedance of position monitor electrodes, 10:31883 (RA;US)
Beam Optics
Design considerations and procedures for the SSC (with appendix on terrain following), 10:31882 (RA;US)
LHC insertions with offset quadrupoles, 10:31923 (RA;US)
Beam-Beam Interactions
Beam-beam resonance criteria for high Q/sub s/ and low crossing angles, 10:31918 (RA;US)
Beam-beam resonance suppression by clustered IR's, 10:31919 (RA;US)
How much random sextupole field can we have in the presence of beam-beam interactions, 10:31928 (RA;US)
Comparative Evaluations
Tevatron as an SSC prototype; experience versus predictions, 10:31880 (RA;US)
Configuration
Lattice and intersection region optics, 10:31874 (RA;US)
Design
Design considerations and procedures for the SSC (with appendix on terrain following), 10:31882 (RA;US)
Electric Impedance
Estimate of the longitudinal and transverse impedances for the superconducting super collider, 10:31927 (RA;US)
Magnetic Fields
Conductor placement errors to Tevatron dipoles and quadrupoles and an extrapolation to SSC dipoles, 10:31925 (RA;US)
Magnet imperfections and collective effects, 10:31916 (RA;US)
Single particle considerations, 10:31876 (RA;US)
Meetings
Accelerator physics issues for a superconducting super collider, 10:31873 (R;US)
Orbits
SSC closed-orbit correction, 10:31924 (RA;US)
Polarized Beams
Polarized protons in the SSC, 10:31921 (RA;US)
Radio Noise
RF noise considerations for the superconducting super collider, 10:31933 (RA;US)
Resonance
Width of nonlinear resonance, 10:31929 (RA;US)
RF Systems
Rf and feedback systems, 10:31917 (RA;US)
Shielding
Design considerations for personnel access penetrations for the superconducting super collider, 10:31942 (R;US)
Stored Energy
Limitations on beam intensity, 10:31884 (RA;US)
Synchrotron Radiation
Synchrotron-radiation in a superconducting super collider: optical considerations, 10:31999 (RA;US)
Vacuum Systems
Beam channel vacuum system, 10:31877 (RA;US)
Photoelectron yields from synchrotron radiation in the SSC, 10:31886 (RA;US)
SUPERCONDUCTORS
See also *TYPE-II SUPERCONDUCTORS*
Comparative Evaluations
Superconductors for pulsed rf accelerators, 10:31872 (R;US)
SUPERGRAVITY
Cosmological Models
Finite temperature corrections in N = 1 supergravity, 10:32456 (J;NL)
Field Equations
Grassmann expansion of the classical N=2 supergravity field equations, 10:32869 (R;AT)
SUPERHETERODYNE RECEIVERS
See *HETERODYNE RECEIVERS*
SUPERNOVA REMNANTS
X-Ray Spectra
X-ray spectra of supernova remnants, 10:32434 (R;US)
SUPERNOVAE
Equations of State
Thomas-Fermi equation of state of hot dense matter, 10:32423 (R;FR)
SUPERSYMMETRY
Supersymmetry, grand unification and proton decay, 10:32635 (R;US)

Coupling Constants
Nicolai maps and stochastic observables from a coupling constant flow, 10:32622 (R;DE)
Stochastic Processes
Nicolai maps on manifolds, 10:32628 (J;US)
SUPERTANKERS
See TANKER SHIPS
SUPERVOLTAGE RADIOTHERAPY
See RADIOTHERAPY
SUPPLY DISRUPTION
Allocations
International energy emergency system: issues and sources, 10:31142 (R;US)
Simulation
Department of Energy's participation in the International Energy Agency's recent worldwide oil-sharing test (allocation systems test - AST-4). Hearing before a Subcommittee of the Committee on Government Operations, House of Representatives, Ninety-Eighth Congress, First Session, September 22, 1983, 10:29789 (B;US)
SUPPORTS
See also FOUNDATIONS
FUEL RACKS
Cracks
Cracking in concrete support panels due to the force exerted by the thrust pads of a Bouygues tunnelling machine, 10:29696 (R;BE;In French)
SURFACE AREA
Correlations
Gasification kinetics and surface areas of catalyzed carbonaceous chars, 10:29644 (BA;US)
SURFACE MINING
Dusts
[Mining and mineral-related research]. Final report, October 1, 1982-September 30, 1983, 10:29614 (R;US)
Land Reclamation
Effects of reclamation methods on groundwater quality and resaturation rates, 10:29702 (RA;US)
Iowa State Mining and Mineral Resources Research Institute. Final report, July 1, 1982-September 30, 1983, 10:29701 (R;US)
Research Programs
Iowa State Mining and Mineral Resources Research Institute. Final report, July 1, 1982-September 30, 1983, 10:29701 (R;US)
Slope Stability
Research for deep opencast coal mines - European practice, 10:29694 (R;AU)
SURFACE WATERS

Kinetic investigation of TBP-hydrolysis in the Purex system, 10:29895 (R;DE;In German)
Agglomeration
Aggregation and interactions of tributyl phosphate and tricaprylmethylammonium nitrate in hexane by osmometry, 10:31655 (J;US)
Dimerization
Aggregation and interactions of tributyl phosphate and tricaprylmethylammonium nitrate in hexane by osmometry, 10:31655 (J;US)
Electric Conductivity
Aggregation and interactions of tributyl phosphate and tricaprylmethylammonium nitrate in hexane by osmometry, 10:31655 (J;US)
TEARING INSTABILITY
Magnetohydrodynamics
Normal mode analysis for linear resistive magnetohydrodynamics, 10:32900 (R;DE)
TECHNETIUM
Environmental Transport
Radionuclide diffusion and mobilities in compacted bentonite, 10:32178 (R;SE)
Voltametry
Voltammetric assay of extremely low technetium concentrations following enrichment at the HMDE after reaction with Thiocyanate, 10:31616 (R;DE;In German)
TECHNETIUM 99
Isotope Production
Report of the Van de Graaff Group: nuclear analysis. Radioactive impurities in technetium 99m generators, 10:30049 (RA;ZA)
TECHNETIUM ALLOYS
Lattice Parameters
Superconductivity in the W-Tc and W_2C-Tc systems, 10:31467 (R;US)
Superconductivity
Superconductivity in the W-Tc and W_2C-Tc systems, 10:31467 (R;US)
TELLURIUM ISOTOPES
Electromagnetic Isotope Separation
Elimination of the image curvature in the MEIRA isotope separator, 10:30047 (RA;IL)
TEMPERATURE DISTRIBUTION
Computer Graphics
HEATPLOT-S: a temperature distribution plotting program for HEATING5/HEATING6, 10:31777 (RA;US)
TENNESSEE VALLEY AUTHORITY
Reviews

TEXTOR TOKAMAK
Plasma Diagnostics
Plasma-edge studies using carbon resistance probes, 10:32931 (J;US)
Plasma Scrape-Off Layer
Plasma-edge studies using carbon resistance probes, 10:32931 (J;US)
TFTR REACTORS
Prior to July 1985, this was a valid descriptor and older material is so indexed.
Alpha Detection
Alpha particle diagnostic based on damping of lower hybrid waves, 10:32967 (J;US)
Beam Injection Heating
Fusion gamma diagnostics, 10:32958 (J;US)
Control Systems
Magnetic diagnostics and feedback control on TFTR (invited), 10:32952 (J;US)
Electrical Properties
Magnetic diagnostics and feedback control on TFTR (invited), 10:32952 (J;US)
Electromagnetic Radiation
Alpha particle diagnostic based on damping of lower hybrid waves, 10:32967 (J;US)
Electron Cyclotron-Resonance
Fast scanning heterodyne receiver for the measurement of the time evolution of the electron temperature profile on the Tokamak Fusion Test Reactor, 10:32949 (J;US)
Electron Temperature
Fast multichannel electron temperature diagnostic for TFTR using x-ray imaging, 10:32936 (J;US)
Fast scanning heterodyne receiver for the measurement of the time evolution of the electron temperature profile on the Tokamak Fusion Test Reactor, 10:32949 (J;US)
Tokamak Fusion Test Reactor horizontal high-resolution Bragg x-ray spectrometer (abstract), 10:32938 (J;US)
Fuel Pellets
Repeating pneumatic hydrogen pellet injector for plasma fueling, 10:33049 (J;US)
Impurities
Study of impurity radiation on the PLT and TFTR tokamaks with high-resolution, time-resolving spectrometers, 10:32939 (J;US)
Ion Temperature
Tokamak Fusion Test Reactor horizontal high-resolution Bragg x-ray spectrometer (abstract), 10:32938 (J;US)
Joule Heating
Status of TFTR with Ohmic heating and neutral beam injection, 10:33053 (J;US)
Magnetic Fields
Magnetic diagnostics and feedback control on TFTR (invited), 10:32952 (J;US)
Neutral Atom Beam Injection
Status of TFTR with Ohmic heating and neutral beam injection, 10:33053 (J;US)
Neutron Emission
Collimated ZnS (Ag)-detector array for Tokamak Fusion Test Reactor neutron source strength radial profile measurements, 10:32969 (J;US)
Neutron Sources
Effects of neutron energy spectrum on the efficiency calibration of epithermal neutron detectors, 10:32970 (J;US)
Operation
Magnetic diagnostics and feedback control on TFTR (invited), 10:32952 (J;US)
Status of TFTR with Ohmic heating and neutral beam injection, 10:33053 (J;US)
Pellet Injection
Repeating pneumatic hydrogen pellet injector for plasma fueling, 10:33049 (J;US)
Plasma Confinement
Princeton Plasma Physics Laboratory annual report, October 1, 1982-September 30, 1983, 10:33028 (R;US)

Plasma Diagnostics
  Alpha particle diagnostic based on damping of lower hybrid waves, 10:32967 (J;US)
  Collimated ZnS (Ag)-detector array for Tokamak Fusion Test Reactor neutron source strength radial profile measurements, 10:32969 (J;US)
  Effects of neutron energy spectrum on the efficiency calibration of epithermal neutron detectors, 10:32970 (J;US)
  Fusion gamma diagnostics, 10:32958 (J;US)
  Magnetic diagnostics and feedback control on TFTR (invited), 10:32952 (J;US)
  Study of impurity radiation on the PLT and TFTR tokamaks with high-resolution, time-resolving spectrometers, 10:32939 (J;US)
  TFTR diagnostic control and data acquisition system, 10:32957 (J;US)
  TFTR Thomson scattering system, 10:32963 (J;US)
  Tokamak Fusion Test Reactor horizontal high-resolution Bragg x-ray spectrometer (abstract), 10:32938 (J;US)
Reactor Fueling
  Repeating pneumatic hydrogen pellet injector for plasma fueling, 10:33049 (J;US)
Vacuum Systems
  Status of TFTR with Ohmic heating and neutral beam injection, 10:33053 (J;US)
Wave Propagation
  Alpha particle diagnostic based on damping of lower hybrid waves, 10:32967 (J;US)
X-Ray Spectra
  Fast multichannel electron temperature diagnostic for TFTR using x-ray imaging, 10:32936 (J;US)
  Tokamak Fusion Test Reactor horizontal high-resolution Bragg x-ray spectrometer (abstract), 10:32938 (J;US)
X-Ray Spectroscopy
  Study of impurity radiation on the PLT and TFTR tokamaks with high-resolution, time-resolving spectrometers, 10:32939 (J;US)
THAILAND

THREE MILE ISLAND-2 REACTOR
Dauphin County, Pennsylvania, USA
Containment Systems
Analysis of the hydrogen burn in the TMI-2 containment. Final report, 10:30917 (R;US)
Primary Coolant Circuits
Computer code calculations of the TMI-2 accident: initial and boundary conditions, 10:30863 (R;US)
Radioactive Waste Processing
Development of the flowsheet used for decontaminating high-activity-level water at TMI-2. Draft, 10:30853 (R;US)
Reactor Accidents
Analysis of the hydrogen burn in the TMI-2 containment. Final report, 10:30917 (R;US)
Computer code calculations of the TMI-2 accident: initial and boundary conditions, 10:30863 (R;US)
Steam Generators
Computer code calculations of the TMI-2 accident: initial and boundary conditions, 10:30863 (R;US)

THREE-BODY PROBLEM
Matrix Elements
Calculation of matrix elements of the three-body system relativistic Hamiltonian in adiabatic representation, 10:32863 (R;SU;In Russian)
Programming
Calculation of matrix elements of the three-body system relativistic Hamiltonian in adiabatic representation, 10:32863 (R;SU;In Russian)

THRUSTERS
Design
Propellers for economy, 10:31342 (RA;US)
Performance
Evaluation of various types of nozzle propellers and reaction fin as the device for the improvement of propulsive performance of high block coefficient ships, 10:31343 (RA;US)

THTR-300 REACTOR
Hammuentrop, North Rhein Westfalia, Federal Republic of Germany
Fission Product Release
Evaluation of radiation doses in the surroundings of the THTR-300 caused by a hypothetical core heat-up accident, 10:30954 (R;DE;In German)
Loss of Coolant
Evaluation of radiation doses in the surroundings of the THTR-300 caused by a hypothetical core heat-up accident, 10:30954 (R;DE;In German)

Radiation Hazards
Evaluation of radiation doses in the surroundings of the THTR-300 caused by a hypothetical core heat-up accident, 10:30954 (R;DE;In German)

THULIUM
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)

THULIUM PHOSPHATES
Raman Spectra
Intensities and asymmetries of electronic Raman scattering in $ErPO_4$ and $TmPO_4$, 10:31587 (J;US)

TIGHT SANDS
See SANDSTONES

TIHANGE REACTOR
Tihange, Liege, Belgium
Fuel Assemblies
Summary of SEMO experience with PWR's cores containing Gadolinia bearing fuel in Tihange 1 nuclear power station, 10:30708 (RA;XA)
Fuel Cycle
Summary of SEMO experience with PWR's cores containing Gadolinia bearing fuel in Tihange 1 nuclear power station, 10:30708 (RA;XA)

TIHANGE-1 REACTOR

TIME-OF-FLIGHT SPECTROMETERS
Data Processing
Deconvolution of liquid structure data: the pulsed neutron source case, 10:32808 (R;GB)
Timing Properties
Analysis of the statistical operation of a time-numerical code multistop with a resolution of 0.5ns, 10:32025 (R;FR;In French)

TIME-REVERSAL INVARIANCE
See T INVARIANCE

TIMING PROPERTIES
Time-of-Flight Spectrometers
Analysis of the statistical operation of a time-numerical code multistop with a resolution of 0.5ns, 10:32025 (R;FR;In French)

TIN
Emission Spectroscopy
Spectrochemical determination of impurities in aluminium alloys by DC arc technique, 10:31634 (R;IL;In Hebrew)

TIN 116
Energy-Level Transitions
Fragmentation of stretched spin states in ^{116}Sn, 10:32723 (RA;NL)

TIN 117 TARGET
Deuteron Reactions
States in ^{118}Sn from ^{117}Sn(d,p) ^{118}Sn at 12 MeV, 10:32716 (R;BR)

TIN 118
Energy Levels
States in ^{118}Sn from ^{117}Sn(d,p) ^{118}Sn at 12 MeV, 10:32716 (R;BR)

TIN 119
Moessbauer Effect
Magnetic and Moessbauer studies on rare-earth-containing Heusler alloys Pd_2RSn (R = Tb—Yb), 10:31498 (J;US)

TIN 120 TARGET
Argon 40 Reactions
First results from GANIL, 10:32680 (R;FR)

TIN 132
E0-Transitions
E0 transitions in light fission fragments, 10:32725 (RA;NL)

TIN ALLOYS
See also ZIRCALOY
Magnetic Susceptibility
Magnetic and Moessbauer studies on rare-earth-containing Heusler alloys Pd_2RSn (R = Tb—Yb), 10:31498 (J;US)

TIN COMPOUNDS
Chemical Preparation
Synthesis of tetrabutyl tin and its performance characteristics in liquid scintillation counting for radioimmunoassay, 10:31591 (R;IN)
Purification
Synthesis of tetrabutyl tin and its performance characteristics in liquid scintillation counting for radioimmunoassay, 10:31591 (R;IN)

TIRES
Stress Analysis
Field measurement of tension in a T-142 tank track, 10:31751 (R;US)

TITANATES
Specific compounds, except those of significance to energy research and development, should be indexed by coordination of a descriptor of the form (CATION) COMPOUNDS and the above anion descriptor.
Structural Chemical Analysis
Chemistry of transuranium elements and compounds, 10:31712 (RA;US)

TITANIUM
Debye Temperature
Debye temperature of Ti in TiC, TiO_2 and TiH_2, 10:31529 (RA;IL)
Emission Spectroscopy
Spectrochemical determination of impurities in aluminium alloys by DC arc technique, 10:31634 (R;IL;In Hebrew)
Mass Spectroscopy
Systematics of multielement determination with resonance ionization mass spectrometry and thermal atomization, 10:31642 (J;US)
X-Ray Diffraction
Comparison between Ti anomalous x-ray scattering factors obtained from layered synthetic microstructures and the dispersion relationship, 10:31510 (J;US)

TITANIUM 48
Alpha Reactions
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Spins of excited states in ^{43}Sc, ^{43}K and the mechanism of $^{48/50}$Ti(p,p′,γ)$^{48/50}$Ti and $^{40/50}$Ti(α,α′γ)$^{48/50}$Ti reactions at Ep = 6 MeV and Eα = 12 MeV, 10:32706 (RA;ZA)
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Angular correlation measurements with (α,pγ) reactions, 10:32707 (RA;ZA)
Proton Reactions
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Spins of excited states in ^{43}Sc, ^{43}K and the mechanism of $^{48/50}$Ti(p,p′,γ)$^{48/50}$Ti and $^{40/50}$Ti(α,α′γ)$^{48/50}$Ti reactions at Ep = 6 MeV and Eα = 12 MeV, 10:32706 (RA;ZA)

TITANIUM 50
Alpha Reactions
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Spins of excited states in ^{43}Sc, ^{43}K and the mechanism of $^{48/50}$Ti(p,p′,γ)$^{48/50}$Ti and $^{40/50}$Ti(α,α′γ)$^{48/50}$Ti reactions at Ep = 6 MeV and Eα = 12 MeV, 10:32706 (RA;ZA)
Proton Reactions
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Spins of excited states in ^{43}Sc, ^{43}K and the mechanism of $^{48/50}$Ti(p,p′,γ)$^{48/50}$Ti and $^{40/50}$Ti(α,α′γ)$^{48/50}$Ti reactions at Ep = 6 MeV and Eα = 12 MeV, 10:32706 (RA;ZA)

TITANIUM 50 TARGET
Proton Reactions
Excitation of $\Delta L=0$ spin-flip transitions in the $N=28$ isotones by 201 MeV proton inelastic scattering, 10:32703 (R;FR)

TITANIUM CARBIDES
Debye Temperature
Debye temperature of Ti in TiC, TiO_2 and TiH_2, 10:31529 (RA;IL)

TITANIUM COMPLEXES
Chemical Reactions
Hydrotreatment catalyst activity enhancement. Quarterly report No. 7, February 1, 1985-April 30, 1985 (Titanocene dichloride), 10:29636 (R;US)

TITANIUM HYDRIDES
Debye Temperature
Debye temperature of Ti in TiC, TiO_2 and TiH_2, 10:31529 (RA;IL)
Erosion
Helium implanted titanium hydrides. Influence of initial structure on implantation-induced properties, 10:31530 (RA;IL)
Ion Implantation
Helium implanted titanium hydrides. Influence of initial structure on implantation-induced properties, 10:31530 (RA;IL)
Roughness
Helium implanted titanium hydrides. Influence of initial structure on implantation-induced properties, 10:31530 (RA;IL)
TITANIUM ISOTOPES
See also TITANIUM 48
TITANIUM 50
Argon 40 Reactions
Fragmentation processes in nuclear reactions, 10:32695 (R;FR)
TITANIUM OXIDES
See also ZIRCONOLITE
Coprecipitation
Electron optical and microanalytical studies of precipitation in ceramic systems. Progress report, July 1, 1983-June 30, 1984, 10:31527 (R;US)
Debye Temperature
Debye temperature of Ti in TiC, TiO_2 and TiH_2, 10:31529 (RA;IL)
TLD (DOSEMETERS)

TMR REACTORS
Feasibility Studies
Interfacing the tandem mirror fusion reactor to a hydrogen thermochemical plant, 10:30058 (J;US)
Hydrogen Production
Interfacing the tandem mirror fusion reactor to a hydrogen thermochemical plant, 10:30058 (J;US)
TMX DEVICES
Beam Injection Heating
Halo plasma heating by neutral beam injection in TMX-U, 10:33054 (J;US)
Bremsstrahlung
Time-integrated x-ray measurements of the very energetic electron end loss profile in TMX-U, 10:32935 (J;US)
ECR Heating
Perpendicular electron cyclotron emission from hot electrons in TMX-U, 10:32951 (J;US)
Time-integrated x-ray measurements of the very energetic electron end loss profile in TMX-U, 10:32935 (J;US)
Electric Potential
Plasma potential formation and measurement in TMX-U and MFTF-B (invited), 10:32953 (J;US)
Electron Cyclotron-Resonance
Electron cyclotron emission diagnostics for mirror devices (invited), 10:32944 (J;US)
Electron Temperature
Electron cyclotron emission diagnostics for mirror devices (invited), 10:32944 (J;US)
Energy Spectra
Energy and density measurements of sloshing ions in tandem-mirror-experiment upgrade using solid-state probe techniques, 10:32923 (J;US)
Impurities
Neutral beam injector oxygen impurity measurements and concentration reduction via gettering processes, 10:33052 (J;US)
Neutral Atom Beam Injection
Neutral beam injector oxygen impurity measurements and concentration reduction via gettering processes, 10:33052 (J;US)
Opacity
Electron cyclotron emission diagnostics for mirror devices (invited), 10:32944 (J;US)
Plasma Confinement
Plasma potential formation and measurement in TMX-U and MFTF-B (invited), 10:32953 (J;US)
Plasma Diagnostics
Energy and density measurements of sloshing ions in tandem-mirror-experiment upgrade using solid-state probe techniques, 10:32923 (J;US)
EparallelB end-loss-ion analyzer for Tandem-Mirror Experiment-Upgrade, 10:32976 (J;US)
Perpendicular electron cyclotron emission from hot electrons in TMX-U, 10:32951 (J;US)
Plasma-edge studies using carbon resistance probes, 10:32931 (J;US)
Plasma potential formation and measurement in TMX-U and MFTF-B (invited), 10:32953 (J;US)
Tandem-Mirror Experiment-Upgrade neutral pressure measurement diagnostic systems, 10:32959 (J;US)
Time-integrated x-ray measurements of the very energetic electron end loss profile in TMX-U, 10:32935 (J;US)
Plasma Scrape-Off Layer
Plasma-edge studies using carbon resistance probes, 10:32931 (J;US)
Plasma Simulation
Perpendicular electron cyclotron emission from hot electrons in TMX-U, 10:32951 (J;US)
Tandem-Mirror Experiment-Upgrade neutral pressure measurement diagnostic systems, 10:32959 (J;US)
Pressure Measurement
Tandem-Mirror Experiment-Upgrade neutral pressure measurement diagnostic systems, 10:32959 (J;US)
Synchrotron Radiation
Perpendicular electron cyclotron emission from hot electrons in TMX-U, 10:32951 (J;US)
Vacuum Systems
Tandem-Mirror Experiment-Upgrade neutral pressure measurement diagnostic systems, 10:32959 (J;US)
TOBACCO SMOKES
Genetic Effects
Genotoxicity of tobacco smoke and tobacco smoke condensate, 10:32368 (J;NL)
Pollution Sources
Indoor air pollution, 10:32127 (R;US)
Tissue Distribution
Cigarette smoke and plutonium, 10:32354 (RA;US)
Toxicity
Genotoxicity of tobacco smoke and tobacco smoke condensate, 10:32368 (J;NL)
TOILETS
Passive Solar Water Heaters
Large passive "breadbox" water heater, 10:30535 (BA;US)
TOKAMAK DEVICES
See also ASDEX TOKAMAK
ATC DEVICES

Current-Drive Heating
Viscous current drive, 10:32917 (R;US)
ECR Heating
ECH tokamak, 10:33041 (R;US)
First Wall
Surface melting and evaporation during disruptions in magnetic fusion reactors, 10:33067 (J;NL)
Images
Far-infrared imaging of tokamak plasma, 10:32945 (J;US)
Magnetic Fields
Far-infrared imaging of tokamak plasma, 10:32945 (J;US)
Magnetic field measurements based on the Zeeman splitting of forbidden transitions, 10:32940 (J;US)
Plasma Confinement
Implication of various confinement laws on solutions of steady self-burning plasma in Tokamaks, 10:32911 (R;IL)

Plasma Density
Far-infrared imaging of tokamak plasma, 10:32945 (J;US)
Plasma Diagnostics
Development and application of multichannel collective scattering systems, 10:32965 (J;US)
Far-infrared imaging of tokamak plasma, 10:32945 (J;US)
Magnetic field measurements based on the Zeeman splitting of forbidden transitions, 10:32940 (J;US)
Plasma Disruption
Surface melting and evaporation during disruptions in magnetic fusion reactors, 10:33067 (J;NL)
Plasma Heating
Energy spectra of slowed-down neutrals from the heating beams in ASDEX, 10:32907 (R;NL)
Plasma Waves
Development and application of multichannel collective scattering systems, 10:32965 (J;US)
Tearing Instability
Surface melting and evaporation during disruptions in magnetic fusion reactors, 10:33067 (J;NL)
TOKAPOLE DEVICES
Plasma Disruption
Observation of helical sawtooth oscillations in a tokamak, 10:32886 (R;US)
TOLUENE
Combustion Products
Soot and radiation in free boundary layer flames, 10:31719 (R;US)
Oxidation
Performance of rare earth modified faujasites in the process of toluene disproportionation, 10:31672 (R;DZ;In French)
Reduction
Performance of rare earth modified faujasites in the process of toluene disproportionation, 10:31672 (R;DZ;In French)
Solvent Properties
Advanced coal liquefaction catalyst development. Quarterly progress report No. 9, October 1-December 31, 1983, 10:29623 (R;US)
Solvent tailoring in coal liquefaction based on critical properties of physical solvating agents and hydrogen donors. Progress report, August 1980-January 1981, 10:29621 (R;US)
Vapor Pressure
Prediction of thermodynamic properties of coal derivatives. Progress report, September 1, 1984-August 31, 1985, 10:31669 (R;US)
TONOPAH TEST RANGE
Radiation Monitoring
1984 Environmental summary: Sandia National Laboratories Tonopah Test Range, Tonopah, Nevada, 10:32177 (R;US)

Corrosion
- Corrosion/erosion of materials for AFBC applications; cost 501 Project NL-9, 10:29727 (R;NL)

Crack Propagation
- Stress and lifetime calculations for first wall and blanket structural components. Pt. 1, 10:33018 (R;DE)

Erosion
- Corrosion/erosion of materials for AFBC applications; cost 501 Project NL-9, 10:29727 (R;NL)

Flame Propagation
- Initiation, stability, and limits of detonation for advanced stable air-breathing and hybrid-propulsion engine design. Final report, 15 March 1982-14 March 1983, 10:31825 (R;DE)

Incompressible Flow
- Stability of Timoshenko beams conveying a compressible fluid, 10:32538 (R;US)

Thermal Fatigue
- Thermal fatigue cracking in T-fittings of feed water systems. Development of testing methods for the determination of the depth of cracks, 10:31036 (R;SE;In English and Swedish)

Ultrasonic Testing
Thermal fatigue cracking in T-fittings of feed water systems. Development of testing methods for the determination of the depth of cracks, 10:31036 (R;SE;In English and Swedish)

TUBES (CONDUITS)
See PIPES

TUFF
Drawdown
Reduction of the well test data for test well USW H-1, adjacent to Nevada Test Site, Nye County, Nevada, 10:29969 (R;US)
Geochemistry
Matrix diffusion coefficients for the NNWSI waste package environment, 10:29947 (RA;US)
Geologic Fissures
Field investigation of keyblock stability, 10:32407 (R;US)
Hydraulic Conductivity
Reduction of the well test data for test well USW H-1, adjacent to Nevada Test Site, Nye County, Nevada, 10:29969 (R;US)
Hydrology
Preliminary evaluation of alterant geophysical tomography in welded tuff, 10:32408 (R;US)
Permeability
Permeability and fluid chemistry studies of the Topopah Spring Member of the Paintbrush Tuff, Nevada Test Site: Part II, 10:29988 (R;US)
Rock-Fluid Interactions
Reduction of the well test data for test well USW H-1, adjacent to Nevada Test Site, Nye County, Nevada, 10:29969 (R;US)

TUMOR CELLS
Biological Radiation Effects
Mutation in cultured mammalian cells. Dose and dose-rate effects, 10:32319 (RA;JP)

TUMORS
See NEOPLASMS

TUNGSTEN
Chemical Vapor Deposition
Real time measurement of deposition initiation and rate in laser chemical vapor deposition, 10:31495 (J;US)
Crystal-Phase Transformations
Frozen-phonon total-energy determination of structural surface phase transitions: W(001), 10:32843 (J;US)
Electron-Phonon Coupling
Frozen-phonon total-energy determination of structural surface phase transitions: W(001), 10:32843 (J;US)
Laser-Radiation Heating
Field adsorption of inert gas atoms on the tungsten surface: A pulsed-laser atom-probe study, 10:31503 (J;US)
Real time measurement of deposition initiation and rate in laser chemical vapor deposition, 10:31495 (J;US)
Pyrolysis
Real time measurement of deposition initiation and rate in laser chemical vapor deposition, 10:31495 (J;US)
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
Sorptive Properties
Field adsorption of inert gas atoms on the tungsten surface: A pulsed-laser atom-probe study, 10:31503 (J;US)

TUNGSTEN 170
High Spin States
Investigation of the rotational nuclei ^{167}, ^{168}Hf and ^{170}, ^{171}W and the shell-model nucleus ^{26}Mg, 10:32737 (R;NL)

TUNGSTEN 171
High Spin States
Investigation of the rotational nuclei ^{167}, ^{168}Hf and ^{170}, ^{171}W and the shell-model nucleus ^{26}Mg, 10:32737 (R;NL)

TUNGSTEN 184 TARGET
Nitrogen 14 Reactions
Subthreshold pion production: An intranuclear N-N collision interpretation, 10:32694 (J;US)

TUNGSTEN ALLOYS
See also HASTELLOY C
HASTELLOY X
HASTELLOY XR
Coercive Force
Coercivity and squareness ratio in Co-W thin films, 10:31455 (RA;IL)
Lattice Parameters
Superconductivity in the W-Tc and W_2C-Tc systems, 10:31467 (R;US)
Magnetization
Irreversible magnetization in Co-W thin films, 10:31456 (RA;IL)
Stability
Stability of amorphous metal films on semiconductor substrates. Progress report, July-December 1984 (Ni-Nb, W-Si, Mo-Si), 10:31444 (R;US)
Superconductivity
Superconductivity in the W-Tc and W_2C-Tc systems, 10:31467 (R;US)

TUNGSTEN CARBIDES
Lattice Parameters
Superconductivity in the W-Tc and W_2C-Tc systems, 10:31467 (R;US)
Physical Radiation Effects
Pulsed x-ray induced damage to metal and multilayer mirrors, 10:31507 (J;US)
Superconductivity
Superconductivity in the W-Tc and W_2C-Tc systems, 10:31467 (R;US)

TUNGSTEN HYDRIDES
Catalytic Effects
Mechanistic studies of carbon monoxide reduction. Final technical report, 10:30065 (R;US)

TUNGSTEN SULFIDES
Catalytic Effects
Mechanistic study of the hydrodesulfurization of methanethiol over tungsten disulfide; a survey of rare earth sulfides for hydrodesulfurization activity, 10:31673 (R;US)

TUNNELING MACHINES
Supports
Cracking in concrete support panels due to the force exerted by the thrust pads of a Bouygues tunnelling machine, 10:29696 (R;BE;In French)

TURBINE BLADES
Aerodynamics
Development of an analytical model and code for the flapping response of a Hawte rotor blade, 10:30633 (R;US)
Materials Testing
Refractory material which is resistant to oxidation and hot corrosion at temperatures of 1000-1600°C, 10:31508 (TG;US)
Mathematical Models
Development of an analytical model and code for the flapping response of a Hawte rotor blade, 10:30633 (R;US)
Stability
Comparative stability analysis of the blade curve of single and double-blade vertical axis turbines, respectively, 10:30629 (R;SE;In Swedish)
Stress Corrosion
Stress corrosion cracking and corrosion fatigue of steam turbine materials, 10:30651 (R;US)
Wind Loads
Comparative stability analysis of the blade curve of single and double-blade vertical axis turbines, respectively, 10:30629 (R;SE;In Swedish)

TURBINE PUMPS
See PUMP TURBINES

TURBINES
See also GAS TURBINES
HYDRAULIC TURBINES
STEAM TURBINES
WIND TURBINES
Temperature Measurement
Proposed method for remote thermometry in turbine engines (Eu-doped yttrium oxide), 10:32056 (R;US)

TURBOGENERATORS
Angular Velocity
Experience curves for selection of modern low-head turbines, 10:30156 (RA;US)

Capitalized Cost
Low-head turbine studies for Lock & Dam 14 Power Project, 10:30132 (RA;US)
Design
Design & evaluation of microhydroturbines (<5HP), 10:30138 (RA;US)
Gears for hydro bulb turbines, 10-100 MW, and station design, 10:30160 (RA;US)
Hydro generators for low-head applications, 10:30161 (RA;US)
Small hydro turbine selection: three case studies, 10:30134 (RA;US)
Dynamics
FEATURE: Finite-Element Analysis Tool for Utility Rotordynamic Evaluation. Volume 1. User's manual, 10:30646 (R;US)
Efficiency
Acoustic flowmeters for hydro-turbine efficiency measurement, 10:30185 (RA;US)
Equipment selection and operation policy aided by microcomputer, 10:30191 (RA;US)
Recent developments of the Turgo Impulse Turbine, 10:30157 (RA;US)
Excitation Systems
Renovation of the Lloyd Shoals hydro excitation system, 10:30167 (RA;US)
Hydraulics
Computer analysis and field correlation from the hydraulic transient program CORA, 10:30144 (RA;US)
Installation
Hydro generators for low-head applications, 10:30161 (RA;US)
Installation of a hydroelectric generating plant at the Ullum Dam, 10:30149 (RA;US)
Maintenance
Hydro generators for low-head applications, 10:30161 (RA;US)
Manufacturing
Hydropower fundamentals, 10:30213 (RA;US)
Market
Hydropower fundamentals, 10:30213 (RA;US)
Modifications
Case studies in hydroelectric turbine rehabilitation, 10:30175 (RA;US)
New technology for modernization of existing hydraulic turbines, 10:30172 (RA;US)
Operation
Machine selection and powerhouse design for small hydropower schemes, 10:30128 (RA;US)
Optimization
Low-head turbine studies for Lock & Dam 14 Power Project, 10:30132 (RA;US)
Machine selection and powerhouse design for small hydropower schemes, 10:30128 (RA;US)
Performance
Case studies in hydroelectric turbine rehabilitation, 10:30175 (RA;US)
Design & evaluation of microhydroturbines (<5HP), 10:30138 (RA;US)
Economical solution of low-head turbine application from a hydraulic point of view, 10:30118 (RA;US)
New technology for modernization of existing hydraulic turbines, 10:30172 (RA;US)
Optimization of a diffuse/ejector for ultra low-head systems, 10:30194 (RA;US)
Recent developments of the Turgo Impulse Turbine, 10:30157 (RA;US)
Performance Testing
St. Anthony Falls Hydraulic Laboratory turbine test facility, 10:30193 (RA;US)
Power Transmission Lines
Connecting small hydroelectric generation onto the power system, 10:30143 (RA;US)
Research Programs
New approach to ULH development using the cross-flow turbine, 10:30195 (RA;US)
St. Anthony Falls Hydraulic Laboratory turbine test facility, 10:30193 (RA;US)
Size
Experience curves for selection of modern low-head turbines, 10:30156 (RA;US)
Speed Regulators
Conversion of mechanical governors to electrical governors, 10:30174 (RA;US)
Standardization
Standardized turbines for mini hydro plants, 10:30142 (RA;US)
Technology Assessment
Small hydro turbine selection: three case studies, 10:30134 (RA;US)
VAR Control Systems
Philosophy, theory and practice of low-cost micro-hydro, 10:30131 (RA;US)
TURBOMACHINERY
See also TURBINES
Aerodynamics
Clearance flow-generated transverse forces at the rotors of thermal turbomachines, 10:31743 (R;US)
Air Flow
Investigation of the three-dimensional flow field within a transonic fan rotor: experiment and analysis, 10:31775 (R;US)
TVA
See TENNESSEE VALLEY AUTHORITY
TWO-PHASE FLOW
Computerized Simulation
Compressible two-phase flow instabilities simulated with a hybrid Lagrange-Euler pseudospectral method, 10:31780 (R;US)
Non-equilibrium effects in flashing liquids, 10:30679 (RA;XA)
Flow Models
Compressible two-phase flow instabilities simulated with a hybrid Lagrange-Euler pseudospectral method, 10:31780 (R;US)
Two-Dimensional Calculations
Numerical computation of phase distribution in two fluid flow using the two-dimensional TOFFEA code, 10:31772 (R;CA)
TYPE-II SUPERCONDUCTORS
Anisotropy
Flux-line lattice anisotropy in V_3Si: observation and interpretation, 10:31440 (R;US)
Neutron Diffraction
Flux-line lattice anisotropy in V_3Si: observation and interpretation, 10:31440 (R;US)
TYPE-III SUPERCONDUCTORS
See TYPE-II SUPERCONDUCTORS
TYROSINE
Catabolism
L-Phenylalanine and L-tyrosine catabolism by selected Streptomyces species, 10:32357 (J;US)

ULTRAVIOLET RADIATION
See also FAR ULTRAVIOLET RADIATION
Mutagenesis
Mutagen-induced changes in cellular deoxycytidine triphosphate and thymidine triphosphate in Chinese hamster ovary cells, 10:32341 (J;US)
Radiation Sources
Studies of collisional and nonlinear radiative process for development of coherent uv and xuv sources. Final report, November 1983-November 1984, 10:32477 (R;US)

ULTRAVIOLET SPECTROMETERS
Fabrication
Study of impurity radiation on the PLT and TFTR tokamaks with high-resolution, time-resolving spectrometers, 10:32939 (J;US)
UNCORRELATED-JET MODEL
See JET MODEL
UNDERGROUND BUILDINGS
See EARTH-COVERED BUILDINGS
UNDERGROUND DISPOSAL
After-Heat Removal
Effects of heat from high-level waste on performance of deep geological repository components. Report of a technical committee meeting on effects of heat from radioactive waste in deep geological repositories organized by the IAEA and held in Stockholm, 28 August-2 September 1983, 10:29932 (R;XA)
Backfilling
Smectite alteration, 10:29977 (R;SE)
Hydraulic Conductivity
Some simple calculations of potential fields in rock mass underneath two typified topographies, 10:29982 (RA;SE)
Hydrology
Interpretation of permeability in an underground rock structure, 10:32405 (R;SE;In Swedish)
Water flow in bedrock; estimation of influence of transmissive shaft and borehole, 10:29980 (RA;SE)
Radionuclide Migration
Migration of radionuclides in fissured rock - The influence of micropore diffusion and longitudinal dispersion, 10:29975 (R;SE)
Note on the impact of transverse dispersion and immediately dissolved radionuclides, 10:30020 (RA;SE)
UNDERGROUND EXPLOSIONS
Containment
Laboratory investigation of containment of underground explosions. Technical report, 10:32102 (R;US)
Functional Models
Material-response models and ground-motion calculations for high-explosive tests in G-Tunnel tuff. Technical report, 10:32080 (R;US)
UNDERGROUND FACILITIES
Detection
Underground obstacle detection and mapping system. Final report, 10:32051 (R;US)
UNDERGROUND MINING
See also LONGWALL MINING
ROOM AND PILLAR MINING
Dusts
Characterization of respirable coal mine dust, 10:29704 (R;US)
Materials Testing
[Mining and mineral-related research]. Final report, October 1, 1982-September 30, 1983, 10:29614 (R;US)
Mine Roadways
All-weather storage of compressible inserts as fixed to reinforced concrete roadway panels, 10:29698 (R;BE;In French)
Behaviour of an initial section of circular stone-drift lined with concrete panels featuring embedded inserts, 10:29700 (R;BE;In French)
Compressive tests on Bullflex bags with different filler materials, 10:29699 (R;BE;In French)
Tests on reinforced concrete blocks with embedded inserts, 10:29697 (R;BE;In French)
Planning
Mine plan drafting, 10:29692 (R;AU)
Research Programs
[Mining and mineral-related research.] Final report, July 1, 1983-June 30, 1984, 10:29615 (R;US)
Roofs
Physical model study of caving under massive sandstone roof conditions at Moura, Queensland, 10:29693 (R;AU)
Safety Engineering
Methane emission in workings and some characteristic gas conditions in a brown coal mine, 10:29711 (TG;GB)
Ventilation Systems
Methane emission in workings and some characteristic gas conditions in a brown coal mine, 10:29711 (TG;GB)
UNDERGROUND STORAGE
Risk Assessment
Analysis of the risk assessment of a waste repository for radioactive waste from the decommissioning of nuclear power plants, 10:30028 (R;DE;In German)
UNIFIED GAUGE MODELS

URBAN AREAS
Air Pollution
Firing fast fuels on a small scale in densely built areas. Basic document, 10:30085 (R;SE;In Swedish)
Electric Utilities
Municipal hydroelectric development: legal and socioeconomic study, 10:30208 (RA;US)
Planning
City form: The creation of comfortable urban microclimates, 10:30279 (BA;US)
Solar Access
Ashland's energy program from inception to implementation, 10:30281 (BA;US)
Deschutes County, Oregon: A unique solar access program, 10:30282 (BA;US)
Solar Architecture
Ashland's energy program from inception to implementation, 10:30281 (BA;US)
Surface Area
Re-analysis of Boston materials inventory (Exposed structural surfaces), 10:33068 (R;US)
Thermal Comfort
City form: The creation of comfortable urban microclimates, 10:30279 (BA;US)
Zoning
Deschutes County, Oregon: A unique solar access program, 10:30282 (BA;US)

URBAN POPULATIONS
Radiation Doses
Annual terrestrial gamma radiation dose to the population of the urban Christchurch area, 10:32176 (R;NZ)

UREA
Metabolism
^{15}N analysis in intestinal metabolism of urea and ammonia, 10:32251 (RA;DD;In German)

URINALYSIS
See URINE

URINE
Quantitative Chemical Analysis
Spectrophotometric method for the determination of uranium in urine, 10:31647 (J;US)

UROGENITAL SYSTEM DISEASES
Diagnosis
Improvement of differential diagnostics in pseudohermaphroditismus masculinus by means of ^{15}N-labelled amino acids. Methodical aspects, 10:32276 (RA;DD;In German)

Administrative Procedures
Department of Energy's participation in the International Energy Agency's recent worldwide oil-sharing test (allocation systems test - AST-4). Hearing before a Subcommittee of the Committee on Government Operations, House of Representatives, Ninety-Eighth Congress, First Session, September 22, 1983, 10:29789 (B;US)
Energy and water development appropriations for 1986. Part 7. Hearings before a Subcommittee of the Committee on Appropriations, House of Representatives, Ninety-Ninth Congress, First Session, 10:31136 (B;US)

Budgets
Authorizing appropriations to the Department of Energy for civilian energy programs for fiscal year 1986 and fiscal year 1987, and for other purposes. A report to the House of Representatives, Ninety-Ninth Congress, First Session, May 15, 1985, 10:31132 (B;US)
Department of Energy Civilian Energy Programs Authorization Act for fiscal years 1986, 1987, and 1988. Part 1. A report submitted to the House of Representatives, Ninety-Ninth Congress, First Session, April 22, 1985, 10:31131 (B;US)
Energy and water development appropriations for 1986. Part 7. Hearings before a Subcommittee of the Committee on Appropriations, House of Representatives, Ninety-Ninth Congress, First Session, 10:31136 (B;US)

Research Programs
Overview of the US Department of Energy geothermal program, 10:30567 (RA;US)

US DOI

Land Reclamation
Bureau of Reclamation could identify more unneeded land, 10:33072 (R;US)

US FEMA

Electromagnetic Pulses
Nuclear electromagnetic pulse (EMP) protection manual for emergency broadcast radio stations and Emergency Operations Centers, 10:31808 (R;US)

US FERC

Administrative Procedures
More ado about prehearing discovery at FERC, 10:31150 (J;US)

US NRC

United States Nuclear Regulatory Commission-prior to 1975 was part of US AEC.

Nuclear Materials Management
Safeguards Summary Event List (SSEL). Pre-NRC through December 31, 1984. Revision 10, 10:30042 (R;US)

Reactor Safety
Implementation of safety goals in NRC's regulatory process, 10:30870 (RA;US)

Regulations
NRC Regulatory Agenda. Quarterly report, January-March 1985. Volume 4, No. 1, 10:30762 (R;US)

BWR Type Reactors
Review of extended burnup research, development and implementation in the United States, 10:30707 (RA;XA)

Energy Analysis
State Energy Data Report Supplement: consumption estimates, 1960-1983, 10:31174 (R;US)
State Energy Data Report: consumption estimates, 1960-1983, 10:31173 (R;US)

Energy Consumption
Annual outlook for US coal 1985: with projections to 1995, 10:29734 (R;US)
Review of the US energy situation, 10:31138 (RA;US)
State Energy Data Report Supplement: consumption estimates, 1960-1983, 10:31174 (R;US)
State Energy Data Report: consumption estimates, 1960-1983, 10:31173 (R;US)

Energy Supplies
Review of the US energy situation, 10:31138 (RA;US)

Hydroelectric Power
Case study of US-China cooperation in unified resource development, 10:30098 (RA;US)

Metal Industry
Assessment of blast furnace retrofit for the co-manufacture of steel, electricity, and synfuels. Final report, 10:29646 (R;US)

Natural Gas
Changes in policies affecting US natural gas trade, 10:29808 (J;US)

Nuclear Power Plants
Licensee contractor and vendor inspection status report. Quarterly report, January-March 1985. Volume 9, No. 1, 10:30760 (R;US)
Operating reactors licensing actions summary. Volume 5, No. 3, 10:30761 (R;US)
Report to Congress on abnormal occurrences, October-December 1984. Volume 7, No. 4, 10:30961 (R;US)

Oil Sand Deposits
Major tar sand and heavy oil deposits of the US, 10:29814 (RA;US)

Petroleum Deposits
Linking US oil and gas reserve estimates, 10:29742 (R;US)

PWR Type Reactors
Review of extended burnup research, development and implementation in the United States, 10:30707 (RA;XA)

Resource Assessment
Linking US oil and gas reserve estimates, 10:29742 (R;US)

Technology Transfer
United States Trade and Development Programs in transferring United States technology, 10:31128 (RA;US)

Waste Oils
Composition and management of used oil generated in the United States, 10:29783 (R;US)

USSR

Lasers
Bibliography of Soviet laser developments, Number 67, September-October 1983, 10:31756 (R;US)

UTAH

Energy Policy
Utah Geothermal Commercialization Project. Final report, April 1979-March 1985, 10:31178 (R;US)

Geothermal Fields
Evaluation of low-temperature geothermal potential in Utah and Goshen Valleys and adjacent areas, Utah. Part II. Water temperature and chemistry, 10:30583 (R;US)

Geothermal Resources
Evaluation of low-temperature geothermal potential in north-central Box Elder County, Utah, 10:30569 (R;US)
Summary of low-temperature geothermal studies conducted by the Utah Geological and Mineral Survey from July 1, 1977 to December 31, 1984, 10:30570 (R;US)

Oil Sand Deposits
Geologic controls of in-situ processing of tar sands, NW Asphalt Ridge, Utah, 10:29837 (J;US)
Laboratory investigation of the steam displacement process in a Utah tar sand, 10:29823 (RA;US)

V

VACUUM SYSTEMS
  Baking
    Fermilab accumulator magnets vacuum chamber heating system, 10:32000 (J;US)
  Cryopumps
    Underground remotely controlled cryopump vacuum system utilizing 460-m long helium gas lines, 10:31800 (J;US)
  Design
    Underground remotely controlled cryopump vacuum system utilizing 460-m long helium gas lines, 10:31800 (J;US)
  Gas Analysis
    Measurement and calibration techniques used in computer partial pressure analysis, 10:32073 (J;US)
  Heating Systems
    Fermilab accumulator magnets vacuum chamber heating system, 10:32000 (J;US)
  Leaks
    Management of vacuum leak-detection processes, calibration, and standards, 10:31799 (J;US)
  Operation
    Underground remotely controlled cryopump vacuum system utilizing 460-m long helium gas lines, 10:31800 (J;US)
  Photoemission
    Photoelectron yields from synchrotron radiation in the SSC, 10:31886 (RA;US)
VACUUM ULTRAVIOLET RADIATION
  See FAR ULTRAVIOLET RADIATION
VALENCE ELECTRONS
  See ELECTRONS
VALVES
  Actuators
    Automatic rotary valve actuator, 10:29885 (R;US)
  Energy Losses
    Model development of energy dissipator for Howell-Bunger valve, 10:30201 (RA;US)
  Modifications
    Syn-fuel reciprocating charge pump improvement program. Quarterly report, July 1-September 30, 1984, 10:29629 (R;US)
    Syn-fuel reciprocating charge pump improvement program. Quarterly report, October 1-December 31, 1984, 10:29630 (R;US)
  Performance Testing
    Reactor containment purge and vent valve performance experiments, 10:30861 (R;US)
VAN DE GRAAFF ACCELERATORS
  Environmental Effects
    Report of the Van de Graaff Group: NUCOR Isotope Unit. Tritium levels and body burdens near the accelerators, 10:32318 (RA;ZA)
  Ion Microprobe Analysis
    Nuclear microprobe and its applications to controlled fusion research, 10:33061 (J;US)
VANADIUM
  Absorption Spectroscopy
    Characterization and comparison of vanadyl and nickel compounds in heavy crude petroleums and asphaltenes by reverse-phase and size-exclusion liquid chromatography/graphite furnace atomic absorption spectrometry, 10:31644 (J;US)
  Catalytic Effects
    In situ combustion, 10:29768 (RA;US)
  Liquid Column Chromatography
    Characterization and comparison of vanadyl and nickel compounds in heavy crude petroleums and asphaltenes by reverse-phase and size-exclusion liquid chromatography/graphite furnace atomic absorption spectrometry, 10:31644 (J;US)
  Lung Clearance
    Lung clearance, translocation, and acute toxicity of arsenic, beryllium, cadmium, cobalt, lead, selenium, vanadium, and ytterbium oxides following deposition in rat lung, 10:32356 (J;US)
  Mass Spectroscopy
    Systematics of multielement determination with resonance ionization mass spectrometry and thermal atomization, 10:31642 (J;US)
  Permeability
    Formation, ion modification, and annealing of VN, 10:31526 (R;US)
  Quantitative Chemical Analysis
    Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
  Toxicity
    Lung clearance, translocation, and acute toxicity of arsenic, beryllium, cadmium, cobalt, lead, selenium, vanadium, and ytterbium oxides following deposition in rat lung, 10:32356 (J;US)
  X-Ray Fluorescence Analysis
    X-ray fluorescence analysis of uranium concentrates, 10:31637 (TG;US)
VANADIUM 51
  Alpha Reactions
    Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Angular correlation measurements with $(\alpha,p\gamma)$ reactions, 10:32707 (RA;ZA)
VANADIUM MINERALS
  See MINERALS
VANADIUM NITRIDES
  Annealing
    Formation, ion modification, and annealing of VN (N-ion energies of 45 and 350 keV), 10:31526 (R;US)
  Physical Radiation Effects
    Formation, ion modification, and annealing of VN (N-ion energies of 45 and 350 keV), 10:31526 (R;US)
  Synthesis
    Formation, ion modification, and annealing of VN (N-ion energies of 45 and 350 keV), 10:31526 (R;US)
VANADIUM OXIDES
  Auger Electron Spectroscopy
    X-ray photoelectron and x-ray-induced Auger electron spectroscopic data, 1. 3d transition-metals (Sc, Ti, V, Ni) and related oxides, 10:32493 (R;JP)
VANADIUM SILICIDES
  Anisotropy
    Flux-line lattice anisotropy in V_3Si: observation and interpretation, 10:31440 (R;US)
  Neutron Diffraction
    Flux-line lattice anisotropy in V_3Si: observation and interpretation, 10:31440 (R;US)
VANPOOLING
    DOE National Rideshare Program Plan, 10:31347 (R;US)
VAPOR PRESSURE
  Errors
    Prediction of thermodynamic properties of coal derivatives. Progress report, September 1, 1984-August 31, 1985, 10:31669 (R;US)
VAPORIZATION

VOLT-AMPERE REACTIVE CONTROL SYSTEMS
See VAR CONTROL SYSTEMS
VORTEX FLOW
Prior to October 1981 this concept was indexed to SWIRL FLOW.
Correlations
Velocity and vorticity correlations, 10:32544 (J;US)
VRAIN REACTOR
Reactor Licensing
ORNL's NRC-sponsored HTGR safety and licensing analysis activities for Fort St. Vrain and advanced reactors, 10:30854 (R;US)

W

W BOSON
See INTERMEDIATE BOSONS
WALLS
See also BEAD WALLS
TROMBE WALLS
Atom Collisions
Vibrational relaxation in H_2 molecules by wall collisions: Applications to negative ion source processes, 10:32528 (J;US)
Heat Flow
Calorimeter for measuring heat flow through walls, 10:31225 (RA;US)
Heat Transfer
Laboratory tests of thermal performance of exterior walls, 10:31199 (RA;US)
Molecule Collisions
Vibrational relaxation in H_2 molecules by wall collisions: Applications to negative ion source processes, 10:32528 (J;US)
Optimization
Calculator programming technique for estimating thermally optimum wall construction, 10:31194 (RA;US)
R Factors
Laboratory tests of thermal performance of exterior walls, 10:31199 (RA;US)
Test Facilities
Calibration procedures and results for a large calibrated hot box, 10:31200 (RA;US)
Design of a calibrated hot-box for measuring the heat, air, and moisture transfer of composite building walls, 10:31204 (RA;US)

Thermal Insulation
Economic considerations in insulating masonry and wood-frame walls of single-family housing, 10:31230 (RA;US)
Economic comparison and thermal performance of several different insulated wall constructions, 10:31231 (RA;US)
Effective thermal performance of an insulated standard stud wall containing air gaps, 10:31242 (RA;US)
Energy conservation design guidelines for including mass and insulation in building walls, 10:31196 (RA;US)
Thermal Mass
Energy conservation design guidelines for including mass and insulation in building walls, 10:31196 (RA;US)
U Values
Heat transmission coefficients of concrete block walls with core insulation, 10:31208 (RA;US)
Vapor Condensation
Annual cycle moisture analysis, 10:31239 (RA;US)
Ventilation
Ventilation of back space of building enclosure siding for solar heat gain reduction, 10:31237 (RA;US)

WASTE BURIAL
See UNDERGROUND DISPOSAL

WASTE DISPOSAL
See also MARINE DISPOSAL
RADIOACTIVE WASTE DISPOSAL
SANITARY LANDFILLS
STACK DISPOSAL
UNDERGROUND DISPOSAL
Landscaping
Field investigations at Kollunds coal ash fill, 10:29674 (RA;SE;In Swedish)
Investigation of profiles from coal ash disposal sites, 10:29673 (RA;SE;In Swedish)
Legal Aspects
Using mined space for long-term retention of nonradioactive hazardous waste. Volume 1. Conventional mines. Final report, August 1983-January 1985, 10:31366 (R;US)

WASTE FORMS
Stability
Technical factors affecting low-level waste form acceptance criteria, 10:29957 (R;US)
Thermal Degradation
Thermal stability testing of low-level waste forms, 10:29956 (R;US)

WASTE OILS
Biodegradation
Biodegradation of uranium-contaminated waste oil, 10:29929 (R;US)
Chemical Composition
Composition and management of used oil generated in the United States, 10:29783 (R;US)
Contamination
Biodegradation of uranium-contaminated waste oil, 10:29929 (R;US)
Waste Management
Composition and management of used oil generated in the United States, 10:29783 (R;US)

WASTE PROCESSING PLANTS
Economic Analysis
Cost analysis of water pollution control during in-situ production of bitumen from tar sand, 10:29850 (RA;US)

WASTE PRODUCT UTILIZATION
[Mining and mineral-related research.] Final report, July 1, 1983-June 30, 1984, 10:29615 (R;US)

WASTE SOLUTIONS
See LIQUID WASTES

WASTE STORAGE
See also RADIOACTIVE WASTE STORAGE
Landscaping
Studies of foreign disposals for coal burning wastes, 10:29672 (R;SE;In Swedish)

WASTE TRANSPORTATION
Cost
Preliminary cost and risk analysis for transporting spent fuel and high-level wastes to candidate repository sites, 10:29900 (R;US)
Risk Assessment
Evaluation of commercial repository capacity for the disposal of defense high-level waste, 10:29914 (R;US)
Preliminary cost and risk analysis for transporting spent fuel and high-level wastes to candidate repository sites, 10:29900 (R;US)
Risk comparisons for the transportation of spent fuel from nuclear reactors, 10:30023 (R;US)

WASTE WATER
Anaerobic Digestion
Biological treatment of tar sands wastewater. Final report, 10:29847 (R;US)
Covered, anaerobic, wastewater lagoon primary treatment system, the "anaerobic cell". Technical completion report, 10:31374 (R;US)
Evaporation
Gas and oil production wastewater disposal alternatives for the San Juan Basin. Final report, 10:29782 (R;US)
Purification
Water use, conservation and wastewater treatment alternatives for oil refineries in New Mexico, 10:29786 (R;US)
Recycling
Water use and reuse opportunities and costs at oil-shale plants, 10:29851 (R;US)
Resource Conservation
Water use, conservation and wastewater treatment alternatives for oil refineries in New Mexico, 10:29786 (R;US)
Waste Disposal
Gas and oil production wastewater disposal alternatives for the San Juan Basin. Final report, 10:29782 (R;US)
Waste Processing
Residuals management in physical-chemical treatment of tar sand processing wastewater, 10:29849 (RA;US)
Treatment of tar sand wastewaters by means of air flotation and foam separation, 10:29848 (RA;US)
Water Pollution Abatement
Theory, design, and operation of nutrient-removal activated-sludge processes, 10:31375 (R;ZA)
Water Quality
Gas and oil production wastewater disposal alternatives for the San Juan Basin. Final report, 10:29782 (R;US)
Uranium mill tailings neutralization: contaminant complexation and tailings leaching studies, 10:29951 (R;US)
Water Treatment
Fossil Energy Program. Quarterly progress report for the period ending March 31, 1985, 10:29616 (R;US)
Gas and oil production wastewater disposal alternatives for the San Juan Basin. Final report, 10:29782 (R;US)
Method of wet oxidation treatment of waste water, 10:32191 (TG;GB)
Technology assessment of sequencing batch reactors, 10:31376 (R;US)
Water Treatment Plants
Pilot-test application for ozone/ultraviolet-light reactor for industrial process water. Final report, 23 April 1982-23 April 1983, 10:31822 (R;US)

WASTEFORMS
See WASTE FORMS

See WATER
WATER POLLUTION ABATEMENT
Use this term for items that involve the prevention of formation of pollutants at the source.
Cost
Cost digest: cost summaries of selected environmental control technologies. Report for January 1981-June 1982, 10:32190 (R;US)
Pollution Regulations
Development document for effluent limitations guidelines, new source performance standards, and pretreatment standards for the inorganic chemicals manufacturing point-source category. Phase 2. Final report, 10:32201 (R;US)
Standards
Development document for effluent limitations guidelines, new source performance standards, and pretreatment standards for the inorganic chemicals manufacturing point-source category. Phase 2. Final report, 10:32201 (R;US)
WATER POLLUTION CONTROL
Use this term for items that involve the removal or management of pollutants after they are formed by a source.
Cost
Cost digest: cost summaries of selected environmental control technologies. Report for January 1981-June 1982, 10:32190 (R;US)
WATER POLLUTION MONITORS
Technology Assessment
Survey of instrumentation used for monitoring metals in water, 10:32189 (R;US)
WATER PUMPS
See also SOLAR WATER PUMPS
Design
Geothermal pumping systems, 10:30595 (RA;US)
Performance Testing
Geothermal pumping systems, 10:30595 (RA;US)
WATER QUALITY
Monitoring
Hanford ground-water data base management guide and user's manual, 10:29963 (R;US)
WATER RESERVOIRS
Aeration
Current status of turbine aeration activities at Alabama Power Company, 10:30262 (RA;US)
Experience with reservoir release aeration and flow improvement, 10:30261 (RA;US)
Environmental Effects
Environmental impact of reservoir on the Merse River, Italy, 10:30254 (RA;US)
Eutrophication
Environmental impact of reservoir on the Merse River, Italy, 10:30254 (RA;US)
Prediction of water quality in proposed hydropower impoundments, 10:30257 (RA;US)
Oxygen
Current status of turbine aeration activities at Alabama Power Company, 10:30262 (RA;US)

Experience with reservoir release aeration and flow improvement, 10:30261 (RA;US)

Water Quality

Conflict in reservoir management: water quality vs fisheries, 10:30252 (RA;US)

Prediction of water quality in proposed hydropower impoundments, 10:30257 (RA;US)

Regulation of project releases for water quality management, 10:30263 (RA;US)

Water quality management of hydropower discharge, 10:30260 (RA;US)

WATER RESOURCES

Research Programs

Energy and water development appropriations for 1986. Part 8. Hearings before a Subcommittee of the Committee on Appropriations, House of Representatives, Ninety-Ninth Congress, First Session, 10:31120 (B;US)

Resource Development

Addressing environmental concerns in water resource projects, 10:30249 (RA;US)

Energy and water development appropriations for 1986. Part 8. Hearings before a Subcommittee of the Committee on Appropriations, House of Representatives, Ninety-Ninth Congress, First Session, 10:31120 (B;US)

National hydropower study, 10:30101 (RA;US)

Opening remarks, 10:30099 (RA;US)

Water in the 21st century, 10:30103 (RA;US)

Water power developments in Norway, environmental considerations, 10:30255 (RA;US)

WATER SOURCE HEAT PUMPS

Pipes

Heat abstraction with bottom-anchored cooling coils in stationary water. Laboratory trials, 10:31253 (R;SE;In Swedish)

WATER SUPPLY

Used in the sense of a public utility or of an engineered system (e.g., irrigation system) as contrasted to a natural system, for which use WATER RESOURCES.

Power Generation

Generating hydropower from municipal drinking water supply systems, 10:30137 (RA;US)

WATER TREATMENT

Cost

Cost digest: cost summaries of selected environmental control technologies. Report for January 1981-June 1982, 10:32190 (R;US)

WATER TREATMENT PLANTS

Industrial Wastes

Barium and radium in water-treatment-plant wastes. Report for September 1983-May 1984, 10:31363 (R;US)

Municipal Wastes

Technology assessment of sequencing batch reactors, 10:31376 (R;US)

Pilot Plants

Pilot-test application for ozone/ultraviolet-light reactor for industrial process water. Final report, 23 April 1982-23 April 1983, 10:31822 (R;US)

WATERBORNE PARTICLES

See PARTICULATES

WATERFLOODING

Additives

Multi-pattern low-tension demonstration flood, Big Muddy field. Technical progress report, January-March 1985, 10:29753 (R;US)

Field Tests

Multi-pattern low-tension demonstration flood, Big Muddy field. Technical progress report, January-March 1985, 10:29753 (R;US)

WATT-HOUR METERS

See POWER METERS

WAVE ENERGY CONVERTERS

Power Factor

Cage rotor induction machine with controllable power factor, 10:30609 (R;SE)

Research Programs

Ocean energy technology program summary, 10:30356 (R;US)

Specifications

Cage rotor induction machine with controllable power factor, 10:30609 (R;SE)

WAVE EQUATIONS

See also DIRAC EQUATION
SCHROEDINGER EQUATION

Conformal Invariance

Conformally invariant equation for the symmetric tensor field, 10:32648 (R;SU)

WAVE FORMS

Recording Systems

Slit-scan flow cytometer for recording simultaneous waveforms, 10:32076 (J;US)

WAVE POWER

Electric Power

Renewable energy sources wind and solar energy in electrical energy systems. Development of methods, 10:30610 (R;SE;In Swedish)

WAVEFORMS

See WAVE FORMS

WAVEGUIDES

Coupling

Multihole couplers for overmoded waveguide systems, 10:33002 (R;DE)

Short mode selective directional couplers, 10:33003 (R;DE)

Electron Emission

Electron wind in strong wave guide fields, 10:31991 (R;US)

Mode Control

High-power millimeter-wave mode converters in overmoded circular waveguides using periodic wall perturbations, 10:33005 (R;DE)

WAVES (SHOCK)

See SHOCK WAVES

WAVES (STANDING)

See STANDING WAVES

WAZ 16

See NICKEL BASE ALLOYS

WEAK BOSON

See INTERMEDIATE BOSONS

WECS

See WIND TURBINES

WEINBERG-SALAM GAUGE MODEL

Higgs Model

Correlations and static energies in the standard Higgs-model, 10:32589 (R;DE)

WELDED JOINTS

Crack Propagation

Reliability analysis of crack propagation behavior of reactor components, 10:30839 (R;DE;In German)

Fractures

Tensile properties of irradiated nuclear grade pressure vessel welds for the third HSST irradiation series, 10:30688 (R;US)

Industrial Radiography

Dimensions of defects determined by radiographical testing, 10:31797 (R;SE;In Swedish)

Materials Testing

Tensile properties of irradiated nuclear grade pressure vessel welds for the third HSST irradiation series, 10:30688 (R;US)

Tensile Properties

Hydrogen embrittlement of austenitic stainless steel (ASS) laser welds, 10:31453 (RA;IL)

WELDING MACHINES

In-cell welding fixture. Remote welder assembly, Model II (Engineering Materials), 10:31731 (E;US)

WELDS

See WELDED JOINTS

WELL DRILLING

Coordinated Research Programs

Advanced drilling development, 10:30596 (RA;US)

WELL LOGGING

Well Logging Equipment

Computerisation of the NUCOR borehole logging unit, 10:32079 (RA;ZA)

WELL LOGGING EQUIPMENT

To be used only when the equipment itself is the topic of the paper; includes source, detector, and associated equipment.

Mathematical Models
Analytical model for a pulsed neutron gauge, 10:32078 (R;DK)
Pulsed Neutron Techniques
Analytical model for a pulsed neutron gauge, 10:32078 (R;DK)
WELL PRESSURE
Buildup
Linear boundary detection using pressure buildup tests, 10:30604 (R;US)
WENDELSTEIN-7 STELLARATOR
ECR Heating
Electron cyclotron resonance heating system for the stellarator W VII-AS, 10:33004 (R;DE)
Wave absorption and transport studies on ECR heated stellarator plasmas in W VII-A, 10:33006 (R;DE)
WEST GERMANY
See FEDERAL REPUBLIC OF GERMANY
WESTERN REGION
See FEDERAL REGION IX
WET-TYPE COOLING TOWERS
See COOLING TOWERS
WHITE DWARF STARS
Star Evolution
Progenitors of white dwarfs, 10:32436 (R;US)
WIGNER COEFFICIENTS
Calculation Methods
Denominator function for canonical SU(3) tensor operators, 10:32872 (J;US)
WILSON LOOP
Fourier Analysis
Fourier analysis and Wilson loops, 10:32633 (R;BR)
WIND
Boundary Layers
Case study of a boundary layer wind regime in stably stratified air over the Baltic Sea, 10:30642 (R;SE)
Turbulent characteristics of a shallow convective internal boundary layer, 10:30641 (R;SE)
Data Analysis
Estimating wind speed as a function of height above ground: an analysis of data obtained at the Southwest Residential Experiment Station, Las Cruces, New Mexico, 10:30338 (R;US)
Flow Models
Flow characteristics above a very low and gently sloping hill, 10:30636 (R;SE)
Forecasting
Estimation of design wind speeds from short-term records. Final report, 10:32111 (R;US)
Mathematical Models
Average diurnal behavior of surface winds during summer at sites in complex terrain, 10:32121 (J;US)
Monitoring
Measurement of wind on high masts. Quarterly report 4/1983 (Sweden), 10:30614 (R;SE;In Swedish)
Turbulence
Flow characteristics above a very low and gently sloping hill, 10:30636 (R;SE)
Gusts. Introductory statistical treatment, 10:30611 (R;SE;In Swedish)
Preliminary analysis of turbulence measurements at Naesudden during October 1980 and October 1982, 10:30640 (R;SE;In Swedish)
Some observations of turbulence structure near a wooded coast line (Sweden), 10:30637 (R;SE)
Turbulence structure at prototype sites - a summary of the analysed data till now, 10:30635 (R;SE;In Swedish)
Turbulent characteristics of a shallow convective internal boundary layer, 10:30641 (R;SE)
Variations
Wind variations on a long time scale at Naesudden, 10:30612 (R;SE;In Swedish)
Velocity
Estimation of design wind speeds from short-term records. Final report, 10:32111 (R;US)
Gusts. Introductory statistical treatment, 10:30611 (R;SE;In Swedish)
Measurement of wind on high masts. Quarterly report 4/1983 (Sweden), 10:30614 (R;SE;In Swedish)
Some observations of turbulence structure near a wooded coast line (Sweden), 10:30637 (R;SE)
Wind-climatic study of profile measurements at Naesskaer, 10:30613 (R;SE;In Swedish)
WIND ENERGY CONVERSION SYSTEMS
See WIND TURBINES
WIND GENERATORS
See ELECTRIC GENERATORS
WIND TURBINES
WIND POWER
Electric Power
Renewable energy sources wind and solar energy in electrical energy systems. Development of methods, 10:30610 (R;SE;In Swedish)
Energy Storage
Power supply system. Some factors affecting the future production pattern (Denmark), 10:30666 (RA;DK;In Danish)
Frequency Range
Turbulent characteristics of a shallow convective internal boundary layer, 10:30641 (R;SE)
Power Supplies
Power supply system. Some factors affecting the future production pattern (Denmark), 10:30666 (RA;DK;In Danish)
Power Transmission
Power supply system. Some factors affecting the future production pattern (Denmark), 10:30666 (RA;DK;In Danish)
WIND POWER PLANTS
Control
Analysis of the control problem for horizontal axis wind turbines. Final report, 10:30634 (R;SE)
Environmental Impacts
Ecological effects caused by wind power situated at sea. A summary, 10:30616 (R;SE;In Swedish)
Site Surveys
Some observations of turbulence structure near a wooded coast line (Sweden), 10:30637 (R;SE)
Turbulence structure at prototype sites - a summary of the analysed data till now, 10:30635 (R;SE;In Swedish)
WIND TUNNELS
Boundary Layers
Retrospective glance of a boundary layer wind tunnel experiment 25 years ago, 10:30617 (R;DK)
Environmental Impacts
Retrospective glance of a boundary layer wind tunnel experiment 25 years ago, 10:30617 (R;DK)
WIND TURBINES
See also VERTICAL AXIS TURBINES
Aerodynamics
Development of an analytical model and code for the flapping response of a Hawte rotor blade, 10:30633 (R;US)
Airfoils
Addendum to a catalog of low Reynolds number airfoil data for wind turbine applications, 10:30632 (R;US)
Atmospheric Precipitations
Effect of precipitation on wind turbine performance. [Final report], 10:30621 (R;US)
Control
Analysis of the control problem for horizontal axis wind turbines. Final report, 10:30634 (R;SE)
Cost
Recommended procedure for a description of cost of energy from WECS. Preliminary proposal (Wind Energy Conversion System), 10:30615 (RA;DK)
Design
[Wind turbine]. Final technical report, 10:30622 (R;US)
Addendum to a catalog of low Reynolds number airfoil data for wind turbine applications, 10:30632 (R;US)
Design of a unique wind powered heating system, 10:30623 (R;US)
Education
Solar Energy Education. Renewable energy: a background text, 10:30544 (R;US)
Electric Generators
Investigation of the characteristics of the autosynchronous generator as a wind generator, 10:30639 (R;SE;In Swedish)

Fabrication
[Wind turbine]. Final technical report, 10:30622 (R;US)
Field Tests
Goodnoe Hills Mod-2 cluster test program. Volume 2. Structural and mechanical loads tests and analyses. Final report, 10:30626 (R;US)
Performance
Goodnoe Hills Mod-2 Cluster Test Program. Volume 1. Energy production performance, availability, and reliability. Final report, 10:30625 (R;US)
Study of the performance of a wind mill in presence of a wind gradient, 10:30627 (R;FR;In French)
Performance Testing
Effect of precipitation on wind turbine performance. [Final report], 10:30621 (R;US)
Interim international recommended procedures for Wind Energy Conversion Systems performance testing, 10:30619 (RA;DK)
Meteorological and performance measurements on a 55-kW Vestas and a 30-kW Sonebjerg wind-turbine EC Wind Energy Programme, Action 5, 10:30630 (R;XE)
Recommended practices for wind turbine performance testing. Preliminary proposals for sub-section on wind speed/power measurements, 10:30620 (RA;DK)
Summary report from the IEA expert meeting on recommended practices for wind turbine performance testing, 10:30618 (R;DK)
Test report for Wind-Matic 14S, 55 kW. Standard measurements, 10:30631 (R;DK;In Danish)
Reliability
Goodnoe Hills Mod-2 Cluster Test Program. Volume 1. Energy production performance, availability, and reliability. Final report, 10:30625 (R;US)
Specifications
Development of large wind energy power generation system, 10:30628 (R;US)
Investigation of the characteristics of the autosynchronous generator as a wind generator, 10:30639 (R;SE;In Swedish)
Switching Circuits
Sequential switching of a three-phase asynchronous wind generator onto the grid, 10:30638 (R;SE;In Swedish)
Turbine Blades
Development of an analytical model and code for the flapping response of a Hawte rotor blade, 10:30633 (R;US)

WINDOWS
Computer-Aided Design
A design procedure to size windows for naturally ventilated rooms, 10:30405 (BA;US)
Cost Benefit Analysis
An analysis of the benefit-costs of alternative fenestration assemblies for internal-load-dominant buildings noting solar heat gain control and daylighting provisions, 10:30286 (BA;US)
Damage
Pulsed D_2-F_2 chain-laser damage to coated window and mirror components, 10:31763 (R;US)
Heat Gain
Dynamic response of conventional residential construction to solar radiation through windows during the heating season, 10:31226 (RA;US)
Plastics
Production of selective optical coatings on plastic sheet. Final report, 10:31281 (R;XE)
R Factors
Dynamic interpane systems for multipane solar collector windows, 10:31206 (RA;US)
Retrofitting
Assessment of the benefits and implications of retrofit options for existing windows in the UK, 10:30457 (BA;US)
Screens
Thermal performance of vinyl covered fiberglass solar screens, 10:31244 (RA;US)
Sizing
A design procedure to size windows for naturally ventilated rooms, 10:30405 (BA;US)
Solar Architecture
Assessment of the benefits and implications of retrofit options for existing windows in the UK, 10:30457 (BA;US)
Test Facilities
Mobile window thermal test facility (MoWiTT), 10:31216 (RA;US)
Thermal Efficiency
Mobile window thermal test facility (MoWiTT), 10:31216 (RA;US)

WIND-POWERED PUMPS
Wind-mechanical pumps only; for wind-electric pumps use WIND TURBINES and PUMPS.
Construction
Sailmill water pump. Quarterly and final report, 10:30624 (R;US)
Design
Sailmill water pump. Quarterly and final report, 10:30624 (R;US)
Performance Testing
Sailmill water pump. Quarterly and final report, 10:30624 (R;US)

WNP-3 REACTOR
Environmental Impact Statements
Final Environmental Statement related to the operation of WPPSS Nuclear Project No. 3 (Docket No. 50-508), 10:30831 (R;US)
Lawsuits
Environmental assessment: the proposed settlement of Washington Nuclear Project No. 3 lawsuits, 10:31134 (R;US)

WOLFRAM
See TUNGSTEN

WOOD
Damage
Effects of daylight on interior woods and wood finishes, 10:30413 (BA;US)
Drying
Drying of wood chips for fuel. Full scale tests and dryer designs, 10:30086 (R;SE;In Swedish)
Flash Hydropyrolysis Process
Flash hydropyrolysis and methanolysis of biomass with hydrogen and methane, 10:30063 (R;US)
Gasification
Simulations of the kinetics of large wood particle pyrolysis and of material balance of pure oxygen gasification, 10:30072 (R;FR;In French)
Pyrolysis
Simulations of the kinetics of large wood particle pyrolysis and of material balance of pure oxygen gasification, 10:30072 (R;FR;In French)
Radiation Effects
Effects of daylight on interior woods and wood finishes, 10:30413 (BA;US)

WOOD ALCOHOL
See METHANOL

WOOD FUELS
Use of this term is limited to policy, feasibility, and socio-economic studies. For wood properties use WOOD.
Combustion
Firing fast fuels on a small scale in densely built areas. Basic document, 10:30085 (R;SE;In Swedish)
Fuel Substitution
Georgia wood energy research and development project, 10:30087 (BA;US)
Research Programs
Georgia wood energy research and development project, 10:30087 (BA;US)

WOOD WASTES
Heat Extraction
Wood residue value at the heating plant - a comparison with oil, 10:30084 (R;SE;SW)
Loading
Tests of loading techniques for biomass, in particular tree stumps, 10:31749 (R;SE;In Swedish)

WOODS-SAXON POTENTIAL
Semiclassical Approximation
Classical properties and semiclassical quantization of a spherical nuclear potential, 10:32788 (R;FR)
Classical properties and semiclassical calculations in a spherical nuclear average potential, 10:32787 (R;FR)
WORKERS
See PERSONNEL
WORKING FLUIDS
See also REFRIGERANTS
Thermodynamic Properties
Determination of the thermodynamic properties of heavy organic fluids and research of compounds adapted to low temperature Ranking cycles, 10:31559 (R;FR;In French)
WORLD
See EARTH PLANET
WWER TYPE REACTORS
See also LOVIISA-1 REACTOR
WWER-3 REACTOR
Fuel Pins
Calculation study of the WWER-440 fuel performance for extended burnup, 10:30704 (RA;XA)
Loss of Coolant
Pre-test analysis of PMK experiments (RELAP4/MOD3 and MOD6 computer codes), 10:30939 (RA;XA)
Primary Coolant Circuits
Modelling aspects and the research programme of the PMK-NVH test facility, 10:30693 (RA;XA)
Reactor Experimental Facilities
Modelling aspects and the research programme of the PMK-NVH test facility, 10:30693 (RA;XA)
WWER-3 REACTOR
Liquid Flow
Experimental research of initially subcooled liquid flow from pressure vessels, 10:30695 (RA;XA)
Pressure Vessels
Experimental research of initially subcooled liquid flow from pressure vessels, 10:30695 (RA;XA)
Research Programs
Experimental research of initially subcooled liquid flow from pressure vessels, 10:30695 (RA;XA)
WWER-440 REACTOR
See WWER-3 REACTOR
WYOMING
Geothermal Resources
Geothermal resources of the Washakie and Great Divide basins, Wyoming, 10:30578 (R;US)

X

X RADIATION
See also SOFT X RADIATION
Dosimetry
Accuracy of coupled Monte-Carlo/next-event-estimator for bremsstrahlung dose predictions, 10:32829 (R;US)
Production
Accuracy of coupled Monte-Carlo/next-event-estimator for bremsstrahlung dose predictions, 10:32829 (R;US)
XENOBIOTICS
Detoxification
Characterization of the detoxifying function of the liver as evidenced by [^{13}C, ^{15}N]methacetin, 10:32292 (RA;DD;In German)
XENON
Ion-Atom Collisions
Report of the Van de Graaff Group: atomic physics. Inner-shell excitation mechanisms in ion-atom collisions, 10:32500 (RA;ZA)
Photoelectron Spectroscopy
Photoelectron spectrum of ArXe obtained using resonantly enhanced multiphoton ionization, 10:32521 (J;US)
XENON 131 TARGET
Pion Reactions
Stopping and energy deposition of hadrons in target nuclei, 10:32730 (R;SU)
XENON 132 TARGET
Proton Reactions
Short-range and long-range correlations in the p-Xe scattering at 200 GeV, 10:32721 (RA;DE)
X-RASERS
See X-RAY LASERS
X-RAY EQUIPMENT
Image Processing
Perceptibility of variations in total x-ray beam filtration as evidenced on radiographs. An exploratory study, 10:32270 (R;NZ)
PIXE Analysis
Report of the Van de Graaff Group: nuclear analysis. Standardisation of PIXE equipment, 10:32059 (RA;ZA)
Standardization
Report of the Van de Graaff Group: nuclear analysis. Standardisation of PIXE equipment, 10:32059 (RA;ZA)
Thermoluminescent Dosimetry
Investigation of alternative means to accomplish the goals of biennial calibration of ionization chambers, 10:32273 (R;US)
X-RAY FLUORESCENCE ANALYSIS
Computerized Simulation
Model for identification and quantitative analysis of materials by x-ray fluorescence, 10:31596 (RA;IL)
Optimization
Model for identification and quantitative analysis of materials by x-ray fluorescence, 10:31596 (RA;IL)
PIXE Analysis
Report of the Van de Graaff Group: nuclear analysis. Construction of XSQR irradiation chamber, 10:32060 (RA;ZA)
Radiation Protection
Guide for the preparation of applications for licenses for the use of sealed sources in gas chromatography devices and x-ray fluorescence analyzers. Draft, 10:32333 (R;US)
X-Ray Equipment
Report of the Van de Graaff Group: nuclear analysis. Construction of XSQR irradiation chamber, 10:32060 (RA;ZA)
X-RAY FLUORESCENCE ANALYZERS
On-Line Measurement Systems
ELBEST x-ray fluorescence measuring system for on-stream analysis in flotation plants, 10:32061 (R;AT;In German)
X-RAY LASERS
Novette diagnostic support. Final report, 10:33043 (R;US)
Photoionization-pumped, Ne II, x-ray laser studies project. Final report, 10:31767 (R;US)
Multi-Photon Processes
Generation of stimulated emission in the soft x-ray range by nonlinear processes with excimer lasers. Progress report, October 1, 1984-May 15, 1985, 10:32484 (R;US)
Optical Pumping
Generation of stimulated emission in the soft x-ray range by nonlinear processes with excimer lasers. Progress report, October 1, 1984-May 15, 1985, 10:32484 (R;US)
X-RAY SPECTRA
Data Analysis
Monte-Carlo error analysis in x-ray spectral deconvolution, 10:32881 (J;US)
Errors
Monte-Carlo error analysis in x-ray spectral deconvolution, 10:32881 (J;US)
X-RAY SPECTROMETERS
Computerized Simulation
Simulation of bent crystal spectrometers, 10:32933 (J;US)
Fabrication
Tokamak Fusion Test Reactor horizontal high-resolution Bragg x-ray spectrometer (abstract), 10:32938 (J;US)
Performance
Tokamak Fusion Test Reactor horizontal high-resolution Bragg x-ray spectrometer (abstract), 10:32938 (J;US)

Signal-to-Noise Ratio
Ultrafast turnoff laser triggered gating system for microchannel-plate intensified x-ray spectrometers, 10:32934 (J;US)
Switches
Ultrafast turnoff laser triggered gating system for microchannel-plate intensified x-ray spectrometers, 10:32934 (J;US)
Timing Circuits
Ultrafast turnoff laser triggered gating system for microchannel-plate intensified x-ray spectrometers, 10:32934 (J;US)
XYLENES
Chemical Reaction Yield
Performance of rare earth modified faujasites in the process of toluene disproportionation, 10:31672 (R;DZ;In French)

Y

YANG-MILLS THEORY
Many-Body Problem
(Confinement) structure of Yang-Mills-theories within a Bose-BCS-theory, 10:32640 (RA;DE)
Variational Methods
Simplified scheme for Yang-Mills variational calculations, 10:32641 (RA;DE)
YEASTS
See also SACCHAROMYCES
Labelling
Importance of ^{15}N-labelled yeast protein as tracer, 10:32243 (RA;DD;In German)
YELLOW CAKE
See URANIUM OXIDES U3O8
YTTERBIUM
Autoionization
Exit channels of autoionization resonances in atoms, 10:32480 (R;US)
Lung Clearance
Lung clearance, translocation, and acute toxicity of arsenic, beryllium, cadmium, cobalt, lead, selenium, vanadium, and ytterbium oxides following deposition in rat lung, 10:32356 (J;US)
Oxidation
Optimization of the NiCrAl-Y/ZrO-Y2O3 thermal barrier system, 10:31535 (R;US)
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
Toxicity
Lung clearance, translocation, and acute toxicity of arsenic, beryllium, cadmium, cobalt, lead, selenium, vanadium, and ytterbium oxides following deposition in rat lung, 10:32356 (J;US)
YTTERBIUM SULFIDES
Catalytic Effects
Mechanistic study of the hydrodesulfurization of methanethiol over tungsten disulfide; a survey of rare earth sulfides for hydrodesulfurization activity, 10:31673 (R;US)
YTTRIUM
Mass Spectroscopy
Systematics of multielement determination with resonance ionization mass spectrometry and thermal atomization, 10:31642 (J;US)
Quantitative Chemical Analysis
Analyses of the NIMROC reference samples for minor and trace elements, 10:31633 (R;ZA)
YTTRIUM 89
Energy Levels
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Neutron cross sections of ^{89}Y analysed in terms of the level structure and reaction mechanisms, 10:32711 (RA;ZA)
Neutron Reactions
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Neutron cross sections of ^{89}Y analysed in terms of the level structure and reaction mechanisms, 10:32711 (RA;ZA)
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Studies involving (n,p) and (n,d) reactions, 10:32712 (RA;ZA)
YTTRIUM 89 TARGET
Neutron Reactions
Measurements and calculations of neutron scattering angular distributions over a wide mass and energy range, 10:32733 (R;US)
YTTRIUM ALUMINIUM GARNETS
See ALUMINIUM OXIDES
YTTRIUM OXIDES
Fluorescence
Proposed method for remote thermometry in turbine engines (Eu-doped yttrium oxide), 10:32056 (R;US)
Oxidation
Optimization of the NiCrAl-Y/ZrO-Y2O3 thermal barrier system, 10:31535 (R;US)
Structural Chemical Analysis
Electron optical and microanalytical studies of precipitation in ceramic systems. Progress report, July 1, 1983-June 30, 1984, 10:31527 (R;US)
YUCCA MOUNTAIN
Radioactive Waste Facilities
Location recommendation for surface facilities for the prospective Yucca Mountain Nuclear Waste Repository, 10:29970 (R;US)
Tuff
Reduction of the well test data for test well USW H-1, adjacent to Nevada Test Site, Nye County, Nevada, 10:29969 (R;US)

Z

ZEOLITES
Catalytic Effects
New catalysts for the indirect liquefaction of coal. First quarterly technical report, August 1-October 31, 1981, 10:30066 (R;US)
Performance of rare earth modified faujasites in the process of toluene disproportionation, 10:31672 (R;DZ;In French)
Lattice Parameters
Neutron diffraction study of natrolite, $Na_2Al_2Si_3O_{10}.2H_2O$, at 20 K, 10:31590 (J;DK)
Neutron Diffraction
Neutron diffraction study of natrolite, $Na_2Al_2Si_3O_{10}.2H_2O$, at 20 K, 10:31590 (J;DK)
Thermodynamic Properties
Determination of properties of zeolite/refrigerant combinations for solar refrigeration systems. Final report, 10:30374 (R;US)
ZINC
Deposition
Dendritic zinc deposition in flow batteries, 10:31069 (RA;US)
Zinc electrode morphology in acid electrolytes, 10:31070 (RA;US)
Emission Spectroscopy
Spectrochemical determination of impurities in aluminium alloys by DC arc technique, 10:31634 (R;IL;In Hebrew)
Membrane Transport
Metal-membrane interactions, 10:32353 (RA;US)
Oxidation
Initial oxidation of Zn(0001) surfaces: H_2 adsorption and XPS studies, 10:31505 (J;US)
Sorptive Properties
Initial oxidation of Zn(0001) surfaces: H_2 adsorption and XPS studies, 10:31505 (J;US)

ZINC OXIDES
Breakdown
Electroluminescence in ZnO varistors: Evidence for hole contributions to the breakdown mechanism, 10:31538 (J;US)
Electroluminescence
Electroluminescence in ZnO varistors: Evidence for hole contributions to the breakdown mechanism, 10:31538 (J;US)
Holes
Electroluminescence in ZnO varistors: Evidence for hole contributions to the breakdown mechanism, 10:31538 (J;US)
ZINC SULFATES
Decomposition
Radiant solid phase decomposition studies. Technical status report, 10:30302 (R;US)
Thermal Gravimetric Analysis
Radiant solid phase decomposition studies. Technical status report, 10:30302 (R;US)
ZINC SULFIDES
Rutherford Scattering
Report of the Van de Graaff Group: solid state and materials research. The characterisation of anti-reflection layers by Rutherford backscattering spectrometry, 10:31631 (RA;ZA)
ZINC-AIR BATTERIES
Electrodes
Cycle-Life testing of porous alkaline zinc electrodes, 10:31096 (RA;US)
ZINC-BROMINE BATTERIES
Design
Recent progress on Exxon's zinc-bromine battery, 10:31062 (RA;US)
Electrodes
Zinc electrode morphology in acid electrolytes, 10:31070 (RA;US)
Performance Testing
Final battery evaluation report: Energy Research Corporation zinc/bromine battery, 10:31107 (R;US)
Technology Assessment
Recent progress on Exxon's zinc-bromine battery, 10:31062 (RA;US)
ZINC-CHLORINE BATTERIES
Electrodes
Zinc electrode morphology in acid electrolytes, 10:31070 (RA;US)
Performance Testing
Energy storage and the best facility progress report, 10:31067 (RA;US)
ZION STATION UNIT-1
See ZION-1 REACTOR
ZION STATION UNIT-2
See ZION-2 REACTOR
ZION-1 REACTOR
Zion, Illinois, USA
Containment Buildings
Ultimate pressure capacity of reinforced and prestressed concrete containments, 10:30718 (R;US)
Risk Assessment
Review of selected topics from PRA studies: system dependencies, human interactions, and containment event trees, 10:30864 (R;US)
ZION-2 REACTOR
Zion, Illinois, USA
Containment Buildings
Ultimate pressure capacity of reinforced and prestressed concrete containments, 10:30718 (R;US)
Risk Assessment
Review of selected topics from PRA studies: system dependencies, human interactions, and containment event trees, 10:30864 (R;US)
ZIRCALOY
For unspecified Zircaloy alloys.
Combustion
Review of zirconium-zircaloy pyrophoricity, 10:31477 (R;US)
Corrosion
Potential corrosion and degradation mechanisms of Zircaloy cladding on spent nuclear fuel in a tuff repository, 10:31491 (R;US)
Failures
Potential corrosion and degradation mechanisms of Zircaloy cladding on spent nuclear fuel in a tuff repository, 10:31491 (R;US)
Flammability
Review of zirconium-zircaloy pyrophoricity, 10:31477 (R;US)
Ignition
Review of zirconium-zircaloy pyrophoricity, 10:31477 (R;US)
Materials Handling
Review of zirconium-zircaloy pyrophoricity, 10:31477 (R;US)
Stresses
Potential corrosion and degradation mechanisms of Zircaloy cladding on spent nuclear fuel in a tuff repository, 10:31491 (R;US)
ZIRCONATES
Specific compounds should be indexed by coordination of a descriptor of the form (CATION) COMPOUNDS and the above anion descriptor.
Structural Chemical Analysis
Electron optical and microanalytical studies of precipitation in ceramic systems. Progress report, July 1, 1983-June 30, 1984, 10:31527 (R;US)
ZIRCONIUM
Combustion
Review of zirconium-zircaloy pyrophoricity, 10:31477 (R;US)
Flammability
Review of zirconium-zircaloy pyrophoricity, 10:31477 (R;US)
Ignition
Review of zirconium-zircaloy pyrophoricity, 10:31477 (R;US)
Mass Spectroscopy
Systematics of multielement determination with resonance ionization mass spectrometry and thermal atomization, 10:31642 (J;US)
Materials Handling
Review of zirconium-zircaloy pyrophoricity, 10:31477 (R;US)
ZIRCONIUM 82
High Spin States
High spin spectrometry of light zirconium isotopes sup(82-90)Zr, 10:32715 (BA;HU)
ZIRCONIUM 83
High Spin States
High spin spectrometry of light zirconium isotopes sup(82-90)Zr, 10:32715 (BA;HU)
ZIRCONIUM 84
High Spin States
High spin spectrometry of light zirconium isotopes sup(82-90)Zr, 10:32715 (BA;HU)
ZIRCONIUM 85
High Spin States
High spin spectrometry of light zirconium isotopes sup(82-90)Zr, 10:32715 (BA;HU)
ZIRCONIUM 86
High Spin States
High spin spectrometry of light zirconium isotopes sup(82-90)Zr, 10:32715 (BA;HU)
ZIRCONIUM 87
High Spin States
High spin spectrometry of light zirconium isotopes sup(82-90)Zr, 10:32715 (BA;HU)
ZIRCONIUM 88
High Spin States
High spin spectrometry of light zirconium isotopes sup(82-90)Zr, 10:32715 (BA;HU)
ZIRCONIUM 89
High Spin States
High spin spectrometry of light zirconium isotopes sup(82-90)Zr, 10:32715 (BA;HU)
ZIRCONIUM 90
Excited States
Study of hole states in ^{90}Zr by the (e,e'p) reaction, 10:32724 (RA;NL)
High Spin States
High spin spectrometry of light zirconium isotopes sup(82-90)Zr, 10:32715 (BA;HU)

Neutron Reactions
Report of the Van de Graaff Group: nuclear reactions and nuclear structure. Studies involving (n,p) and (n,d) reactions, 10:32712 (RA;ZA)
ZIRCONIUM 90 TARGET
Carbon 12 Reactions
Determination of the total reaction cross section for heavy ions at 15 MeV/amu, 25 MeV/amu, and 35 MeV/amu, 10:32679 (R;US)
Electron Reactions
Study of hole states in ^{90}Zr by the (e,e'p) reaction, 10:32724 (RA;NL)
Proton Reactions
Analyzing power for the inelastic continuum with 200 MeV protons, 10:32714 (J;NL)
ZIRCONIUM 95
Radioecological Concentration
Annual report of the Surface Air Sampling Program, 10:32157 (R;US)
ZIRCONIUM 96
E0-Transitions
E0 transitions in light fission fragments, 10:32725 (RA;NL)
ZIRCONIUM 98
E0-Transitions
E0 transitions in light fission fragments, 10:32725 (RA;NL)
ZIRCONIUM ALLOYS
See also ZIRCONIUM BASE ALLOYS
Debye Temperature
Investigation into temperature dependence of specific heat of $Zr_{70}Be_{30}$ superconductive system in amorphous and crystalline, states in the temperature range of 100 to 500 K, 10:31458 (R;SU;In Russian)
Physical Radiation Effects
Electron beam and pulsed laser irradiation of glass-forming Cr-Ta and Cr-Zr-Ge alloys, 10:31513 (J;US)
Specific Heat
Investigation into temperature dependence of specific heat of $Zr_{70}Be_{30}$ superconductive system in amorphous and crystalline, states in the temperature range of 100 to 500 K, 10:31458 (R;SU;In Russian)
ZIRCONIUM BASE ALLOYS
See also ZIRCALOY
Fabrication
Manufacturing process to reduce large grain growth in zirconium alloys, 10:30822 (P;US)
Metallurgy
Manufacturing process to reduce large grain growth in zirconium alloys, 10:30822 (P;US)
ZIRCONIUM ISOTOPES
See also ZIRCONIUM 82
ZIRCONIUM 83
ZIRCONIUM 84
ZIRCONIUM 85
ZIRCONIUM 86
ZIRCONIUM 87
ZIRCONIUM 88
ZIRCONIUM 89
ZIRCONIUM 90
ZIRCONIUM 95
ZIRCONIUM 96
ZIRCONIUM 98
High Spin States
High spin spectrometry of light zirconium isotopes sup(82-90)Zr, 10:32715 (BA;HU)
ZIRCONIUM OXIDES
See also ZIRCONOLITE
Fracture Properties
Room and elevated temperature sliding contact-stress behavior of transformation-toughened zirconium oxide ceramics, 10:31397 (RA;US)
Mechanical Properties
Time-temperature dependence of the strength of commercial zirconia ceramics, 10:31389 (RA;US)
Transformation toughening in the Al_2O_3-Cr_2O_3/ZrO_2-HfO_2 system, 10:31391 (RA;US)
Transformation toughening of ceramics for engines, 10:31392 (RA;US)
Microstructure
Time-temperature dependence of the strength of commercial zirconia ceramics, 10:31389 (RA;US)
Oxidation
Optimization of the NiCrAl-Y/ZrO-Y2O3 thermal barrier system, 10:31535 (R;US)
Phase Studies
Time-temperature dependence of the strength of commercial zirconia ceramics, 10:31389 (RA;US)
Physical Properties
Glass electrolytes for sodium/sulfur cells, 10:31077 (RA;US)
Long-term stability and properties of commercial zirconia ceramics, 10:31390 (RA;US)
Research Programs
Glass electrolytes for sodium/sulfur cells, 10:31077 (RA;US)
Stresses
Room and elevated temperature sliding contact-stress behavior of transformation-toughened zirconium oxide ceramics, 10:31397 (RA;US)
Structural Chemical Analysis
Electron optical and microanalytical studies of precipitation in ceramic systems. Progress report, July 1, 1983-June 30, 1984, 10:31527 (R;US)
ZIRCONOLITE
Physical Radiation Effects
Self-irradiation effects in ^{238}Pu-substituted zirconolite. Pt. 1. Temperature dependence of damage, 10:31540 (J;NL)

CONTRACT NUMBER INDEX

Numbers assigned to DOE contracts under which documents announced in this publication were prepared are included in this index.

Contract No.	*Abstract No.*	*Report No.*
AA03-76SF00034	**Central Institute for Industrial Research, Oslo, Norway**	
	10:29685	Chemosphere 13 NO. 4. 527-534 (1984).
AC01-77CS34039	**New York State Dept. of Education, Albany (USA). Solar Energy Project**	
	10:30270	DOE/CS/34039—T1
	10:30271	DOE/CS/34039—T2

REPORT NUMBER INDEX

The numbers assigned to reports cited in this publication appear in the first column of the index. Cross reference information and/or availability are included as appropriate. Abbreviations used in the availability column are elaborated at the end of the index. To expedite the filling of orders for reports from NTIS and OSTI, a file number in the form, DE82000001 or TI82000001, appears in column 3. File numbers with DE prefixes may be used in ordering from both NTIS and OSTI. Numbers with TI prefixes are valid at OSTI only. Requesters are urged to use this file number where provided. In column 4, one or more DOE distribution categories are indicated, e.g., STD-10, MN-25. STD indicates distribution was made in full-size copy; MN indicates microcopy distribution; ND indicates no distribution was made. These category numbers are included to assist DOE librarians in responding to requests for reports in their collections. The UC (Unclassified Distribution Categories) are defined in DOE/TIC-4500, available from OSTI. The citation numbers are given in column 5. NOTE: DOE attempts to disseminate its information as broadly as possible. Even though a report may contain some degree of illegibility, it is believed that the report may still make a contribution. The presence of a 1, 2, or 3 following NTIS in the availability column denotes the extent to which a report may be illegible and the form in which it is available: 1 = 5 to 8% illegibility, available PC and MF; 2 = 9 to 12% illegibility, available MF only; 3 = 13% or more illegibility, available PC only. For the users of DOE/RECON, report ordering may be accomplished more expeditiously via the on-line system. Employees of DOE or DOE contractors are urged to order from the Office of Scientific and Technical Information (OSTI); all others should order from the National Technical Information Service (NTIS). Procedures for on-line ordering are detailed in the DOE/RECON User's Manual (DOE/TIC-4586).

FILE NUMBER CORRELATION

This correlation list is provided for those organizations where document storage is alphanumeric by report number and request may be received by file number. For other information about a document (abstract number, distribution category, availability, and price), please refer to the Report Number Index.

AVAILABILITY OF REFERENCES ABSTRACTED

REPORTS

A document cited in this publication is considered a "report" when it carries a unique identifying number (e.g., ANL-3130, BNL-4000, DP-150, etc.) as the first element of the citation. Usually, one or more of the following abbreviations will appear at or near the end of the citation, indicating the organization from which the document is available. If none of these abbreviations appears, the report should be requested from either the cited publisher or corporate source.

GPO	Available from the Superintendent of Documents, U. S. Government Printing Office, Washington, DC 20402.
GPO Dep.	Available for inspection or interlibrary loan at GPO depository libraries. Unlimited DOE reports are being sent to the GPO depository libraries. See inside back cover for list of the libraries. These reports are identified by report number, Supt. of Docs. Class Number (E 1.99:) and OSTI accession/file number, e.g., DE84003384.
NTIS	For sale by the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161. Paper copy (PC) price codes given are for domestic users; prices for foreign purchasers are in most instances twice the domestic price. There is only one microfiche (MF) price code, MF A01 ($4.50).
OSTI	Available from the Office of Scientific and Technical Information (OSTI), U. S. Department of Energy, P. O. Box 62, Oak Ridge, TN 37831, Attn: Technical Information Division.

NOTE: DOE offices and contractors should order reports from OSTI; all others should order from NTIS. For additional information, see the introductory paragraph to the Report Number Index.

NTIS NORTH AMERICAN PRICE CODES

Most NTIS products and services are now announced by price codes and, therefore, without specific prices in NTIS journals, newsletters and indexes.

The current dollar equivalent for each code is shown in the schedule below. Orders must list the accession number(s) and be accompanied by the total dollar amount from the current schedule.

NORTH AMERICAN CONTINENT PRICE SCHEDULE

Customers in Canada, United States, and Mexico please use this price schedule; other addressees, write for Folder PR-360-4.

MICROFICHE		E01	$6.50	T01	$125.00
A01	$4.50	E02	7.50	T02	140.00
PAPER COPY		E03	9.50	T03	240.00
A02	7.00	E04	11.50	T04	320.00
A03	8.50	E05	13.50	T05	400.00
A04	10.00	E06	15.50	T06	465.00

NON-REPORT DOCUMENTS

BOOKS

Most books cited are available from commercial publishers. Order from the publisher or other source as given, not from OSTI.

CONFERENCE PAPERS

Individual conference papers (or preprints) not available as reports should be requested from the originator or other source as cited.

CONFERENCE PROCEEDINGS

Many proceedings are available from commercial publishers; in other cases, request from the society, organization, institution, etc., cited as the source.

DISSERTATIONS (THESES)

Available from University Microfilms International, Dissertation Copies, P. O. Box 1764, Ann Arbor, MI 48106. Request by order number cited, e.g., DA83-22350.

JOURNAL ARTICLES

Users must use their own resources to obtain (or scan) articles cited—local, state, or university libraries or publishers, reprint services, etc.

MONOGRAPHS

Request from the organization, institution, society, etc., responsible for the monograph.

PATENTS

Although not cataloged as reports, patents cited from each country are listed in the Report Number Index under PATENTS-AU, PATENTS-FR, PATENTS-US, etc. U. S. Patent Applications (e.g., A 293,415) are available from NTIS.

CODES USED ON INDEX LINES

Following the citation numbers in the Corporate Author, Personal Author, and Subject Indexes, codes are used to designate the type of document, country of publication, and language of the document, e.g., (R;SU;In Russian). The language designator does not appear if the document is published in English.

FEDERAL DEPOSITORY LIBRARY PROGRAM

As a result of an agreement between the U. S. Government Printing Office (GPO) and the Department of Energy, beginning in 1984 DOE reports with unlimited distribution are now included in the Federal Depository Library Program. The Regional Depository Libraries listed below receive and retain at least one copy of nearly every Federal Government publication, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are *not* sales outlets. You may wish to ask your local library to contact a Regional Depository to help you locate specific publications, or you may contact the Regional Depository yourself. Do not send checks or orders to these libraries.

DOE/RECON SYSTEM

COMPUTER SEARCH SERVICE

DOE/RECON is an interactive on-line information retrieval system developed to provide rapid and easy access to energy-related data bases. It is available to DOE and contractor offices and to other federal government and state agencies with energy-related missions. The acronym RECON stands for REmote CONsole, which signifies that the system can be accessed by users located at various sites across the United States.

The system permits users to carry on a dialogue with the computer. This dialogue allows browsing through large data bases and can result in retrieval of citations which answer specific needs. Desired information can be selectively retrieved via simple yet powerful commands sent to the computer from the terminal keyboard.

Search logic may be formulated by the use of indexed terms, such as keywords, authors, categories, or corporate authors. As the search session progresses, AND, OR and NOT Boolean logic may be used to improve precision, i.e., the specificity of the retrieved set. For most data bases, the user may limit the scope of the search to particular years or volumes of data. Upon completion of a search, the user may choose to have the results displayed or printed at his/her terminal or to have the results printed and mailed the following day.

The DOE/RECON system is supported by dual IBM 370/3033 computers. Two IBM 3705 front-end communications computers are used to perform the message switching. Although most of the ~40 data bases are bibliographic in content, DOE/RECON is not limited to this type; the Research in Progress (RIP) data base is one that is nonbibliographic. Presently, over 2 million references are available.

Requests for information concerning authorization to access the DOE/RECON system should be addressed to
